	$223,133.34

W. D. ROSS, General Manager.

BUILDINGS IN EDMONTON.

For a city of the size of Edmonton, Alberta, the volume of building operations for the past year was something remarkable, the aggregate total of the permits from March 1st until December 31st reaching the value of $700,444. This for a place with a population variously estimated at from 7,000 to 11,000 is a record to be proud of. During the eight months' season there were no fewer than 500 buildings erected and there is said to be not a dwelling to rent, besides this there have been several hotel and boarding house enlargements. Perhaps the most expensive business block erected in recent months was the new Merchants Bank building, at a cost of $40,000; and next to that, is the building put up by McDougall & Secord for the Canadian Northern offices. This firm also completed the Empire block at a cost of $80,000. Revillon Brothers' great fur emporium is another large business block still under construction, the first storey having already cost well over $11,000. The new station building for the Canadian Northern cost $30,000, and the roundhouse another $25,000. The Alberta Milling Company also built a new mill and elevator, the cost of which totalled about $16,000. Another elevator was built by the Alberta Grain Company. Edmonton is not behind in churches, the most important work in this direction undertaken during last year being the reconstruction of All Saints'. Educationally, too, one only needs to mention Alberta College, a large addition to which was made a few months ago. For these and other particulars we are indebted to that live paper, the Edmonton "Bulletin."

* * *

—We have been very generously supplied with calendars for 1906. Among those who have most lately favored us in this respect are the Confederation Life, the Mutual Life of Canada, the Crown Life, the Manitoba Assurance Co., the Traders, the Anglo-American, and the Intercolonial Railway Company, Berger & Worth, lithographers, New York; Ludger Gravel, manufacturers' agent, Montreal.

Mercantile Summary.

A number of Sault Ste. Marie, Ont., men are asking the Ontario Government for a grant in aid of the establishment of a technical school. The sum of $30,000 has been voted already by the town for this purpose.

A commission agent of St. John, N.B., W. A. Cathers, is reported as arranging a composition at the rate of 25 cents on the dollar, and F. H. Tippett & Co., also commission men of the same city, are reported to have stopped payment.

Osias Feiczewitz, a Quebec dry goods dealer, also manufacturing waists under the style of the Quebec Waist Co., was burned out a few days before Christmas, and is now reported to have compromised obligations of $8,000 to $9,000 at 50 cents on the dollar.

St. Paul's Indian Industrial School at Middlechurch, Man., was totally destroyed by fire a few days ago at a loss of $30,000. Much of the furniture and equipment was saved. Another industrial school to feel the ravages of fire was that at Mimico, the large assembly hall of which was on Monday evening last completely gutted at a loss of $12,000 to $15,000. There were no casualties in either case.

Final surveys are now being made by the C.P.R. for an extensive loop at Field, B.C., in order to reduce the heavy grade at that point. The new loop will be twenty miles in length, and its estimated cost is $60,000 a mile, or $1,200,000 in all. The work will be practically all through solid rock, in a highly picturesque section of the Rockies. The new loop is expected to reduce the grade to one per cent.

The druggists' section of the Toronto branch of the Retail Merchants' Association of Canada held their annual meeting last week and elected officers as follows: Chairman, G. M. Petrie; first vice-chairman, C. H. Cowan; second vice-chairman, Fred W. McLean; secretary, W. G. Becker; treasurer, W. A. Ellis; chairmen of committees—Contract Plan, John Hargreaves; Pharmacy, F. W. Flett; Trade Improvement, W. J. A. Carnahan; Membership, J. W. Struthers; auditor, D. E. Munro.

Recent failures in Nova Scotia are reported as follows: G. McKinnon, in general trade in a small way at Mabou Mines, has assigned with an indebtedness of $2,060 and nominal assets of $2,533, a considerable proportion of which is in the shape of book debts of dubious value. He is reported to have been unsuccessful some years ago as a merchant at Whycocomah.—G. McGillivray, in the drug line at Sydney, is reported to be in embarrassed shape, and proposing a composition at the rate of 50 cents on the dollar. He is said to owe about $3,000.—Charles O'Leary, keeping a small general store at White Rock, has assigned, showing nominal assets of $1,700, as against liabilities of $2,100. He began business only in 1903.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

The Great Northern Railway is pushing preparations for the construction of its line in the Similkameen region of British Columbia, five surveying parties being in the field.

It is expected that the Canadian Pacific Railway will have its line to Spokane finished by next September. Forty miles on the United States side have been graded already. Connection will be made with the Crow's Nest line at Eastport.

An express train from Montreal to New York over the Rutland, Boston and Maine and New York Central Railroads was partially derailed near Bennington, Vt., a few days ago by the work of train-wreckers, who are believed to have been tramps.

The Dymond Development Company, Limited, has been organized with a capital of $250,000 to acquire from C. W. F. Gorrell certain mining rights in the township of Dymond, Nipissing District, Ont., and to carry on a mining, milling and reduction business. Ottawa will be the company's headquarters.

The Dominion Brazing Co., Ltd., Montreal, has been authorized by an Ottawa charter to carry on the business, with a share capital of $100,000, of brazing, welding, smelting and refining iron and other metals, and to acquire patents for their works. Charles Ralph, of Longueuil, and Alex. Hendery, of Montreal, are members of the company.

From Vancouver comes word that the Nanaimo Lumber Company has sold the leases for some 6,000 acres of timber land lying on Vancouver Bay and Powell Lake to the Merrill-Ring-Bliss Company of Michigan for $37,500. The Nanaimo Company purchased these limits from the Haslam Co. a few months ago and retains about one-half of its original purchase. The former is about to increase largely the capacity of its mills by the addition of new machinery, etc.

The Canadian Pacific Railway has filed plans for a new line to run from Woodstock to Niagara Falls by way of Brantford, Hamilton and Grimsby. The South Ontario Pacific charter of 1887 under which the company is acting accords the right to construct a line between Woodstock and Niagara Falls, and to cross the Niagara river, connecting with any railway in the United States. The construction of such a line would doubtless do much to give the C.P.R. an important share in the fruit business of the Niagara peninsula.

Mercantile Summary.

Mr. W. Howard, of Montreal, representing American capital, proposes to establish a factory for making radiators in Peterborough. There will soon be radiator factories enough, surely.

The Dufferin block at St. John, N.B., occupied by F. S. Thomas, hats and furs; A. C. Witham, confectioner, and E. Marcus, furniture, was on Tuesday gutted by fire at an estimated loss of $11,000, partially covered by insurance.

The Britannia Smelting Company has now completed the alterations and additions to its smelter at Crofton, B.C., and are commencing to smelt ore from the company's Howe Sound mines, as well as small quantities of custom ore.

The Tebbutt Shoe and Leather Company, Limited, Three Rivers, Que., has been granted a charter authorizing a capital stock of $250,000. It will make and deal in leather and all its products, also boots and shoes and rubbers, blackings, varnishes, etc.

The gross earnings of the Montreal Street Railway Company for the month of December amounted to $234,710, compared with $208,428 in December, 1904, or an increase of $26,282. For the last three months of the year the earnings were $709,916, against $629,207, or an increase of $80,709.

The management of the Richelieu and Ontario Navigation Company, who contemplate adding to their line a sister ship to the SS. "Montreal" and a freight and passenger boat for the Montreal-Toronto-Hamilton route, will probably have the hulls, engines and boilers built in England and the upper works added at Sorel, Que.

From the fact that the United States Steel Corporation has renewed its options on the properties under consideration near Sandwich, Ont., and that it has been engaged in taking careful soundings along the shore with a view to the location of docks, it is concluded that the report that it was about to build a $10,000,000 plant at that place is true.

The Siche Gas Company, Limited, is the name of a Toronto company which has been formed to acquire the goodwill and assets of the business carried on under the name of the Siche Gas Company. The provisional directors of the company are Messrs. F. L. H. Sims, J. H. Chewett and Robt. Gregg Hunter. The business of this artificial light company has shown very considerable increase during the last year or two.

A KEEN OBSERVER ON THE LABOR SITUATION.

Mr. J. J. Hill, in a recent interview in which he touched on several pertinent questions, spoke as follows on the labor situation in the United States:

"In some respects this country, industrially, is going the way of England, where the labor unions have dominated business with the result that there is no town in England of over 15,000 inhabitants where you cannot buy almost any important article to better advantage by selecting one of foreign make. German cutlery is sold in Manchester today to advantage. The glass works in England closed down and factories were started in Belgium, with the result that the English glass makers are out of employment. What has labor in this country to look forward to? Our immigration is 1,000,000 a year or more, and the natural increase in population is two and one-half times as much. There is homestead land left to be sure—the kind a man can starve on—and besides that there is the irrigated land being opened up, enough to supply the new population for a few years, perhaps. And then what? If labor finds itself beaten in this country—and many think it is beaten now—it will have itself to blame. It will have killed the goose that laid its golden egg."

* * *

FOOD FOR THE FEEDER.

An Irishwoman, meeting a neighbor in Fleet Street, was glad to see her friend wearing a happier face than usual.

"What do you think, Mrs. Grady? My husband has got a job."

"I am just delighted to hear you say so, and what is he doing?"

"Faith, he tells me he is feeding the press in a printing office."

"Feeding the press? Go on, now; why, Murphy's not been able to feed himself for the last two months. Feeding the press, indeed. I'd teach him to bring the food home to his poor wife!"—Scottish Typographical Circular.

* * *

FAILURES IN CANADA IN 1905.

With the exception of the years 1898 and 1903, the business losses in the Dominion last year were smaller than they have been for a decade. They numbered 1,347, which was about a hundred more than in 1904, but at the same time their amount in money was less, both assets and liabilities being considerably smaller, being $6,822,095

AGENCIES WANTED

Total, 1905..	1,347	$6,822,005	$9,854,659
" 1904..	1,246	8,555,875	11,394,117

Among these, the manufacturing returns show a striking improvement, 289 failures for $3,129,262 comparing with 307 defaults and $4,136,908 liabilities in 1904. The increase in number occurred in the trading class, where 1,039 suspensions compared with 914 in the previous year, but liabilities were almost identical, $6,522,821 against $6,577,788. Other commercial defaults, not properly included in the two principal divisions, were 19 in number and $172,576 in amount, against 25 failures for $679,421 in 1904. The most striking change in commercial failures appeared in the Province of Ontario, where total liabilities of $2,417,549 fell far below the $3,839,695 of 1904.

ATHLETICS AND LONGEVITY.

Dr. William G. Anderson, physical director at Yale University, in an address before the University Club, at Buffalo, N.Y., declared his belief, based on long experience and careful observation, that athletes are longer lived than people not given to muscular development by gymnastic and other athletic training and exercise. He said that he had been assured by a life insurance expert that "college athletes, barring the trackmen, show better average expectation of life than their non-athletic classmates, and much better than the general average of insured lives."

That there is physical benefit in rational exercise tending to develop the muscles of the body, and especially those affecting respiration, particularly when the exercise is accompanied by the concomitants of pure air and sunshine, the latter being Nature's great tonic, goes without saying. But it is very doubtful, says the "Insurance Register," whether those students who devote themselves primarily to athletics, and especially to contests which involve over-exertion to the last strain of human endurance, as in boat racing, football contests, and the like, are not quite as much injured by the excess of these occasional overstrains as they are benefited by ordinary and rational athletic exercises. Whether the college athlete will prolong or shorten his life depends on how he trains, and whether or not he continues the habit of muscular exercise, wholesome full breathing and out-of-door activity after entering upon his business career. In athletics, as in other useful things, temperance benefits, intemperance injures. Over-exertion is undoubtedly the cause of many cases of functional heart disease.

We do not doubt that Dr. Anderson was told what he says by some one, but it is hardly likely that that person was in reality a life insurance expert. It is most unlikely that any company has any record of experience upon which to base the statement that college athletes are much better risks than their non-athletic fellow collegians and much better than the general average of the insured. It may be, and very likely is, the fact, but we doubt the existence of any life insurance statistics to prove it.

WANTED

An energetic, responsible young man desires to hear from reputable firms who require a representative in Toronto.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Home Office - Toronto, Ont.

AN IDEAL POLICY OF LIFE INSURANCE.
The 20-Year Premium Endowment Plan
ISSUED BY THE

ROYAL-VICTORIA LIFE INS. CO.
Head Office, Montreal.

This policy is a model of simplicity. The Endowment feature is the return of the actual premiums received by the Company. The insured has his life insurance for the interest on his premiums and his full premiums returned, if living. **There are no estimates. Everything is guaranteed.** This is permanent life insurance. There is no assessment insurance as cheap. It is the policy the people want.

In introducing this plan, the Royal-Victoria Life Insurance Company has embodied in one policy the best features of the most popular plans of insurance that have received public approval in the last few years.

The adoption of the 20-Year Premium Endowment Plan is due to a careful observation of the requirements of insurers to have combined in one form of Policy, Whole Life Insurance, Term Insurance and Endowment Insurance at the option of the insured.

This policy is the embodiment of full value for the premiums paid, as shown in the **Guaranteed Interval Values** in the Policy, should the premiums **not be continued** during the 20 full years; or the **Guaranteed Options,** should the premiums be continued to the end of 20 years.

David Burke, A.I.A., F.S.S., General M'g'r.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

UNION MUTUAL Life Insurance Co. of Portland, Maine.

TORONTO MARKETS.

Toronto, Jan. 11, 1906.

Chemicals, Drugs, etc.—No appreciable change has occurred in the position of drugs and chemicals on the local market since last report. Quinine and opium continue to be bought at steady prices, but the demand is not markedly active. Other staples are about the same. Across the line business presents few noteworthy features, and is a little on the dull side. Baltimore advices on the fertilizer situation, however, are strong. A letter from Manchester, Eng., says: It is always dangerous to prophesy as to the course of trade, but looking at the position in all parts of the world, we ventured twelve months ago to indicate that 1905 might be expected to be a year of better trade, and that indication has been quite justified. In the early months of the year—and indeed up to the end of June—the volume of business in the home trade was less than had been expected, but there was always a good tone and a sanguine feeling that better times must soon come. During the second half of the year there has been a strong improvement and a heavy business done, many articles appreciating considerably in value, and the demand has continued until late in the current month. Export trade has been good throughout the year: the board of trade returns show the total exports of chemicals, drugs, dyes and colors to have been £13,403,269 during the eleven months ended November 30th last as against £12,503,280 during the corresponding period of 1904, an increase of £899,989 or about 7 per cent.

Dry Goods.—While perhaps the mildness of the season this winter has done something to subdue activity in many branches of dry goods, most wholesalers agree that seldom or never before have they experienced such an active demand at good prices. With favorable climatic conditions, the general impression is that the season's business would have been extraordinarily good. The undoubted cause is the general prosperity of the country which thus far shows no sign of weakening. The chief feature in city warehouses is the sorting out of receipts for the spring trade for which all reports bespeak favorable prospects. Fawns, brocades, shirtings are all shown in particularly wide variety. Dress goods are also shown in all colors and designs and qualities, but in the latter connection, it may be said that good grades are specially noticeable.

Flour and Grain.—Comparatively little Ontario wheat is coming forward, and millers are making some complaint. Manitoba is moving more rapidly. No change in value has been made in either since last report. In fact the only change in grain prices since last report has been in barley which dropped one to two cents. In flour not a great quantity of business is passing, though the price has come down a fraction. Ninety per cent. patents are quoted at $3.10 in buyers' bags, but this is too high according to the ideas of export requirements. Bran and shorts continue scarce and very firm and there is hardly enough on hand for immediate requirements.

Hides and Skins.—A quiet market prevails for hides and supplies are coming in in fair quantity. Prices are easy at the last reduction, but values are intrinsically not very much lower, taking into account the poor quality of offerings at this season of the year and the large proportion of wastage.

Live Stock.—All classes of stock were in demand at this week's markets and prices showed a firming tendency. Butchers' cattle especially were in strong demand, despite fairly large supplies. Colder weather perhaps has started a brisker demand. The demand for exporters has been fairly brisk and pices in some cases have reached $5, though $4.80 would be nearer the general mark. Hogs advanced 10c. during the week. Not many stockers or feeders have come forward, and old prices have been retained. Calves are easier. There has been a good demand for sheep and lamb, and all supplies have been cleaned up early in the day.

Hardware.—Prices hold very steady for all lines of ordinary shelf hardware, as well as metals, and business has been very active, with good sorting orders coming in. No feature presents itself for special comment.

Provisions.—An easier tone prevails in regard to butter, the receipts being almost more than enough to meet requirements. Cheese continues very firm @ 13c. for large and 13½c. for twins. Eggs are fairly steady, though but few new laid are in the market. A fair demand exists for poultry and prices keep about the same as last week. In sympathy with the higher prices for hogs, the prices for smoked meats are quite firm. The demand is active.

Wool.—Prices named in our Prices Current are purely nominal, business being at a standstill.

* * *

MONTREAL MARKETS.

Montreal, 11th Jan., 1906.

Ashes.—Business is lifeless at the moment, and quotations are more or less nominal at $5.25 to $5.35 for first pots, $4.75 to $4.80 for second pots, and $7 to $7.25 for first pearls.

Cements and Firebricks.—In cements there is little doing, but for firebricks there is quite a steady demand, with quotations firm at $18 to $23 per thousand. Belgian cement is quoted at $1.90 to $2.10; Canadian and English, $2 to $2.20.

Dry Goods.—Travelling salesmen are now fairly at work again, and are sending in very fair orders, mostly for spring stuffs, though there is a certain amount of sorting being done. Money is coming in pretty well, and some of the larger houses report about 85 per cent. of customers' paper met on the 4th inst., which was a fairly heavy day for three months' goods dated October last.

Groceries.—Both the local sugar refineries, which have been shut down for the yearly clean up and repairs, are again in operation, and report a brisk demand for soft yellow grades, which cannot be very satisfactorily accounted for, and prices of these goods are relatively higher than those for granulated. We quote $4.30 for standard granulated in barrels, and $4.25 in bags, while the lowest grade of yellows is $3.90 in barrels, and $3.85 in bags. Stocks of molasses in first hands are pretty well cleaned up, and the jobbing quotation for Barbados is steady at 35c. in single puncheons. Teas are comparatively quiet at the moment, but are generally firm in price. In other lines there is nothing new.

Hides.—Hides are barely as firm in price as they were, and buyers claim that there is no 12½c. per pound now for No. 1, and that 12c. is the extreme figure. Lambskins are steady at $1.10 each. The business passing is not large.

Leather.—The boot and shoe factories are all again in full blast this week, with good spring orders in hand, and there is more business doing in leather. Values are all firmly held, and we quote: No. 2 manufacturers' sole, 25c.; No. 2 jobbers' at 26c.; slaughter sole, 29c.; Western splits, 22 to 23c.; Quebec ditto, 19 to 20c.; buff and pebble, 13½ to 16½c.; glove grain, 12½ to 14½c.; Scotch grain, 33 to 37c.; harness, 32 to 33c.; russet, 40 to 45c.; black sheep skins, 8c.; colored ditto, 8½ to 8¾c.

Metals and Hardware.—The year's business is opening up well, good demand being reported in all lines. Bar iron has been put up in price again, $2 being now the quotation in an ordinary way. Pig iron is steady at last quoted figures. In boiler plate some revision of prices is not improbable. Canada plates are steady at $2.60 for fifty-twos; coke tins, $4, and charcoals, $4.25; terns, $6.85; black sheets, $2.40 for 28 gauge. Lead is a shade easier abroad, but $4.90 to $4.95 is asked locally for jobbing lots; tin, 39½c.; antimony, 14c.; copper is very firm at 20¼ to 20½c. per pound.

Oils and Paints.—Linseed oil has at last assumed a distinctly firmer tone, and is cabled as advancing a pound a ton in London within the last day or two. Local jobbing prices are now 53c. for raw and 56c. for boiled, and with the very high prices of late prevailing for pig and dry lead, it is just possible that this may lead to some revision of paint prices. Putty remains as yet unchanged at $1.40 in bulk; pure white lead is quoted firm at $5.75. Window glass is firm at $4 per 100 feet for first break. Fish oils are very dull; castor oil firmer, fom 8 to 8½c. being quoted for first quality, and 7½ to 8c. for second quality.

❧ ❧ ❧

ALBERTA WHEAT.

Alberta, which took first prize for wheat against all comers at the Lewis and Clark Fair, is to compete with Portland, Oregon, where that exhibition was held, for the trade of the Orient. Elevators are to be built at Vancouver, and Canadian steamers will carry the product of the prairies across the Pacific to the great markets of China and Japan. Mr. L. P. Strong, Secretary-Treasurer of the Alberta-Pacific Elevator Company, an American who was attracted from North Dakota to the wheat fields of Canada at the time of the American invasion, said on the subject at Vancouver a few days ago:—

"We have demonstrated that it is a fact that the wheat of Alberta can be shipped through Vancouver in successful competition with that of the United States through the ports of Portland, San Francisco, and Seattle. This is what I came to the Coast to do. The Alberta wheat will without doubt move this way, and it is only a question of a short time before large elevators will be erected in Vancouver.

"The tremendous wheat production of Alberta must come to Vancouver and seek its markets in the Orient. By this route we are able to ship more favorably than Manitoba, which has us handicapped towards the east, Calgary being twice as far as Winnipeg from the water transportation at Port Arthur. In the same way we have Winnipeg handicapped in shipping to the far east, it being twice as far from Vancouver as Calgary. At the same time we can compete through this port with the Pacific ports of the United States, and, in addition, we have the benefit of a decided Oriental preference for Canadian wheat and flour over that of the United States. Another point is that the United States

soon must cease to be a wheat-exporting country, as it will need all that is grown within its borders and be cut off from the export trade. When I think what North Dakota has done I am astonished to think what Alberta can do. In its palmiest days before the productive power of the soil had been lessened by cropping, North Dakota only grew twenty-one bushels to the acre in its best crop. Alberta averages thirty-five bushels to the acre, and the wheat belt is 400 miles long by 250 miles wide. It is a fact that fifty-three bushels of wheat was produced to the acre this year south of Calgary. This was Turkey red wheat. The production of Alberta must be tremendous, and its wheat must come to Vancouver. Our company have recently sold 25,000 bushels of white wheat to a British Columbia distillery. We were in direct competition with a Seattle firm. Prices were the same, but the contract was given us purely on the quality of our wheat. That shows you what Alberta can do in competition with the United States."

SHIPBUILDING ON THE LAKES.

The "Marine Review," of Cleveland, had an article last week on the amount of shipbuilding that was going on on the Great Lakes, from which we see that the Canadian Shipbuilding Company have six vessels in course of construction, including a car ferry for the Ontario Car Ferry Company, and three passenger steamers, and that the Polson

Iron Works, Toronto, have five under construction, including a hydraulic dredge for the Dominion Government, and another for the city of Toronto. In the American yards, thirty-nine vessels are under order for 1906, delivery of which the greater number are bulk freighters. A significant thing about this construction work, says our contemporary, is that a fair part of it was ordered early last summer, a thing unprecedented in the history of the great lakes, as new vessels are not usually contracted for until late in the fall, when the volume of next year's commerce can be more accurately gauged. The vessels under order mostly have carrying capacities ranging from 8,000 to 12,000 tons, the thirty-four freighters have a carrying capacity on a single trip of 338,000 tons. The average carrying capacity of the modern freighter on the Great Lakes has grown so fast that it is now almost double what it was even as late as three years ago. Confined to the ore trade, these thirty-four new freighters will be able to move in a season approximately 6,760,000 tons of ore. These figures, of course, take into account only those vessels now actually on the stocks. The shipbuilders of the Great Lakes during the year 1905, put into the water twenty-eight steamers.

A year ago the United States Steel Corporation placed orders with the American Shipbuilding Company for four steamers, which were to be the largest on the Great Lakes. These steamers were 569 feet over all, 549 foot keel, 56 foot beam, and 31 feet deep, and are now in commission. The Steel Corporation has recently given to the American Ship-Building Company orders for four additional steamers to be even larger than their predecessors. They are to be 600 feet over all, 580 foot keel, 58 foot beam, and 32 feet deep, and are to have a carrying capacity of 12,000 tons.

In conclusion, says our authority, the ship yards of the Great Lakes have really never had the volume of work on hand that they have to-day. They are not only blessed with a prodigality of orders for new ships, the like of which has never been experienced before, but the elements, too, have served to enrich them, for the last great storm on Lake Superior beached nearly a score of modern steel steamers, and made extensive repairs necessary upon all of them.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

ANNUAL MEETING

The Annual Meeting of the Association will be held at the Head Office, Toronto, on Feb. 13, 1906. Holders of Participating Policies are entitled to vote and take part in all the business of the meeting. Full reports will be printed and distributed shortly after the meeting.

OFFICERS:

W. H. BEATTY, Esq., President. W. D. MATTHEWS, Esq., FRED'K WYLD, Esq., Vice-Presidents.
W. C. MACDONALD, Secretary and Actuary. J. K. MACDONALD, Managing Director.

DIRECTORS:

W. H. BEATTY, Esq., W. D. MATTHEWS, Esq., FRED'K WYLD, Esq., HON. SIR W. P. HOWLAND
HON. JAMES YOUNG, A. McLEAN HOWARD, Esq., GEO. MITCHELL, Esq., M.P.P.,

BRITISH COLUMBIA MINERAL PRODUCTION.

The annual mining review published by the "Daily News," of Nelson, gives a comprehensive idea of the progress of the mining industry of the Province of British Columbia, such as cannot as yet be obtained from any other source. The production of minerals last year shows even more clearly than before that British Columbia is, without doubt, the mineral province of the Dominion, notwithstanding that the rich finds of cobalt in Northern Ontario place the latter province in a higher position than before.

The considerable advance made in the year just closed is the more gratifying for the reason that the increase is not alone due to the higher average prices of copper, silver, and lead, as compared with those of 1904. A materially increased tonnage of minerals has also contributed largely to the gain made, and in this respect the improvement appears to be permanent rather than temporary, which is still more satisfactory. It is true that in several districts there has been a decrease, but in only one, namely, the Coast, has this been serious, and even here there is the sufficient reason that this was in part brought about by a labor difficulty that prevented one colliery from contributing its ordinary share to the year's total production. This, namely coal, is the only mineral that did not exceed in quantity as well as value the production of 1904.

Classifying the production by districts, the results of the year are by no means unsatisfactory. The decreases, with the exception of that on the Coast, explained above, were small, and more than counterbalanced by gains in other districts. An important feature was the large increase in East Kootenay, due mainly to the enlarged output of lead from St. Eugene, as a consequence not only of the bounty granted by the Dominion Government, but of the higher average price of the metal. An increase in the Boundary section of Yale district, amounting to 33 per cent. is the result of a much larger production of copper-gold ore, and of the higher average price of copper throughout the year.

A large proportion of the net gain of $325,000 in silver is due to heavy increases of production in the Fort Steele district of East Kootenay, and in the Slocan. On the other hand, the Lardeau section produced somewhat less.

Summed up, the mining review demonstrates a new high record for mineral production, the total of the figures showing:—Metalliferous, $15,913,000; non-metalliferous, $5,050,000; grand total, $20,963,000; as compared with $18,977,359 for the year previous. In values the minerals produced were:—Gold, placer, $1,110,000; lode, $5,640,000; silver, $2,045,000; copper, $5,430,000; lead, $2,368,000; zinc, $320,000; coal, $3,090,000; coke, $1,210,000; building materials, etc., $750,000; placer gold and coal show a decrease from 1904 of $5,300 and $670,884; all others a big increase. The former total banner production of minerals was for 1901, $20,086,550, when the quantities of minerals produced were:—Gold, 279,990 ounces; silver, 3,587,710 ounces; copper, 36,200,000 pounds; lead, 57,200,000 pounds; zinc, 13,330 tons; coal, 1,030,000 tons, and coke, 242,000 tons of 2,240 pounds each; placer gold decreased 265 ounces; coal, 223,628 tons; all others show increase. All the smelters in the Yale-Kootenay are working. Many of the old ones have increased their capacity. New plants at Rosebery, Kaslo, and Frank, have been erected, and the plant at Pilot Bay, Kootenay Lake, closed down for past six years, is now at work once more. So, altogether, Mr. Byron E. Walker's assertion that the mining and smelting of metalliferous ores in British Columbia is in a sounder position than ever before, is amply borne out by the facts.

DRY GOODS OPINION.

What most people are now taking the greatest interest in, in the dry goods world, is the styles which are to be most prominent in ladies' cloaks and coats. These styles are many, but on the whole they may be said to lean towards plainness. There is a striking absence of frill and embroidery in this respect, going back to seven or eight years ago. In colors, the very light ones seem to be preferred. For misses, the Eton jacket bids fair to be more popular than ever. Short, tight-fitting covert coats will be good style for grown-ups. Sleeves are of the leg-of-mutton variety. The greatest change of style would appear to have taken place in mantles, which this year are to be much fuller and more voluminous. Sleeves are pleated and gathered, and collars seem a reversion to the old Medici type.

Considerable contrariety of opinion seems to exist with regard to trade conditions in general dry goods now prevailing. The mild weather has without a doubt caused a weakness in the demand for the heavier lines of goods, such as meet with their most ready sale during the earlier part of the winter; and, of course, there must be, to a limited extent at any rate, a certain degree of accumulation of stocks. But the most weighty opinion is that even notwithstanding the drawbacks presented by the weather conditions this season, trade has been good in both volume and satisfactoriness of profits. This is shown by the fact that payments from a majority of localities have been distinctly above the average.

It does not often happen that a very keen demand co-exists with a very high range of prices. Yet this is what seems to be taking place now in the chief staple goods. From Bradford, Yorks; from Boston, Mass.: from practically all the wool centres of the world, continue to come reports about the strong market for wool, and there is evidently not the slightest chance of a drop within the near future. Manufacturers of textiles in the Old Country would appear to be well employed, and, in some lines, those in this country are the same. The trade has evidently settled down to a basis of high prices, and this, no doubt, causes the seeming anomaly of active demand and big prices concurring. In cottons, the position is perhaps scarcely so secure, owing to the dips and leaps made by raw material in response to highly speculative influences. But the concurrence of opinion is that a fairly high range of values for raw cotton is most probable to continue, and it should not be forgotten that, even with a pronounced drop in that commodity, the disparity between present prices and those prevailing when existing stocks were made up, would prevent any speedy fall in manufactured articles.

* * *

BANK OF NOVA SCOTIA.

The seventy-fourth annual report of the Bank of Nova Scotia is published, and gives evidence of great earning power on the part of that institution. Twenty per cent. on capital has been considered very good bank earnings, not often reached among us, indeed, or at least not often shown. But here are profits equal to 21.65 per cent. That is to say, the net earnings of this bank for 1905 are shown to have been $478,507, which is equal to 21.65 per cent. on the average capital of $2,214,730. But there were other sources of profit: 3,408 shares of new stock were taken by shareholders at a price of 260, and afterwards 1,592 shares were sold (at auction, we presume, or on 'Change), and brought 265, and so the bank profited to the extent in all from these sales of $807,960. This sum, together with $192,040 from profit and loss was added to reserve fund, which is thereby swelled from $3,200,000 to $4,200,000, while the paid capital is at $2,500,000, an increase of half a million on the year.

An increase of nearly three millions is shown in the totals of the bank's assets and liabilities as a result of the year's business. Additional deposits of $1,503,728 came in, making the total $23,076,747, and the circulation advanced from $1,917,000 in the previous year to $2,339,000. There is a slight increase in current discounts and secured time loans, but the greatest increase is in call loans and immediately available assets. Indeed this bank carries as a rule a larger proportion of liquid assets than any other. One dividend was paid in August at the annual rate of 10 per cent., another, at the yearly rate of 11 per cent., is to be paid in February. There has been written off bank premises $35,869, that account now standing at a quarter million, and the generous sum of $18,000 is placed at the credit of Officers' Pension Fund in place of the $10,000 or $12,000 usual in recent years.

* * *

BOND ISSUES IN CANADA.

Mr. E. R. Wood, of the Central Canada Loan Company, has made a careful compilation of the bond issues made in Canada during the past year. With the exception of the last two or three months the market was very active, as indeed had been the case during the whole of 1904, though prior to that time, owing to unsteady financial conditions, both corporations and municipalities found difficulty in marketing their bonds. In the fall of 1905, prices were well maintained, but the volume of business fell off considerably, owing to the great stringency in the money markets.

The total of new issues in Canada was $133,874,528. Of this amount $25,522,040 was in connection with the reorganization of existing corporations, but resulted in placing additional bonds in the market. Compared with 1904 the issues were:—

	1904.	1905.
Municipal	$13,759,247	$ 9,031,160
Provincial Governments ...	11,146,000	346,087
Corporations, new	9.344,000	99,975,241
Reorganizing corporations		25.552,040
Total	$35,174.247	$133,894,528

Mr. Wood's information showed that of these, total sales had been made as follows:—

	1904.	1905.
In Canada	$24,235,247	$27.732,500
In England	2,584,500	84.996,794
In United States	8,354.500	7.450,000

The amount of Provincial bonds sold in 1905 was exceptionally small. The $6,000,000 issue of the Province of Ontario were borrowed on in London, and therefore did not come into the market this year. Manitoba issued $286,087 worth of bonds, and Quebec $60,000. In addition, Prince Edward Island will issue $500,000 of bonds during the current year, and Quebec also a certain unstated amount.

Referring to municipal bonds, Mr. Wood's summary shows that issues to the total amount of $4,624,076 were made by western municipalities; $4,407,084 by eastern municipalities. Of this total Mr. Wood considered it safe to say Canada had taken eighty per cent., the United States probably fifteen per cent., and Britain five per cent. The British investor can now get the bonds of British municipalities to yield almost as much as similar Canadian issues, and is therefore not an active buyer in this market, while the only American demand is from insurance companies, who require securities of this class to deposit with the Government to do business here. The Canadian market for municipal bonds is, however, growing with the growth of our insurance companies, and private investors also are turning more attention to this field.

The American buyer is, as a rule, only slightly acquainted with the security offered by Canadian municipalities. In addition, the laws of most municipalities in the United States restrict the amount of debt which can be assumed by any municipality to a very limited sum, while those in Canada are given more latitude, and, as a rule, have much heavier debts. With corporation bonds, however, the case is different, and whenever money is plentiful in the United States, we find the American dealer looking to this country for good bonds of this class. This class of business Mr. Wood believes will grow from year to year.

Of the total of nearly 100 million new issues by corporations, the chief issues were by the Grand Trunk Pacific and Canadian Northern. These totalled nearly sixty-one million, while the C.P.R. issued nearly four million, and flotations of companies incorporated by Canadians to operate in Rio de Janeiro, Mexico and Cuba make up about $33,000,000, leaving only about $3,000,000 for minor Canadian corporations. The issues were as follows:—

Canadian Northern—	
Four per cent. debenture stock	$8,954,666
Three per cent. Dominion guar. bonds	9,359,996
James Bay Ontario Government guar	5,250,000
Great Northern, C. N. R. guar	4,926,000
Chateauguay & Nor. C. N. R. guarantee	1,110,000
Equipment bonds, C. N. R. guar	1,000,000
Total, C. N. R.	$30,636,662
G. T. P.—	
Prairie sect., G. T. R. guar	$ 8,010,533
Superior sect., G. T. R. guar	6,608,933
Western sect., Government guar	15,573,333
Total, G. T. P	$30,192,799
C. P. R. 4 per cent. debenture stock	3,893,280
Mexican Light	2,000,000
Mexican Electric	6,000,000
Havana Central	5,000,000
Rio Tramway, new underwriting	20,000,000
Dominion Iron & Steel, 2nd mortgage	768,500
Bell Telephone	600,000
New Brunswick Coal & Railway	368,000
Winnipeg, Selkirk & Lake Winnipeg	300,000
Niagara, St. Catharines and Toronto Railway	116,000
London Electric	100,000

Under reorganization plans bonds were issued of the Canada Atlantic Railway, guaranteed by the G.T.R., and £1,025,000 issued in London, the balance being held for exchange for old bonds or in the treasury. The reorganization of the Dominion Coal Co. placed $5,000,000 bonds, of which $2,250,000 were sold in the United States, and $2,750,000 in Canada, while of this company's preferred stock $1,387,450 was sold in the United States, and $1,612,550 in Canada. The reorganization of the Shawinigan Power Co. issued $4,000,000, disposed of:—In Britain, $2,000,000; in United States, $1,000,000, and in Canada, $1,000,000. The total issued under reorganization was:—

Canada Atlantic	$16,022,040
Dominion Coal	5,000,000
Winnipeg Electric	500,000
Shawinigan Power	4,000,000
	$25,522,040

* * *

CANADIAN SAVINGS.

"Merchant" writes from Hamilton as under: "In last week's issue, page 897, you speak of a hundred millions of deposits outside those in the chartered banks, where are they?" In answer to "Merchant's" enquiry, we have added together the amounts of money of the public deposited with various institutions in Canada and find it to exceed considerably $600,000,000. The various known depositaries are as under:—

In chartered banks, 30th Nov., 1905	$511,942,492
In Government savings banks, 30th Nov.	61,140,643
Quebec Caisse d'Economie, 31st Dec., 1905	7,852,717
Montreal C. & D. Savings Bank, 31st Dec., 1905	18,417,192
In Ontario loan companies, 31st Dec., 1904	20,150,486
Debentures in Ontario Loan Companies, 31st Dec., 1904	19,575,645
	$639,079,175

There is thus $136,000,000 of the savings of Canadians deposited with loan companies and savings banks, or loaned on debentures, besides the $512,000,000 deposited with the thirty-four chartered banks. No doubt there are further savings, in private bankers' hands, in various receptacles such as tin boxes, and even old stockings in the country; these, however, can only be guessed at. But these listed above are depositaries of whom one may have knowledge at any time. The "Canada Gazette" gives some of their amounts each month; the Ontario report upon loan corporations gives every year the total in such institutions. The total of $639,000,000 is equal to $106.50 per head of our population.

* * *

ROYAL BANK OF CANADA.

The comfortable balance of $302,743 was brought forward from 1904, which added to the $491,918 earned in 1905, produced the very respectable sum of $794,662 to deal with. Out of this, $247,500 was allotted to dividend—three of the quarterly payments at two per cent. each, and the last at two and a quarter; $10,000 was placed to officers' pension fund; $100,000 written off bank premises account, and $400,000 transferred to rest account, the remainder carried forward. The reserve is now $3,400,000, with a paid capital of $3,000,000 out of $4,000,000 authorized.

An active business is indicated by the state of circulation, which had reached $2,820,971 at the close of December. Deposits having advanced to $26,332,000 against $21,820,000 a year before, the increase of two millions in current loans and three millions in immediately available assets is fairly accounted for. The holding of British Consols and other Government and municipal securities is large, and the call and short loans on bonds and stocks very much increased. This important bank has now attained total assets of $36,373,000.

* * *

THE BANK OF HAMILTON.

The first thing to strike a reader of the Bank of Hamilton's report is the recommendation of the directors, adopted unanimously by the shareholders represented at the meeting on Monday last, to make another increase of the capital stock, namely, half a million dollars. This, however, is quite in line with the tendency of to-day, for enlargements of capital have been common enough of late, and the expanding business of the country justifies them. The paid capital, which was $2,000,000 in June, 1903, is now $2,240,740, and by profits upon new stock sold at a handsome premium, supplemented by additions from earnings, the reserve is now equal to the paid capital, thus fulfilling the anticipation of the president in January last year.

The fact that the report submitted at the last general meeting of shareholders (January, 1905), was for six months only, owing to the change of date in the annual meeting from June to January, prevents any immediate comparison of earnings or resources. But it may be said that the ratio of earning is well maintained, indeed increased, for the net profits of 1905 were $357,273, which is over 15 per cent. on the average capital. Circulation stands at $2,279,755. Deposits have gone up from $19,086,000 to $21,494,000. An increase in current loans of nearly a million is shown, and the loans on call and other quick assets exhibit a still larger increase, both actually and relatively.

The president takes credit to the management for having been conservative in opening new branches of the bank; but we observe that no fewer than seven have been opened during the twelve months. This is an indication that the board believes in the steady growth of Canada, and the branches thus recently opened are nearly all in our new North-West. Referring to the unhappy defalcation in the East-end branch, Senator Gibson defended the inspection staff of the bank, and showed how overwhelming was the proportion of the trustworthy employees, as indeed it is in any financial institution. It is probably true, as he claims, that it is possible to have too much inspection. Assuredly no inspection can provide against clever dishonesty.

* * *

SYDNEY, CAPE BRETON.

A decided change, and a change for the better, has come over the fortunes of Sydney, Cape Breton, whose enterprises and disappointments, whose hopes and fears, whose astonishing growth, occasionally checked, led to predictions of an extraordinary future for the place, based upon the vast importance of its coal trade and the Dominion Iron and Steel works begun there in 1899.

Although not so much is heard from Sydney as we used to hear a few years since, when the "boom" started there, it is well recognized that both the trade and the industries of that city are on a more satisfactory basis than they have ever been. A year or two ago wholesale dealers in Halifax, and possibly other cities, were inclined to advise their travellers to fight shy of Sydney, or to accept business from its traders with the utmost caution. To-day the Sydney trade is considered good, and we hear from Halifax that its payments are as prompt as in any other section of the country.

Both the steel and coal industries of Sydney are on a much better footing; and attention deserves to be drawn to the fact that the Dominion Iron & Steel works as they now stand were put there by Canadians, after highly paid "experts" from the United States had come and gone, leaving too often a legacy of incumbrances behind them in the shape of ineffective plant.

During the past year the rail mill of this company has been completed and put in operation; the coke oven plant enlarged; the Sydney Cement Company established; and the Tar and Chemical Company's plant extended. The rail mill gives employment to three hundred men, has been busy continuously since starting, and we are told has work on hand for three years ahead. The company anticipate the greatest year in the history of the business. There are now over 3,000 men on the company's pay-roll at Sydney, and this number will likely be increased shortly. The water and electric systems of the company are proposed to be extended this year at an expenditure of over half a million dollars. The minor industries, such as the cement works and the tar works, had a prosperous year in 1905, and are in their way desirable adjuncts to the prosperity of the place. There is at last good reason to believe that these extensive and important works of the Dominion Company have been placed in a position by possessing the best possible character of plant and by utilizing modern methods, to do a continuous business that will reward the shareholders and directors for years of thwarted expectations.

* * *

"A WOLF IN SHEEP'S CLOTHING."

The disposition to recur said to be possessed by decimals and bad pennies is also possessed by some of the cheap financial concerns which the law finds it better to suppress. Put out of business in one province, they raise unabashed heads in another. Of such a character seems to be the People's Loan & Deposit Company.

About two years ago or a little more, it will be remembered that W. J. Holden, president of a company styling itself the Dominion Co-operative Home Building Association, and W. J. Doran, of the Sterling Home Buyers' Union, were convicted in a Toronto court of transacting an illegal business. Shortly before this, the charter of the People's Loan & Deposit Company, a fairly well known Ontario institution, had expired, though it was afterwards renewed temporarily on the representations of the liquidator. Subsequently, it was found that the very business for which Doran and Holden had been condemned, was being carried on under the name of the People's Loan and Deposit Company, whereupon the latter's license was cancelled.

It now appears that the same people removed to Montreal, obtained a charter under Quebec laws under the same name, and have still had the management of the Dominion Co-operative Home Building Association, the Sterling Home Buyers' Union, and another, the Canadian Co-operative Alliance.

This is so far as one can gather from the evidence given in a suit now pending in the Superior Court at Montreal, which, however, from the admissions and allegations and counter-allegations made by the defendants is somewhat difficult to follow. However, it seems to be a fact that Holden and Doran, the men convicted of conducting an unlawful business in Ontario two years ago, are still, under one guise or another, carrying on their old tricks in Quebec. The company in question, amongst other features, has an industrial savings department, and issues "investment bonds," in some cases, we are told, for fairly large amounts. One case is recorded where a Montreal lady had paid in $500, and had received in return a bond imposingly printed in large gilt letters, and showing on its face that she was entitled to 3 per cent., or $15 every six months, for a term of years. We understand, too, that at one time the Government refused the use of the mails to the People's Loan and Deposit Company, believing it was the same concern whose license had been cancelled in Ontario. On representations, however, that it possessed a Quebec charter, and was a new company, the privilege was returned.

All of which goes to show, in our opinion, that the granting of terminating share company charters in future by the different governments should be suspended, as is now practically the case in this Province, with advantage, and to the better protection of the whole people against visionary schemes.

* * *

HALIFAX HARBOR FACTS AND STATISTICS.

Imports of sugar and molasses into Halifax last year were large. Molasses shows a considerable increase over the previous year, and judging from the figures Halifax is rapidly becoming the principal molasses distributing centre in the Dominion. The imports consisted of 20,095 puncheons, 5,362 tierces, 3,311 barrels, the most of which came from the British West Indies. Imports of sugar amounted to 46,117 tons, every ton of which came from the British West Indies or British Guiana. No sugar was imported from Germany at all.

There was a large increase in the shipping of this port last year, notably in deal shipments. To-day, deals form the principal item of export from Halifax. The quantity shipped last year was nearly 38,000 tons. There has also been a marked growth in the export trade in wheat and cattle from the port.

Ship-building is practically dead in Nova Scotia. It was once a great industry, but iron has taken the place of wood for ships, and the total tonnage of the province shows a decrease of over 10,000 tons, from 1904. That province has the men competent to build iron ships, and it produces the material, but ship-building is an industry in which it seems to be taken for granted that Nova Scotians cannot compete unassisted against the long established industries and cheap labor of the Old Country. Nova Scotians hope for that bounty, however, before long, and, as our correspondent says: "We look to the people of Ontario and Quebec to give us 'a leg along.' "

* * *

PRESENTATION TO MR. MACAULAY.

Decided interest attaches to the recent review by Mr. Robertson Macaulay of fifty years of life assurance upon an occasion last week when that gentleman was honored by being presented with his portrait. The agency managers and field staff of the Sun Life Assurance Company decided some months ago to have a portrait of their president painted, and accordingly engaged a very competent artist, J. W. L. Forster, R.C.A., for the purpose. The completed portrait in oil, an excellent likeness, appropriately framed, was presented last week at the head office to Mr. Macaulay together with a handsomely illuminated address on vellum, bound in morocco. This address was signed on behalf of the field staff by Mr. T. McIntyre, chairman; Mr. W. H. Hill, secretary, Mr. A. S. Macgregor, treasurer; and Mr. T. R. Raitt, assistant secretary of the presentation committee.

Replying to the expression in warm terms of his agents and admirers, Mr. Macaulay gave them his cordial thanks, saying that he had coveted and striven for these many years to merit the confidence and friendship of the Sun Life staff. This presentation, he said, was but a reiteration in a more durable form perhaps of the cordial friendship of days gone by continued on to the present time.' Referring to his connection with life assurance, Mr. Macaulay said:

"I entered upon life assurance with the old Northern Company, in January, 1856, so that I have given fifty years to the business. In 1874 I took in hand the three-year-old Sun Life, with four agents, doing a weekly business of $10,000. Its revenue that year was $64,073. Its assets were $171,362, and the business in force amounted to $1,786,092. What a tiny concern it was to be sure! When this record is contrasted with to-day's transactions the great growth of the company can be readily seen. At the close of 1905 the company had nearly $100,000,000 of assurances in force, and cash income of over $5,000,000."

Mr. Macaulay gave many reminiscences of the early days of the company and its great struggle for business.

"Mistakes and misunderstanding in the administration," said Mr. Macaulay, "have occurred from time to time. It is said that these things are unavoidable even in families the best regulated. But misappropriation—or the use of the company's funds or securities to promote the well-being of anyone but the company is absolutely unknown in the records of the management of the Sun Life. Strict honesty has governed its administration, from July 1874 all along to the present moment, and I believe will continue in the future to govern it." In a solemn strain he continued: "I regard the highest of all trust confided to man to be life itself. We may all come to find some day that life is like surgery—a grave undertaking—the outskirts of a vast system, its real significance and momentous importance to be disclosed only at the exit from it. A boy may pass among tempting sweets of a confectionery, and an adult may go through the strong room of a bank, or of a gold-washer's establishment, and both may deem a little cribbing to be unimportant, no watchful eye being apparent; but wait the imperious search at the exit! And who shall say that what is exacted by man of man shall not be exacted at the gate of death? Who will tell us just what happens at that exit and days after? Shall there be no reckoning of the great trust, life? The man who plays loose with human trust is simoly playing the fool."

* * *

LA CHAMBRE DE COMMERCE, MONTREAL.

The twentieth annual meeting of the French Chamber of Commerce of Montreal, was held in the Board of Trade Building on the 11th inst. In his annual report the president made the statement that the number of members of the Chamber from its establishment had increased from ten to nearly four hundred. During the past five years its correspondence increased four-fold, and the general business showed also a remarkable increase as well as the number of visitors to the Chamber. The report mentions an unusual proportion of English agents and tradesmen who came to enquire about possibilities of entering into communication with French firms. This fact is apparently a good result of the warm reception of the Canadian manufacturers in Paris and of the "entente cordiale" on the other side of the Atlantic. The French Chamber proposes to heighten this friendly intercourse between the two countries by the publication next spring of a special number of its monthly bulletin.

Upon proceeding to the election of officers for the current year, the following were found to be the choice of the voters: President, Mr. C. A. Chouillon; vice-president, Mr. G. des Etangs; secretary, Mr. A. F. Revol; treasurer, Mr. J. Salone.

HAMILTON BOARD OF TRADE.

A very successful and largely attended meeting of the Hamilton Board of Trade was held on Wednesday last. It was decided on that occasion to send a protest to the Dominion Parliament against the tax on commercial travellers in British Columbia. Both the Ontario and Dominion Governments will be memorialized on the question of trying to save the Canadian inland waters from being depleted of fish. The subject of providing good roads between Hamilton and Toronto for automobiling created much interest. It was agreed that President Lamoreaux should name three members to co-operate with the civic committee in inducing manufacturers to locate in Hamilton.

* * *

BETRAYING CONFIDENCE.

We have heard of people "fouling their own nest" in politics, and much execration has followed them in consequence. But this nasty performance is sometimes heard of in commercial circles too, and the like approbrium should follow those who practise it. "Leslie's Weekly" has an article on the subject, from which we take the following:

"Few crimes are more despicable or worthy of more swift and condign punishment than that of a man who turns upon an employer who has trusted him in close and confidential service and attempts to extort money from him under the threat of disclosing important business secrets. Scoundrels have profited so often and so much by such acts of perfidy that it is not at all surprising that this scheme for making money easily should be resorted to at frequent intervals by creatures of a certain type. But if all these blackmailers were served as two of them were served the other day by Armour & Company, of Chicago, crimes of this order would soon disappear. One of the men was formerly a stenographer who had been employed in a confidential capacity by Armour & Company, and had in this way possessed himself of a number of highly valuable and important letters bearing on the relations of the company with other firms Joining a brother-in-law with him in the plot, the stenographer, who had resigned his position, went to the office of the beef company and demanded $40,000 as his price for withholding the letters from the public. Instead of throwing up their hands and allowing their pockets to be picked by their traitorous employee and his partner, the firm laid a trap for their capture, had them arrested and put in prison, where they now are awaiting trial. The action of Armour & Company in this matter deserves commendation, and the punishment of the offenders should be swift and sure."

* * *

BANKING AND FINANCIAL

We hear of the recent appointment of Mr. D. D. Y. Hossack as manager of the Quebec Bank branch at Ottawa, to succeed the late Tristram C. Coffin.

The Ottawa Electric Railway Company has declared a dividend of 2 per cent. for the quarter ending December 31st last, and a bonus of two per cent. for the year.

The Bank of British North America advises us that a sub-branch of that bank was opened on 10th inst., at Alexander, Man., under the management of Mr. A. C. Skelton. manager of the Brandon branch.

A Montreal despatch of last Saturday states that Max. A. Roth, manager of the Canadian Finance Company, was committed by Judge Desnoyers to stand his trial on a charge of obtaining money under false pretences by means of "fake" telegraphs. This is one of the concerns referred to a fortnight ago as exacting usurious rates of interest from poor people.

Having recently removed from Newmarket, where he was in charge of a branch, and well spoken of, Mr. N. Wallace Bruce is now manager of the branch of the Sovereign Bank in the city of Chatham, Ont. We hear also of the promotion of Mr. W. J. Hill, of Montreal, to take charge of a branch of the same bank at 635 Dundas Street. London.

We are pleased to learn that the committee of the Montreal Clearing House Association has arranged for a course of instruction to be given to the clerks of the banks in that city on legal subjects connected with banking questions. For the present two courses of lectures have been arranged for Tuesday and Friday evenings, one on" The Canadian Bank Act," by Mr. A. Rives Hall, advocate, and the other on the "Law of Contracts," by Mr. Ed. Fabre Surveyer, advocate. Both have given their services gratuitously, and the lectures are free of charge to all bank employees. The secretary of the association announces that if the present lectures seem to be appreciated, others will be arranged for. The opening lecture on Tuesday evening, January 23rd, will, it is expected, be attended by a number of the managers of the city banks.

A Canadian banker in Manitoba sends us a recent clipping from a United States journal, "The American Banker," which, quoting from the report of the United States Consul at Chatham about the presence of American silver in Canada and the means taken by our Government to deport it, comments thus: "Instead of exhibiting this petty carping spirit the Canadian press ought to be thankful that their currency is *reinforced* and *invigorated* by the presence of the coins to which they object. It is not true that "every dollar that passes in trade displaces the same amount of Canadian currency." . . . . . "But as, in fact, the metal will not pay debts and dollars will, it follows that, at least so far as the debtors are concerned, the more dollars the better, and not only are debtors benefited by the addition of American dollars to the Canadian currency, the whole country is benefited. Many new enterprises are afoot in Canada and money is needed to provide plant and pay laborers. To reject the American dollars is to deprive the Dominion of a valuable adjunct to its own financial resources; and this is what the Canadian press will do if it keeps up the present foolish agitation." The words we have italicized indicate a belief that the very currency of Uncle Sam, like everything he owns or does, is "the best on earth." Our correspondent says, "This editorial writer is apparently a typical Yankee. Our friends to the south always had a fair opinion of themselves, but this excels anything I have seen."

* * *

LIFE ASSURANCE ITEMS.

The English head offices of the Manufacturers Life Insurance Company are now at 19, 21, 23 Ludgate Hill, E.C.; the head office for Great Britain having been removed from 36 Spring Gardens, Manchester.

On and after the 1st of January next, says the London "Review," the business of the Yorkshire branch of the Sun Life Assurance Company of Canada, hitherto transacted at 21 Tyrrel Street, Bradford, will be carried on at 15 and 16 Victoria Chambers, South Parade, Leeds.

According to the judgment rendered on Wednesday last by Mr. Justice Archibald, Montreal has no by-law authorizing it to levy a special tax on life insurance companies, and the city was condemned to repay to the Royal Insurance Company $400 collected for two years' taxes on the company's life branch. It seems that the word "life" was carelessly left out of the by-law.

At a recent gathering of a more or less convivial character held last week in the board room of the London & Lancashire Life, the general manager of that company showed that policies for more than $1,200,000 had been issued during 1905. The company's business shows $375,000 more total assurance than a year ago. Net income exhibits an increase of nearly $25,000.

We observe that the total insurance now in force on the books of the Royal Victoria Life Company has been increased to $4,630,000. The company had a satisfactory year's business in 1905. There were new applications received amounting to $1,254,325; new insurance issued, $1,116,825; and new insurance taken, $1,002,100. The income for the year was $160,309, as compared with $147,016 in the previous year.

* * *

FIRE INSURANCE.

The report for the year 1905 of the Montreal Fire Alarm Department gives some interesting particulars. Superintendent Ferns tells us in his annual report the classes of buildings in which fires occurred during the year, and also the work done by the different fire stations in the city. Four hundred and eighty fires broke out in dwelling houses, 72 in sheds, 48 in stables, and 25 in new buildings in course of erection. Two fires occurred in fire stations, two in ice houses, one in a police station, one in a theatre. Destruction of a hen house by flames is included in the records. St. Denis ward had few fires during the year, and the men of No. 18 station only used five streams and 11 hand extinguishers. Chemical engines were used seven times. The water towers were used nine times.

* * *

DRY GOODS.

A corporation has been organized in Nova Scotia, under the title of Stanfields, Limited, with a capital of $750,000 for the purpose of acquiring the plant and assets, including patents, trade marks, good-will, etc., of the Truro Knitting Mills Company, Limited, and also to establish extensive worsted yarn mills. The two industries would be carried on together, one feeding the other. The new yarn mill will be of brick, and is to be erected either on Salmon River or on the Intercolonial Railway at the west end of the town. The underwear made by this old mill finds market in every part of the Dominion. John Stanfield and Frank Stanfield, of the old company, will remain as managers, the former as president of the new company, and the latter as vice-president and treasurer, and they will hold a controlling interest in the company. Associated with them on the board of directors are John Y. Payzant, president of the Bank of Nova Scotia, and Geo. S. Campbell, and J. Walter Allison, directors of the same bank.

* * *

FOR GROCERS AND PROVISION DEALERS.

McLarens', Limited, has been granted by the Ontario Government a charter authorizing it to manufacture, grind and deal in coffees, spices, jelly powders, etc. It will also take over the business of the Hamilton Coffee and Spice Co. in Hamilton, Ont. The capital authorized is $200,000.

A disappointing state of things is reported from South Africa in regard to Canadian fruit. The quality of recent shipments of apples to Cape Colony has been so bad that they are in danger, it is authoritatively said, of being excluded altogether from that country. In a communication, dated December 20th, to the Trade and Commerce Department, Mr. Kittson, Canadian Trade Agent, states that a recent shipment of Canadian apples consigned to Cape Town, was upon arrival found to be seriously infested by scab, and also by codlin moth, some barrels to the extent of 60 per cent. in case of the former, and 40 per cent. in case of the latter. He points out that Canadian shippers were warned that fruit so affected was liable to confiscation on arrival, without compensation to shippers or consignees. It is hopeless for Canadians to attempt to work up large export trade, if such methods as these are employed.

According to an American authority, the pack of corn last year in the United States and Canada was the largest on record, amounting to 13,418,665 cases, of which 400,000 are credited to Canada, compared with 11,462,969 cases, with 300,000 of them Canadian, in the previous year, which itself was a very good year. This heavy output of 1904 was the result of a light production in the three preceding years, which forced prices up to extreme figures, New York State No. 2 standard selling in 1903 and 1904 up to $1.25, and not lower than 90 cents. in the first named year, nor 80 cents in 1904. The report says: "These prices made corn packing a highly profitable industry, and naturally tended to stimulate production. Poor crops in several States in 1902-3 kept down the output to a quantity not large enough to care for requirements, unless consumption was checked by high prices. This year the corn crop was very large and conditions favorable, so that nearly every factory was worked to its full capacity, resulting in a total pack of 13,418,665 cases, against 11,462,969 cases in 1904.

* * *

—We understand that the annual meeting of the Toronto Clearing House is to be held on Thursday p.m. It is likely we shall have gone to press before its proceedings are made public, but we have been made aware by the manager that the deposits of the Clearing House thus far in 1906 show an increase at the rate of a quarter of a million annually. That is to say the clearing for fifteen week days this year have aggregated $67,616,711, as compared with $54,697,232 in the same period of 1905.

—It is stated that a contract has just been made for the shipment of 300,000 cords of pulp wood from New Brunswick to United States mills, this being the first lot to take that direction in any quantity. The attention of the Tariff Commission is being drawn to the waste, so far as Canadian industry is concerned, which ensues from the export of pulp in its raw state, when it is worth approximately $6 per cord, when the finished product would be worth $29 per ton. A good many people think there is a fine opening for an export duty on Canadian pulp.

—A very good ratio of earning is shown by the Merchants Bank of Prince Edward Island, whose paid capital is $350,400. Its net earnings for the year 1905 were $56,788, besides which there was $5,061 received as premium on new stock. Eight per cent. dividend was paid and $35,000 added to the Rest, which now exceeds $330,000. The bank has a million in deposits; a circulation of $312,964 at close of November last. Its total assets are $2,036,010, of which current loans form $1,639,440. The Merchants Bank of Prince Edward Island has its head office in Charlottetown and branches in Alberton, Montague, Souris and Summerside on the Island and at Sydney, Cape Breton.

—Bank clearings in London last year were phenomenal. The "Economist," of 6th January, says that the secretary of the Bankers' Clearing House has published the totals of the clearings for the past year, the figures again establishing a series of records for the year, for a month, and a day. "Not only, however, is the total for the year the largest ever recorded, but the increase as compared with the previous year is greater than the difference between any two previous years. The clearings amount to the enormous total of £12,287,935,000, which compares with £10,564,197,000 for 1904, and thus shows an increase of £1,723,738,000, equal to 16.3 per cent." Clearings for 1903 were 10,119 millions, and for 1902 nearly the same, and for 1901 they were 9,569 millions.

—Among the enquiries relating to Canadian trade received at the Canadian Government office first week of January, 1906, are: An engineering firm making steam engines, boilers, lifting machinery, motor-wagons, for one or two firms in Canada with good connections, who would push the sale of such goods. A London firm of gold and silver beaters make enquiry respecting the market in Canada for gold leaf and powder, silver, platinum and bronze powder, gold size, etc. A provision merchant at Derby has requested to be placed in touch with Canadian manufacturers of egg boxes to hold 360 and 180 each. The Basinghall Street branch tells of a London firm making Japanese silk embroidery novelties who would sell to Canadian manufacturers of children's millinery. A Midlands company making pumps is prepared to appoint suitable Canadian resident agent. A London firm desires to act as buying agent for Canadian importers of dry goods and millinery lines. A Dundee firm wishes to do business in Canada in jute goods of all kinds and invites correspondence from buyers.

* * *

—The exports of the United States to Great Britain during the fiscal year 1905 aggregated nearly one-third of the total foreign export commerce of the Republic. They amounted to $523,000,000 out of a total of $1,518,000. Imports from Britain on the other hand were $176,000,000, out of a total importation of $1,117,000,000, or about one-sixth. Comparing with 1905 the year 1895, exports from Great Britain to the United States have increased 10 per cent., while, in the reverse direction, exports from the United States have grown by 35 per cent.

* * *

—It is worth recording that the British Tariff Commission believe in preferential treatment as a means of increasing the Mother Country's share of Canadian trade. It reports that facts and figures justify the following conclusions: (1) During the past twenty years the tendency has been that Canada, to an increasing degree, depends on the United Kingdom for the disposal of her products, and on the United States for the supply of materials that could have been supplied by the United Kingdom. (2) Largely as a result of the keen competition of the United States and Germany, British exports to Canada declined till the preference of 1897; since then they have increased. (3) Yet the British share of the Canadian market is increasing at a lesser rate than the share of the United States. (4) In the opinion of British manufacturers and merchants, giving evidence, the most effective means of increasing the British share lies in the enlargement of the preference along the lines of the resolutions of the colonial conference, and the declaration of Canadian Ministers.

* * *

—When a man has served with conspicuous loyalty and capacity in a responsible position for a series of years, the first impulse felt when it is learned that he is about to leave it is one of regret, coupled with wonder who can be got to fill his place. This was the feeling, we venture to think, of hundreds who heard for the first time yesterday that Richard John Younge had resigned his post as secretary of the Canadian Manufacturers' Association. Such a man as he, conscientious, methodical, alert, scholarly and still business-like, was one to have offers of higher emolument from persons or firms who, within the Association, had become aware of the secretary's value. And so, one fine day, the Canadian Rubber Company, of Montreal, whose manager knows a good man when he finds him, put a hand metaphorically on Mr. Younge's shoulder and said, "Come and be our sales manager." Mr. Younge agreed to go, and even his friends of the C. M. A. who prized him but wished him well would not stand in his way. Mr. Younge leaves Toronto on 1st March for his new residence, and his successor is likely to be Mr. J. M. Fred. Stewart, who is nearly as well-known to the C. M. A. as Mr. Younge.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, January 18th, 1906, as compared with those of the previous week:

	Jan. 18th.	Jan. 11th.
Montreal	$30,299,704	$30,348,042
Toronto	24,892,291	26,757,075
Winnipeg	7,560,922	9,589,670
Halifax	1,885,151	2,621,141
Hamilton	1,590,403	1,494,048
St. John	1,098,377	1,367,402
Vancouver	1,806,203	2,017,880
Victoria	975,698	1,067,731
Quebec	1,719,079	1,970,026
Ottawa	2,806,821	2,336,259
London	1,088,793	1,378,999
Total	$75,723,444	$80,948,273

Mercantile Summary.

The new ferry boat "Ludlow," belonging to the city of St. John, N.B., collided with a float last week and suffered damage to the amount of $10,000.

The Conboy Carriage Company, Limited, Toronto, has been incorporated for the purpose of manufacturing and buying and selling waggons, buggies, sleighs, automobiles, etc.

The business of the Murray Printing Company is to be carried on under a recently obtained charter as a joint stock company, having a capital stock of $150,000. The company will extend its operations, and do printing, publishing, lithographing, engraving, stereotyping.

The Dominion Government has granted a charter to the Canadian Consolidated Mines, Limited, the name under which the concern will be known which is taking over the assets and operations of the St. Eugene, Centre Star, Trail Smelter and Rossland power companies. Its authorized share capital is placed at $5,500,000, and its head offices in Toronto. An extended list of powers is mentioned in the "Gazette" as having been granted the company. H. M. Osler and W. B. Raymond, Toronto, are named in the notice of incorporation as being among the charter members.

Meetings

BANK OF HAMILTON.

The annual meeting of the Bank of Hamilton was held 15th January, 1906, in the banking house, when the following report was submitted:—

Report.

The directors beg to submit their annual report to the shareholders for the year ended 30th November, 1905:—

The balance at credit of profit and loss account, 30th November, 1904, was	$ 40,176 28
The profits for the year ended 30th November, 1905, after deducting charges of management and making provision for bad and doubtful debts, are	357,273 12
Premiums received on new stock	205,421 00
	$602,870 40

From which have been declared:—

Dividend, 5 per cent., payable 1st June, 1905	$111,779 29		
Dividend, 5 per cent., payable 1st December, 1905	119,940 28		
		$231,719 57	
Carried to reserve fund from profits	$135,319 00		
Carried to reserve fund from premium on new stock as above	205,421 00		
		340,740 00	
Allowance to ex-president authorized by the shareholders		5,000 00	
			577,459 57
Balance of profit and loss carried forward			$ 25,410 83

The directors have pleasure in pointing out that after paying the customary 10 per cent. dividend, they have been able to place to reserve fund out of profits, the substantial sum of $135,000. The year's earnings are, in the opinion of the directors, very satisfactory indeed, considering that out of the year's profits the maximum estimated loss ($90,000), which the bank has sustained by the embezzlement and forgeries of T. Hillhouse Brown, has been provided for.

The directors beg to report that the progress of the bank still continues in a marked degree, and that, while they had thought it prudent to open during the year a few new branches in Ontario and Manitoba, in recognition of the rapid development of the country, they had mostly confined themselves to the strengthening and building of the business at the various points at which offices had already been established. It is proposed, however, to ask of the shareholders, at the annual meeting, power to increase the capital of the bank by $500,000, in order that the directors, in case it become advisable, may be in a position thus to provide for the future growth of the bank's business.

The directors have noted the growing tendency on the part of banks and other corporations to pay dividends quarterly, and, believing that such a practice may become more or less general, have decided to adopt it, and propose hereafter to declare dividends every three months.

Wm. Gibson, President.

Hamilton, 18th December, 1905.

GENERAL STATEMENT.

Liabilities.

To the Public—		
Notes of the bank in circulation		$ 2,279,755 00

J. Turnbull,
General Manager.

Bank of Hamilton, Hamilton, November 30th, 1905.

In moving the adoption of the annual report Hon. Mr. Gibson said:

Gentlemen,—Your board of directors beg to express the pleasure they have in being able to present the report to the shareholders. During the whole history of the bank, covering a period of thirty-four years, this year would have been the best and the most successful that we have ever enjoyed but for the unfortunate incident in connection with our East-end branch in this city. Had that not occurred our net earnings would have been 19.30 per cent. on our capital, and, notwithstanding that we had to make provision for that loss, the net earnings of the year are 15.42. After deducting the loss of $90,000 already referred to, our earnings for the year are considerably greater than the average for the past ten years. In the period from 1875 to 1885 the rate of earnings was 10.1; 1885 to 1895, 11.03; 1895 to 1905, 13.98. I invite the attention of the shareholders to the fact that every dollar earned by the bank, except what has been carried to rest, has been paid to the shareholders, and that the misfortune of the past year in the East-end branch is likely to fall on the employees more heavily than upon the shareholders, for, as you know, though the bank has had under consideration, and it is still its intention, to establish a pension system, such has not yet been begun.

During the year new agencies have been opened at College Street and Ossington Avenue, Toronto; Toronto Junction, Carberry, Kenton and Killarney, Man.; Battleford, Sask.; and at Fernie, B.C. While we have been somewhat conservative in opening new branches, we have been endeavoring to strengthen those where we already have agencies. It may be said that some of the places where we have opened branches are small in the matter of population, but it must be remembered that they are in growing centres, surrounded by rich country, and that the prospect for increased business in the future is very bright. The directors have great faith in the country. I am very glad to notice that the bank is popular with the investing public. Last year there were 645 shareholders on our books, and this year the number is 713, showing that the stock is going into the hands of the investors.

At the same time we have made sixty-eight new friends for the bank.

By the report I have just read you will see that it is proposed to increase the capital stock by $500,000. During the last six months a quarter of a million dollars was taken up at a premium of 100 per cent. The same care will be exercised in issuing the new stock only as the business of the bank requires it.

Now, in regard to the incident in the East-end. Much comment and criticism have been indulged in. I had been away from the country at the time, but I want to say for the members of the board that they acted like men in the best interests of the public and of the bank. The board determined to give the public the result as soon as the result could be ascertained. Our inspection is as rigid as that of other banks. You can do something with the staff of the bank when the agent is honest, but when the agent is not honest, and adds forgery to his stealing, the bank is largely at his mercy. You have to trust the people employed by you, and we have to depend on the fidelity of our agents, and while one man has proven false, the 399 other employees of the bank have not, and we have confidence in them. You

may say that the inspection is not rigid enough; I believe that you may have too much inspection. If you let an agent think that he is being spied upon he will probably sit and do nothing, and your business is bound to suffer. Now, in regard to quarterly dividends, I need not say much—they cannot come too often.

Mr. John Proctor seconded the motion, which was carried unanimously.

On motion of Mr. Samuel Barker, M.P., seconded by Mr. John A. Bruce, the following motion was unanimously carried.

"That the thanks of this meeting be given to the president and directors for their services during the past half-year." Carried and replied to by Hon. Mr. Gibson.

Mr. W. A. Robinson moved, seconded by Dr. Russell:

"That the thanks of this meeting be given to the general manager, assistant general manager, inspectors, agents, and other officers of the bank for the efficient performance of their respective duties."

This was carried, and responded to by Mr. Turnbull.

Hon. Mr. Gibson moved the adoption of the by-law to increase the capital stock from $2,500,000 to $3,000,000. Mr. John Proctor seconded the resolution, and it was carried unanimously.

The scrutineers reported the following gentlemen unanimously elected directors for 1906: Hon. William Gibson, John Proctor, Hon. J. S. Hendrie, George Rutherford, Cyrus A. Birge, C. C. Dalton, and J. Turnbull.

At a subsequent meeting of the directors, Hon. William Gibson was re-elected president, and Mr. J. Turnbull vice-president.

❧ ❧ ❧

NORTH OF ENGLAND LETTER.

London bank clearings tell a flattering tale. In grand total they aggregated for 1905 almost 12,288 million pounds, which figure is both larger than ever and a larger increase on immediate precedent than ever. The improvement is of 1,724 million pounds sterling, of which 534 millions are traceable directly to Stock Exchange account days. Exactly how much may be attributed to the large foreign loan transactions and to Treasury bills cannot be estimated. From the fact that country cheque clearances, constituted chiefly of commercial payments, were greater by 46 millions, it may be believed that business has really been more healthy. And in talking with miscellaneous business men one finds no cause to doubt these appearances. Business still is better, and if it be not better again during this year many expectations will be falsified. Canadians opening in these markets have at least excellent auguries on their side in the improving state of economic conditions.

Canadian cotton manufacturers are understood to envy large profits. The impression here is that they stand out for returns which a Lancashire man would hardly dare to anticipate. Be that as it may, our own cotton spinners are finding themselves in the hot waters of inconsistency. For years they have cried poverty with one breath, and by lumping old and new, good and bad, mills together they actually did make a plausible case. The demolition of four million spindles between 1892-97, the rapid growth of industry on foreign soil, the poor returns of the coarse yarn mills and so forth were leading items in their litany. When operatives wanted more wages, an effective display of the employers' woes was quickly made. One does not say that these were always exaggerated, but since the fiscal system has been challenged, the cotton-lords have sung another tune and rather injudiciously. They have preferred to parade their successes, and numbers have been at pains to show that really the cotton trade has done famously well. Needless to say these recantations of old professions have been found absorbingly interesting by operatives' leaders. And one of these days we shall see the glowing versions which were prepared strictly for political employment used for a commercial purpose. The instance conveys its own warning.

Deputations have lost no time in applying persuasion upon the new President of the Board of Agriculture. He is enjoined both to maintain and to remove the embargo on Canadian cattle. What will be done is yet unknown, but by way of intelligently anticipating an event that has not yet occurred, one may hazard the suggestion that Lord Carrington will try to please both sides. It would not be uncharacteristic of the man or the Ministry to ease the restriction to an extent. On conditions that would not be untrammelled, the new chief of department might make importation possible. Considerations of Canadian feeling and the natural desire of Liberals to show that they are not unfriendly to colonial sentiment would go with a temptation to cheapen beef and please the cattle dealer. While farmers in certain districts would be incensed by relaxation of the rigor of the regulations, it would manifestly be a ticklish thing for Unionists to oppose the measure in public.

Under encouraging prices the British farmer is enlarging his flocks and herds. Of sheep we have still two millions fewer than six years ago, but there are more horses and more cattle than ever in the United Kingdom. An increase of 42,000 cattle gives no great promise perhaps of benefit to the tanner, who has had the utmost difficulty in possessing himself of hides. But there is the fact that British cattle number only 13,000 less than seven million head. Of horses we have 1,572433, and of sheep some 29 millions. The favorable fall of 1904 in part accounts for the striking increase last year in the acreage under wheat, which was enhanced by 30 per cent.; barley and oats by six per cent. each, and rye by 11 per cent. Once more, England returns to the cultivation of the potato, and now we are not seriously behind the record of 1871. To growers of potatoes the British market has the interest attaching to its external purchases of between 250,000 and 500,000 tons per annum.

One class of people in this country do most utterly and unreservedly believe in the efficacy of advertising. They are the persons who manage our elections, and in the electoral conflict now raging, the partisans have outdone themselves. The country is aflame with gaudy cartoons and paved with handbills whose flimsy texture can only be likened to their flimsy contents. Printers have little cause to regret that the issues are so many and various that to present them in all lights to all people taxes human compass. Whether the world would be any pleasanter if we all believed so perfervidly in advertising at all times, one hardly knows. Experience has shown party managers of all degrees that at least elections cannot be successfully conducted by non-advertisers competing against advertisers. Effects may be as far distant from direct causes in political advertising as in commercial. But if the effects cannot be analyzed and examined in relation to particular individuals, they show up without leaving room for question in the actions of the mass.

The insured who loses a hand at work, or by accident, is distinctly more likely to lose his right than his left. An Eng-

lish office took alarm on finding that its claims for loss of left hands were in aggravated disproportion. For every dozen rights, one hundred lefts were lost, and in these circumstances it seemed politic to change the terms of policies. The office abandoned its practice of paying over one-third of face value for loss of either hand, and this step had the singular effect of rectifying the rates of right to left. If the claimants were not actually malingerers they had perhaps heard of those artists in feigning fits and seizures who never recover until the brandy is done and until the chances are slight of obtaining more.

FIFTH INTERNATIONAL CONGRESS OF ACTUARIES.

The fifth International Congress of Actuaries will be held September 10-15, 1906, at Berlin. The previous Congresses of the kind were at Brussels, September, 1895; London, May 1898; Paris, June 1900; New York, August-Sept. 1903.

The Hon. President of the Congress will be the German Imperial Secretary of the Interior, His Excellency, Dr. Count von Posadowsky, and the officers of the organizing committee: Dr. Hahn, Madgeburg, president; Dr. Ehrenberg, Gottingen, 1st vice-president; Ritter von Rasp, Munich. 2nd vice-president; Dr. Manes, general secretary, Spichernstrasse 22, Berlin. Mr. Israel C. Pierson is the correspondent for the United States and Canada, room 1307, 141 Broadway; telephone, 6229 Cortlandt; cable address, Phelpspier, New York.

The subjects of the papers to be read and discussed are: Industrial insurance, and insurance of children. Extra premiums for hazardous risks, impaired lives, war risks, etc. Mortality tables for annuitants. Insurance of abstainers and those engaged in the manufacture or sale of alcoholic beverages. Insurance of women. Taxes imposed upon insurance companies. Kinds of insurance if any, which should be prohibited. Mortality investigations. Graduation of tables of mortality. Instruction in actuarial science in colleges and universities. Insurance legislation. Calculating machines. etc. Uniformity of reports to insurance authorities.

Reports to be presented by the German authorities consist of the following: Apportionment of dividends by life insurance companies. Criticism of the mortality tables generally. Insurance of working classes. What is invalidity from an insurance point of view. Regulations for disability annuitants. Duration of life among the German population.

One not qualified for membership may become a subscriber to the Congress on the payment of $4.00 (by draft on New York or by postal order), and will be entitled to receive a copy of the transactions. which will contain the papers read, discussions, proceedings and minutes of the Congress, in the three languages, German, French and English. The papers and discussions on the subjects mentioned above will undoubtedly be of permanent interest and value to the companies, to actuaries and students, to public and private libraries, and to colleges and universities giving instruction in actuarial science.

* * *

A CURIOSITY.

A correspondent has sent us an extract from the "Quebec Gazette" of September, 1808, which makes interesting reading. Upon communicating with the head office for Canada in Montreal of the Pelican and British Empire Company, we are informed that the files have been carefully searched, and it seems clear that the wording of the notice correctly indicates that the Pelican Company was the first life assurance company of any nationality to operate in the New World. There is a delightful flavor of the eighteenth century about this document. (N.B.—The Pelican was founded in 1797). Witness the mouth-filling phrases, the "words of learned length and thundering sound," as Goldsmith called them, which go to make up this century-old homily on the benefits of life assurance. One would think the writer a disciple of Dryden or Dean Swift, perhaps of Doctor Johnson. The second sentence seems to bear a resemblance to the Declaration of American Independence. And further on one finds some good old words—"recourse," "solicitous," "bequeath," "decent," "subsistence." It was written, we must remember, at a time when Lower Canada had only 250,000 people and Upper Canada 70,000, and before the first steamer ran on the St. Lawrence between Quebec and Montreal.

Extract from the Quebec Gazette.

(Dated Thursday, 1st September, 1808.)

Life Insurance.—To Parents, Guardians, and Others, desirous of securing a Provision against Sudden Death.—The utility of Institutions to enable the various classes of a Mercantile Community to provide for their families and dependents, in case of premature or unexpected death, is too obvious to require an enlarged exposition. In the pursuits of life a principal anxiety with every one is to secure either by frugality or foresight, the means of independence and comfort to his family; but the most laudable and industrious exertions to accumulate a small fund, for such purposes, are frequently defeated by the sudden death of the individual, and poverty and destitution as often fall upon those who depended upon him. All income arising from talents and personal exertion must be liable to prove inadequate to such objects, unless some security is at the same time provided to prevent a disappointment from its failure. The means, however, of rendering the attainment of such views certain, are easily supplied by recourse to Life Insurances; and it is, accordingly in Europe generally resorted to by persons who, possessing life incomes only, are solicitous to bequeath to their families the means of a decent and independent subsistence.

The Pelican Life Insurance Office, of London, is one of the most solid and and respectable foundations of the kind, and is the first that ever offered to the inhabitants of America a facility of making insurances upon moderate and equitable terms.

To persons unacquainted with the subject the principle of such insurance may be easily explained. It is that of paying a certain annual sum to the Office, for which it engages, in return to pay to the heir, assigns, or legatees of the assured an equivalent amount at death. Thus, for instance, a person whose age does not exceed twenty-one, by paying annually, during life,, £33:7:6 may secure, beyond the power of contingency, the sum of £1000 sterling, which he may leave to his widow, or any other relation or person, or appropriate it, in the hands of trustees, for the education of his children; or, in short, dispose of it in as absolute a manner as any other property. It will be obvious, therefore, that this mode of accumulating the savings of an income is preferable, in many cases, to any other, inasmuch as it enables a person to secure a fixed sum, subject to no chance of casualty.

Persons who borrow money on personal loan Supercargoes or Captains of Ships, will, in many instances, find conveniences in having recourse to such policies as they furnish good collateral security for debts. In many other ways Life Insurances contribute greatly to the conveniences of the public. The Premiums charged for such Insurances are calculated according to the age of the party, and other circumstances which affect the value of the risk. The terms generally, as well as other particulars on the subject, may be learnt by enquiry of the undersigned, who will be happy to transact any business of this kind which may be proposed to them.

At Montreal to A. AULDJO.

At Quebec to W. VONDENVELDEN.

Quebec, 27th August. 1808.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

THE BANK THIEF BANWELL.

The misguided bank clerk Banwell, of Toronto, has been traced by detectives to various United States cities, then to Cuba, and was last week arrested in Jamaica. Some $36,000 out of the $40,000 he stole has, it seems, been recovered. The young woman whom he took away, and who is said to have been married to him in Buffalo, was found with him in Jamaica, and will be brought back to Toronto. Appearances indicate that she was not particeps criminis, but was shamefully deceived. Whatever punishment the law may mete out to him, the suffering of his companion must be lasting. The bank has spared no effort or expense to trace him by the employment of both Canadian and American detectives. And it is well that such bold thieves should know that they will be relentlessly pursued wherever they may strive to hide. The case suggests that it would be a proper thing for the banks of the city to unite in an arrangement by which the heavy cost of pursuing and punishing bank thieves who get away with their temporary gains should be paid out of a fund to be contributed to by all the banks. We commend this suggestion to the consideration of the chairman of the Bankers' Section of the Board of Trade or to the president of the Clearing House. The American Bankers' Association have an arrangement of the kind for helping to catch counterfeiters, and it has worked wonders.

* * *

CANADIAN LOBSTERS.

The lobster season has been open for a month on the Atlantic shores of Canada, and fair catches are being made. The year 1905 was one of the most successful in the history of the lobster fishing business on our Atlantic coast. The world's lobster packing is, if we do not mistake, confined nearly altogether to the Maritime Provinces of Canada and Newfoundland, for in no other part of the world are these crustaceans found in quantities great enough to warrant canning them.

For ten years previous to 1898, there was a constant diminution in the supply of lobsters in Canada, and fears for the extermination of the crustacean were entertained. But wise enactments for the preservation of the animal and their propagation have about restored the condition to normal. The value of the lobster fisheries of Nova Scotia in the year 1905 was $2,116,000, representing a catch of about 33,700,000 lobsters. The prices realized that year were the highest, it is said, in the history of the trade.

An indication of the value of this portion of our sea coast wealth may be found in the exports for the fiscal year, 1st July, 1904, to 1st July, 1905. During those twelve months the United States took 32,886 barrels of fresh lobsters, valued at $376,336, and 4,514,000 pounds of canned lobsters, valued at $1,059,761; Great Britain took 4,022,000 pounds tinned, valued at $889,608; France, 2,342,000 pounds, valued at $589,392. Belgium, Denmark, Norway, Sweden, Germany, Holland, and nine other countries bought the remainder of our exports of canned lobsters, which amounted last year in all to $2,754,598 in value.

* * *

FREDERICTON BOARD OF TRADE.

The annual meeting of the Board of Trade of Fredericton, N.B., took place on the 8th inst., with Mr. J. J. Weddall, the president, in the chair. This gentleman's address referred to the good work that had been done through the board's efforts in the previous year, and to the improvement in the city in several directions. He also referred to the question of bonusing manufacturing industries upon the propriety of which opinions were divided. However, the city would appear to be in an encouraging mood respecting the location of new industries within its boundaries, more particularly carriage and machine factories. The question which brought forth the most discussion was in respect to fire insurance, and the attitude of the insurance companies came in for some very harsh strictures. The demand by the latter for the purchase of a chemical engine was looked upon by some members of the board as an "excuse to raise rates." It is a curious thing that a lot of business men, sensible and calm upon most other subjects of discussion, are so apt to lose their heads when fire insurance rates are discussed. The old topic under such circumstances of "municipal" insurance came to the fore, but those present were not so foolish as to adopt that will-o-the-wisp. A happy feature of the meeting was the report of the chairman of the New Brunswick Tourist Association, which spoke of the successful work which had been done for the province by means of advertising through postal cards and in the United States papers and magazines. One regrettable point was the decrease in the numbers of incoming sportsmen, owing to the increased fee imposed. Officers for the ensuing year were elected as follows:—

President, J. Weddall; vice-president, George W. Hodge; secretary, J. W. McCready; treasurer, M. Tennant; council, C. F. Chestnut, J. S. Neill, J. D. Phinney, J. E. Palmer, A. H. Randolph, J. H. Randolph, J. H. Barry, J. M. Wiley, F. B. Edgecombe, Geo. Y. Dibblee, J. D. McKay, W. L. McFarlane; tourist committee, C. F. Chestnut, F. B. Edgecombe, J. S. Neill, J. W. McCready, R. P. Allen.

* * *

BERLIN BOARD OF TRADE.

The twenty-first annual meeting of the Board of Trade for Berlin, Ont., took place on the evening of the 11th inst., and was a great success in every way, no less than a hundred members being present and taking a keen interest in the proceedings. The fact indicates a creditable commercial spirit in the place. Mr. C. H. Mills, the president, acted as chairman and referred in enthusiastic vein to the progress made by the town. He also expressed the opinion that Berlin would reach a population of 15,000 in probably less than three years, and thought it would be as well to wait until that time before applying for incorporation as a city.

The election of officers resulted as follows: President, D. B. Detwiler; vice-president, H. J. Sims; secretary, J. A. Scellen; treasurer, W. H. Schmalz; council, L. D. Merrick, C. A. Ahrens, G. M. Debus, W. M. O. Lochead, L. J. Breithaupt, R. Reid, C. H. Mills, Dr. J. F. Honsberger, C. Kranz, M. M. Donald, C. K. Hagedorn, W. H. Leeson, E. P. Gower, Ed. Smyth, W. J. Moody.

* * *

—At a meeting of the share and debenture holders of the Chignecto Marine Transport Railway Company in London, Eng., last month it was decided to extend the trust until January 1911, in order to secure a continuance of negotiations with the Dominion Government looking to a settlement of the company's claims. It will be remembered that the company never fulfilled its part of the terms under which a subsidy was to have been paid it by the Government, though the company claims it was harshly treated by the Government in not renewing the offer after a certain date at which, the former claims, it was ready to proceed with the work.

* * *

—The Department of Agriculture, Ottawa, announces that it will receive applications for space for Canadian exhibits at the New Zealand International Exposition, to be held at Christchurch, New Zealand, November, 1906, to April, 1907. The Dominion Government will erect a special building, to be devoted exclusively to the accommodation of exhibits illustrating the natural and manufactured products of Canada, and offers to pay transportation charges, one way only, on all exhibits which are accepted. Space, installation and maintenance will also be provided free of charge. Mr. William A. Burns, of the Department of Agriculture, has the arrangements in hand.

Mercantile Summary.

The Shovel and Tool Company of Peterboro', Ont., has decided to increase its capital stock from $50,000 to $100,000.

The town of Bobcaygeon, Ont., has decided to purchase Mr. Boyd's water-power and to instal an electric light and power plant at a cost, it is estimated, of $25,000.

The Record Foundry Machine Company at Moncton, N.B., is reorganizing its staffs in Montreal, Toronto and other places with a view to a more active campaign to extend its business.

A dividend of 2 per cent. was declared for the first quarter of 1905 on the capital stock of the St. Eugene Mine, East Kootenay, B.C. The earnings for the mine last year amounted, it is stated, to over $500,000.

It is expected that within a few days tenders will be invited for the construction of nearly 250 miles of the Grand Trunk Pacific Railway from Winnipeg to the point of meeting with the Lake Superior branch from Fort William.

Debentures for Sale

Tenders will be received by the undersigned up to six o'clock p.m , on Tuesday, the sixth day of February, 1906, for the purchase of Debentures to the amount of $15,000 issued by the TOWN OF GANANOQUE. These Debentures are of $1,000 each and one of them will become due and payable on the first day of January in each year till all are paid. Interest at four per cent. per annum will be payable on the first day of January each year on all Debentures unpaid. The purchase money to be paid and Debentures delivered at the Town Treasurer's office in Gananoque. These Debentures are issued to raise money to assist, by way of loan, a manufacturing industry, and the loan is to be repaid to the town at the rate of $1,000 each year.

The highest or any tender not necessarily accepted. Further information if required will be furnished on application to

S. McGAMMON,
Town Clerk.

Town Clerk's Office.
Gananoque, Jany. 10, 1906.

NOTICE

Is hereby given that the Annual General Meeting of the Policy-holders and Guarantors of the

North American Life Assurance Co.

will be held at the Head Office of the Company, North American Life Building, 112-118 King St. West, Toronto, Ont., on

Thursday, 25th January, 1906,

at 11 o'clock in the forenoon,

for the reception of the Annual Report, a Statement of the Affairs of the Company, the Election of Directors, and the transaction of all such business as may be done at a General Meeting of the Company.

Participating Policy-holders have one vote, in person, for each $1,000 of insurance held by them.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

A. E. Vallerand's general warehouse in Quebec city was on the 10th inst. gutted by fire at a loss of $8,000, with insurance of about $5,000.

It is now officially announced that the Canadian Northern Railway will be constructed around the north of Lake Superior, uniting the company's lines in the east with Port Arthur.

A large warehouse of the Dominion Coal Company at Caledonia Mines, Sydney, N.S., containing a quantity of mining supplies, was last week destroyed by fire at a loss of possibly $7,000, covered by insurance.

Mr. Wm. Bruckhof, of St. John, N.B., proposes to establish a billet mill in connection with the Portland Rolling Mills in that city. He figures roughly the cost of a plant, with a capacity of 10,000 tons, at $200,000, and at least another $100,000 would be required for working capital.

The Simmonds Manufacturing Company, of Fitchburg, Mass., is, we understand, about to take over the Canadian Saw Company's shops in Montreal, St. John, and elsewhere. It will conduct its operations in this country under a Dominion charter, and in the name of the Simmonds-Canadian Saw Company.

The Fredericton Boom Company held their annual meeting on the 9th inst. The directors' report showed that business last year was conducted at a loss of $21,913, owing to extra expenses incurred in dislodging a large quantity of logs which had jammed, also to high wages and to the small diameter of logs causing heavier cost for rafting them. President R. F. Randolph and Secretary Jewett were re-elected.

The people of Dunnville, Ont., and vicinity have the advantage of being able to obtain gas by boring at comparatively light expense, though it is alleged that the Dominion Gas Company spoils private wells by sinking other wells in their close neighborhood and exhausting the field. Now Mr. F. R. Lalor, M.P., proposes a scheme for the municipality to enter the gas supply field and to furnish it at 10c. per thousand.

A subscriber sends us the assignee's statement in the matter of Jos. W. Dawson,. insolvent, of Hamilton. This gives receipts:—Sale of stock at 50c. on the dollar ($191.39), $95.69, and rent of dwelling (Dawson), $30; total, $125.69. Payments:—To Kerr & Thomson, legal expenses, $35; rent, preferred claims, $55; insurance, $1.44; cartage, $1.20; assignee's fee, postage, etc., $15.20; first and final dividend, 5c. on the dollar ($356.97), $17.85. And he asks: "What do you think of $35 legal advice to assignee to secure less than $18 to creditors?" Unless we know what was done to earn that $35 we cannot offer any opinion upon its proportion.

Mercantile Summary.

The North-Western Gas and Oil Company, it is said, have succeeded in striking gas in the eastern part of Edmonton, Alta., at a depth of 1,450 feet. The business men of the city are naturally rejoiced at the prospects opening up before them of cheap light, heat and power.

The Dominion Government has granted the request of a large proportion of the citizens of Morrisburg, Ont., that the town should acquire the surplus water-power, amounting to about 750 horse-power, from the canal. A large part of the available power is to be utilized by the tin-plate industry which is to be established in the town.

The Canada Chemical Manufacturing Company have decided to erect somewhere in Central Ontario, probably in the vicinity of the Marmora mining region, a large plant for the production of sulphuric and nitric acids and of sulphur by-products. Quantities of sulphur ore exist near Marmora, and it is believed that it can be produced in this country in sufficiency to take the place of that imported from Sicily and South America.

A conspicuous departure in the lighting of canals is that of the Welland Canal near St. Catharines, Ontario. Over 600 A.C. series arc lamps have been provided by the Canadian Westinghouse Company, and these have been in operation for the past few months and, we are told, have given excellent service. This installation as a whole reflects great credit upon the Ontario Government, as well as on the consulting engineer, Mr. R. J. Parker, under whose direction the complete plant was installed.

The C.P.R. announces that it hopes to complete the connection of Wetaskiwin, Alta., with Saskatoon, Sask., next summer, and then an additional 150 miles will be built east from the latter point towards the present terminus of the Pheasant Hills branch at Strassburg. Besides these extensions, which will practically give the C.P.R. a second transprairie line, there will be construction work on north and south extensions on the main line, which will run north from Moose Jaw. Twenty-eight miles will be constructed. On the Wolseley-Reston branch forty-five miles will be ready for the operating department. It is reported that engineers are working westward from Wetaskiwin toward the Yellow Head Pass.

Mercantile Summary

The Ontario Government has granted a charter to J. L. Spink, Limited, which, with a capital of $100,000, will carry on a milling, elevator, grain and produce business, manufacture and deal in foods, sell fertilizers, etc.

The assignment is reported, to J. K. Dowsley, of F. M. Scott, who has carried on a creamery business on quite a considerable scale several miles from Prescott, Ont. He is said to owe about $35,000, while showing nominal assets of $38,000.

The orders for equipment for the Canadian Northern Railway which are to be delivered during the present year, embrace 1,000 box cars, 400 flat cars, 50 stock cars, 30 first-class day coaches, 16 baggage, mail and express cars; 5 sleepers, 2 diners and 44 high-class freight and passenger locomotives.

English as well as Vancouver and Victoria, B.C., capital is said to be behind some large plans for the erection of iron and steel furnaces and mills on the north arm of the Fraser river at Eburne, to give facilities for the reduction of the large magnetic ore deposits along the Pacific coast by an electrical process. Samples of iron and steel turned out at Pittsburgh from this ore are described as being of fine quality, and it is believed that the cost of production will be comparatively small. A good deal of preliminary and survey work is understood to have been already done.

A demand of assignment has been served upon Philippe Maher, of St. Guillaume d'Upton, Que. He was formerly engaged in the hay business, and in 1903 started storekeeping with a stock of groceries, hardware, etc.—G. Berubé, a repatriated Canadian, formerly working in the State of Maine, started up storekeeping in a small way at St. Pamphile, Que., about two years ago. He apparently had little capital and less experience, and his assignment is now noted. He might have done better for himself and his country to stay away, rather than further crowd the ranks of storekeepers.

The Canadian Pacific Railway is believed to be making preparations to establish an important terminal at Victoria Harbor, on Georgian Bay. The branch line to that point would connect lake freighters with the main line at or near Peterboro' by a short run across country on easy grades. Victoria Har-

bor would, therefore, become, if not the chief point of transhipment of freight from lake bottoms, at least one of the chief points. When the second track between Winnipeg and Fort William is ready for operation a large grain fleet can be kept busy on the lakes, and that will naturally call for far greater accommodation on the east side. Victoria Harbor affords the shortest and most economical possibilities for connection with the main line eastward, and it is probable, therefore, that the bulk of the shipments for export will pass through the elevators to be built there.

* * *

"TORONTO THE GOOD."

It is perhaps not an unwarranted thing, it may even be a good thing, to have a complacent and self-righteous community stirred up and brought to realize its faults. People in our midst and a few elsewhere have long spoken of this city as "Toronto the Good," and although we consider it, compared with others, by no means a bad city—we speak now under correction from the moralists—there are occasional revelations about its inner life which should prevent our regarding ourselves as perfectionists, or indeed as very much holier than other people. The ministers of the city appear to be encouraged by the denunciations of two evangelists now holding meetings in Massey Hall to launch out in stronger terms than usual against its dwellers. Rev. J. B. Silcox, in the Bond Street Church, declares that this city is "hypocritically called Toronto the Good," and expresses himself further thus: "A minister who knows the city better than I do, told me Toronto was full of thieves. Look at the tack combine, and the plumbers' combine, and the druggists' 'merger'—just a more fragrant term for the same thing—these show the lack of business morality in our midst." If the reverend gentleman has any parishioners among the druggists, he will be apt to hear more of his inapt comment on them. But leaving the merchants, he next "goes for" the merchants' customers, and says indeed that the working force, the exemplars, of the Christian Church are not 20 per cent. of its members, and that they need converting as much as the sinning business men. He does a good turn for the retail merchants, however, when he urges people to pay their debts. "In Wales, now, people are paying their old debts. There are a lot of storekeepers

Guarantee and Fidelity BONDS

are as necessary in business as fire insurance.

The smooth operation of a business system is liable to many interruptions, and recent reports would indicate that fire is not the only element which encroaches stealthily and makes devastating sweeps.

Every employer should protect his own interests under the form of insurance a guarantee bond affords.

Every employee in a trusted position should extend to his employer the protection and security a guarantee bond insures.

In this matter write or consult with the institution most widely and favorably identified with this class of business.

London Guarantee & Accident,
LIMITED.

in this town who would be glad if religion would sweep over it and make people pay their debts." Some of Dr. Torrey's scathing phrases make rather a lurid contrast with the Beatitudes, but it is possible they are needed. They remind one of Sam Jones, or Sam Small, former American evangelists, one of whose watchwords to his audiences was "Quit your Meanness—Quit your Meanness." And doubtless there is always more or less "meanness" amongst us, which it would be well to "quit."

* * *

TORONTO MARKETS.

Toronto, Jan. 18, 1906.

Drugs, Chemicals, etc.—No appreciable change has taken place in the position of most of the staple lines, and values are steady. No great volume of business is being done, however. In New York, business has a tendency to dullness according to latest reports. Baltimore chemical advices are still strong.

Dry Goods.—Wholesalers are completing the laying in of spring stocks, and are looking forward to a fine season's trading. Heavy winter goods have shown a natural slowness in selling, in keeping with the weather, but this has not been so markedly the case in outside points as might have been expected. Woolen, cotton and linen staples are still exceedingly firm—cottons, perhaps, not quite so much so as they have been, but without any dragging tendency. Raw cotton still fluctuates considerably, and undoubtedly highly speculative influences are at work. Even should it go considerably lower, however, of which there is no particular indication, it would hardly be expected to have any immediate influence on finished goods.

Flour, Grain, etc.—A dull market prevails for flour, and ninety per cent. patents fetch $3.10, in buyers' bags. Offerings of Ontario wheat continue light, but there is not much demand at the moment from local millers. Manitoba wheat is firmer in sympathy with the market quotations in Winnipeg and Chicago. Bran and shorts are in light supply, and prices are quoted very strong. Oats are firmer on some degree of scarcity. Barley also is more asked for. In rolled oats the tone is easy, and no great business is being done.

Fruits.—For this time of the year, which usually is not the busiest, there is a fair demand for all seasonable fruits. Oranges keep steady in price. Apples are comparatively scarce, and fetch full prices. A report from Liverpool, referring to the apple shipping season up to December 30th last says: The first part of the season closed today, arrivals to date being 663,342 barrels, as against 672,835 up to the same period last year. The prospects this year have proved, as was anticipated, the exact reverse of last year, when the English crops of apples and all other fruits were a record. The promise of an early demand was fully realized, at prices showing an advance upon the opening rates of the previous season of 3s. to 5s. per barrel. The position was made more secure by the generally satisfactory condition of arrivals, both by careful packing and by better ventilation and handling on the steamers, as also by avoiding such early varieties which experience has demonstrated cannot be shipped to land in saleable condition. Comparatively few apples from New York district have been sent, the bulk of supplies being from Maine, New Hampshire and Canada, the quality of which was excellent; although Baldwins from the two first-named districts were small, which is a serious fault. Nova Scotians have been in small supply, and arrivals of Virginians had not their usual attractiveness.

Hides and Skins.—Hides are coming into this market with more freedom, and prices in Chicago are easier; notwithstanding these features, however, prices here remain as before. There is no change in tallow. No great improvement in leather is reported, the open weather being inimical to any heavy demand.

Live Stock.—Active conditions again prevailed this week. There was a good demand for choice specimens of exporters in spite of bearish reports from across the Atlantic. Prices are unchanged, though buoyant. With regard to butchers' animals, in some cases a slight advance was recorded, and the general tone of the market was distinctly good. Good milch cows are in demand. Calves were rather scarce, and fetched good prices. Prices for hogs advanced 15c. The demand for sheep and lambs was more pronounced, and all sold early.

Groceries.—No special feature of interest has developed since our last report. A fair to good trade is being done, and the movement of staples to the rural districts is fully up to normal. Canned goods are in request at firm prices. The demand for dried fruits has slackened off a little. Sugar dropped 10c. per cwt. in all grades, in keeping with a similar drop in New York.

Provisions.—There is plenty of butter in local market, though quality is often not A1. Prices are rather high still. A report from Liverpool of ten days ago said that strictly choicest continued exceedingly scarce, and in demand at full prices. Secondary grades were also in good request at hardening values. Medium and confectionery butters were in small supply, and demand is somewhat enlarged. Of cheese the same report says it had been in fair demand, and the tone was exceedingly strong. A further advance was anticipated, as retail dealers were not stocked, and must come into the market to replenish. The published stock in Liverpool December 30th was 94,775, but in a great many quarters was believed to have been overestimated. Medium cheese was in good request. Mild weather has brought a greater abundance of eggs, and prices are easier in consequence.

Seeds.—Not much is being offered, and business is very dull. For best red clover the quotation is $7, or slightly less: for poorer and mixed grades quotations are much lower. Alsike is $6 to $6.50, or higher for extra fancy.

LIFE INSURANCE IS THE ONLY ONE OF A MAN'S ASSETS THAT HIS DEATH AUTOMATICALLY CONVERTS INTO CASH.

One of the most stringent rules of the Great-West Life Assurance Company is that calling for the UTMOST DISPATCH in settling death claims. The booklet "Appreciation" comments on the promptness and liberality with which such claims are met. Ask for a copy.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, 17th Jan., 1906.

Ashes.—There are few offering, and very little enquiry, so that values are more or less nominal; $5.25 would now be considered the outside limit for No. 1 pots, with second pots at about $4.75, and pearls about $7 per cental.

Dairy Products.—Business in these lines is of a rather quiet character. Owing to the prolonged mild weather and somewhat free receipts butter values are a shade easier, choicest creamery being quoted at 23 to 23¼c.; under grades, 21½ to 22½c.; dairy, 20 to 21c. Actual business in cheese is of a limited character, with the quotation for finest Westerns held at 13 to 13½c. per pound.

Dry Goods.—Deliveries of spring goods are now being made in fair volume, and country orders from travellers are coming in well, but city retailers are busy with January clearing sales, and commands from this quarter are not numerous. Some representatives of Roubaix dress goods manufacturers are in the city, and are reported as quoting advanced prices for their wares, and there is a continued tendency to firmness all along the line.

Furs.—The London January sales open on the 22nd, Monday next, and the offerings of Canadian and American furs of all sorts are much smaller than usual. Lampson's report offerings of 64,000 coons, 1,500,000 muskrat, 56,000 mink, 11,500 marten, 280,000 skunk, 150,000 possum, 10,000 red fox, 6,000 grey fox, 9,000 lynx, 4,200 beaver, and 15,500 ermine, with a fair proportion of Australian and Eastern furs. prices are quoted as follows for strictly prime skins: No. 1 large beaver, $6 to $7; medium ditto, $5 to $5.50; kilts, $2; black bear, $15 for large No. 1, $10 for medium, and $5 for small; badger, 40 to 60c.; fisher, $6 to $7 for fine dark; red fox, No. 1 Northern, $3.50; Eastern and Ontario, No. 1, $3; No. 1 silver fox, $100 to $175; cross fox, $7 to $10 for dark; wolverine, $7 for No. 1 dark, other grades, $2 to $5; lynx, $6 to $7 for No. 1; Marten, Western and British Columbia, No. 1, $6 to $7; Eastern ditto, $4.50 to $5; mink, $6 to $8 for large No. 1, and $4 to $5 for medium; winter rats, 15 to 18c. for large; other No. 1 large dark Labrador, $30, and $15 for Western; coon, $1.75 to $2.50; skunk, $2 for No. 1 prime black, $1.50 for short stripe, other grades 30 to 75c.

Groceries.—Business rules on the quiet side, and with the large French houses preparations are in order for stocktaking. The only notable feature of the week is a decline in sugars of 10c. a cental, making standard granulated $4.20 in barrels, and $4.15 in bags, with No. 1 yellow $3.80 in barrels, and $3.75 in bags. Molasses is unchanged. Dried fruits are dull, with some easiness in seeded raisins. Evaporated apples are very firm at 10 to 10½. in a jobbing way. Canned goods are also firmly held, 95c. to $1 being asked for tomatoes, and 85c. for corn.

Hides.—While quotations for beef hides are a little easier, this is, no doubt, largely due to a falling off in quality usual at this time of the year. We quote 12c. per lb. for No. 1 beef hides, and $1.10 each for lambskins.

Leather.—Moderate demand for stock is reported from local manufacturers of boots and shoes. Though hides are apparently a little easier, leather values are, if anything, firmer than ever, and sales of No. 2 manufacturers' sole are claimed at 25½c. Black leathers are also very stiff, 23 to 24c. being asked for best Western splits; Quebec splits are reported scarce. For buff and pebble as high as 15½ to 16c. is quoted, and from 33 to 34c. for harness.

Metals and Hardware.—The demand in these lines is reported excellent, with generally steady or firmer prices. Bar iron is again advanced, from $2.02½ to $2.05 being quoted in a jobbing way. Steel is unchanged at $2.10 for sleigh shoe, and $2.20 for tire. As recently anticipated, boiler plate is now dearer at $2.40 for quarter inch and thicker, and an advance is expected in iron pipe. Sheets are all steady at last week's figures. Lead is easier at $4.70 to $4.75, but antimony is recovering from late decline, and is advanced to 15½ to 15¾c.; tin is firmer at 39½ to 40c.; copper, 20½c.; spelter, 7½ to 7¾c. per pound.

Oils and Paints.—Orders for spring delivery are coming in well. A further strong advance is reported in linseed oil, and quotations for raw and boiled are now 53 and 56c. per gallon, respectively. Turpentine is rather firmer at 94c. Owing to the high prices of copper Paris green is dearer by 3 to 4c. per pound than last year, being quoted now at 18c. in bulk, and 19c. in one-pound packages. Leads, window glass, etc., are firm at last-quoted figures.

MONTREAL TELEGRAPH COMPANY.

The Montreal Telegraph Company held their annual meeting on Friday last, the chair being taken by Mr. Wm. Wainwright, in the absence of Mr. Hugh Allan, the president.

The annual report showed the gross assets to be $2,288,000, made up as follows: Telegraph lines in Canada and the United States, $1,625,890; telegraph cables in Canada and the United States, $33,487.39; telegraph offices and equipment of offices in Canada and the United States, $212,500; real estate in Montreal, Ottawa, Quebec and Toronto, $279,946.46; cash, accounts receivable, bonds and other securities, and real estate, $136,384.66. The assets include stockholders' capital to the amount of $2,000,000, and excess of value of property over and above the amount of the capital stock. The company's property is operated and maintained by the Great North-Western Telegraph Company of Canada. Its operation and maintenance being guaranteed also by the Western Union Telegraph Company, of New York, under an agreement with this company for 97 years from the 1st July, 1881.

At the meeting the old board of officers and directors were re-elected, as follows:—Mr. Hugh A. Allan, president; Mr. A. T. Paterson, vice-president; Messrs. W. R. Miller, William Wainwright and William Macmaster, directors.

Mercantile Summary.

The Winnipeg, Selkirk and Lake Winnipeg Railway is making a proposition to the city to extend into the heart of Winnipeg and establish terminals there.

That is a good idea which has been given expression to in Galt by Mr. Goldie, of the Goldie & McCulloch Company, to beautify the town. Planting of trees, flower beds, vines, etc., will be particularly encouraged, besides the making of lawns, hedges and boulevards. The guild is not intended to be confined to employees of that firm, but is for all citizens interested in making their homes and the town prettier.

The Farrar Transportation Company have decided to build a large steel carrier for the 1907 trade. It will be 486 ft. in length and of 9,000 tons.

Minneapolis capitalists talk of establishing a large factory in Galt, Ont., for the manufacture of a patent form of platform gear for use on waggons, drays, lorries, etc.

Despatches in the British Columbia newspapers speak of the present prospects of mining on Texada Island as being particularly rosy. The Marble Bay Mining Company is doing some extensive development work, while several other concerns, mostly with Seattle capital, are said to be about to enter the field.

Emile Schwartz, of Montreal, carrying on the manufacture of fancy leather goods, under the style of the Champion Manufacturing Co., has been obliged to assign. His wife has been registered as the legal proprietress of the business, owing to old complications when he was engaged in a similar business several years ago with his father, Jacob Schwartz.

Good news for the taxpayers of Sherbrooke was given out at the latest meeting of the Sherbrooke city council, when Mr. D. O. E. Denault, chairman of the Finance Committee, made an informal report that the year had been a most satisfactory one. There would be, he declared, a surplus of $4,720 of revenue over expenditure. He believed a reduction of one mill in taxation might be made.

The Temiskaming Railway Commission has decided in favor of the electrification of that railroad from North Bay to Blanche River, some thirty-eight miles north of New Liskeard, the power to be obtained from the water powers along the route. The work is expected to cost in the neighborhood of $1,000,000. It has also been decided to make a junction with the Grand Trunk Pacific at a point 235 miles north of North Bay. Progress in the construction of the Northern Ontario road is very rapid being greatly helped by the mildness of the winter.

One of the most serviceable and welcome presents The Monetary Times has received this year is a copy of the Year Book for 1906 of the United States Fidelity and Guaranty Company, of Baltimore. We thank Mr. A. E. Kirkpatrick, the Canadian manager, for his courtesy. The book has 352 pages, with a proverb or comment for each one of the 313 week days of the year, commending corporate security in preference to personal. It takes a liberty with Scripture sometimes, as where it renders Proverbs 13:15, "The way of the transgressor is *not* always hard, or rough"; and with Don Quixote, where it translates "Honesty is the best policy," as "Honesty is the best policeman." But these, we assume, are some of the bubblings over of American humor.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

Marmora DEBENTURES

Tenders will be received by the undersigned up to 6 p. m. on Monday, February 12th, 1906 for the purchase of $5,500 Debentures of Village of Marmora. These debentures will bear interest at the rate of four and one half (4½) per cent. per annum. Principal and interest will be payable in equal annual payments of $422.78 for 20 years. The highest or any tender not necessarily accepted. Tenders will be received for only the whole issue.

For further particulars address
RENDOL SNELL,
Village Clerk,
Marmora, Ont.

Marmora, Jan. 11th, 1906.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY TH STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	Per day in Increase of Assets.

A few good producing agents can secure liberal contracts in desirable territory.

Head Office, — LONDON, Ont.
JOHN MILNE, - Managing Director.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Home Office - Toronto, Ont.

AN IDEAL POLICY OF LIFE INSURANCE.
The 20-Year Premium Endowment Plan
ISSUED BY THE
ROYAL-VICTORIA LIFE INS. CO.
Head Office, Montreal.

This policy is a model of simplicity. The Endowment feature is the return of the actual premiums received by the Company. The insured has his life insurance for the interest on his premiums and his full premiums returned, if living. **There are no estimates. Everything is guaranteed.** This is permanent life insurance. There is no assessment insurance as cheap. It is the policy the people want.

In introducing this plan, the Royal-Victoria Life Insurance Company has embodied in one policy the best features of the most popular plans of insurance that have received public approval in the last few years.

The adoption of the 20-Year Premium Endowment Plan is due to a careful observation of the requirements of insurers to have combined in one form of Policy, Whole Life Insurance, Term Insurance and Endowment Insurance at the option of the insured.

This policy is the embodiment of full value for the premiums paid, as shown in the **Guaranteed Interval Values** in the Policy, should the premiums **not be continued** during the 20 full years; or the **Guaranteed Options**, should the premiums be continued to the end of 20 years.

David Burke, A.I.A, F.S.S., General M'g'r.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

LOYALTY IN BUSINESS.

Two weeks ago we commented on some of the ways in which merchants lose money and lose customers through the unsatisfactory service of their salesmen. This, of course, is caused largely by faulty conceptions of business method, but sometimes the unsatisfactory character of the "help" may be charged, not so much to the assistants themselves, as to the lack of human instincts and to the general disposition of the merchant himself. An example of loyalty to the house and of harmony between all its parts, if it is to be acted up to by every subordinate must be set primarily by its head. Yet how often, in moving around among stores and business offices, does one find all precepts as to the need for a union of interests from the highest to the lowest set hopelessly at nought, and by the very man whose prosperity is most injuriously affected by these inapt conditions, namely, the merchant himself.

A customer enters to register some complaint as to an article which has been sold to him. It is a comparatively trivial matter, and the customer, as a matter of fact, may have merely mentioned it as much as a suggestion to the firm for future guidance in its buying operations as for any personal cause. The merchant, however, immediately wants to shift the blame on to some one else, and therefore hails one of his clerks who, it may be, is only very relatively to blame. Him he berates most unmercifully before the now apologetic customer, and thinks, having found a victim, the wrath of the gods is now appeased. But far from it. The customer goes away, perhaps with the feeling that he does not care to deal with a merchant whose meanness of character has just been shown up in such a sinister light, and the clerk feels aggrieved and goes back to his desk or his counter with a grudge against the man for whom otherwise not only his lip-service but his enthusiasm would otherwise have been enlisted.

The merchant who makes a great success of his business is generally one who has, and takes the trouble to use, the power to draw his subordinates to him with hooks fine as silk, but strong as steel. He does not constantly rasp their susceptibilities, nor blame them harshly for doing wrongly the things which perhaps he had not properly explained, nor keep them on tenterhooks wondering how they are to "take" him. In short, the ideal merchant is a gentleman, even though he may not have a superfine education, and he treats his employees as ladies and gentlemen. He expects loyalty and enthusiasm in their work; and he himself is loyal and courteous to them.

Nor does he act on the assumption that unswerving allegiance to a moribund or moth-eaten routine is the main part of business; he recognizes that the business is greater than its tools or methods. And so, when he sees one or more of his clerks or salespeople developing, in their devotion to his interests, a new method more in accordance with their own individuality, he does not attempt rudely to stamp it out, but wisely either accepts it or tells them gently and with thanks why it will not answer.

Loyalty and a harmonious working together of its several parts are assets of such paramount importance to a business house that no merchant can safely disregard their reaching a full growth. Much less can he afford to nip them in the bud by irritability or an over-weening sense of his own importance or infallibility. Largely, the whole character of a store or office is a reflection from that of its proprietor; and if the public finds the clerks of any establishment possessing a noticeable disposition to act at loggerheads with one another, to cast blame on each other's shoulders, in short, where each department is constantly nagging at the other, they usually can guess where the fountain-head of the mischief is to be found.

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian banks for December, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.

Canadian Bank Statement.

LIABILITIES.	Nov. 1905.	Dec. 1905.
Capital authorized	$102 646,666	$102,646,666
Capital paid up	84,542,598	85,294,210
Reserve Funds	58,529,624	59,898,397
Notes in circulation	$72,592,543	$69,981,574
Dominion and Provincial Government deposits	10,274,546	11,555,484

Overdue debts	1,696,723	1,665,732
Real estate	661,081	691,828
Mortgages on real estate sold	530,780	481,970
Bank premises	11,220,397	11,569,131
Other assets	9,836,267	8 696,970
Total assets	$817,149,132	$815,533,302
Average amount of specie held during the month	19,776,046	19,246,431
Average Dominion notes held during the month	37,533,332	38 390,071
Greatest amount notes in circulation during month	79,226 877	75,850,739
Loans to directors or their firms	8,594,105	8,039,244

About half a dozen of the banks have added slightly to their subscribed and paid-up capitals during the month, but the total changes in these items are not large. Subscribed capital has increased by $725,000 and paid-up capital by $751,000. The Bank of Ottawa shows the largest increase for any single bank, having increased its subscribed capital from $2,500,000 to $2,933,500, and its paid-up capital from $2,500,000 to $2,873,860. An addition of $1,369,000 has been made to total Rest Account, the principal increases being shown by the Bank of Nova Scotia, the Royal Bank of Canada and the Bank of Ottawa. The Rest of the Bank of Nova Scotia now amounts to $4,200,000, or 168 per cent. of its paid-up capital; the Royal Bank of Canada has added $400,000 to this account, which formerly stood at the same figures as its paid-up capital, and has thus joined the ranks of those banks whose Rest funds exceed their capital, while the Bank of Ottawa has added $373,860 out of premiums on new stock. The tendency is becoming more marked among our banks to follow the lead of banks across the border, where small capital stocks are the rule, and to make of the Rest or reserve fund, not so much what it was originally intended to be—a fund for the purpose of equalizing the results of good and bad years, and thus ensuring a steady dividend to the stockholders—as a permanent addition to the funds in the business, taking the place of additional capital, with the advantage that on the amounts so laid up no dividends need be paid. Undoubtedly a large Rest is a most excellent thing, adding to both the stability and the prestige of a bank; but a development along the lines along which certain well-known New York banks first pointed the way is not akin to the spirit or consistent with the normal development of our Canadian banking system, which demands the provision of sufficient capital to afford an ample basis for the circulation requirements of the country.

The amount of notes in circulation has fallen from $72,593,000 to $69,981,000, a decline of $2,611,000. The fall of the past two months, taken together, is $6,909,000, almost 9 per cent. of the total circulation at its high level of $76,890,000 at the end of October, and there is still another month of rapid contraction before us. Last year the reduction during the same two months was $7,709,000 from the October figures of $72,216,000, being a decrease of 10.6 per cent.

Quite a large increase is shown for the month in balances due to the Dominion Government, this item increasing from $3,672,000 in November to $5,211,000 in December. The difference is almost entirely accounted for by the figures of the Bank of Montreal, though the Bank of Nova Scotia also shows an increase under this heading. The increase is usual at the end of the year, being in anticipation of the payment of provincial subsidies due on the 1st of January.

In deposits a slight but steady growth continues all along the line, except in public deposits in Canada payable on demand, which show a decrease of $2,202,000. It is the first time since April last that an increase has not been shown under this heading.

Decreases of $1,182,000 and $590,000 appear in balances due to agents in the United Kingdom and to those in foreign countries respectively. Total liabilities have fallen off from $664,328,000 to $662,160,000; last year the figures were $588,645,000 in November and $587,918,000 in December.

Turning to the other side of the return, we find a slight decrease in specie and Dominion notes. The total held is $57,705,000, or 8.7 per cent. of the total liabilities. Last month the ratio was 9 per cent., and in December, last year, 9.6 per cent. The reason for the reduction of .9 per cent. since December, 1904, is doubtless the fact that while total deposits have increased during the year by $62,964,000, total advances have increased by $79,742,000, the difference of $17,000,000 having to be met out of quick assets.

Under the heading of Deposits with the Dominion Government for the Security of Note Circulation it will be noticed that the Bank of British North America has withdrawn the deposit which, owing to the absence of the double liability on its shares, it had, under Sub-section 2 of Section 51 of the Bank Act, been obliged to make before issuing circulating notes in excess of 75 per cent. of its paid-up capital.

Balances due from agencies in the United Kingdom decreased during the month $3,113,000, the greater part of the difference being in the figures of the Canadian Bank of Commerce.

In loans the changes are not large, but all the various classes show increases except loans outside of Canada. The reduction in these has gone to swell the funds available for Canadian business.

Under the heading of Bank Premises the Dominion Bank shows an increase from $446,000, the amount at which the bank has shown this item for over a year, to $800,000. This is doubtless caused by the payment for the property purchased at the rear of its head office premises.

Taking a retrospect over the year 1905 it will be found to have been a year of general prosperity for the banks, as well as for the country as a whole. The number of banks in operation is the same as at the beginning of the year, but two of the old names have disappeared, the Bank of Yarmouth by failure, and the People's Bank of Halifax by amalgamation with the Bank of Montreal, while the Home Bank of Canada and the Northern Bank have been added to the list. The number of branches in operation has again increased largely, such statistics as are available going to show that about two hundred new branches have been opened during the year as against about half that number in 1904. The total number of branches in Canada cannot now be far from 1,350.

Paid-up capital has increased during the year $5,239,000, and it is interesting to compare this with the increase in note circulation. The difference between the highest points reached by the latter in 1904 and 1905 was $5,010,000, or, comparing the figures at the end of December in each year, the increase has been $5,474,000, or about 8.49 per cent., so that increase in paid-up capital has almost exactly kept pace with the increased requirements of the country in circulating notes.

As might be expected in a period of prosperity, five banks have increased their dividends by 1 per cent., and one, the Metropolitan, has commenced a distribution to its shareholders at the rate of 8 per cent. It should be remembered in this particular case that this rate only represents a return on the investments of 4 per cent., as the capital was paid in at a premium of 100. The banks which have increased their dividend are Nova Scotia, Molsons, Royal, Ottawa and Sovereign. Nearly all have added something to Rest account, the Canadian Bank of Commerce and the Bank of Nova Scotia adding $1,000,000 each. The total increase in Rest account, allowing for the banks which have disappeared from the return, has been $6,302,000, or an average increase of 11.76 per cent.

Public deposits show an increase during the year of $64,065,000, and current loans of $81,096,000, exclusive of Government business in both cases. Taken in connection with the remarkable increase in bank clearings from $2,735,744,000 in 1904 to $3,336,602,000 in 1905, these figures show immense strides in both the wealth and the internal trade of Canada.

Finally, there is an increase in gross assets of $85,618,000, or nearly 12 per cent., representing the added responsibility which falls on those who direct the chartered banks of the country. If the responsibility is as successfully discharged in 1906 as in 1905 there will be much occasion for congratulation on the part of the shareholders of the various banks as well as by the community at large.

❧ ❧ ❧

WHY BRITISH EXPORTS TO CANADA DO NOT GROW.

Continuing our reference to the subject of an article of 12th January, "Why British Exports to Canada do not Grow," we present some facts from a very different source. A letter to the "Times" of 29th December last from Mr. F. C. T. O'Hara, Superintendent of Commercial Agencies [abroad] at Ottawa, is discussed by that valuable London journal, "Commercial Intelligence." Mr. O'Hara had pointed out how amazed Britons travelling in Canada usually are to find that there is not a single official appointed by the British Government throughout the Dominion whose duty it is to report to London upon commercial matters for the benefit of the exporters of the United Kingdom.

Contrast this with the alert attitude of the United States authorities upon trade matters. There are, scattered over Canada, 372 consular officials, representing the various foreign countries of the world. Of these, 189, rather more than half, are representatives of the United States. There are 16 from Germany and 15 from France. No fewer than 14 represent Brazil, while Belgium, Italy, Portugal, and Spain have 10 each, Norway and Sweden have 33. Smaller numbers represent other countries, Greece, Hayti, and Colombia having one each. The question put by Mr. O'Hara is a perfectly natural one: "Why should Great Britain permit herself to be placed at a disadvantage by standing quietly aside while active and energetic American consuls are ever alert all over the Dominion to increase the market for United States goods in Canada?"

The ignorance of most British exporters as to the relations of Canada to the Empire is illustrated by a statement of Mr. O'Hara—a Canadian official—that "frequently a British exporter takes a shot in the dark and addresses 'The British Consul, Toronto,' or 'The British Consul, Montreal,' or sends circulars to half a dozen such imaginary persons in various parts of Canada." If such missives find their way to Government House, or to any of the departments at the capital of Canada, they are answered when possible. But a Government department is not in a position at all times to answer enquiries implying the furnishing of a laborious statement of prices of commodities, cost of raw materials, various rates of wages, and so the British exporter, if he is not prepared to send a salesman across the Atlantic is at a disadvantage, for he has no one to whom to write. The American exporter can enquire at Washington, or he can write to some of the 189 consuls of the United States. It ought not to be necessary for us to point out that there are no British consuls in Canada. Consuls are for service in foreign countries. We are not a foreign country.

The suggestion has been made frequently in 1905 and is now repeated, that a British bureau should be established in Canada for the benefit of British exporters. Canada has fourteen official commercial agents in the United Kingdom, but there is not a single Government agent for Great Britain in the length and breadth of Canada. Mr. O'Hara has made a list of the advantages that would follow the establishment of a properly organized British Bureau of Commercial Information in Canada, among which are that it would benefit the British exporter in his competition with United States, German, Belgian and French firms; it would help to keep British contractors informed of Canadian contracts, most of which go to the United States; and it would be a medium of information here comparable to the High Commissioner's office in London, as used by Canadians for statistics, trade reports, and trade enquiries.

If the British exporter desires to sell goods in Canada he will have to learn. He will have to take some trouble. The United States have learned and have taken trouble for many years. And this is one of the reasons why for twenty years that country has been selling to this country more than Great Britain does. Up to 1882 or thereabout, Great Britain's exports to Canada were greater than those of the United States. But in every year since that date, the United States has sold more to us than Britain. In each of the last six years the exports of the United States to Canada have exceeded $100,000,000. But Great Britain's exports to us in the first of these years were $44,789,000, and in the last, namely, 1905, they were only $60,342,000.

* * *

ASCERTAIN THE CAUSES OF FIRES.

Year by year we are accustomed to read the tabulations made of the fire loss in this country, and startling enough the figures are. Now and then we hear of the arrest of a fire-bug, which gives us an inkling of the number of incendiary fires in our midst which are not detected. In many ways and at various times the devastation wrought by fire is brought to our attention, but we Canadians have been strangely remiss in making any resolute, united effort to put a stop to it. This seems to be nobody's business.

In several of the United States moderate but very satisfactory progress has been made in the direction of reducing the fire loss through the appointment of fire marshals. The Massachusetts insurance report for 1895 says that the passage of the act extending the jurisdiction of the Boston fire marshal over the whole State is one of the wisest and most economical appropriations ever made. The Insurance Reports of New Hampshire, Maryland, Illinois, Minnesota, all recommended years ago to their legislators a fire marshal law.

But to come down to a later day. In the year 1905 the fire marshal system was in operation in thirteen States and the District of Columbia. The States referred to are Massachusetts, New Hampshire, Maine, Connecticut, North Carolina, South Carolina, Pennsylvania, Washington, Maryland, Louisiana, Alabama, Mississippi and Ohio. The effect of the law and the efforts of marshals under it in the State of Maine is that, taking a period from May 26th to December 31st, there is shown a reduction of incendiary fires from 8.64 per cent. in 1895, year by year, down to 1.10 per cent. in 1904. In the same period fires from unknown causes were reduced from 32.54 per cent. to 20.23 per cent. In North Carolina there have been forty convictions under the law in four years, and many prosecutions with no convictions; but the prosecutions were excellent deterrents, for we are told: "The operation of the law has been entirely satisfactory to the citizens of the State, as well as to the insurance companies. Nothing will do more to lessen the fire waste and reduce our insurance rates." Favorable reports upon similar Acts have been received from officials of other States. Unhappily, in the State of Washington the Legislature makes the law inoperative by failing to appropriate any funds to carry it into effect.

The States from which we may best learn how valuable fire marshal laws have been are probably Massachusetts and Ohio. We are in correspondence with the authorities of these States, and hope presently to obtain from them recent statistics of the results of the enactments. Meantime we remark that the report of Mr. Charles W. Whitcomb, of Boston, State fire marshal, before the fire underwriters of the North-West in 1895 was reprinted by the Mutual Fire Underwriters' Association of Ontario in 1899 as part of a pamphlet, compiled in 1898 by Seneca Jones, Esq., of Hamilton. There were also obtained from Mr. Whitcomb by Mr. Jones valuable facts and figures as to the satisfactory results of the law as lately as 1898. During the year 1897 there had been fifty-six arrests and forty-one convictions under the Act, and the percentage of incendiary fires in Boston that year was only 3½ per cent., whereas in former years the average percentage throughout the State had ranged from 35 to 18 per cent. It was found in that year that one-third of the total number of incendiary fires were set for the purpose of defrauding insurance companies; 9 per cent. from motives of revenge; 2 per cent. from insanity; 1 per cent. from pyromania.

The Ohio fire marshal began his work in 1899. Five years thereafter, namely, at the close of 1903, he says: The average annual fire loss of the State is $7,000,000, the result largely of ignorance, carelessness, and incendiarism. Of 999 "unknown" losses 449 should be termed incendiary. The number of such losses occurring in 1901 was 292; next year it was 222; and the next year only 190. The motives of 689 incendiary fires in that State were classified as follows:

To defraud insurance companies	468
For revenge or malice	110
Mischievous boys	36
Pyromaniacs	29
Intoxicated persons	28
To avoid or secure work	18

The number of fires investigated in 1903 was 1,664. In connection with these there were:

Persons arrested charged with arson	91
Fled State before arrest	5
Were bound over to grand juries	46
Were indicted	76
Acquitted	12
Convicted	36
Committed to asylums	9
Pending trial at this time	27

Mr. Davis, the marshal, declares that "the object of the prosecution of arson is not simply to convict the guilty, but to protect the community by making conspicuous the result of wrong-doing, thereby deterring others from committing like crimes." Carrying out this idea, fifty-five pages of the report are devoted to pictures of convicted incendiaries and those who fled the State to escape arrest.

In an appendix to the report laid before the Mutual Fire Underwriters of Ontario in March, 1905, Mr. G. N. McKendrick says, after giving a lot of facts and figures such as the above: "We are struck with the lack of knowledge of such items in Ontario and Canada."

"When we realize that over $10,000,000 of property was burned within sight of our Legislative Buildings (Toronto), and that there is no report in the Government records of the cause of the conflagration (1904), the amount of property destroyed, or other particulars; in fact, it is not known to the Government that one of the most disastrous events in the history of this Province occurred on the 19th April, 1904. I say, when we realize this fact, we believe the body of Mutual Fire Underwriters is justified in again, with renewed vigor, pressing upon the Government the advisability of collecting fire statistics showing the amount of property destroyed and the cause of the fire, and such other details as may be considered advisable.

"This we believe to be a preliminary step towards the lessening of the serious fire waste and a reduction in the heavy insurance rates in this Province."

* * *

CASH DISCOUNTS.

A subject which was introduced at a recent meeting of the Wholesale Dry Goods Association in Montreal and caused a good deal of discussion was cash discounts, brought up by Mr. Wm. Agnew, the new president of that body. It does seem an anomaly, while the banks of the country pay 3 per cent. on deposits and make discounts at 5 to 7 per cent., that wholesale dealers in dry goods should allow a discount of 5 per cent. for thirty days, or three months net, or at the rate of 20 per cent. per annum. Mr. Agnew suggested that the present rate of 5 per cent. thirty days, 6 per cent. ten days, should be reduced to 3 per cent. thirty days, or 4 per cent. ten days, which would still present the attractive rate of 12 per cent. per annum to the man who wishes to pay cash and save time charges. Such a change would scarcely be likely to prevent any merchant who is in the habit of taking discounts from doing so still, while those who at present take full time would certainly not make any objection. Even were these changes made there would still be considerable disparity between trade discounts and ordinary bank rates, but they would pave the way for still further reductions later on. We believe these proposals are in line with a noticeable tendency in the United States of recent years to reduce both the dating term and the cash discount rates so as to bring all business as nearly as possible to a prompt net cash basis.

* * *

GRAIN ROUTES TO THE SEABOARD.

The tendencies presented by grain routes to seaboard are always worthy of careful note, and in the case of a country like Canada at its present stage of development they may lead to far-reaching and important results. The chief grain commissioner at Winnipeg has furnished tables showing the routes by which the Western crops of the last three years have found their way east, and they are confessedly disappointing from a Canadian standpoint, inasmuch as they indicate an increasing volume of Canadian grain which was carried by way of Buffalo to the ports of the Eastern States. So far as the past fall is concerned the large traffic via Buffalo is to some extent explained by the congestion that occurred at our own ports on Georgian Bay and the relatively small number of vessels comprising the Canadian fleet on these waters. When the Government has carried out its proposed improvements in these harbors the conditions, it is hoped, will change, and Canadian trade be recovered to its own shipping routes.

The figures show that, of the grain moved eastward from Fort William and Port Arthur during 1905, 29,763,810 bushels were carried in Canadian bottoms and 11,218,882 bushels in United States vessels. In 1904 the proportion that went from Port Arthur and Fort William by Canadian bottoms was 27,091,086 bushels, and by United States bottoms, 2,822,302. In 1903, 28,160,980 travelled by Canadian, and 6,532,049 by United States bottoms. Of the 1905 grain, 40,982,782 bushels was wheat, 723,413 bushels oats, and 345,292 bushels barley. The movement of flax seed has increased from 2,355 bushels in 1903 to 182,000 in 1904, and 353,000 last year.

* * *

POLITICS IN THE MOTHER LAND.

Were it not for the unchallenged position of Mr. Chamberlain himself, his son, and a few candidates under his immediate influence in his own district, the defeat of the Chamberlain proposals for tariff reform in the election of the present month in the British Isles may be described as overwhelming. This result, which cannot be said to have been altogether unlooked for except in the degree of the disaster, without a doubt comes as a disappointment to many people in Canada, who desire to see the bonds of Empire drawn closer together in a commercial as well as in a sentimental way. Yet, we think most unbiased people will acknowledge that, whatever good may have been the aim of the reformers, the proposals themselves were of such a crude and necessarily contradictory character, and they were so enveloped in an empirical non-understanding of the economic principles underlying the mutual welfare of an old and a new country, respectively, that they were really bound to fail of acceptance. Of course, the defeat of the late British Government cannot be laid altogether at the door of fiscal reform; there were many other features of policy which, no doubt, added a no mean share. But for all practical purposes it would appear that their fate was bound up with that of preferential tariffs, a form of protection with which the electorate unmistakably expressed their determination to have nothing to do.

What we mean by saying that the presentation of the reformers' case has so far been but crude is that Mr. Chamberlain never cleared up certain anomalies therein. For example, the two shillings tax on grain was to do good to Canadian wheat-raisers by increasing their profits, and at the same time was not to raise the price to the consumer. Mr. Chamberlain made many efforts to put this clearly before the British voters, but we venture to say his explanation "explained" an apparent contradiction to but very few. Be it understood, however, we do not say that it would not have been better for the British workingman to accept the terms of the whole offer, even though he should have to pay a fraction more for his bread. And then, even if the said workingman were prepared to pay this extra cost, it was not made very clear to him wherein, apart from a quicker development of a section of the Empire on which he is generally told to cast envious eyes, he was to gain any benefit.

True, Mr. Chamberlain took pains to explain that the colonies preferred (which is perfectly true) to trade with the Mother Country, and would willingly knock a few bricks off their tariff wall to render it more easily scalable for British-made wares, thus giving workingmen of the United Kingdom more employment. But it always remained a moot question how many bricks would be taken off; and it was never conclusively shown that, even with them removed, British manufactures could enter the colonies in such quantities and values as would render any sacrifice of food-cheapness worth while making. The average Englishman argued that probably the colonies wanted to develop their own industries just as warmly as he wanted to develop his own, and that the two things do not go well together without a deal of planing and dove-tailing, which nobody seemed exactly competent to undertake. And he pointed to what seemed to him and a good many others the fact that, though the colonial Governments seem fully inclined to make tariffs which give a preference to British-made goods, there were tariffs which still kept British-made goods outside, and that customs duties which were just sufficient to do this were, for all practical purposes just as deleterious to his interests as if they were twice as high.

On the whole, it is probably well, in the interests of Imperial good policy, that Canada made no more strenuous efforts than she has done in favor of the policy of Great Britain which has now been shelved.

* * *

—According to a recent Canadian Associated Press despatch, the British Government has decided to place commercial agents in the Colonies. This may be taken as an indication that past criticism in this regard has at length been taken to heart. The feeling on the subject is admirably summed up by the following sentence from a recent editorial in the London "Standard." "In commercial relations, as in all other matters," it says, "the Mother Country has to realize that what are termed colonies are new nations, and if we wish to retain their trade it is folly to treat them *de haut en bas*. It is not less important to us that our goods supply the needs of the colonies rather than those of the Americans and Germans, than it is to have a secure footing for their infant industries in their home markets."

* * *

The Merchants Bank of Canada will open a branch at Vancouver, on the 1st of February. Alix, Alberta, hitherto a sub-agency, has been made a branch.

A special despatch from Sherbrooke to the Montreal Gazette states that representatives of the Bank of Montreal were in Sherbrooke the other day, in connection with the establishment of a branch of that institution in the city. It is reported that the bank have secured offices in the Metropole Building, on King Street.

NOTES ON THE LUMBER MARKETS.

The only particular feature worth noting since our last report is a flurry in laths, which, while nominally advanced about 50c. on former prices, practically fetch any price asked. With regard to the prices of other lines, they are not appreciably changed, but they exhibit considerable strength and indeed the outside quotations in our Prices Current may be said to represent more truly the general range of the market at the present time. Yard-men are wondering how they can make any money with lumber at its present prices; while at the same time the lumber men are in an equal predicament as to how to make those prices any less, with all the expenses of production so extremely high. Of course, it is purely a question of demand, and this does not show any strong sign of slackening in the near future.

An important gathering in the history of the British Columbia lumber trade occurred on the 10th inst, when the Mountain Lumbermen's Association held its fifth annual convention at Nelson. The lumbering companies represented, and the names of the delegates in attendance were as follows: Columbia River Lumber Co., F. W. Jones, Golden; Yale-Columbia Lumber Co., Joseph Genelle, Nelson; the Fernie Lumber Co., L. M. Proctor, Fernie; the Standard Lumber Co., C. D. McNab, Cranbrook; the Bowman Lumber Co., A. F. Dudgeon, Revelstoke; the King Lumber Co., M. B. King and Dr. J. H. King, M.L.A., Cranbrook; the Big Bend Lumber Co., T. A. Ludgate, Arrowhead; the Revelstoke Lumber Co., C. F. Lindmark, Revelstoke; the Yale-Columbia Lumber Co., J. G. Billings, Nakusp; the East Kootenay Lumber Co., A. Leitch, Cranbrook; the Fernie Lumber Co., A. McDougall, Fernie; the Porto Rico Lumber Co., G. W. Orchard, Ymir; the Koch Lumber Co., W. C. E. Koch, Nelson; the Crow's Nest Lumber Co., H. L. Lindsay, Wardner; the Kootenay Shingle Co., C. B. Archibald, Nelson; the Elk Lumber Co., F. C. Dubois, A. L. Boynton, Fernie; the North Star Lumber Co., A. F. Krappel, Elko; J. G. Scott, and H. Depencier, delegates from Vancouver; Geo. P. Wells, permanent secretary-treasurer, Nelson.

The following officers were elected at the meeting for the ensuing year: F. W. Jones, of Golden, president; J. A. Dewar, Nelson, vice-president, and G. P. Wells, Nelson, permanent secretary-treasurer.

The chief business of the meeting was a discussion of prices and the outlook of the market, also railroad rates, Prices changes are understood to have been of minor importance, though stocks at the mills and in the Territories are small and advances are not improbable in the future, perhaps at the association's quarterly meeting next March.

Reports from the Old Country markets would appear to represent the prospects for good prices and a good demand for lumber as fairly bright, though the building trade in England is hardly in a satisfactory condition. Freights rule low, and in favor of importers.

Farnworth & Jardine, of Liverpool, in their circular for January, referring to Canadian woods, say:

> The import of Quebec pine timber during the past year was very moderate, not much larger than that of 1904—the smallest import of which we have any record; the deliveries kept pace, and stocks are fairly light. Square Pine.—The import, though quite small, is sufficient for present requirements, but the stock has been gradually worked down, and is now light; values are firm. Red Pine.—There is only a very limited demand for a few special requirements. For oak logs there has been a little more enquiry, the deliveries satisfactory, and stocks are only some 20,000 cubic feet. The import of pine deals, including red pine, boards, etc., shows a considerable reduction as compared with the previous year, the shortage being chiefly in boards, etc.; the demand throughout the season was very slow and dull, sales difficult, especially for the lower grades, but first and second quality fairly held their own, and values are firm. In sidings, boards, etc., there has been

less business, high prices inducing buyers to look for cheaper substitutes. Stocks of both deals and boards, etc., are adequate. Red pine deals have again been imported freely, and meeting with a languid demand, sales could only be effected by lowering prices; stocks are ample. The import of spruce deals, consisting chiefly of "unsorted" shipments, have been on a more liberal scale, and met with ready sale, but prices ruled low. First quality spruce has been scarce and values high.

Spruce and Pine Deals, etc.—N.B. and N.S. Spruce Deals.—Deliveries have fully kept pace with the arrivals, and although present stocks are less than January last year the difference is more than balanced by heavy stocks of cheap Baltic goods and Galatz whitewood, which have come into strong competition. It is most desirable that shipments during the winter, should be moderate. Pine deals from Miramichi, Bathurst, etc., arrived more freely, but met with poor demand, though recent sales have shown a little better result. Stocks are adequate.

* * *

CHARLOTTETOWN BOARD OF TRADE.

The annual meeting of the Charlottetown Board of Trade has been held, the president, Mr. Neil McQuarrie, in the chair. We have not yet received a full report of the meeting, and cannot comment upon the resumé of it we find in a Quebec journal, for it is typographically confused, and we are unable to make out just what the president in his address is alleged to have said about the cause of the deficit on the International Railway working. He objected, however, to the increase in freight rates—nobody ever does take kindly to them—and claimed that this exceptional deficit should not be made the basis of frenzied economy. A broader policy would increase the business of the road, in his opinion, and the deficits would be borne by the people generally and not felt.

* * *

NEW BRUNSWICK AFFAIRS.

A statement of the finances of New Brunswick for the year ending October 31st, made public a few days ago, shows that the total ordinary revenue of the year was $865,637.05, and the ordinary expenditure $874,419.75; but there were additional expenditures which carried the account up to $1,548,364.78. Among these were debentures redeemed, $80,500; special loan for permanent bridges paid, $125,000; public works for permanent bridges, $175,000; and railway subsidies advance or bonds, $35,202.50. During the year the province negotiated a temporary loan from the Credit Foncier, of $550,000, and the sum of $50,000 was received as deposits from companies starting business in the province. The chief item of the revenue is the Dominion subsidy of $491,360.96. The territorial revenue yielded $259,936.98, nearly $40,000 less than the year previous, due to the falling off in the lumber cut. Other items of revenue are succession duties, $42,018.02; taxes of incorporated companies, $31,634.19; liquor licenses, $21,739.72; and fees of the Provincial Secretary's office, $15,096.66. The chief items of the expenditure were public works, $223,784.62; schools, $214,442.70; and interest, $156,051.07. The insane hospital cost $57,764.09; agriculture, $26,776.06; game protection, $15,600; printing, $11,502.49; the legislature $29,581.70, and the executive government $32,773.31. These are the main items in the expenditure.

Figures just prepared of the trans-Atlantic shipments from the port of St. John, and the whole province for the year show how important the lumber industry is. There was shipped from St. John to trans-Atlantic ports 161,749,959 feet of deals in 169 vessels. The year previous, 183 vessels took away 172,995,547 feet. A feature of the St. John business is the shipment of 44,640,316 feet by J. E. Moore & Co., new-comers in the trade, who jumped into second place as shippers from here, and got within a million feet of W. Malcolm Mackay, who in 1904 shipped upwards of 62,000,000. The shipments from the whole province totalled 343,494,502 feet, against 358,081,893 feet in 1904. In 1902 there was shipped 445,682,102 feet. The outlook for the coming year is good. The cut in the woods will be heavier than for several years past, and if it all comes out in the spring, next season's business will be large.

Five Allan steamers took away cargoes from St. John last year to the value of $1,071,808, while five C.P.R. steamers carried away from the same port $2,048,162. An equal number of Donaldson line boats took $761,270 worth. The total value of the export trade to the end of the year was $4,424,915, which is far and away ahead of the record of any previous year.

* * *

OUR ST. JOHN LETTER.

The city of Fredericton is giving serious consideration to the question of establishing an electric street railway. James Mitchell, of West Newton, Mass., brother of Senator Mitchell, has been visiting Fredericton, and looking over the ground. He has promised to secure the necessary capital, and says he will start construction work early next spring. At the present time, efforts are making to induce the Provincial Government to so strengthen the bridge across the St. John River that it will be able to carry the cars to Marysville and to points across the river. The establishment in Fredericton of a car line will prove a great convenience, for distances within the city are great.

The annual meeting was held on Monday, of the Cornwall and York Cotton Mills, St. John. A few years ago when these mills were sold under the hammer they were bought by James F. Robertson, a local merchant. He organized a company, and the mills have since been managed by the new owners. The year just closed was the most successful in their history, and while no dividend has been declared, it is known that a large sum was earned, and is available for alterations and improvements that are now under way.

Business men of St. John are beginning to take some interest in the civic elections, which are to come off in April. A citizens' league has been organized, and an effort will be made to secure the nomination of successful business men as candidates in opposition to some of the present aldermen. It is difficult, here as elsewhere, to get busy men to give their time to civic affairs, and so it cannot be said what success the movement will have.

Messrs. Ross & Holgate, a reliable engineering firm of Montreal, have been engaged by the city of St. John to report on the probable cost of an electric lighting plant that will furnish street lights for the city. It is probable that in building the city will so lay out its plant that it can be enlarged at any time it may be considered advisable to go into private lighting also. The city now pays each $80 for street lights, and the committee hope to cut the charge in two. The Street Railway Company, which has the present contract, has offered to furnish lights for $65 in future.

An effort is being made to amalgamate and consolidate into one company all the steamship lines operating on the St. John river. Last year there was keen rivalry in river traffic, and none of the companies made any money. It is likely that an agreement as to rates, etc., will be secured, even if it is impossible to bring about the amalgamation some of the parties hope for.

Of late there has been much discussion in the St. John papers over the depth of water at the ocean steamship berths. This was precipitated by the declaration of the Allans, of Montreal, that the depth was not sufficient for their big steamers. All the discussion has resulted in a decision by the city to have the berths dredged and cleared of any sediment before the turbine steamers come here in March.

The Massey-Harris Company has just arranged for a large shipment from New Brunswick of the different hard woods grown in the province. The intention is to test these and ascertain the value of these woods for the various lines of work carried on by that large implement company. If they prove satisfactory, the future will see much larger shipments, no doubt.

INSURANCE INSTITUTE OF TORONTO.

The regular monthly meeting of the Insurance Institute of Toronto was held on Tuesday, 23rd January, in St. George's Hall. Two papers were submitted by Messrs. C. C. Ferguson, and H. W. Crossin respectively, on "British Life Office Accounting," and "Some Results of Specific Rating." Discussion took place of the papers read at the previous meeting, by Mr. J. W. Wallace, on "Life Insurance Bookkeeping and Office Records," and by Mr. C. W. I. Woodland on "Employers' Liability Insurance." In the absence of the president, Mr. John B. Laidlaw, who was in New York reading a paper on "Conflagration Hazards," before the Fire Insurance Institute of that city, the chair was occupied by Mr. Percy C. H. Papps, vice-president.

* * *

LIFE INSURANCE NOTES.

Undermentioned are figures of the Excelsior Life Insurance Company for 1905: Amount of policies new and taken up in Canada, $2,433,281. Amount of insurance in force at close of year 1905 in Canada, $9,009,774. Premiums received on all business for 1905 in Canada, 271,371.32. Total income for 1905, $321,236.62. Reserve on policies in force, $894,025.30.

The annual meeting of the National Life Assurance Company of Canada was held last week in Toronto. There was a good attendance, and the results as shown by the statement for the year 1905 seemed to be quite satisfactory. Applications had been received for $1,800,000 of insurance. There is a large increase in income over 1904 and other gains are shown; the gain in surplus to policyholders being especially noteworthy. The speakers were Mr. Elias Rogers, president; Hon. J. J. Foy, vice-president; Mr. Wm. and Mr. Hart, of Halifax.

* * *

—The Welland Board of Trade has elected the following officers:—President, Geo. C. Brown; vice-president, Geo. H. Burger; secretary, John McCaw; treasurer, J. S. O'Neal; council, John Goodwin, W. H. Crowther, Geo. W. Sutherland, O. H. Garner, J. J. Sidey, C. H. Hanson, J. H. Crow and Mr. Duff.

Established 1855.

INSURANCE INSTITUTE OF MONTREAL.

Before the Insurance Institute of Montreal last week, Dr. F. G. Finley read a paper on "The Relation of Occupation to Life Insurance." The lecturer pointed out that in dealing with the industrial classes as applicants for life insurance, the question of occupation was a very important one, as so many engaged in manual labor ran undue risks from accidents, and others were liable to contract diseases from special dangers connected with their work. . . . There were some occupations attended with a greater degree of longevity, and thus considered as gilt-edged from the insurance standpoint. Of these clergymen headed the list. . . . Compared with doctors and lawyers, the clergymen as long livers shows to great advantage. Ogie's figures of mortality are 106 for clergymen, 152 for lawyers, and 202 for doctors. The high mortality among members of the legal profession is attributed to mental energy and strain, while the death rate among doctors is only exceeded by that of the notoriously unhealthy callings.

OUR AUSTRALIAN LETTER.

Australian newspapers contain this paragraph:

"In the year 1892 the banking advances in Australasia exceeded the deposits by over 31 millions, whereas in June last the deposits exceeded the advances by 14 1-4 millions. Thus the banking situation in Australasia is about 45 1-4 millions better to-day than it was fourteen years ago. The recovery has been slow and painful, but it has been substantial."

This is a remarkable statement; but whether it warrants the jubilation the last sentence implies is to be doubted, for it is due not to the increase of deposits, for the deposits are a good deal less than they were, but to the decrease of advances, which have dropped fifty millions of pounds sterling. The figures indicate an infinitely healthier position than in 1892, but they also show a wonderful shrinking in business. The surplus of deposits also indicates the fear of investing in new enterprises. There is a tendency towards buying up Australian stocks in London and bringing them here. It is a serious calamity to Australia that there should be such a lack of confidence in new enterprises, which should find a profitable investment in the development of the great resources which the country has.

In New Zealand the readiness of capitalists to invest in the bonds of the New Zealand Government is an indication of the same sort of thing—though to a lesser extent—existing in that island. Notwithstanding these enormous sums of money unused, there is a school which is in a position of great influence in the politics of this country which affect to believe that the great need of Australia is money, and who have always quoted the Government that went to London to borrow, to be expended in what have been sometimes termed "reproductive works."

The prospect for the coming year is exceedingly good. The wool crop of 1905-6 will probably return more money than Australia ever received before from it, though Australia has yet sixty-five million sheep, instead of one hundred and six and one-half millions that she possessed in 1891. The improvement in the breed and the higher prices obtained for the wool will account for the increased returns. In 1905-6 it is anticipated that there will be eight million more sheep to shear than have been shorn this year. Then again, the harvest, though smaller than the record year of 1903-4, it is estimated, will yield four million bushels more than last year. Minerals, so important a part in the production of Australia, are also bringing very high prices, and the yields are greater than the previous year.

Trade in the city is not pronounced active, but there is an increase of both imports and exports. For the first eleven months of 1904 the imports of New South Wales increased by nearly two million pounds, and the exports by over a million, but the bulk was interstate trade. The other States do not all show equal advances in imports, but the course of trade is quite as healthy. On the whole, the State revenues have for the past year improved. The States have either reduced their deficits or have had a small surplus, so that Australia faces 1906 with better prospects ahead of it than for many years.

The Canada Cycle Company is selling out its Australian business, which has hitherto been carried on by a branch office here. The company has been hampered by not having motor-cycles and motor-cars to offer to maintain the volume of business. The abandonment of its agency may not lead to the diminution of its exports to Australia, but it probably will.

H. J. Boswell, formerly of Toronto, died near Sydney on the 11th inst. His death was rather sudden, and due to heart failure. He came to Australia in 1893 with a number of Canadian agencies. Most of them were unsuited to the trade here, and hence he did not achieve the success he hoped for.

The Canadian Australian S. S. Co. is putting on the route the "Maheno," a new steamer of 5,500 tons burthen. She has turbine engines, is claimed to be the finest equipped steamer on the Pacific, and has a capacity for 240 first class, 120 second class, and 60 third class passengers. The cabins are unusually airy, and promise to make the trip across the Pacific one of unusual comfort. She can make her four hundred knots a day comfortably. It is to be hoped that she will be so well patronized as to warrant two others to be put on the line.

F. W.

Sydney, New South Wales, 26th December, 1906.

* * *

CALGARY BOARD OF TRADE.

In no way is the vigorous business life of the Far West better indicated than in the meetings of the boards of trade in its towns and cities. That of Calgary is not far from being an exception to this general rule. Not only is it the office of a board of trade in such a live centre to perform all sorts of commercial work, but, situate in the centre of a region which is astonishing the continent by the rapidity of growth, that city has many important immigration and development problems to master. This fact is made prominent by some of the recommendations which came before the Board of Trade of Calgary at its annual meeting on the 16th inst. Some of these, for example, were that the sum of $15,000 should be raised for publicity purposes, that the board should erect a suitable building of its own, and have a secretary on duty day and night, while another still more striking was that a determined effort should be made to make Calgary a city of 50,000 inhabitants by the year 1910—a date which surely leaves little room for laggards.

Mr. R. J. Hutchings, the president for 1905, in his retiring address, referred to the great expansion which had taken place in the business of Calgary during the past year, to its ten banks, its many wholesale houses, its foundries, soap works and other industries, the natural gas deposits of the region, and to the hope of having the Dominion Fair in their city next year. He expressed the opinion that the telephone system could not be considered complete until every residence, and every farm house in ordinary convenient districts, should be connected with one another, the present rates, however, being prohibitive as regards the popular utilization of the telephone for anything but urgent business. He considered that the future of Calgary as a great milling centre was now undoubtedly assured, its geographical situation combined with the unlimited capacity of the surrounding country for feeding and dairy farms rendering it the natural location of large flour mills. The irrigation canal, the first section of which, now completed, would throw open approximately 110,000 acres of land, was also spoken of hopefully in respect of the prospects it held forth for a rapidly increasing and dense population.

The election of officers resulted as follows: Hon. President, Hon. W. H. Cushing; president, C. W. Rowley; vice-presidents, A. E. Cross, T. Allan, J. N. Patterson; secretary-treasurer, C. W. Peterson; members of the Council: G. C. Porter, G. T. C. Robinson, W. Strong, W. M. Davidson, R. R. Jamieson, R. A. Janes, F. F. Higgs, J. S. Dennis, I. S. G. Van Wart, A. B. Cushing, —. Taylor, R. C. Johnston, W. H. Connacher, A. Allan, D. J. Young, Dr. Stewart, J. J. Young, Hon. J. A. Lougheed, R. C. Edwards, H. M. Cherry, C. P. McQueen, C. T. Jones, T. J. S. Skinner, E. H. Telfer, H. Neilson, O. C. Smith, C. A. Stuart.

ARE MODERN BANKING METHODS DETERIORATING?

Discussing modern banking tendencies an English authority sounds a note of warning. In a letter to "The Times" he says (we quote from the "New York Journal of Commerce"):

"There are now only two methods by which or by a combination of which, the operations of a bank can be extended. One is the method of amalgamation, of buying up businesses 'ready made.' The other is the method of branch extension, of opening new offices in districts where the bank-

ing business, actual or prospective, appears to justify the experiment. By the banker amalgamation is regarded as tending to economy, and branch extension, in the first instance at any rate, to increased expense. By the general public—or that section of it which troubles about such matters—amalgamation is eyed somewhat askance, as leading to monopoly, whilst the multiplication of branches is regarded as an unmixed boon, bringing banking facilities within easy reach of all, and keeping the charges for banking accommodation within reasonable bounds through the medium of competition.

"With the standpoint of the banker as to these two phases of his business one is not now concerned, but it should not be difficult to point out some considerations which are overlooked by the public in arriving at the conclusions indicated. It is true that amalgamation tends to create a monopoly, but it is not in this generation that a banking monopoly will come even within measurable distance, and in the meantime the smaller and weaker banks all over the country are being weeded out and replaced by large and well-administered institutions, to the manifest strengthening of the commercial fabric. With regard to the great extension of of banking facilities to which the branch movement has given rise, it is true that those facilities have now been brought within the reach of all: that we have no longer to go a journey to reach a bank, nor to run the risks involved in allowing cash or securities to accumulate in houses or offices. It i further true that the rivalry between the branches of various institutions makes for the benefit of the community in the matter of interest and charges, and induces the banker, without increase of remuneration, to multiply the number of services he renders. Yet, again, the growth of the branch system has had the pleasing effect of reversing to a large extent the old relationship between banker and customer, for whereas it used to be the customer who took his turn to be ushered into the presence of the banker, it is now often the bank manager who, hat in hand, waits on the trader to crave his custom or to ascertain his wishes.

"So far, so good—from the public standpoint; and if the rush of new branches resulted only in increased and cheaper facilities, the banker might grumble (as, indeed, to do him justice, he does), but the public would undoubtedly benefit. Banking profits would suffer, and what used once to be known as the 'dignity of the profession' would have to go by the board, but these would not be matters of general interest. The risks involved in excessive branch extension are not to be found in the lowering of banking terms. They show themselves in the lowering of banking standards, a deterioration of which perhaps the most significant manifestation is a distinct falling off in the kind of security against which, in certain quarters, banking accommodation is sought and granted.

"The keeping down of bank dividends does not matter to the community at large, but a lowering of banking standards does, and may come to matter vitally; and if over-branching leads to over-banking, to a deviation from the sound and well-understood rules which govern the conduct of a business which affects all other businesses, another and a more general interest is at once given to the branch bank problem. Such deviation must inevitably contain the germs of trouble—trouble not only to the transgressors, but to the public which puts confidence in them. This point need not be labored. It is sufficiently obvious. The questions are: Are banking methods deteriorating? And, if they are can the deterioration be attributed in any degree to an increase in the competition between branch banks, due to the undoubted increase in their numbers?"

* * *

DIAMONDS.

Once more attention is drawn to the possibility of there existing somewhere in Canada—probably in Northern Ontario—a rich diamond field. Dr. G. F. Kunz, mineralogist for Tiffany & Co., New York, stated the other night before the New York Academy of Sciences that since 1830 about two hundred small diamonds, ranging from one-half the size of a pea to that of a small hazelnut, have been found in various parts of the United States where they were presumably deposited by glaciers. He explained that in an early period in the history of the world, two glaciers descended over the continent of North America. One came directly south from James Bay over Lake Superior, upon what are now the States of Indiana, Michigan, Wisconsin and Ohio. A second glacier came down upon the same territory from the north-east. Dr. Kunz believes that the first of these glaciers carried into the United States diamonds from a northern source yet undiscovered. The new national transcontinental railway will traverse much of Canada whence the diamonds have probably come, and important discoveries may very likely ensue.

* * *

PROFESSIONAL ACCOUNTANTS AND PARLIAMENT.

The candidates for election to the Imperial Parliament are not to be permitted to overlook the legislative demands and grievances of the practising public accountants in the British Isles. The Society of Accountants and Auditors (Incorporated) which numbers among its members some of the prominent Canadian chartered accountants practising in Eastern Canada, has formulated two important questions, and its members in the United Kingdom are requested to put the queries before their respective candidates, and to forward the replies to the society's council for future reference:

Question 1.—Whether, subject to consideration and report by a select committee of the House of Commons, you will support a Bill for the registration and control of persons publicly practising as Accountants in the United Kingdom?

Question 2.—Whether you will urge upon the Government the necessity of taking immediate steps to promote legislation for giving effect to the unanimous recommendations of the joint select committee of both Houses of Parliament on municipal trading, in relation to the keeping and audit of the accounts of local authorities?

According to the authority of the "Incorporated Accountants' Journal", among the candidates for parliamentary honors are two English chartered accountants and one incorporated accountant, all in public practice.

AN INSULTING HEADING.

The word "houligan," or as it is sometimes spelt "hooligan," is a slang phrase to designate a useless rough, a boisterous, lazy, ignorant ruffian, such as often infests the suburbs or sub-cellars of cities. We are astonished to find an influential daily journal in the United States attributing to Canada a desire to welcome such persons as are thus described to her borders. And yet the "Chicago Tribune" of January 14th deliberately puts as the full heading to its Ottawa letter of January 11th, (which had characterized schemes for the deportation to Canada of "able-bodied men of good character from the agricultural districts of England, Scotland and Wales,") as "Canada's Welcome Given Houligan," although the word or anything like it, was never used by the Ottawa correspondent.

A subscriber to The Monetary Times, writing from Detroit on Monday last, expressed his astonishment that the word "welcome" to such riff-raff should have been used so inaccurately as thus by the "Chicago Tribune." And another correspondent, a Canadian who lives in Chicago, frees his mind to us thus:

"As far as I am aware, nothing has been done by the Canadian Government in carrying out its immigration policy to warrant the use of so opprobrious a word by a leading American newspaper. It is therefore difficult to understand the motive, except it be a deliberate intention to create a wrong impression as to the facts in the minds of its readers, and so deter would-be emigrants from the United States to Canada. As a matter of fact, it would in Chicago answering to the description of 'houligan' than if Canada was searched from the Atlantic to the Pacific."

❧ ❧ ❧

TRADE ENQUIRIES.

The following were among the enquiries relating to Canadian trade received at the Canadian Government Office, 17 Victoria Street, London, during the week ending 12th January, 1906. A firm of egg and butter importers in Wales ask to be furnished with the names of reliable Canadian shippers of eggs. A Yorkshire firm of poultry importers asked to be referred to shippers in Canada. A Swiss firm points out that there is a good market for fat young oxen from Canada. A Bordeaux house enquires for names of Canadian firms wishing to be represented in South-west France for any kind of goods saleable in that market. A London firm asked to be placed in connection with mining companies and others in Canada shipping antimony ore.

From the City Trade branch, 73 Basinghall Street, London, E. C.:

A London firm of billiard cue makers wishes to hear from Canadian firms who can supply cue blanks cut to dimensions in ash and maple. Blanks to be five feet long, square cut, 1½ in. square, tapering to ¾ in. square. A Midlands firms of merchants possessing a connection in the building trade, would be pleased to undertake the sale of Canadian doors and sashes. A London firm manufacturing a patented thimble are prepared to appoint a resident Canadian agent to sell their thimbles on commission. A firm of Wiltshire bacon curers is prepared to appoint suitable Canadian agent to sell their bacon and tinned goods. A Yorkshire firm manufacturing oil engines wishes to get into touch with Canadian machinery dealers prepared to handle same.

❧ ❧ ❧

—A very significant jury award was made recently in Chicago, when damages in $17,500 were awarded to the children of a drunken father for redress against the saloonkeepers who are alleged to have made a drunkard of him. The verdict, establishing a precedent which is likely to result in the institution of many similar suits, was rendered in Judge Richard S. Tuthill's court. The plaintiffs were the five children of John Hedlund, and the defendants, Oscar Geyer, Louis Lundquits and Ernest Thoren, saloonkeepers. The verdict is against them separately and jointly. The condition of the Hedlund family was first brought to the attention of the authorities by Miss Caroline Blinn, of the University of Chicago settlement. While acting as probationer officer she found the children in destitute circumstances, and was instrumental in having the cases started against the saloonkeepers. The children have been compelled at times to go after beer for their father. Th saloonkeeper, or any one else, who, knowing the disposition of a man to get drunk and waste his substance, will supply him with liquor in excess or coax him to drink, deserves to be punished. It is one of the marks of a decent liquor-seller that he will never in his premises sell a man liquor who has already had enough to intoxicate him.

—"And now, my son," said the bank president, "on this, the threshold of your business life, I desire to impress one thought upon you. Honesty, ever and always, is the policy that is best." "Yes, father," said the young man. "And, by the way," appended the greybeard, "I would urge you to read up a little corporation law. It will amaze you to find how many things you can do in a business way and still be honest."

—The following would make good New Year resolutions for a good many retail merchants:

First—Buy good quality at lowest possible prices.

Second—Get all the trade discounts there are.

Third—Pay bills on time and take cash discounts.

Fourth—Obtain fairly any other discounts that may foolishly be offered, but don't think no one else gets the same. There are others.

Fifth—Appreciate and stick to a good, fair business salesman in preference to a cross between a cutter and a trickster.—Maritime Merchant.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

BANKING AND FINANCIAL

It is stated that the Imperial Bank has purchased the Mansion House property in Ingersoll, and intends to erect a handsome bank building. The site is described as being a very desirable one.

We are advised that a branch of the Bank of Toronto has been opened at Portage la Prairie, Manitoba, under the management of Mr. John A. Tate, and that a branch of the same bank has been opened at Victoria Harbor, Ont.

Mr. F. H. Mathewson, manager of the Montreal branch of the Canadian Bank of Commerce, has been elected president of the Montreal Board of Trade. And it is a reasonable prediction that he will make a good president of that body. For years he has been a valued member of the council of the board, and was last year made first vice-president.

There was a meeting in Hamilton last week of the creditors of James Stinson, of Chicago, the proprietor of the defunct Stinson's Bank in the former city. No fewer than 755 claims, aggregating $250,050 were submitted. The real estate is valued at $65,950, against which there are mortgages of $43,400. Even if the property is sold at the estimated value it will not leave much for the depositors, who are the principal creditors in Canada. The appointment of C. S. Scott as assignee was confirmed.

The Dominion Bank has issued its statement for 1905, being its 35th year. The profit earned was sufficient to pay ten per cent. dividend, to write $75,000 off bank premises account, and to carry forward at credit of profit and loss account $100,000 more than in the previous twelve months. There is another larger increase in deposits and circulation, and net profits are larger than ever. The bank management seem disposed, now that they have got a reserve fund half a million greater than its paid capital, to call a halt upon additions to reserve.

The annual meeting of the Montreal Trust and Deposit Company was held on Friday last. The general manager, Mr. John M. Smith, reported over $1,875,000 new bonds arranged for this year. The authorized capital of the company is now $1,500,000, of which $500,000 will be paid in full. The following were elected directors: Messrs. R. Wilson-Smith, Robert Archer, George Hague, Frank W. Ross, S. H. Ewing, George E. Drummond, F. Orr Lewis, A. M. Crombie, Sir William Hingston. Later Mr. R. Wilson-Smith was elected president.

Loan sharks are by no means confined to Montreal or Toronto. They are being exposed in Winnipeg. Word came from that city on Friday last that the C. P. R. authorities had issued orders to Tolman & Co., an American loan company, which has been operating on a large scale in Winnipeg, that it would no longer honor assignments of wages of their employees in Tolman's favor, and employees who take loans from that firm will be in danger of dismissal. It is said that Tolman & Co. charge anywhere from 100 to 400 per cent. interest. They have been making a special effort to secure business among railway employees of roads out West, having sent enticing literature to the men.

* * *

—A large part of the foundations of the Atikokan Ore Company's blast furnaces at Port Arthur, Ont., have been completed, and several contracts for structural work have been awarded. The Canada Foundry Company, of Toronto, have secured, it is said, $200,000 worth of the work; the Canada Bridge Company, $100,000, and the Caledonia Iron Works, Montreal, $20,000. The remainder of the contracts went to United States firms, being for machinery not made in Canada. The company expect to start the furnaces going next August. The mine at Atikokan is being equipped with high-class machinery and the shipping of ore will begin as soon as navigation is open. A railway six miles long from the Canadian Northern main line to the mine will be constructed at once.

DRY GOODS ITEMS.

On Monday last, the wholesale dry goods section of the Toronto Board of Trade held its annual meeting and elected the following officers:—Chairman, R. W. Spence; vice-chairman, J. D. Ivey; secretary-treasurer, F. G. Morley; executive, J. W. Woods, A. T. Reid, C. S. Meek, W. R. Smallpiece, A. F. Roger, John Macdonald, J. D. Allan, John Knox, A. M. Ivey, Chas. Reid, R. A. Nisbett, John Northway and A. W. Allen.

A serious state of things in the linen trade has developed in consequence of the troubles in Russia. Russia is the greatest flax-growing country in the world, and during the last two seasons the production of that crop has been very scanty. One result has been higher prices for linen in all the linen centres of the world, and now, according to all late reports to hand from Ireland and elsewhere, linen is not only high-priced, but deliveries are uncertain. Indeed, it would appear that unless some unlooked for alleviation in the situation arrives speedily on the scene, it will be impossible to get linen goods at any price.

FOR GROCERS AND PROVISION DEALERS.

Few people who have the best interests and the good name of Canada at heart will be found to regret that the arm of the law, in the shape of the Fruit Marks Act, has come down with its full severity on a Trenton man, who had marked fifty barrels of apples as No. 1, when a large percentage of the fruit was inferior, scabby, worm-eaten and small. He was fined one dollar per barrel for the whole shipment, and costs, and in default of payment was sentenced to imprisonment for thirty days in the common jail.

The old, old questions of railroad rates and facilities were the chief subject for discussion of the transportation committee of the Ontario Fruit Growers' Association, when it met in Toronto last week, with Mr. W. H. Bunting, of St. Catharines, in the chair. This gentleman stated that experiments in shipping tender fruits from St. Catharines to Winnipeg had shown that the journey was made in five and a half days when the car was accompanied, and in seven or eight days when not accompanied. It was decided to ask the railway commission to compel the railways to furnish cars within a week of placing the order for same; to maintain a minimum speed of twelve miles per hour during transit, and to furnish "tracers" by which shippers can learn where the cars are at various stages in the journey. A resolution was passed asking for the reduction in the rate on apples asked for in June, 1904, that apples in barrels be accepted at a fixed weight of 150 pounds, and that equipment equal to the best now in use be supplied for the carriage of fruit. It was decided also to press the Government to enact legislation placing express rates under the control of the railway commission.

—Widespread regret is felt at the death of Mr. Charles F. Gildersleeve, the veteran Canadian steamship manager. He died in Kingston after an illness of about two weeks, at the age of seventy-three. His first efforts were devoted to the law, but he soon showed his preference for marine matters. The Bay service originated by his father was probably the oldest company in America. Mr. Charles F. was mayor of Kingston in 1879, and was a candidate for parliamentary honors, but was defeated. Mr. Gildersleeve was very optimistic and was a leader in many public enterprises. He was general manager of the Richelieu & Ontario Navigation Company for ten years, from 1894 to 1904, and is acknowledged to have been largely instrumental in reconstructing the company's equipment and enlarging its dividends. In 1904 he returned to Kingston and resumed the management of the Lake Ontario and Bay of Quinte Navigation Company, his son, Mr. H. H. Gildersleeve, going to the Northern Navigation Company as its manager. In 1904-5 he was president of the Canadian Marine Association.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 30th Dec., 1905.

		CAPITAL					LIABILITIES

ANNUAL MEETING.

The Annual General Meeting of Shareholders of this Corporation will be held at the Head Office of the Corporation, Toronto Street, Toronto, on Friday, the second day of February, 1906, at 12 o'clock noon, for the reception of the Financial Statement and Report of the Directors for the past year; for the election of Directors and for the transaction of such other business as may be brought before it.

GEO. H. SMITH,
Secretary.

WHY lock your money up in a bank to bear an insignificant rate of interest when you can purchase our Debentures, which are issued for one, two, three, four or five years, and bear interest at five per cent. per annum. Half-yearly interest coupons, made payable to bearer, are attached to these Debentures. . . . .

The Debentures are transferable. Remember your money is safe here. There is absolutely no chance for loss. Write us for further information. . . . 6

The failure is reported of Eugene Delorimier, a Montreal haberdasher. He began business in the spring of 1904, in premises formerly occupied by his old employer, who also had proved unsuccessful.

Mercantile Summary.

The Quebec and Lake St. John Railway Company is applying to the Quebec Legislature for authority to subscribe for stock in the Quebec Transport Company and other shipping companies trading with the city of Quebec.

It is stated by a correspondent of the St. John's "News," writing from Thetford Mines, that the year has been exceptionally good for asbestos shippers, and the mines are all running full blast. The companies will begin the new year with small stocks in their sheds.

Up to May, 1904, Samuel Bazar was working at his trade as a cigarmaker in Montreal. He then decided to engage in the boot and shoe trade as a retailer, but his venture has ended disastrously, a demand of assignment having been made upon him. He owes about $5,000.—Another Montreal failure in the same line of business is that of H. Hebert, who has kept shop for some twelve years in the Point St. Charles suburbs in a small way.—The assignment is also noted of T. J. Daniels, who in 1901 or thereabout took over the uptown branch of the late Wm. Dangerfield's well-known custom shoe business. He was formerly long employed with Mr. Dangerfield, who left a considerable fortune, but Mr. Daniels has not been able to retain the old and profitable connection.

The Dominion Square Land Company, Limited, whose primary object, we believe, is to build a palace hotel in Montreal, has received its charter from Ottawa. R. Wilson Smith and S. A. Finley, of that city, are among those prominently interested. The capital stock is placed at $500,000.

Considerable interest is being taken by British Columbia mining circles in the cargo brought down in the "Henriette" by way of Vancouver to the Britannia smelter at Crofton. It is said to be the first shipment of ore to be sent from an Alaskan mine to a B. C. smelter, but many more are to follow, it is understood.

The Murray Bay Lumber and Pulp Company, Limited, capital stock $500,000, and chief place of business at St. Etienne de la Malbaie, P.Q., will take over the business of the Laferrière Lumber Co., Limited, and carry on a lumber and pulp-wood trade in all branches, purchase timber limits, buiid wharves, steamboats, etc.

Deposits of petroleum have been discovered, it is reported, at Quilchena Creek, on the property of the Diamond Vale Coal and Iron Mines Company. The management of the latter state that prospecting on their property during the last year or two has disclosed several seams of coal and permanent mining operations will be begun as soon as possible.

The large general merchandise store of Crawford & Co. in Indian Head, Assa., was completely destroyed by fire on the 14th inst. at a loss of something like $25,000, only about one-half of which is covered by insurance. On the same day fire broke out in the acid-room of the Dominion Pulp mill at Chatham, N.B., and it was destroyed, and much damage done also to other buildings. The Seaside Hotel at Rustico Beach, a lovely seaside resort on Prince Edward Island, was destroyed at a stated loss of $14,000, the insurance being only $4,000.

A failure is reported from Fraserville, Que., J. C. Levesque, general merchant, of that town, which is on the St. Lawrence, far below Quebec, having assigned. He was formerly a clerk in Quebec, and for two or three years was of the firm of Belanger & Levesque, dry goods retailers of that city. They dissolved in February, 1905, and Levesque opened a shop in Fraserville with but a limited capital. He has, however, been able to secure credit to a very liberal extent, and has overloaded himself with stock which he cannot pay for, resulting in his serious embarrassment. His liabilities are figured at $15,120, and assets at $14,800.

A tobacconist of Brockville, Ont., Charles Young, is reported insolvent, with liabilities of about $1,600.

A report from Rossland, B.C., states that the St. Paul mine has been sold to Toronto capitalists, who intend to carry on development work on an extensive scale. The mine is situated on the Red Mountain Railway.

A voluntary assignment has been made to V. E. Paradis, Que., by Francois Bois, operating in a small general store way at St. Louis de Ha Ha, Que. The liabilities foot up about $1,500, and the estate is to be closed out.

The Vancouver Gas Company, an organization subsidiary to the British Columbia Electric Railway Company, are planning extensive improvements to its system for the coming summer. Large orders for pipe, etc., have already been sent out. A new gas reservoir will also be built at a cost of $25,000.

F. X. Martin, who commenced business in Montreal last spring, in a small retail dry goods way, has abandoned his estate to his creditors. Formerly he was in business as a retailer in Hull, Que., when he failed in 1896, and resuming there in his wife's name he was again unsuccessful a year or so later.—J. A. Lazure, another Montreal dry goods retailer, has voluntarily assigned to Kent & Turcotte, owing about $6,000. He is a middle-aged man, who failed once before, some twenty years ago, after which he went clerking up to 1903, when he determined to make another essay on his own account.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO

Mercantile Summary.

A firm named O. Lamontagne & Co., in the confectionery line in Quebec city, have assigned, owing, it is estimated, about $2,500. Lamontagne is reported as having failed before in 1897.

A Valleyfield grocer named Joseph Morand has assigned on demand. He has been in business since 1899 in that Quebec town in quite an active way, but has been disposed to overstock, and has not generally shown ease or promptness in payments.

For ten years past H. R. Gregor has been doing business in a modest tailoring way at Cornwall. He has assigned to Alex. Langlois, of the same town, and is said to owe about $2,000.—Grondin & Co., in the same line of business at Smith's Falls, Ont., are reported to be offering 75 cents. Grondin failed before in 1900, and has since been doing business under cover of his wife's name.

Mr. John Lineham, president of the Rocky Mountain Development Company, which is the concern which discovered several oil-wells in South-west Alberta, is taking up the question of building an elevator in Vancouver, with a capacity of at least 100,000 barrels. The grain production of Alberta for the coming season is expected to reach a total of 4,000,000 bushels or more, and with adequate facilities for handling, it is believed a large proportion of it will pass through Vancouver to the Orient.

The failure of Hugh Allan, cheese and butter exporter, Montreal, has occasioned somewhat of a flutter in the trade. A fire occurred in his premises on December 14th instant, and the insurance companies interested could not apparently reconcile his claims with the results of their investigation as to the amount of stock actually on hand. Several weeks later Mr. Allan left town, and not having since returned, his affairs have been put into the hands of the assignee. His liabilities are reported to reach to from $40,000 to $50,000.

The agreement between the Canadian Northern Railway Company and the Quebec Transport Company is to the effect that the latter will handle all grain brought to Quebec for export to Europe for which purpose it has secured the old Leyland steamship line berths in the Louise docks. At a meeting of the Quebec Transport Company on Saturday last the following officers were elected: President, Wm. Power, M.P.; vice-presidents, J. G. Scott, general manager Quebec & Lake St. John Railway, and C. W. Spencer, Eastern manager Canadian Northern and Great Northern Railways; managing director, Thomas Harling, of Montreal; directors, J. H. Walsh, general manager Quebec Central Railway; John Theodore Ross, and A. E. Doucet, C.E. Mr. Harling will go to England to complete negotiations for some first-class steamships.

Mercantile Summary.

The Toronto Paper Company's chemical building at Cornwall, Ont., was, on Tuesday last, gutted by fire, which, however, did not spread.

Contracts have just been given out for the building of a new Roman Catholic cathedral at St. Boniface, near Winnipeg, the expenditure involved being $250,000.

J. A. Matthews, W. J. Feeney, and others, of Toronto, have joined together under the name of the Elevator Specialty Company, to manufacture and repair elevators and machinery.

The Allan Steamship Company has been awarded the mail contract between Canada and Great Britain for five years, and it contains a provision for an extension by another five years if certain improvements are made in the service.

The C. P. R.'s freight shed at Portage la Prairie, Man., was destroyed on Thursday last, with all its contents, the loss being $10,000. On the same day Kerr & Combs' foundry in Hamilton was badly damaged by a fire which started in the moulding shop. Loss, about $5,000.

A company under the name of Warden King & Son, Limited, has been granted a charter by the Ontario Government to take over and carry on as a going concern the business carried on in Ontario by the firm of Warden King and Son, iron founders and machinists, in Montreal. The capital authorized to be used in Ontario is $40,000.

The Duluth, Rainy River and Winnipeg Railway is seeking legislation to enter Fort Frances from the south, in order to connect with the Canadian Northern; and for this purpose it wants to build a railway and passage bridge across the river above that town. The intention is to bring Winnipeg several hours nearer the east by way of Fort Frances and direct a large percentage of traffic that way, making the Canadian Northern, it is claimed, the shortest and cheapest route to and from the east and south.

A booklet descriptive of the Cobalt Mining District of Ontario has been compiled by Messrs. B. B. Harlan & Co., stock brokers at No. 6 King Street West, Toronto. Mr. Harlan quotes from various authorities as to the unique character of these silver-cobalt ores. Professor W. G. Miller, for instance, and one or two correspondents of United States journals, who were sent over here to report upon this novel Canadian field. He gives extracts from Canadian journals, too, the "Globe," and the "World," and "Telegram," of Toronto, between July and December last. He has made use of illustrations, too, giving views of the town and of several of the mines, the La Rose and the Trethewey included. The pamphlet is a very neat one.

Mercantile Summary

We have received a handsome illustrated programme of European travel. Free copies will be sent on application to the Rev. Dr. Withrow, Toronto.

The corn crop of Kansas in 1905 amounted to 190,519,593 bushels, the largest since 1902, and 58,500,000 bushels more than in 1904; its value is $68,718,584, which with one exception is the most valuable corn crop produced in the State.

The Fletcher Manufacturing Company, of Toronto, has been granted an Ontario charter by the provincial government, authorizing it to make and deal in bakers' and confectioners' tools and supplies, hardware, glassware, etc. The capital is $250,000.

The Manitoba Lumber Company's plant at Carman, Man., with practically the whole of its stored timber, was burned on the 20th inst. The loss is estimated at $10,000 on the plant, $12,000 on the stock; fully insured. The fire is presumed to have been the work of an incendiary. Sieling's lumber mills at Eagle Lake near Sundridge, Ont., were destroyed by fire on the same day, with an estimated loss of $6,000, partly insured.

HALIFAX

The Grand Trunk Railway is completing its plans for the improvement and enlargement of Bonaventure station, Montreal. The improvements will include a raised track from St. Henri suburb to the depot at the corner of St. James and Windsor Streets. The elevated track is to be on stone pillars, with steel bridges at the street crossings.

A winding-up order has issued in the matter of the Lacto-Globulin Company, Limited, of Montreal, a concern organized in 1903, with an authorized capital of $100,000, to engage in the manufacture of a special food for invalids from milk. The article has been highly commended by medical men, but the difficulties attending its manufacture on a large scale have proved greater than anticipated.

A company has been formed in Toronto under a charter from the Ontario Government and called the South American Petroleum Company, Limited, with a capital of $1,000,000, for the purpose of prospecting for and developing oil wells, and to manufacture and refine the products thereof, "where" not being stated in the "Gazette." J. H. & G. W. Spence, barristers, are mentioned as provisional directors.

"There has been a lot of talk about the increase of crime in Canada, but in thirteen years the number of our prison inmates has shown very little variation. Notwithstanding the great increase in population, many of whom are foreigners, our record will compare favorably with that of any country in the civilized world." So said Mr. W. B. Archibald, Dominion Parole Officer, at Ottawa the other day. Mr. Archibald eulogized the improved management of Canadian prisons, where convicts were taught a trade, so that they afterwards might lead honest lives. There had been 1,082 men released from penal institutions on parole, and only 24 of these had been returned to prison for having again committed crimes. About 70 had their licences cancelled for failure to report to the police or other causes.

C. P. R. FREIGHT RATES NOT ALWAYS EXCESSIVE.

A Scotchman named Alex. McOwan, writing in the Winnipeg "Free Press" about the western country and the C. P. R., makes it plain that he does not always sympathize with the plentiful complaints made of that road's overcharges by Western Canadians:

"When in Scotland at the beginning of the year, on immigration business, my attention was directed to a complaint in the "Scotsman" newspaper, the national organ of the country. It was written by a well known Scotch cattle breeder, a landed proprietor, near the town of Oban on the west coast of Scotland. In his letter this gentleman complained that he could put a steer on board the train at Calgary and the C. P. R. would haul it to St. John, N.B., a distance of about 3,000 miles, tranship it to one of their ocean steamers and carry it over sea, another 3,000 miles, landing it in Liverpool, cheaper than he could ship a beast by freight from Oban to London. You can depend that this gentleman did not think the Canadian farmer had much to complain about in comparison with his own grievances."

Another case is cited by Mr. McOwan. He says it was brought under his notice by Mr. W. Haxton, of Dundee, of the firm of Fleming-Haxton, shipping agents, through whose hands thousands of emigrants for Manitoba and the Northwest have passed within the last ten or twelve years.

"That Canadian Pacific of yours is a marvel for low rates," said Mr. Haxton to me one day. I ventured to remark that if he were on the other side of the Atlantic he would hear more about it. "Oh! it'll be the old story," he said,

pawkily, "A prophet is always without honor in his own country."

He then laid before me the details of a comparison he had just made between home and Canadian rates. Two years ago a family had passed through his hands from Forfarshire and gone to Brandon. A year after settling there, they sent home for some household effects that had been left behind. The weight was somewhat about two tons. The goods were shipped from Glasgow to Halifax and thence to Brandon. Out of curiosity Mr. Haxton asked a quotation for the same weight of material from Dundee to London, and was more than astonished to find that the difference was a shilling in favor of the Brandon consignment.

FINANCES IN THE UNITED STATES.

Henry Clews & Co., New York, in a recent weekly circular, say:

The strain between natural and artificial influences in the stock market grows stronger each week. Artificial conditions are all ranged on the side of still higher prices, and predictions are frequent that such are to be expected. These predictions, however, are usually inspired by self-interest on the part of large holders who still have stocks to sell or are engaged in important negotiations which would be facilitated by a rising market. They are usually based, moreover, on conditions which have been amply discounted, such as large earnings of the railroads, and especially of the industrials, which, through high prices and a large volume of business, are unquestionably making very unusual profits. On the other hand, natural conditions, which for some time have been kept out of view, are working with increased force towards reaction. Chief of these influences is the money market. It is quite evident that monetary supplies the world over are none too large for present extraordinary requirements, and this in spite of the great increase in the gold supply and other forms of currency. Firmer rates than usual have prevailed in all international money markets, but at New York the advances have been extreme for two reasons: First the inelasticity of our currency system, which prevents either expansion or contraction, according to requirements; and second, the highly artificial manipulations of those who control the local money market. Extortionate rates have been enforced upon speculative borrowers, which would not have been possible but for the fact that our available supplies of money are practically exhausted.

The question now is, What are the prospects for building up our bank reserves? Unfortunately, they are not very brilliant at the moment. The period is approaching when funds which were used for crop-moving purposes should return to the East. In a degree

these funds are now being returned, but not very freely, to New York.

Outside conditions in the stock market still continue satisfactory. The technical situation is strong, but subject to reversal; and, while strong efforts may be made to sustain the market, especially in view of important deals which are in prospect, still the present tendency is liable to change towards lower prices, with sharp fluctuations and much activity at various intervals. Investment purchases this January have been relatively light, and a great deal of capital is held back awaiting more attractive opportunities. These can only be afforded by permitting the market to recede to a more wholesome and attractive level.

* * *

—The Chignecto Mines Company is said to be contemplating the installation of a large central power station, at its mines in Cumberland county, and also the erection of a building in the town of Amherst, with a view to the transmission of power by a pole line. Amherst is one of the chief manufacturing centres of Nova Scotia, and the prospect of securing electrical power has been received with great satisfaction by the mercantile and industrial classes of the town. The town council has given the company the right to enter the town, and in most cases the owners have granted free right of way for the pole line. At a very largely attended meeting of the Amherst Board of Trade the electrical project was unanimously endorsed, the resolution being moved by Mr. N. Curry, of the Rhodes, Curry Co., Limited, and seconded by Mr. D. W. Robb, of the Robb Engineering Company, and President H. L. Hewson, of the Hewson Woolen Mills.

MUNICIPAL OWNERSHIP IN FORT WILLIAM.

The results of municipal ownership in Fort William, Ont., which a year or so ago were a subject for some controversy, will be interesting at the present time. As an outcome of the year's operations, it is stated that not only have the ratepayers secured cheaper water, light and telephone service than before, but the corporation has netted a handsome profit as well, and the chairman of the Water, Light and Telephone Commission in his annual report just submitted recommends that the rates be further reduced at an early date.

According to the report of the superintendent of the waterworks department there had been laid during the year 9,000 feet of six-inch mains and 8,800 feet of four-inch, with the necessary fire hydrants, valves, etc., at a cost of $13,261. Three hundred water services were installed at a cost of $10.10 each. The total number of water services now in use is 1,400. Altogether there is now laid down a trifle more than fifteen miles of water mains, while 102 fire hydrants have been installed.

In the telephone department 10,000 pounds of galvanized wire were used, and 39,000 feet of other kinds of wire. Two hundred feet of okinite cable and 4,200 feet of encased cable were strung. One hundred lines were added to the switchboard, 240 telephones and fifteen exchange bells were installed.

In the electric light department 82,000 feet of wire were strung, and twenty-four metres and ten arc lights placed in service.

⁂

IRON AND STEEL MARKETS.

The bulk of the present metal business is mainly for large undertakings, says a Chicago report. Big concerns are the prominent factors. Public works of vast dimensions are calling for tonnages that run up into five figures. Only a few of these are needed to give tone to the market in its present condition, even if the rank and file of the consuming trade remains back in semi-obscurity. Pig iron buying has been heavy. January is starting out under a good deal of pressure. In this respect the east having been much more active than the west.

It is notable that much of this enquiry is for shipment during the first half of the year. It is the guess of some pig iron men that considerable iron will still have to be bought for use during the first half of the year, and it would not be unexpected to them if the present activity in the east were to extend soon to the west.

There have been actual advances in some of the steel products within the past week, including sheets, tin plates and wire products. And because advances are anticipated in other departments there has been considerable buying. thus giving to the present market a livelier hue than it might otherwise possess. The net result has been that the order books of the steel mills are weighted down with a heavier tonnage of contracts than they have ever before possessed. To prevent themselves from being completely swamped the large steel makers have lately taken steps for a further capacity of production. It has just been decided by the steel corporation to increase its production in the Pittsburgh district nearly a million tons per year.

TORONTO MARKETS.

Toronto, Jan. 25th, 1906.

Chemicals, Drugs, Etc.—The market is steady with few features of a noteworthy character. The staple drugs have made no appreciable change in values, but no great volume of trade is passing. In fact business is a little on the dull side, a character which it seems is shared by that in most other centres at present.

Flour and Grain.—The absence of snow and consequent badness of the country roads, has militated against any large movement of grain, and business for the week has been extremely dull. Quotations for wheat are just as they were last week. The export price offered for ninety per cent. patents in buyers' bags is $3.10 to $3.15. Shorts and bran are still very firmly held owing to scarcity. The market for barley is a little unsettled. Oats are firm and so are peas. In rye, corn and buckwheat, there is but little change and not much is doing.

Groceries.—Dullness has been the rule in both city and country markets and without doubt trade is being affected by the abnormally mild season and the absence of good sleighing roads. Sugars are a little on the heavy side at the recent decline. Other lines of staples, in respect to values, remain unaltered. Canned strawberries are out of the market. Other canned goods are held firmly. Dried fruits present no feature. They are moving with about average freedom for this time of the year.

Hardware.—Trade in both small hardware and heavy metals is described as quite satisfactory, though scarcely so great in volume as was the case last month. The prices of pig iron and iron products keep high, and most of the other staple metals continue also at the high figure referred to in our last report.

Hides, Skins and Leather.—No change has taken place in prices, though their tendency is weaker. The quality of hides coming in is quite poor, but this is always looked for at this time of the year, and not much improvement is looked for before March or April. In the leather trade not much is doing, but prospects continue fair for a good season's business.

Live Stock.—Briskness was not a distinguishing feature of the cattle trade this week, but for this the bad weather is largely accountable. The exporters offered were but few and they sold at steady prices. Few choice butchers' animals were offered, but demand was small. Really choice are required. The demand for stockers and feeders is light. There was an active enquiry for calves. Sheep and lambs were also in fairly brisk demand. Hogs are scarce in nearly all parts, and prices are advancing steadily.

Provisions.—Butter coming in is mostly of poor quality, of which there is more than a sufficiency, while better qualities are largely absent. The market is easier. A steady demand exists for cheese. Receipts of poultry are light.

Seeds.—There is but little enquiry, but prices are steady at before-quoted prices.

Wool.—No business is being done, but prices are nominally quoted the same as before.

A WESTERN JOURNAL of repute, commenting on Life Insurance, states:

"The main thing for a Company to have is a high ratio "of strength—assets, compared with its weakness—liabilities. THIS THE GREAT-WEST LIFE HAS. There are "three reasons for this: Good management, high rates "of interest on its investments, and the select, vigorous "young population of the healthy West."

Rates and full information on request.

MONTREAL MARKETS.

Montreal, Jan. 24th, 1906.

Dairy Products.—Owing to the mild weather the butter market is a little easier, the outside figure for choicest creamery being now 23c.; dairy grades are quoted at 20½ to 21c. Fine Ontario cheese is quoted at 13 to 13¼c., and fine Quebecs at 12¾c. per pound.

Furs.—Telegraphic reports so far received indicate a very stiff advance in muskrats, spring rats selling 50 per cent. higher than a year ago, and fall and winter skins at 35 per cent. advance. Beaver has sold 5 per cent. lower; lynx, 15 per cent. lower; other, 10 per cent. lower, and wolverine the same as last year. Salter N. W. fur seal sold 15 per cent. lower than December. We shall be able to give complete returns in next issue.

Groceries.—The recent very pronounced thaw has played havoc with the country roads, and has consequently affected business in this line quite materially, as well as remittances to some extent. The sugar market continues to rule easy, under reports of a large prospective yield of beets, and factory quotations are not any firmer, being $4.15 for standard granulated in bags and $4.20 in barrels, while No. 1 yellows are quoted at $3.80. Japan teas are in much request at the moment, but are very firm in price. Ceylon teas are in better demand, and are firmer by 1 to 2 cents for both greens and blacks. Canned goods are firmly held, and some enquiry for tomatoes is reported from New York, where stocks are low; strawberries are scarce and are quoted as high as $2.25; gallon apples are quoted at $2.50 at the factory. A sale of a car lot of evaporated apples is reported at 10½c.; for dried apples 6½c. is asked in a jobbing way. The milling company has put the price of rice back to the same figure it was before the recent rise, owing it is said to importations from England.

Hides.—The easiness in the hide market noted last week has assumed more definite shape, and 11½c. per pound is now generally quoted for No. 1 hides by buyers, though 12c. has been occasionally paid. The usual seasonable deterioration in quality is becoming more apparent. There is nothing offering yet in new calfskins, but quotations are made at 15c. per pound for No. 1, and 13c. for No. 2. Lambskins remain at old figures.

Metals and Hardware.—Continued good enquiry is reported in these lines, with generally firm values. Barb-wire is quoted easier at $2.15, Cleveland, due to competition. Bars continue very firm at $2.05 in a jobbing way; nails, horseshoes, etc., are unchanged. Boiler plate is firm at $2.40, and iron pipe at $4.29 for inch. Canada plates are quoted at $2.60 for fifty-twos; black sheets, $2.40; galvanized Canadas, $4.10 and $4.35 for fifty-twos and sixties respectively; galvanized sheets, tinplates, etc., are unchanged. Pig lead is again rather firmer at $4.85; sheet lead, 5⅛ to 5¼c.; ingot tin, 40 to 41c.; copper, 20½c.; sheet copper, 24½; spelter, 7¾c; sheet zinc, 8¼ to 8½c. per pound.

Oils and Paints.—Travellers generally report good spring orders. Turpentine is again firmer by a cent this week, making present quotation 95c. Linseed oil is quoted at 56c. per gallon for raw, and 59c. for boiled; fish oils are very much neglected. Strictly pure white lead is very firm at $5.75. Paris green at 17 to 18c. in bulk, and 18 to 19c. in packages. Some moderate stocks of window glass are coming forward via Boston and Portland, but prices continue very stiff at former quotations.

Wool.—A wool salesman recently returned from the West reports poor business, millmen being little disposed to buy, though it is generally conceded that there is no probability of them being able to buy cheaper later. Capes are quoted at from 19 to 23½c.; fine B. A., 40 to 45c.; North-West, 19½ to 21c.; domestic fleece, 28½ to 29c. per pound.

* * *

SOME IMPROVEMENT IN CANADIAN EXPORTS TO AUSTRALIA.

Quite frequently it falls to the lot of our various informants in Australia to complain of the manner in which Canadian shippers to that market fail to meet its requirements, either in manner of doing the business, or in methods of packing and shipping. Sometimes, however, a most encouraging tale is told. For example, in a recent letter from Mr. D. H. Ross, Canadian trade agent in Melbourne, he speaks thus:

The first sample shipment of Canadian sewing machines, which has come under my notice, was recently landed at Melbourne to the order of an energetic firm of manufacturers' agents. These machines are beautifully cased in oak, and opened up without a scratch. While this line is well looked after by branches of United States and German manufacturers, there is every prospect of Canada securing a portion of the trade, particularly if the makers will loyally support their agents in endeavoring to secure a foothold in this rather conservative market.

In his report of January 7th, 1904, Mr. Ross referred to some Canadian machinery, which, at that time, was being erected in a Tasmanian saw mill. It is gratifying to learn that the machinery is looked upon as the most modern in Australia at the present time, being in every way highly creditable to the makers, and further that it has given entire satisfaction despite that for some months it was operated by unskilled men.

It is pleasing to record that a sample shipment of Canadian cream separators has just been opened up in Melbourne. British, Swedish and United States makes of cream separators have hitherto held the Australian trade, but if the comparative trials of the Canadian machines prove satisfactory to dealers in dairying requisites—and the prices can meet competition—there is a vast market to exploit not only in Victoria, but throughout the Commonwealth and New Zealand.

Quite recently the first Melbourne order for a line of Canadian organs new to this market went forward to the manufacturers. These instruments have for some time been imported by dealers in Adelaide with satisfactory results.

On the other hand, it is to be regretted that Canadian manufacturers of carriage woodstock have not, to any extent, yet succeeded in securing a portion of the large Australian trade in carriage builders' materials. Independent of furniture and handles, the Commonwealth imported in 1904 manufactures of wood to the value of over £7,000, of which the United States supplied £33,000 and Canada only £506. Samples of Canadian woodstock shown in Melbourne do not as yet meet the requirements of the local trade or the competition of the United States makers as regards values. This trade is an important one, and well worth the serious attention of Canadian manufacturers and exporters. Some Canadian manufacturers of carriage springs are exporting considerable quantities of their goods to Australia, chiefly through New York commission houses, and in Melbourne, and doubtless in other im-

porting centres, they are in good demand, owing to their excellence of workmanship and suitability for local vehicle builders. This trade is capable of further expansion. The principal materials required by Australian carriage builders are as follows: Sarven wheels, hickory rims, spokes, singletrees, doubletrees, poles, shafts, hickory for gearing under rigs, elm hubs (a leading line), waggon bows, etc. These materials are imported in a considerably varied assortment, and for the most part in the better grades only.

⁂

PORT ARTHUR BOARD OF TRADE.

The twentieth annual meeting of the Board of Trade for Port Arthur, Ont., was held on the 23rd January and resulted in the election of the following officers: President, Geo. Mooring; vice-president, H. A. McKibbin; secretary-treasurer, F. D. Jackson. The council of the board were elected as follows: H. A. McKibbin, I. L. Matthews, J. T. Emmerson, W. H. Nelson, A. McGillis, R. A. Ruttan, George Hodder, J. A. Little, A. W. Roberts, C. H. Shera, Col. Wray, W. C. Dalton, F. S. Wiley.

⁂

GUARANTEE COMPANY OF NORTH AMERICA.

The annual meeting of shareholders of the Guarantee Company of North America was held at the company's offices, 57 Beaver Hall Hill, Montreal, the president, Mr. Edward Rawlings, in the chair.

The report gives the following figures: Amount of bonds in force, $63,777,624; gross revenue, $323,419.65; assets, $1,338,648.75; total resources, $1,702,648.75. The total amount paid and provided for indemnity to employers to date is $1,866,784.42. The profits for the year amount to $99,686.43, out of which has been paid the usual dividend of 6 per cent. on the paid-up capital, and a bonus of 2 per cent., leaving a balance of $75,318.43, to be carried to profit and loss, making the surplus to shareholders $881,385.84. Hereafter the rate of dividend will be 8 per cent. per annum, payable quarterly.

The following directors were elected: Messrs. E. S. Clouston, George Hague, Hartland S. MacDougall, H. W. Cannon, of New York; James B. Forgan, of Chicago; E. C. Smith, of St. Albans, Vt.; Edward Rawlings, Wm. Wainwright, and H. E. Rawlings, of New York. Mr. Edward Rawlings is president, Mr. Hartland S. MacDougall, vice-president, and Mr. Richard B. Scott secretary-treasurer.

⁂

PROGRESS OF MOOSE JAW.

We gather from a report of the council of the Moose Jaw, Sask., Board of Trade presented to its members at the annual meeting on January 9th, that the year 1905 has passed into history as the most prosperous ever experienced by that city. For this there are several causes, the most prominent among them being the great crop of grain which was sold at remunerative prices, thus enhancing the buying powers of farmers; the inrush of new settlers, and the sharp advance in the price of farm lands as well as of city property. At the same time, it may be mentioned that though the Moose Jaw district was first settled twenty-three years ago, there are still thousands of acres unoccupied within easy distance of the city, the wave of settlement having in some measure carried the rush past many spots which perhaps, on account of fine railroad facilities and so forth

The British Canadian Loan & Investment Company, (Limited.)

Notice is hereby given that the Annual General Meeting of the Shareholders will be held at the Company's office, Equity Chambers, 24 Adelaide Street East, Toronto, on Wednesday, the Seventh day of February next, at noon.

By order of the Directors.

ERNEST S. BALL,
Manager.

M., for the Election of Directors for the ensuing year, and the transaction of other business relating to the management of the corporation.

By order. HUGH SCOTT,
Manager and Secretary.

Toronto, 23rd January, 1906.

are in truth more than usually favored. A feature of the settlements in this region is their Anglo-Saxon—Canadian, British and American—character, the foreign element being conspicuous for its absence. We gather further from the report that the total assessment of the city of Moose Jaw in April last was $2,916,840. The population is now estimated at over 6,000. The expenditure on public works and new buildings during the year totals over $850,000, of which $230,000 was for municipal improvements, sewerage, electric lighting system, cement sidewalks, and other improvements. Railway improvements amount to $150,000 on new machine shops, boiler house, freight sheds, and completion of stock yards, not including the outlay on the branch line north. Some of the public buildings erected during the year, are the new school, which cost $43,000, post-office and customs house $30,000, Masonic Temple $25,000, Bank of Hamilton $35,000, McRobert's Hotel $40,000, and many other buildings for commercial or residential purposes. The prospects for a good building year in 1906 would appear to be very good.

Mercantile Summary.

In connection with the statement in our St. John correspondence as to enquiries being made in New Brunswick by the Massey-Harris Company of Ontario for samples of native wood, a newspaper of the former province says that W. S. Tompkins, of Woodstock, N.B., general agent for the Massey-Harris Company, has closed a contract with B. F. Smith for one hundred thousand feet of birch plank, to be shipped to Brantford, Ont.

The Toronto firm of Parker & Co., real estate and stock brokers, Colborne Street, suspended on Tuesday last. The firm has been in business in Toronto for eighteen years, dealing largely in real estate. The liabilities seem to be about $12,000 in claims scattered over Canada. The assets consist of the balances on accounts in London and New York, but there is no real property to realize upon. The assignment was made to Charles Heath, accountant, by George C. Parker, the senior partner in the firm.

Announcement was made on Tuesday last of the failure of James Birchley, tobacconist on Mill Street, Saint John. His business, a good one, was ruined, it it said, through the neglect of the proprietor. The liabilities are not heavy.

Statistics from the mining districts of Thetford, Black Lake and Broughton, in the Eastern Townships of Quebec, which have been lately compiled, show a remarkable increase for the year just past. The shipments of asbestos alone are 37 per cent. more than those of 1904 The shipments of asbestos of all grades during 1905 were in round numbers 47,000 tons. The shipments of chrome iron from Black Lake also showed a good increase, amounting in all to about 9,000 tons, chiefly concentrates.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

Marmora DEBENTURES

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Compony OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00

More Than $7,000,000.

Over and above premiums received, more than $7,000,000 has already been paid or credited to its policyholders by the

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain additional security of $300,000 and what is of greater importance, are assured of careful and conservative management as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a voice in the management of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet possesses the advantages of both.

Home Office - Toronto, Ont.

AN IDEAL POLICY OF LIFE INSURANCE.
The 20-Year Premium Endowment Plan
ISSUED BY THE

ROYAL-VICTORIA LIFE INS. CO.

Head Office, Montreal.

This policy is a model of simplicity. The Endowment feature is the return of the actual premiums received by the Company. The insured has his life insurance for the interest on his premiums and his full premiums returned, if living. **There are no estimates. Everything is guaranteed.** This is permanent life insurance. There is no assessment insurance as cheap. It is the policy the people want.

In introducing this plan, the Royal-Victoria Life Insurance Company has embodied in one policy the best features of the most popular plans of insurance that have received public approval in the last few years.

The adoption of the 20-Year Premium Endowment Plan is due to a careful observation of the requirements of insurers to have combined in one form of Policy, Whole Life Insurance, Term Insurance and Endowment Insurance at the option of the insured.

This policy is the embodiment of full value for the premiums paid, as shown in the **Guaranteed Interval Values** in the Policy, should the premiums **not be continued** during the 20 full years; or the **Guaranteed Options**, should the premiums be continued to the end of 20 years.

David Burke, A.I.A., F.S.S., General M'g'r.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

BACON HOG PRODUCTION.

Whatever may be the merits of the arguments presented on either side of the controversy between the farmers and the pork-packers, one fact does not diminish in importance. This is, that if the bacon trade of this country is to continue to improve, it is necessary that the hog raisers adhere to the class of animal best adapted to the British market. The Live Stock Commissioner at Ottawa considers this matter of so much importance that he is distributing a circular dealing especially with it. In this is briefly sketched the ideal which should be held by the Canadian hog raiser compared with him of the United States; and this distinction of object must always be borne in mind by those in this country who, in spite of obvious lessons, seem disposed to take the model of the latter for their own. For various reasons, Canada cannot successfully compete with the United States in the production of hogs of the lard type. A large proportion of the cattle there are fed on snapped or shelled corn. Herded with these are hogs that thrive and fatten on the undigested corn left by the steers. These hogs constituting a by-product of cattle feeding are produced at a cost much lower than pork can be raised in Canada. True, all United States hogs are not fed in this way, but a large proportion of them have the advantage of cheap corn, than which there is no better feed for producing fat hogs of the lard type. "Let the Canadian farmer go back to the thick, fat type of hog," says a man well informed on the question, "and it will not be long before the price of Canadian bacon will have fallen to a level with the United States product which is usually from ten to fifteen shillings per hundred, and twelve pounds lower than the quotations for Canadian 'Wiltshire' sides."

In spite of the general supposition that pork is more cheaply and easily produced from hogs of the thick, short American breeds than from the three English breeds which are favored for bacon production, repeated tests have shown that hogs of the Yorkshire, Berkshire, and Tamworth breeds produce pork as cheaply as those of the Poland China, the Chester White, or the Duroc Jersey breeds. In the opinion of Prof. Day, of the Ontario Agricultural College, who is foremost among authorities on bacon production, the lusty, growthy pig of the bacon type is the most economical pork-maker we have, especially when reared, as bacon hogs should be, largely on such foods as roots, soiling crops and dairy offal.

* * *

THE WOOLEN MARKET.

The receipts of circulars from various dealers in wool in London, Boston, New York, and elsewhere, serves to remind one how exceedingly difficult it is to say much of a new or definite character respecting the state of the market for wool in this country at the present time. Quotations have remained at practically the same figure for a long time past; but the truth is they represent but little. For purposes of transacting new business, wool has been out of the market for a long time past, so that the prices given are purely nominal. So far as one can gauge the situation, however, in the absence of any movement, the tone of the market is firm, and manufacturers look forward to continuing to pay the prices which they have had to pay for their raw material during the last year or more. And indeed there would appear to be no special reason why values should decline to any extent, though of course the wool markets of the world are sometimes very erratic.

It is true that in recent sales in London the large increase in offerings of merino and the finest crossbreds caused some to think that a fall in price was imminent; though, as a matter of fact, at the last sale for which report has come to hand, viz.; Tuesday last, there was an actual increase of price in these lines of

5 per cent. Apart from that, however, present prices for these finer grades are still low when compared with the coarser crossbreds, with which we in this country mainly have to do. Also, stocks of all grades, taking the world's markets all through, are distinctly less than normal, which is particularly noticeable in view of the constantly augmenting demand. The real position of the coarser grades of wool is expected to be much more clearly known after the next London sales, which are to take place in the middle of next month. The following excerpt from the annual report of Helmuth, Schwartze & Co., London, indicates in brief compass the movement of the year in regard to the coarse cross-breds in which the Canadian manufacturer is most interested:—

> As regards crossbreds the position has been rather more complicated; and though manufacturers have had a fairly profitable twelvemonth they have had to reckon throughout the whole year with the uncertainty felt in many quarters as to the continued maintenance of values. There can, indeed, be little question that in the steady decrease in the production of merino wool during the previous years crossbred had found its great opportunity and that the rise in the price of fine wool had turned the eyes of many consumers in the direction of coarser kinds. Some doubts were, therefore, felt, perhaps not unnaturally, by many people at the commencement of last year as to the stability of crossbred prices in view of the large increase in the merino clip. But, except for the temporary weakness in the early part of the year when prices, apparently without reason, declined sharply for a time but soon recovered a portion of the fall under the stimulus of renewed American buying, nothing occurred to justify the fears expressed by the pessimists. Partly, no doubt, the continued buying for war purposes helped to strengthen the position of the article; but the renewed fears entertained in many quarters that the conclusion of peace between Russia and Japan would bring with it a decided fall in the value of coarse wools also proved groundless, and prices current in the autumn were fully as high as those ruling during the continuance of the war.
>
> As regards the future it is very difficult to gauge. We have seen that last year's supply barely sufficed for the demand and we have to deal with no appreciable increase in the coming year. This is certainly of hopeful augury. On the other hand, we recognize that the present strong position of crossbred is partly due to its substitution for merino during a period of greatly attenuated supplies of the latter commodity, to which fashion now seems to be turning anew. And further it is possible that the cessation of the exceptional demand for army purposes may even yet have results erroneously anticipated for last autumn. On the whole, therefore, while it seems unlikely that any decided change is impending, we can hardly perhaps expect, at any rate as far as low crossbreds are concerned, to see the present high level prices fully maintained throughout the ensuing year.

* * *

INJURIOUS DISHONESTY.

Every now and then some illustration presents itself of the way in which men show their disposition to sacrifice the reputation of their country for fair dealing to an immediate, ill-earned gain of a few dollars. People who ship No. 2 apples to England and mark them XXX, come under this class; and there have been more cases of this foolishly injurious sort of thing lately than it is pleasant to contemplate. Last week at the Western Dairymen's Convention at Ingersoll, Mr. Barr, the Dominion chief dairy instructor, complained of a form of dishonesty which he alleged is growing among the patrons of cheese factories, and that is to add water to their milk, and to skim the cream off before taking the milk to the factories. This is a poor return by the farmers for the vigorous efforts which have been made by the Government to place the dairying industry on a sound and paying basis.

* * *

ASCERTAIN THE CAUSES OF FIRES.

Some of our readers may wonder why no citation was made in our article of last week from the experience of Great Britain or other European countries in this matter of fire inquests. We had made enquiry about several of these, and collected some information; but held it over, not wishing to make last week's article too long. A sufficient number of years has not yet passed, it would seem, for the idea of employing fire marshals or holding fire inquests to have commended itself in proper quarters in the United Kingdom. Or perhaps we should rather say there has not been time enough—only some thirty-seven years having passed—to get a measure enacted which shall fill in Great Britain what other countries have felt to be a want. One Parliamentary Committee pronounced the difficulty to be "in adjusting satisfactory machinery for making such inquests."

We may learn, if we will, something of the result of efforts made to ascertain the causes of fires in other countries. In Germany, Denmark, France, and Russia fire inquests have been common, and they are found to have the effect of lessening fires. It is forty years ago nearly since a bill was introduced into the British House of Commons to make provision for enquiries into the origin and circumstances of fires. This was favored by the fire offices, but appears to have been talked out. Again in 1882 a like bill was drafted, sent to the Home Department, which sent it to the Metropolitan Board of Works. Nothing definite came of this. In the next year the Common Council of London resolved to ask for a Royal Commission on this subject, and also consulted the fire office managers about it. No definite step was taken, however, after all this conferring. In 1895 the scheme was re-introduced to public notice by the "Post Magazine," which reprinted a circular on "Fire Inquests and Fire Marshals," compiled in 1886 by Mr. G. W. Bell, secretary of the Law Office in London, England. So far as we know, however, the various authorities, parochial, metropolitan, or governmental, are still working away in London independently, perhaps confusedly, with the objects of preventing, contending with and perhaps finding out the causes of fires, but there is no distinct act appointing fire marshals, whose business it is to find out the causes of fires and punish those responsible for them.

It is probably true, as the Massachusetts marshal, Mr. Whitcomb, has said, that a person to fill all the requirements of a fire marshal adequately needs many and varied qualifications:—He should have the intuition of a detective; experience as lawyer; a judicial mind; ability to weigh evidence; and some knowledge of mechanics and electrical science. In any case he must be "a man of honesty, industry, and perseverance." Is it possible that the difficulty of securing such men in England has had to do with the years of delay in providing a fire inquest law which could be administered by competent men in London, to begin with? One cannot believe this. Therefore the lack of action must be put down to the steady and severely official operation of the machinery of delay, so to speak. It is as if the Home Office travelled by the streets of "By and by," through which, as Cervantes has it, one arrives at the house of "Never."

Have not we in Canada lost enough by fire in the last fifty years to cause us to take some steps towards lessening the fire-waste? Do we not learn, month by month, of cases which indicate incendiarism, which show carelessness, which prove improper construction, as causes of fire? Is it not time that Parliament, or the Legislatures of Provinces took steps, by the appointment of fire-marshals and the authorizing of fire inquests, to follow up cases of burning and find out who is responsible for them. Such means would help to rid us of fire-bugs. It would also tend to cure over-insurance, or the dishonest efforts of merchants to prove that they had more goods burned than was the case. In Ohio, after a fire-marshal was appointed, the number of fires of "unknown" or suspicious origin came down from 292 in 1901, to 190 in 1903, which is very significant, and in 1903 five persons charged with arson fled the state to escape arrest.

* * *

DOMINION BANK.

The extensive transactions of this bank resulted last year in large earnings, the net amount of which was $490,000. The amount of capital of the public employed was $34,000,000, and that of the shareholders some $6,500,000 more, making in all in round figures above forty millions of dollars. The distribution among its forty branches of the transactions which this great sum represents doubtless fructified many different businesses, and assisted in the development of the country from Montreal to the Pacific.

Current discounts were five millions larger last year than the year before. Call loans on bonds and stocks were also larger, while the sum held in the shape of public securities, stocks, bonds, and debentures was lessened. Liquid assets, of whatever kind ($15,026,000), were almost exactly the same in amount as twelve months before, but their relative proposition was slightly less. The bank premises item among assets now stands at $800,000. We notice the addition to the board of Mr. R. J. Christie, head of the well-known manufacturing firm of Christie, Brown & Co.

* * *

THE POST OFFICE IN THE FAR WEST.

One indication of the growth of far-west Canada is the extension of postal facilities, and the use made of them. Certain it is that the largest proportionate increase in the number of post-offices in the Dominion has been in the North-West Territories and provinces and British Columbia. This is shown by a comparison taken from the Blue Book. Twenty years ago there were 7,084 post-offices in Canada. Ten years later there were 8,832, and last year 10,879, an increase between 1885 and 1905 equal to more than fifty per cent. Now to compare the relative number in the far West, or, say west of Lake Superior. In 1888 there were 7,671 post-offices in Canada, and 613 of them west of the Great Lakes. This represents, say eight per cent. Seventeen years afterward, in 1905, the number of far western offices had grown to 1,751, equal to sixteen per cent. of the whole. The growth is quite noteworthy.

Again, compare the business done in the matter handled at the offices, and it will be evident that it exceeds the ratio of increase in the number of offices. Taking 1888, as before, as a basis of comparison, the number of letters and post-cards handled in the Dominion was estimated at 96,792,000, equal to 309,000 per working day. Of these 6,980,000, or 7.21 per cent. were handled by the offices in the West. Coming down to 1905, the total number of pieces of similar mail matter handled was estimated at 332,792,000 pieces, and the western share was 59,345,000, or say 17.83 per cent. At this rate of increase, in twenty years' time, the proportion of Western business handled by the Post-Office will be one quarter of the whole. But the ratio of increase must be expected to be much greater during the next twenty years than the last twenty.

* * *

HALIFAX AFFAIRS.

In the election of officers for the Halifax Board of Trade for the coming year a great deal of interest was manifested. The election was conducted on a new plan, large ballot papers being mailed to every member of the board some days before the election. These ballots contained the names of all the candidates for office, the voter's choice to be marked, the ballot sealed and returned to the secretary. There was keen competition for all the offices, and what is thought to be an exceedingly efficient lot of men has been secured for the management during the coming year. They are as follows: President, A. M. Bell; vice-presidents, Geo. E. Faulkner; W. J. Clayton. Council: G. S. Campbell, J. E. DeWolfe, O. E. Smith, I. C. S. Stewart, J. P. Cox, H. L. Chipman, C. H. Mitchell, L. J. Mylius, Andrew McKinlay. Twenty-seven new members were elected at this meeting. The secretary's report showed great numerical progress made during the year. One hundred and two new members have joined and the membership is now 485. The number of meetings held during the year was as follows: Of the council, 52; general meetings, 9; committee meetings, 36; in addition to numerous meetings of the associations affiliated with the board. All the standing committees of the board were very active. Notwithstanding extraordinarily large expenditure, largely in connection with the furnishing of the new rooms, there is a respectable balance on the right side in the financial statement. The secretary briefly outlined some of the things accomplished or aided by the board during the year. Thirty or more distinct lines of effort, ranging from entertaining press associations to working for the securing of steamship subsidies, and from steel shipbuilding to tourist trade were referred to, and even the members themselves, certainly many of them, were probably surprised that so much had been done. The board is well aware that it can only secure the support of the public by showing its usefulness and the enthusiastic backing it is receiving from every citizen of any importance, is sufficient proof of its having fulfilled all that is expected of it.

A great deal of dissatisfaction is expressed here at the mail service from Great Britain. The Halifax "Echo" pointed out, in a leading article a few days ago, that the passages being made by the mail boats were very little, if any, better in point of speed than those made nearly sixty years ago. It showed that old ships like the "Europa," the "America," and the "Niagara," were making the passage in from 8½ to 11½ days, according to the time of year, as long ago as 1848, and that the "Numidian," "Corinthian," etc., are not doing any better to-day. The average speed of the "Numidian" on her last voyage was less than eight miles an hour. The "Corinthian" left Moville on January 13th and arrived in Halifax January 24th. Her highest run was 311 miles, her lowest 47. The good steamers, such as the "Victorian," the "Virginian" and the "Tunisian" figure far too seldom in the schedule of sailings, and Halifax is getting decidedly disgusted with a service in which no advance is made in sixty years.

Local financial institutions are now publishing their statements, and they are without exception very satisfactory. The Union Bank of Halifax, which is the only one of our banks confining its business principally to Nova Scotia—it has one or two branches in the West Indies—has increased its dividend for the last half year to 4 per cent. or 7½ per cent. for the year. It has just purchased a large adjoining property for purposes of extension. The stock is now at 173, and not much offering. Fifteen years ago it was at par.

The thirteenth annual statement of the Eastern Trust Company, a local institution, shows an increase in reserve from $14,000 to $16,000. The paid up capital has increased from $125,000 to $187,500 during the year.

The assessment of the Acadia Sugar Refinery at Dartmouth has been increased by consent from $100,000 to $200,000. This is the first year the refinery has been assessed, as it has been exempt since its foundation twenty-one years ago.

Halifax, N.S., 29th January.

This tabulation of British Board of Trade figures, showing how rapidly Manchester has advanced from a sixth to a fifth place in the exporting and importing cities of the United Kingdom, we obtain through Mr. Dawson Harling. Almost ten million pounds sterling is a remarkable growth in five years. Evidently the Manchester ship canal has been a great thing for that city. The table shows the great importance of Hull as a shipping port, ranking as it does ahead of Glasgow. Liverpool and Manchester both show greater relative growth than any of the cities compared.

* * *

NORTH AMERICAN LIFE COMPANY.

The twenty-fifth annual report of this company exhibits creditable gains in various directions, and a condition of affairs which may well prove gratifying to its policyholders. Gross assets manifest an increase of $737,013 on the year, and net assets an increase from $5,945,362 to $6,666,081. New insurances in 1905 were not quite so great as in the banner year, 1904; but the total in force is swelled from $35,416,380 twelve months ago to $37,825,605 to-day. Premiums of the year are $117,357 greater ($1,354,000 against $1,237,000), and the surplus is swelled from $501,263 at the close of 1904 to $570,010 at the close of last year. Payments for death claims for the last twelve months were $259,476; for matured endowments, $52,203; for matured investment and other policies surrendered, $130,191; paid annuitants, $11,435; and for dividends to policyholders, $86,520. Additional features of the report, including the securities owned and loaned upon, tend further to prove that the company is a sound and progressive one.

A noticeable feature of the annual meeting on Thursday was the attack made upon the management of the company by a man who had formerly been in its employ, alleging "either improper expenditures or gross extravagance," the employment of relatives of the directors as brokers—suggestive of graft—and advances by the company on securities which were worth in market only half their face value. These and other charges indicated that the man who made them was saturated with the idea that the North American Life had been doing things that several large life corporations of New York city were shown in the recent examination to have done. Nay, more than this, to use the language of his long and widely circulated letter, he pronounces upon other Canadian life companies in these words: "many of which are equally as bad, and a number even worse." Further, he desires "to drive from the managements and from public life," those who misuse the trusts committed to their care.

The reply made by the president to these various charges was full and satisfactory. In a gathering numbering seventy or eighty, largely composed of policyholders, not a single voice was raised that would indicate either agreement or sympathy with the critic's adverse statements or suspicions. In referring to agency expenses Mr. Blaikie very gently but most significantly put the critic out of court by saying:

> "It is necessary to provide for losses in the operation of the agency department, for whilst the greatest care is exercised in securing the best and most reliable and trustworthy men to represent the company as agents, Mr. Harpell will readily understand *from his own case*, that occasionally we have to deal with agents who do not earn the salaries and expenses which the company have paid them."

The words we have italicized mark what the company's records show, as we have taken occasion to ascertain, that the man who thus seeks to damage the company's standing is not an unprejudiced critic. Nor clever as he may be in certain literary or forensic aspects, is he competent to pronounce upon financial details. Witness his charges as to the company's holding of Chicago and Milwaukee Electric Railway bonds, so denominated in the company's report to Government, but mistakenly placed in the Blue Book under "stock" of the company named. If the large sum mentioned in the attack had been loaned upon the stock of this road, there might have been ground for fault-finding, but that the bonds are good value for the loan made upon them is conceded by authorities on United States securities.

Mr. Harpell's letter makes an oblique reflection upon the adequacy of the supervision exercised by the Superintendent of Insurance over the affairs of life companies. And he calls upon sympathizers with his views to assist him (and, we infer, remit to him), for the purpose of a general house-cleaning of underwriting companies. Up to the present time—his letter is now two weeks old—we have not learned that his appeal meets with much response. The Superintendent of Insurance is able to defend his own reputation. And we do not think the insuring public are likely to commit their policies or their money to a man whose resentful disposition has led him to make an impetuous and widely-reaching attack upon grounds so slender. That the management of the company invited, as we are told they did, every one of the morning and evening newspapers in Toronto to send a reporter to the annual meeting, is proof that the North American Life had nothing to conceal.

* * *

DIGBY BOARD OF TRADE.

The annual meeting of the Digby Board of Trade was held on January 22nd, in Digby, Nova Scotia. Officers were elected as follows for the ensuing year: President H. L. Dennison; vice-president, F. R. Steadman; secretary-treasurer, C. Jameson. Council—Dr. J. E. Jones, E. F. L. Jenner, O. S. Dunham, H. Anderson, F. W. Nichols, J. L. Peters, T. E. G. Lynch, H. B. Short, Dr. E. DuVernet. The membership of the board is steadily increasing, and its finances, we are told, are in a healthy state Among the matters brought up at the last meeting were daily steamboat service between Digby and St. John, the modus vivendi, and dredging Digby harbor.

* * *

SASKATOON BOARD OF TRADE.

The annual meeting of the Board of Trade for Saskatoon, Sask., was held on January 23rd, and was marked by a large and enthusiastic attendance. It was decided to appoint a commissioner who will devote his whole time to the work of furthering the interests of the town. Some complaint was made as to the high freight rates charged by the C. P. R. on the Prince Albert line. The election of officers resulted as follows: President, F. R. Oliver; vice-president, F. E. Harrison; secretary, F. M. Brown; treasurer, A. E. Young; councillors, J. F. Cairns, W. P. Kirkpatrick, W. A. Coulhard, Jas. Leslie, Dr. P. D. Stewart, J. F. Johnson, T. Copland, and J. A. Smith.

* * *

INDEPENDENT CASH MUTUAL FIRE COMPANY.

An encouraging report is submitted by this company for the year just past. It did a much enlarged business, taking gross premiums of $90,345 and net premiums of $62,306, against which the fire losses were $28,372, equal to only 45.67 per cent., and expenses $23,292. Having $10,953 to carry from revenue account to profit and loss, they declared six per cent. dividend and carried the balance to reserve. The company's re-insurance reserve, according to the Government standard, is $39,927, whereas it shows a cash reserve of $15,635 in cash and a premium note reserve of $25,343, or in all $40,978. The number of policies issued and renewed during last year was 5,924 and the total in force was $4,350,-000 at the close, a very respectable sum.

* * *

BRITISH MORTGAGE LOAN COMPANY.

A moderate but steady growth characterizes this company. Its total assets at the end of last year were something like $42,000 greater than at the close of the previous year. Among liabilities, both deposits and debentures are greater, but the special loan of the previous year has disappeared. The record given in the report of the absence of losses for a series of years speaks well for the character of the company's loans. In the company's report for the year 1903 reference was made to, and a moral drawn from the then recent frauds in connection with loan companies at St. Thomas. This year, the York County Loan Company furnishes the text for a paragraph upon the danger of loose management in terminating loan companies and the excessive cost for expenses at which such companies are conducted. If, continues the report, false swearing be found to go hand-in-hand with fraud, it is clear that official inspection is also necessary.

* * *

TRUSTS AND GUARANTEE COMPANY, LIMITED.

At the annual meeting of this company on Wednesday last it was shown that paid-up capital had increased to $1,037,800, and that the company's business continued to grow. Gross earnings, Mr. Stratton said, were almost $20,000 greater than in the year before. After paying expenses, and five per cent. dividend, there was a sum carried to profit and loss account, which now exceeds $100,000. Mr. Karn expressed his satisfaction with the condition of the company's affairs and thought the statement presented a subject for congratulation. The action of the directors in appointing Mr. J. J. Warren manager of the company in the room of the late Mr. Coffee was confirmed.

* * *

MANILA ELECTRIC RAILROAD.

In no better way is the marvellous transformation which is now going on in certain portions of the Orient indicated than by a perusal of the facts presented by some of the larger corporations which have helped to develop them. When the Philippine Islands passed into the control of the United States, the only means of transportation possessed by Manila, the capital, a city with a population of about 300,000, comprised a poorly equipped horse-car line about thirteen miles long, and several thousand native two-wheel cabs, or *carromatas* and *calesas*, as they are called. Naturally, in a climate like that of Manila, where walking is not a popular pastime, the service given was totally inadequate. In 1905 the Manila Electric Railroad and Lighting Corporation, built by J. G. White & Co., of London and New York, the well-known engineers, was opened, and to-day it has forty miles in operation, with several more under construction, and having a fifty year franchise covering the absolute control of the street railway, power and lighting business of Manila. This company now makes an offer of its first lien and collateral trust sinking fund, 5 per cent. gold bonds, through John MacKay & Co., of Toronto, and Wm. Salomon & Co., of Chicago and New York, the bankers through whom was recently awarded by the Philippine commission the grant for building 295 miles of steam railroad in the islands of Panay, Negros and Cebu. We understand that, so far, the earnings of the Manila street railway have exceeded expectations as, though it has only been open a short while and is even now incomplete, it has already realized 4½ per cent. per annum on its $5,000,000 stock, besides having paid interest charges on its bonds.

* * *

OTTAWA BOARD OF TRADE.

The annual meeting of the Board of Trade for Ottawa took place on the 25th January. The question which brought on most discussion was that of manufacturing industries, of which there is a lack in Ottawa at the present time. The belief was expressed by many speakers that if Ottawa would make an effort to get industries to locate there and offered equal inducements with other places, the city would develop much more rapidly. On the other hand, several present disagreed with these views, contending that Ottawa could not get many industries no matter what inducements were offered. One member of the board stated that Ottawa was bound to become the Washington of the north, and would never become a great industrial centre. The very fact that the Government was spending $60,000 per year in beautifying the city and thus raising the value of property for residential purposes, would, he said, militate against any such future. The following officers were re-elected by acclamation:—Mr. Denis Murphy, president; J. W. Woods, first vice-president; Mr. P. Whelan, second vice-president; and Mr. C. A. Douglas, treasurer.

* * *

BANKING AND FINANCIAL.

A branch of the Metropolitan Bank has been opened in Guelph.

The Ontario Bank advises us that a branch of that bank has been opened at Millbrook, Ont., under the management of Mr. F. J. Holladay.

The Bell Telephone Company is applying to the Dominion Parliament for authority to increase its capital stock. The present authorized amount is $10,000,000.

The Union Bank of Canada advises the opening of branches at the following points: Swift Current, Saskatchewan, Lacombe, Alberta, and Thornton, Ontario.

The gross earnings of the Winnipeg Electric Railway Company for the year ended December 31st last, amounted to $551,650, compared with $507,542 for the previous year, or an increase of $144,108.

The branch of the Bank of Montreal in London, England, is removing from 22 Abchurch Lane to 46 and 47 Threadneedle Street, E. C., where they expect to be open for business on or about the 10th of February.

A press despatch of 30th January from Kingston states that Mr. W. D. Hart, agent of the Standard Bank of Canada, has severed his connection with that bank to enter the service of the new Sterling Bank of Canada, Toronto, as acting general manager.

We are informed that Mr. J. W. Baillie has, by mutual consent, retired from the firm of Baillie Bros. & Co., 42 King Street West, Toronto, and that the business will be carried on by the remaining partners, under the style of Baillie, Wood and Croft.

Up till recently, the Government of Yukon Territory supported the assay office in Dawson City, but the lease of that building having expired, it is announced that the assay office in White Horse will be the only one in connection with the Government. Assays will continue to be made at the latter free of charge.

"Don't say anything harsh about the young man," said the president of the bank. "He was the best cashier we ever had, and his shortage is a shock to all of us. He was a model young man, without a single bad habit." "Yes, sir," the vice-president added, by way of confirmation, "a model young man without a single bad habit, except"——"Except what?" asked the surprised president. "Except stealing."—Boston Journal.

At the meeting of the board of the Imperial Bank of Canada held this week, the vacancy on the board caused by the death of the late Mr. T. Rodman Merritt, the president, was filled by the appointment of Mr. D. R. Wilkie to the position of president and general manager. Mr. Wilkie has been general manager of the bank since its inception, and vice-president since 1901. Mr. Robert Jaffray, who has been a director of the Imperial Bank since 1885, was at the same meeting elected vice-president, and Mr. Peleg Howland, head of the wholesale hardware firm of H. S. Howland, Sons & Company, was added to the board of directors.

A recently published statement of the Twin City Rapid Transit Company shows that last year the gross receipts from passenger traffic were $4,750,000 or an increase of $480,600 over the previous year, and that the net receipts were $2,640,000, an increase of $455,200. After paying taxes, preferred dividends, etc., earnings equalled 7.8 per cent. on the common stock, compared with 7¾ per cent. in 1904, since which time $1,000,000 was issued. The surplus, after dividends, is put at about $500,000, compared with $440,690 in 18904, and $419,296 in 1903. From this year's surplus $240,000 was transferred to the reserve fund.

* * *

INSURANCE NOTES.

The Quebec Fire Assurance Company advises us that the amount of losses paid, and outstanding, for the year 1905 is $51,310, this being a reduction of $1,900 from amount previously reported.

The number of fires started by persons greedy for insurance money has been reduced in Ohio each year since the establishment of the office of fire marshal. The number was in 1901, 292; in 1902, 222; in 1903, 190; in 1904, 168 and in 1905, 96 (November and December estimated.)

We learn from the "Insurance Record" that the Gresham Lectures were to be given by E. Symes Thompson, M. D., F. R. C. P., at Gresham College, Basinghall Street, London, on January 23rd, 24th, 25th, and 26th. Their subjects were 1st, On Healthy Nerves; 2nd, Nerve Disorders; 3rd, The Drug Habit; 4th, Sanity and Insanity

The directors of the Halifax Fire Insurance Company have decided to appropriate from the rest the sum of $120,000 to pay in full the unsubscribed capital stock of the company ($240,000), so that the said stock shall be fully paid up. This is done to relieve shareholders from further liability on account of their stock.

It was well said by Mr. McConkey, superintendent of agencies, at the gathering of the field staff of the North American Life the other evening, that, in any convivial occasion, or at any time when compliments and thanks are being passed around: "We should remember the local men, who write the small applications; for here, after all, is the back-bone of any company's business."

The guesses made as to amount of damage done in cases of fire by those who make up the returns for the press, are never in our experience below the facts but always above them. An example is found in the fire of last month in the Windsor Hotel, Montreal. The information wired all over the country was that damage of $250,000 had been done, and that the hotel would be out of business for an indefinite time. Now that the adjusters have reported, however, they place the loss at $100,000. The hotel is by no means so seriously damaged as was at first represented.

Much sympathy is expressed by unreflecting people in the Eastern States with the captain of the burned steamer "General Slocum," now sentenced to imprisonment, because he is an old man. It is well to remember, however, that there must be an enforcement of the penalties of the law, and that it was proven that the captain had not properly instructed his crew as to their duties in case fire broke out on board. It is greatly to be feared that there are many captains of passenger steamers not only on the Hudson River, but on the great lakes and the St. Lawrence who are guilty of a like neglect, to the appalling danger of their passengers should fire break out on board.

The Ohio fire marshal has a word to say to canvassers for fire-underwriting companies upon the dangers of over-insurance. Thus: "Although I have some appreciation of the difficulties under which the companies get business, I am constrained to state the disagreeable fact that it is over-insurance which creates the crimes which created the great need for a fire marshal. Many cases have been brought to my notice in whch property in a losing business was insured for for several times its value, thereby furnishing so attractive a reward for the crime that men feeble of principle must yield to the temptation to burn. Insurance solicitors [i.e., canvassers] as a class at least equal the average business man, but the temptation to increase business, or a too childlike faith in the honesty of their fellow men, leads some agents to write amounts which are in excess of the value of the buildings and to insure the contents of buildings without personal inspection."

* * *

TRADE NOTES.

Fuller particulars are given in the Montreal papers regarding the erection in that city of a mammoth dry goods store, chiefly devoted to women's dress goods, on the property recently purchased by the Robert Simpson Company.

It is stated that the Wallaceburg Sugar Company has turned out during the year 12,250,000 pounds of sugar, the quantity of beets required for the purpose having been 53,000 tons. In 1904 the production was 7,200,000 pounds, so that the increase has been great.

The T. Eaton Company are preparing plans for the addition of a sixth story to their mammoth store in Winnipeg. It is the intention of the company in the near future, it is said, to extend the present building greatly, so as to cover, indeed, one-half more space.

Hudon, Hebert & Cie, Limited, have been granted a Dominion charter to take over the business as a going concern of the firm of that name in Montreal and to trade in general groceries, provisions, liquors, tobaccos, and to import and export the same. The capital named is $750,000, for the business is a very large one.

The Kidd-Rutherford Company, Limited, of Montreal, capital stock $50,000, has been formed for the purpose of buying, selling, manufacturing, importing, exporting, and dealing in all kinds of cotton, jute, woolen and other dry goods. T. C. Kidd and H. L. Rutherford, of Montreal, are interested.

The British Columbia salmon canners are protesting vigorously against the increase in the provincial assessment on their plants, which amounts on the average to no less than 500 per cent. in excess of previous years. It is said that in one case alone, that of a cannery at Steveston, owned by the B. C. Packers' Association, the taxation to the current year is within a few hundred dollars of the assessment for the whole of the nineteen plants last year.

The Consumers' Cotton Company, Limited, is the name of a company which has just been granted a charter by the Dominion Government to authorize it to buy, sell and deal in raw cotton, wool and cotton waste of every description, manufacture cotton, woolens, shoddy, and waste fabrics, and bleach print and dye raw product, yarn or manufactured goods, also to generate steam or electricity for its own business.

A winding-up order has been issued for the Dominion Linen Mills Company, of Bracebridge, Ont., in order to permit of the speedy sale of the business as a going concern. The assets amount to about $100,000 in plant and machinery, and there is some $25,000 in unpaid stock. The liabilities are about $140,000. The company, of which Dr. Beattie Nesbitt is president, was started a year or two ago, and has turned out considerable quantities of linen, aided by the work of many expert operatives who were imported from Ireland.

* * *

—We have already mentioned that the Commissioners of the Temiskaming and Northern Ontario Railway had decided in favor of electrifying the first 125 miles of that road, but their plan would appear to be on the larger scale of supplying sufficient power not only for extending the electrical running of the road itself in the future, but for the supply of light, heat and power to municipalities along the railway. This surplus energy, it is proposed, would be sold to distributing companies along the route, the rates being fixed by the Commission. The chief part of the power, it is probable, would be developed from the Montreal River.

THE DOMINION BANK.

The thirty-fifth annual general meeting of the Dominion Bank was held at the banking house of the institution, Toronto, on Wednesday, January 31st, 1906.

Among those present were noticed:

Dr. Andrew Smith, Messrs. J. G. Ramsey, Barlow Cumberland, W. R. Brock, R. T. Gooderham, H. C. Hammond, Cawthra Mulock, E. B. Osler, M.P., J. J. Foy, K.C., David Smith, R. J. Christie, J. M. Bond, A. W. Austin, F. J. Harris, Ira Standish, E. C. Burton, A. R. Boswell, John T. Small, J. Bruce Macdonald, W. Mulock, jr., Sidney Small, H. Gordon Mackenzie, J. Gordon Jones, F. J. Stewart, Wm. Ross, W. G. Cassels, Geo. D. Scott, N. F. Davidson, W. H. Cawthra, J. A. Proctor, David Kidd, F. D. Benjamin, J. F. Cavanagh, S. Samuel, W. C. Harvey, W. Dixon, C. Holland, F. J. Phillips, Wm. Davies, H. W. A. Foster, W. C. Crowther, E. W. Langley, H. S. Harwood, R. N. Gray, Richard Brown, Henry Johnson, Wm. Spry, W. Glenney, Frank H. Hill, John J. Dixon, G. N. Reynolds, F. C. Taylor, F. G. Hodgins, W. C. Lee, F. E. Macdonald, John Stewart, Thos. Walmsley, T. G. Brough, and others.

It was moved by Mr. W. R. Brock, seconded by Mr. A. W. Austin, that Mr. E. B. Osler do take the chair, and that Mr. T. G. Brough do act as secretary.

Messrs. A. R. Boswell and W. G. Cassels were appointed scrutineers.

The secretary read the report of the directors to the shareholders, and submitted the annual statement of the affairs of the bank, which is as follows:

Report.

The directors beg to present the following statement of the result of the business of the bank for the year ending 30th December, 1905:

Balance of profit and loss account, 31st December, 1904			$134,572 64
Profit for the year ending 30th December, 1905, after deducting charges of management, etc., and making provision for bad and doubtful debts			490,495 20
			$625,067 84
Dividend, 2½ per cent., paid 1st April, 1905	$75,000 00		
Dividend, 2½ per cent., paid 3rd July, 1905	75,000 00		
Dividend, 2½ per cent., paid 2nd October, 1905	75,000 00		
Dividend, 2½ per cent., payable 2nd Jan., 1906	75,000 00		
		$300,000 00	
Written off bank premises		75,629 87	
			375,629 87
Balance of profit and loss carried forward			$249,437 97

With deep regret your directors have to record the death, which occurred in October last, of Mr. William Ince, who had been a member of the board since 1884. The vacancy was filled by the appointment of Mr. R. J. Christie.

Branches of the bank have been opened during the past year in Hespeler, Ont.; in Winnipeg, at No. 643 Portage Avenue, and at the corner of Notre Dame and Nena Streets, and in Toronto at the corner of Dovercourt Road and Bloor Street, and at the Union Stock Yards.

Premises have been secured in Windsor, Ont., and a branch will shortly be opened there.

All branches of the bank have been inspected during the year.

E. B. Osler, President.

Toronto, 31st January, 1906.

The report was adopted, and the thanks of the shareholders were tendered to the president, vice-president and directors for their services, and to the general manager and other officers of the bank for the efficient performance of their respective duties.

The following gentlemen were elected directors for the ensuing year: Messrs. A. W. Austin, W. R. Brock, R. J. Christie, T. Eaton, J. J. Foy, K.C., M.P.P., W. D. Matthews, and E. B. Osler, M.P.

At a subsequent meeting of the directors, Mr. E. B. Osler, M.P., was elected president, and Mr. W. D. Matthews, vice-president, for the ensuing term.

GENERAL STATEMENT.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, February 1st, 1906, as compared with those of the previous week:

	Feb. 1st.	Jan. 25th.
Montreal	$26,261,731	$30,133,027
Toronto	21,000,942	25,109,567
Winnipeg		6,909,690
Halifax	1,379,136	1,534,900
Hamilton	1,190,631	1,289,110
St. John	1,006,983	1,062,947
Vancouver	1,652,826	1,759,023
Victoria	635,200	724,823
Quebec	1,450,867	1,501,831
Ottawa	1,949,678	2,265,374
London	872,953	956,314
Total		$73,246,606

The receiving freight shed and bonded warehouse of the Canadian Pacific Railway at Winnipeg, containing large quantities of merchandise consigned to merchants in that city, were on Wednesday last partially destroyed by fire which started from a live wire. The loss is estimated at nearly $100,000.

Marmora DEBENTURES

Tenders will be received by the undersigned up to 6 p. m. on Monday, February 12th, 1906 for the purchase of $5,500 Debentures of Village of Marmora. These debentures will bear interest at the rate of four and one half (4½) per cent. per annum. Principal and Interest will be payable in equal annual payments of $422.78 for 20 years. The highest or any tender not necessarily accepted. Tenders will be received for only the whole issue.

For further particulars address

Meetings

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED.

The annual general meeting of the shareholders of the company was held in the company's office, 23 Toronto St., Toronto, on Wednesday, 24th of January, 1906, at 12 o'clock noon, the following being present:—John L. Blaikie, Esq., President; Dr. Hoskin, K.C., Vice-President; Hon. James Young, Dr. Thomson, K. C., Dr. Andrew Smith, Messrs. Newman, Silverthorn, J. S. Playfair, Alfred Hoskin, K.C., Frank Turner, C.E., George Porter, W. B. McMurrich, John Aitken, Geo. F. Burns, Alex. Smith, John W. Beaty, John Stark, H. G. Langley, Mungo Nasmith, Geo. W. Blaikie, James Mitchell and Mrs. LaCourse.

The president, John L. Blaikie, Esq., having taken the chair, the manager, Mr. Saunders, acting as secretary, the following report and balance sheet were read:

Report.

The directors beg to submit their annual statement to the shareholders for the year ending 30th December, 1905, which has been audited by the company's auditors.

The net profits for the year (including $1,572.57 brought forward from last year) after deducting expenses of management, interest on debenture bonds, losses, and all other charges amounted to	$102,581 17
Transferred from Contingent Fund	20,000 00
	$122,581 17

Disposed of as follows:		
Dividend paid 2nd July, 1905	$30,120 00	
Dividend payable 2nd January, 1906	30,120 00	
Transferred to Reserve Fund	60,000 00	
Balance carried forward	2,341 17	
		$122,581 17

The provision made in previous years in the contingent fund is found to be larger than necessary, and from that source $20,000 is now transferred to reserve. To this fund is also added $40,000 from the year's earnings, making a total addition of $60,000, and bringing the reserve fund up to $460,000, nearly equal to forty-six per cent. of the paid-up capital.

The demand for money during the year has been good and payments by borrowers have been well met.

Owing to recent legislation by the Parliament of the Dominion of Canada respecting Judges of Provincial Courts, the Hon. Sir John A. Boyd, K.C.M.G., LL.D., tendered his resignation as a director of the company, and the same was accepted, and you will be asked to confirm a by-law passed by the directors reducing their number.

The officers of the company discharged their duties with satisfaction to the board.

JOHN L. BLAIKIE,
President.

Toronto, 13th January, 1906.

EDWARD SAUNDERS,
Manager.

Auditors' Certificates.

We hereby certify that we have examined the books, accounts and securities at the head office of the Canada Landed and National Investment Company, Limited, for the year 1905, and have found them correct.

All our requirements as auditors have been complied with, and the statements of assets and liabilities, and profit and loss, as above, exhibit a correct view of the company's affairs, at 30th December, 1905.

H. W. WILLIAMSON,
T. E. P. TREW,
Auditors at Head Office.

Toronto, January 13th, 1906.

I hereby certify that I have examined the books, accounts, and securities of the Canada Landed and National Investment Company, Limited, at their Winnipeg office for the year 1905, and found same correct. I also certify that the securities were produced for my inspection and found in order, and all my requirements as auditor have been complied with.

J. B. PEPLER,
Auditor at Winnipeg.

Winnipeg, January 4th, 1906.

In moving the adoption of the report, the president said:

Ladies and Gentlemen:

As we have an excellent report and balance sheet to submit to you to-day, and do not require to make apologies of any kind, we have great pleasure in meeting you at another annual meeting of this company.

A year ago we laid before you the most favorable statement that had ever been presented to the shareholders, and I am glad to say that that now before you is still better, and reveals continued progress and prosperity.

The balance sheet in your hands shows the net profits of the year, including $1,572.57 brought forward from last year, amounted to $102,581.17, disposed of as follows:

Dividend of 3 per cent. paid 2nd July	$ 30,120 00
Dividend of 3 per cent., payable 2nd January, 1906	30,120 00
Transferred to reserve fund	40,000 00
Carried to credit of Profit and Loss account	2,341 17
	$102,581 17

These results have been attained after deducting from the profits the expenses of management, interest on debenture bonds, every other charge pertaining to the year, and losses arising out of the sale of properties.

But this is not all. We began the year with a reserve fund of $400,000 and a contingent fund of $33,081.29. Instead of carrying any more to contingent fund, we have transferred from it to reserve fund $20,000, which now amounts to $460,000, and we still have a contingent fund of $10,000, and carry forward to credit of profit and loss account $2,341.17.

We are satisfied that it is no longer necessary to have a large contingent fund, if indeed to have one at all, the condition of the company being in all respects so satisfactory. The reserve fund, you will observe, is now 46 per cent. of the paid-up capital, and within sight almost of soon reaching $500,000, or 50 per cent. of the paid-up capital.

I am persuaded that such a state of affairs cannot fail to afford satisfaction to every person interested in the company.

You will observe that our liquid securities, consisting of municipal debentures, Government scrip, and call loans on stocks and bonds, amount to $629,118.81, being more than our reserve fund, and these can be readily converted into cash at any time. This meets the views of those who claim that this is to be preferred to having the reserve fund in mortgages, however good these may be, these having a period to run before their maturity.

The high character of the assets of the company can be estimated by the prompt manner in which payments are made of principal and interest. In this connection I may state that on Manitoba loans the principal comes back in many cases too soon, as we would rather it remained longer in the hands of the borrowers, but it frequently happens that they have realized such a large sum of money for the season's crops and for stock sold, that they want to pay off their mortgages before they are due, and willingly give a bonus of some months' interest in order to get their mortgages discharged.

With regard to the future of Manitoba and the two newly added provinces of Saskatchewan and Alberta, I take the liberty of quoting from the admirable address delivered last month at the annual meeting of the Bank of Montreal by the president, Sir George Drummond:

"The feature of the year, however, is the splendid crop which has just been harvested in the Northwest Provinces and in Ontario. As regards the former, the most sanguine anticipations have been realized, and it seems beyond doubt that the following estimates of this season's crop in Manitoba and the Northwest Provinces are conservative:

"Wheat, 90,000,000 bushels; worth on the spot 65 cents.
"Oats, 65,000,000 bushels; worth on the spot say 25 cents.
"Barley, 13,000,000 bushels; worth on the spot, say 30 cents.
"Flax, 50,000 bushels; worth on the spot, say, 80 cents.
"Rye, 300,000 bushels; worth on the spot, say 35 cents.
"In all 169,000,000,000 bushels of grain."

Of course, a proportion of these crops will be consumed by the farmer, as, no doubt, will all the root crops, of which potatoes alone are estimated at 8,000,000 bushels, as well as hay, but of these I take no account. At the prices named it is not difficult to reach an approximate sum of $75,000,000, or fifteen million sterling, to be distributed among a comparatively small population, and won from a soil which was considered barren and surrendered to the wilderness a few years ago. In addition to the foregoing, and not included in the above estimate, 75,000 cattle were disposed of during the year in the Northwest. Incidentally, I may mention that I was informed by expert millers, that this year's wheat is so good in quality that 7 per cent. less of it is required to produce a given quantity of flour than an average.

It is asserted that the area so far brought under cultivation does not, from the most accurate information obtainable, much exceed 5 per cent, and certainly it is well under 10 per cent. of the area available and waiting for occupants. In this connection I may quote here a sentence from an able and well-qualified government officer who has just completed a wide survey of the Territories. He says: "The immense wealth so long stored in the virgin soil of the great western country will be gradually developed, and the fact that Canada is destined to rapidly become one of the greatest food-producing nations in the world will soon become apparent to all in the volume of her exports.

"The great extension of the railway systems operating in this country must not be passed over. The C.P.R. Company is spending vast sums in improvements and extensions; the Canadian Northern is pushing westward, while the G. T. R. is preparing for an extension to the Pacific Coast, and the Government of Canada has the necessary powers to duplicate the railway connection between Quebec and Winnipeg, and is now surveying a line."

A natural consequence of such results and such wealth is a great influx of settlers from many lands, many from southern and eastern Europe, Doukhobors, Galicians, and Hungarians. As a rule they arrive very poor and hence have to begin life on the prairie in a small way, yet by economy and persevering industry, on the whole they are making fair progress, and honestly paying any debts they incur.

The best class of settlers are the Scotch, English, Irish, Germans, and Americans. The last mentioned were in many cases Canadians who had gone from Ontario many years ago, and settled in Dakota, Iowa, Nebraska, or other States, but who have sold out their farms in these places and have transferred themselves, their families, their horses, cattle, and farming implements to Manitoba or the two North-West Provinces. These ordinarily are the most successful settlers, having been accustomed to the kind of life, and scarcely lose one day after reaching their new homes in beginning to plough and prepare for crops of various kinds.

The number of new settlers who have made homes for themselves in 1905 is estimated to be about 146,000. This will result in a large additional acreage of land being under crop next year, and indeed every succeeding year. It is only repeating what has now become a hackneyed phrase when I say; "Our great North-West will soon become the great granary of the world," and will supply a large part of the foodstuffs required by the multitudes in Great Britain and other European countries.

A considerable number of farmers have taken up or bought more land than they can work properly, and run into debt in connection with it, also have incurred liabilities in the purchase of farming implements, reaping machines, etc., hoping to make money by a rapid rise in land values. They are forgetting that such a bountiful crop as the last cannot be counted upon every season, and that in the event of a lean year coming round they would be in trouble and be unable to meet their obligations. It will be a wise policy for loan or insurance companies engaged in the business of lending money to discourage loans when the applicant's purpose in borrowing is to hope for profit by the increased value of the land, rather than by persevering industry in the cultivation of what he already has. The spirit of speculation is abroad, and the price of land is in many cases considered by conservative valuators too high for safety.

I may repeat what I have often said previously, that it it easy to make bad loans in these regions, and hence lose money, but this company has a complete organization for carrying on that business, for procuring reliable valuations, and for making thoroughly reliable inspections. Without this there would be no safety.

The city of Winnipeg continues to grow rapidly in population and in wealth. The population is now about 87,000, and there are many wholesale houses that, for extent and completeness, will compare favorably with similar establishments in Montreal and Toronto. The buildings erected during the past year will amount in value to about $11,000,000, and extensive buildings are now in progress for a large, first-class hotel for the Canadian Pacific Railroad, for banks, for offices, and for departmental stores, not to speak of warehouses for merchants. There has also been an insufficient supply of dwelling houses to meet the wants of the rapidly increasing population, but now there are probably enough to serve for some time to come. That Winnipeg must be a large and important city is beyond peradventure, and will be the great distributing point for merchandise and supplies of many kinds for the vast country to the west of it, embracing Manitoba, Saskatchewan, and Alberta, and, to some extent also, for British Columbia.

But while this is granted, there are good reasons to fear that the value placed upon land in the city is not warranted, that it is in many cases altogether too high, and that to make loans based upon such boom values would be unsafe, and might be reckoned rash financing.

With respect to our own Province of Ontario, and our own city of Toronto, it can be confidently stated that prosperity is apparent on all hands. The farmers generally were never better off than at present; they conduct their operations with much greater intelligence and skill than was the case not very many years ago, and undoubtedly the Agricultural College at Guelph, where so many young men have graduated since it was established, has been largely instrumental in bringing this about.

As for this city, the manufacturers are, as a rule, kept very busy, and are in many cases pushed to overtake the orders on hand and offered. The merchants, too, are doing a large and profitable business, the extent and rapid development in Manitoba, the North-West Provinces, and New Ontario, furnishing new fields for the disposal of almost every variety of merchandise.

Nothing, probably, shows more forcibly the remarkable prosperity that has marked the past year than the immense increase in money on deposit with the banks, and the increase in the circulation of the banks. As shown by the following returns, there are:

Deposits in chartered banks, to November 30th, 1905	$511,942.492
Deposits in Post-Office Savings bank to November 30th, 1905	61,140.643
Deposits in Ontario loan companies, to November 30th, 1905	20,000,000
Deposits in Montreal City and District Savings Bank, December 30th, 1905	18,417,192
Deposits in Quebec Savings Bank, Notre Dame, December 30th, 1905	7,852,717
Total	$619,353.044

Agencies,—Ottawa, Ont. Washington, D. C

Some banks during the past year have increased their capital stock, which serves at once to give greater security to depositors, and to enlarge the circulation of their own notes.

In October the note circulation amounted to $76,890,863. Several of the banks have opened a number of new branches during the year, both in this city, and many of them in Manitoba and the North-West Territories. This has been forced upon them by the great expansion of business, and the prospect of obtaining safe and lucrative accounts, all pouring little streams into profit and loss account at the head office until at the annual meeting it has become an immense accumulation of money, ready for distribution to delighted shareholders and proud managers and directors.

I have now trespassed upon your time and patience, gentlemen, at considerable length, but you must remember that we have a numerous audience, who are interested in our affairs, both as shareholders and holders of our debentures in Scotland and England. All these like to know such facts as I have dwelt upon, and hence you will pardon me for having detained you so long.

In concluding, let me say that we have a most efficient staff of officers and clerks, and that to these gentlemen we are largely indebted for the success of the company; more especially I would mention Mr. Saunders, our manager in Toronto; Mr. McLaren and Mr. Campbell, Winnipeg, all of whom are hard workers, and are ever watchful and active in promoting the interests of the company.

The vice-president, Dr. Hoskin, K.C., seconded the motion, which was unanimously adopted.

The scrutineers reported the following gentlemen elected directors for the ensuing year:—John L. Blaikie Esq.; Hon. Sir James R. Gowan, K.C.M.G., LL.D.; Dr. Hoskin, K.C.; Alfred Hoskin, Esq., K.C.; J. Kerr Osborne, Esq.; John S. Playfair, Esq.; Newman Silverthorn, Esq.; Dr. Thomson, K.C.; Frank Turner, Esq., C.E.; Hon. James Young.

At a subsequent meeting of the directors, John L. Blaikie, Esq., was elected president, and Dr. Hoskin, K.C., vice-president.

* * *

—Figures compiled in the office of the Assistant Commissioner of Vancouver show that the real estate transfers in that city last year amounted in value to $31,055,000, and that the greatest record reached in any month in the city's history was $4,218,000, last November. The transfers in 1900 totalled $7,781,000, and in 1895 they were $6,609,000. Customs collections last year were $1,654,857, compared with $910,005 in 1900, or with $305,856 ten years ago. The population of Vancouver is now estimated at 50,000, or about double what it was ten years ago.

Solicitors: Barnard & Rogers, Victoria, B.C.; Tupper & Griffin, Vancouver, B.C.

OBJECTS:

1. To carry on a General Trust and Guarantee business.
2. To loan money on advantageous terms on first class security including real estate.
3. To guarantee loans.
4. To issue Debentures.
5. To administer trusts of all kinds.
6. To receive money on deposit.
7. To transact such financial business as may seem safe and profitable, much of which Chartered Banks are precluded from engaging in under the Banking Act.

MANAGEMENT.

The Directors of the Corporation have been prominent in the business life of the Province for many years and are thoroughly conversant with local conditions, thus insuring careful and experienced supervision over the investments and business to be transacted by the Corporation.

ADVANTAGES.

This corporation affords an opportunity for the small investor, by becoming a shareholder, to earn substantial interest on his money, while his security is unquestionably gilt-edged and will enhance in value as the business of the Corporation grows with our rapidly developing country.

Large sums of money are lying in our Savings Banks drawing only 3%. Savings Bank depositors by becoming shareholders in this Corporation are afforded the same opportunity as the large capitalists for getting their money out at a good rate of interest.

SHARES.

These shares which are of the par value of $100.00 are offered for subscription at ($110.00) one hundred and ten dollars, payable on application, $10.00 for the preminm and 10% on the par value of the shares, and thereafter to be subject to a call of not more than 5% per annum until fully paid. The shares may be paid in full at any time after allotment. Five per cent interest will be allowed on payments in advance of calls, until such time as the subscriber shall elect to receive in lieu of interest such dividends as may be declared by the Corporation. It is not expected that the Corporation will need to call more than the first 20%, as many applicants will voluntarily pay up their shares so as to receive the guaranteed 5%. This will give the business man an opportunity to participate in the speculative value of shares in a first-class financial Corporation without investing a large amount of capital.

Reasons Why You Should Invest in This Corporation.

1. Stock in Trust and Securities Companies has proved to be one of the most profitable of stock investments.
2. There is a great opening for a Trust Company in British Columbia.
3. The affairs of the Corporation are subject to inspection by the Lieutenant-Governor-in-Council.
4. The liability of the shareholder is limited to the amount (if any) unpaid on his shares.
5. The following figures are published in the November (1904) Issue of the "Business and Finance Journal" as showing the earning powers of various Trust Companies.

Name.	Capital.	Surplus.	Dividends.	Last bid or Sale Price of Stock of $100 Par Value.
Central Trust Co.	$1 000,000	$10,881,416	60 per cent.	$2,050
Farmers Loan & Trust Co.	1,000,000	6,185 149	30 per cent.	1,500
Union Trust Co.	1,000,000	6,587,532	32 per cent.	1,400
United States Trust Co.	2,000,000	11,152,346	40 per cent.	1,600

SUBSCRIPTIONS—Subscriptions for these shares will be received at any B.C. branch of the Bank of Montreal, or at the Bank of Montreal in Quebec, Montreal, Ottawa, Toronto, London or Winnipeg.

BRITISH MORTGAGE LOAN COMPANY.

The annual general meeting of the shareholders of the British Mortgage Loan Company was held in the company's office, Market Street, Stratford, on Thursday, January 25th, 1906, at which Hon. Thomas Ballantyne, president, was appointed chairman, and Mr. W. Buckingham, manager, secretary. There were also present: Mrs. W. R. Hamilton, Miss Machan (Mitchell), Messrs. John Brown, A. Johnston, John McMillan, A. F. Youngs, (Youngsville), J. W. Scott, (Listowel), W. Maynard, (manager Bank of Commerce), E. P. Winslow, (manager Bank of Montreal), R. W. Youngs, (Embro), H. M. Johnson, John Dempsey, J. W. Brown, Duncan Forbes, G. G. McPherson, K.C., Robert Morton, (Hamilton), Jas. Crerar, W. Gillard, R. C. Tye, James Trow, John Parker, John McIntyre, W. Spence, Dennis Clifford, F. Buckingham. Many more shareholders were represented by proxies in the hands of the president and vice-president.

The following reports and financial statement were read:

The twenty-seventh annual report is as follows:—

Report.

The directors are gratified in being able again to present to the shareholders a favorable report of the business of the company for another year.

There were increased receipts of money, and greater demands for it, at slightly higher rates of interest. Deposits increased from $545,254 to $592,007; debentures from $222,683 to $233,905; capital, from $437,308 to $446,954; assets, from $1,431,604 to $1,473,291; reserve fund, from $170,000 to $180,000; profit and loss, from $5,162 to $7,015. Losses there were none. Seven years ago one property failed by the small sum of $200 to realize what there was against it. Since then there has not been in a single instance a miscalculation in regard to the investments—no need of taking over the land or buildings of a borrower; no loss to a customer or to the company of any kind. There are slow coaches, of course, among the hundreds with whom we have had dealings, but, with the occasional aid of the solicitors, they have been compelled either to move on or off; quite as much to their own advantage as to ours. For our $1,462,900 mortgage assets, we have $2,516,400 property values. The securities are therefore sound and healthy. There have been small decreases in the commissions paid for loans and the cost of inspection of lands, as well as in the general expenses of the office. The latter is but a little over four-tenths of one per cent. on the assets—about one-half the relative cost of management of some of the other old line companies, and much lower than most of the rest.

In common with shareholders in other permanent companies, and the community generally, we regret to have recently seen a concern of the terminating kind go into liquidation, consequent upon the unsound methods adopted by it, particularly with reference to its obligations to return the moneys paid in on its capital stock, instead of holding them permanently, as old line companies are bound by law to do, in order to secure depositors and holders of debentures; the imprudent, perhaps the criminal character of its investments; and its extravagant charges for management, amounting, according to its last published official statement, to over five per cent. of what is put down as assets—assets really non-existent, for, on investigation, they have shrunk to nearly half of their volume on paper.

We welcome the announcement that the Government is considering the advisability of a system of inspection, by one of its own officers, of all these institutions, persuaded that the consequence will be the establishment on the firmest grounds in the public mind of every company like our own, that is honestly managed and conducted on business principles. Already, the president and the secretary or manager of every loaning company are required to make a detailed sworn annual statement to the registrar of loan corporations, but if false swearing be found to go hand-in-hand with fraud, it is clear that official inspection is also necessary. It is hoped that the system to be adopted will be made in a very strict sense to cover enquiry into the nature and value of the properties held by companies as security for their funds.

THOMAS BALLANTYNE, President.

Stratford, January 25th, 1906.

Wm. Buckingham, Manager.

Auditors' Report.

We certify that we have carefully audited the books of the British Mortgage Loan Company of Ontario for the year 1905; that we have examined all vouchers, and find them to correspond with the entries therein; and that the foregoing statement indicates the financial position of the company on the 31st day of December, 1905.

George Hamilton,
William Irwin,
Auditors.

Stratford, January 9th, 1906.

The president moved, and the vice-president seconded, a resolution for the adoption of the reports and the financial statement in remarks laudatory of the growth and prosperity of the company. They congratulated their fellow shareholders on its having been built up from small beginnings by a prudent and conservative course of action since its establishment in our midst, and by the high character of the managers, into a strong financial institution, enjoying to the full the confidence of the community. With Mr. Johnson and the manager they had made the usual thorough inspection of the securities, and had found them all in perfect order, and no losses whatever in sight. Interest had been well paid. On the whole, 1905 was the best year in the history of the company. There had been increased demands for money, and higher rates were of late obtainable. The six per cent. dividend had been maintained, another $10,000, for the ninth year in succession, placed to the rest, and a good surplus added also to the profit and loss account.

The continued favorable position of the company again prompted the question of increasing the dividend to seven per cent., but no recommendation to the board in this direction was made.

Mr. Hamilton and Mr. Irwin, M.A., were re-elected auditors.

Messrs. Maynard and Winslow as scrutineers, reported the unanimous choice of the former directors: Hon. Thomas Ballantyne, Messrs. McMillan, Scott, Parker, Innes, Johnson, Morton, and Trow.

Thanks were voted to the president, vice-president, and the manager and assistant manager, accompanied by grants of $200 to the president, $150 to the vice-president, and $200 to the manager and his assistant.

Before the shareholders separated, Mr. Winslow desired to give expression to the sense of security felt by the Bank of Montreal in its dealings with the company, consequent upon its straightforward, careful and conservative management.

The directors afterwards met, with Mr. Scott in the chair, and re-elected the former president and vice-president, and the executive committee.

* * *

—The county councils of Waterloo, Middlesex, Oxford and Elgin, in Ontario, are discussing the problem of how to obtain better roads. The system under which they propose to act is that of county grants and township control of expenditure and no doubt, the interests of these counties being identical, they will be readily able to secure the necessary legislation.

OUR AUSTRALIAN LETTER, (Continued.)

The Commonwealth Parliament has passed a Bill known as "The Commerce Act of 1905," which contains some provisions that will be of great interest to Canadian exporters. It provides that the Governor-General may, by proclamation, prohibit the importation or introduction into Australia of such goods as may be specified, and which he deems to bear a false trade description. It inflicts a penalty of £100 upon the importer of such goods, or they may be seized and forfeited to the Crown. It contains a saving clause that the importer shall have a good defence if he can prove that he did not knowingly import, and goods that may be seized can be returned upon security being given for the proper trade description being placed upon them, or that they will be exported. A false trade description is a label on the article, or covering of any description which misrepresents the goods in the following way:

(a) as to the nature, number, quantity, quality, purity, class, measure, gauge, size, or weight of the goods,
(b) as to the country or place in or at which the goods were made or produced; or
(c) as to the manufacturer or producer of the goods or the person by whom they were selected, packed, or in any way prepared for the market; or
(d) as to the mode of manufacturing, producing, selecting, packing, or otherwise preparing the goods; or
(e) as to the material or ingredients of which the goods are composed, or from which they are derived; or
(f) as to the goods being the subject of an existing patent, privilege, or copyright.

It applies only to the following:
(a) Articles used for food or drink by man, or used in the manufacture or preparation of articles used for food or drink by man; or
(b) medicines or medicinal preparations for internal or external use; or
(c) Manures; or
(d) apparel (including boots and shoes) and the material from which such apparel is manufactured; or
(a) Jewelry; or
(e) seeds and plants.

This bill has created a good deal of concern. Under fair administration of the Act, not much is to be feared, but in view of the extraordinary power which is given to the Minister of Customs, and the experience that the trade has had with the present Minister of Customs, this Act makes him absolute master of the trade in the articles specified.

A still more objectionable Act was one introduced at the tail end of the session, and which is alleged to be aimed at trusts. As originally introduced, it provides that the Minister of Customs may prescribe any duties and restrictions he likes upon the importation of goods, provided only that the Board of Enquiry appointed by himself reported that the competition with Australian made goods was unfair. The definition of what is unfair was the kernel of the Bill, and is as follows:

(a) Under the ordinary circumstances of trade, it would probably lead to the Australian goods being either withdrawn from the market, or sold at a loss, unless produced at a lower remuneration for labor; or
(b) the means adopted by the importer or seller of imported goods are, in the opinion of the tribunal which has to determine the matter, unfair in the circumstances.

Under this extraordinary provision, all that would be required would be for a labor union to demand an increase of wages, the employers to consent to give them, and then appeal to the Minister of Customs for the prohibition of the importation of the articles that compete with them, on the grounds that he cannot meet the competition owing to the higher wages which he has to pay. Such a combination of

labor-protection legislation no country has yet seen. It was too extravagant even for the Commonwealth Parliament, and the Bill has been for the present withdrawn, to be reintroduced, however, at the next session of the Parliament, provided the present Ministry is in power.

It will be seen that no consideration whatever is given to the consumer upon the land, who under it, could be compelled to pay any price that the combination of labor and protection should demand. When it is remembered that it is only a few months ago that the present Minister for Customs, of his own will, and upon the statements of an interested Australian manufacturer—some of which have been proven to be false, and others unsupported—put up the value for duty on harvesters from £38 to £65 because they were likely to injure the trade of the Australian manufacturer in question, the concern created by such a Bill. It may be noted, too, that this was done without hearing the defence of the importers.

It is improbable that even the present Parliament, controlled as it is by the Labor party, in alliance with a small section of ultra-Protectionists, will pass the Bill, as the Minister of Customs wishes it to be, should it be introduced.

Another interesting bit of Australian legislation is a clause in the new Electoral Bill now before the Commonwealth Parliament to prohibit any candidate from contributing to any charity or benevolence within three months of the period of an election. In Australia, it is not the church so much as the cricket clubs, racing associations, etc., that levy upon the unfortunate member or political candidate. One member in advocating this section of the Bill, stated that he had had eight hundred applications for contributions. The theory of this scheme will commend itself to Canadian politicians, who probably suffer from the same flood of beggardom, but it will be an interesting spectacle to see how the scheme can possibly be carried out. One thing it is likely to do is to increase the traps for the unfortunate politician, and the emoluments of lawyers who conduct contested election cases. Like a good deal of other legislation, the proposer meant well, but has not considered how the scheme will work out.

Another singular proposal was a provision prohibiting newspapers from criticizing the character of any man who had announced himself as a candidate for Parliament. This attempt to gag the press, as might be expected, came from the Labor party, which considers itself to be democratic. The libel laws of Australia are now sufficiently stringent as to make the newspapers not only very cautious, but, to outsiders it would appear, timid—in their criticisms of public men and public measures. It perhaps may be surprising to people in Canada, but not here, that the measure for restricting the press actually had an even vote in the Senate, and was only lost by the casting vote of the Speaker.

F. W.

Sydney, N.S.W., 26th December, 1905.

* * *

CANADA LANDED AND NATIONAL INVESTMENT COMPANY.

It is something of a novelty to hear mortgagees complaining that their mortgagors are too prompt in payment of principal. Yet this is the statement made with respect to many borrowers from the Canada Landed and National Investment Company. Not only have the interest payments to this company been paid in 1905 with uncommon promptness, but the principal of Manitoba loans comes in many cases back too soon; the mortgagors being "forehanded" by reason of their recent large crop, willingly pay a bonus to get their mortgages discharged. Whether lenders on mortgage like it or not—and some of them do not like it—the fact is an excellent testimony to the very remarkably successful character of our north-western farming country. The company's net earnings were $10,000 greater than in the previous year. Its contingent fund being found largely unnecessary, $20,000 of it had been added to reserve, which fund by the further addition of $40,000 from earnings is swelled to $460,000. It is observable that the company's cash assets are increased by $100,000, and that a much larger sum than the amount of the reserve is held in this shape. The report is a very satisfactory one, and shows that the company's affairs are in excellent condition.

The presiding officer at the meeting devoted a good deal of attention to facts and statistics descriptive of the progress of the Canadian North-West; the extension of its railways, the expanding area of its cultivated land, the increase in its population. One hundred and forty-six thousand is given as the number of new settlers who made homes in Manitoba, and the two new provinces of Saskatchewan and Alberta last year. And while it is a welcome circumstance that so many of the new-comers are from the British Islands, it is of still greater importance to the rapid development of the country agriculturally, that perhaps a still larger proportion are settlers from the nearby American States—persons who are adaptable and enterprising, accustomed to prairie farming, and therefore immediately valuable producers. The warning is sounded by Mr. Blaikie, however, as it was by Mr. Walker at the Bank of Commerce meeting, that many farmers in the West are "land-hungry," and buying more land than they can work or easily pay for. Words of salutary caution, too, are those about the dangerously high prices of Winnipeg real estate. After a word upon the general and remarkable prosperity of Ontario, the speaker has a few words on the activity in Canadian banking, and quotes with pardonable pride the total ascertained deposits of the Canadian people, $619,000,000, an evidence of thrift we have some right to be proud of.

* * *

FISHING IN ALBERTA.

It is not generally known in the eastern provinces that there exists quite a considerable fishing industry in the lakes north of Edmonton in Alberta. An article in the Winnipeg "Free Press" tells us that no fewer than five hundred men are employed in the business, but that journal does not tell us where the product goes. A Mr. N. C. Butterfield is a prominent leader and employs settlers, half-breeds and Indians in fishing at a time when there is little else to do. Gill nets are employed, about 30 ft. long and 4 ft. deep. Leaden weights are attached to the bottom of the nets and cork floaters to the top, so that the net stands upright from the bottom of the lake when placed in position. As the fishing is done in winter, it is necessary to cut holes in the ice, through which the net is placed in the water by shooting it under the ice by means of a long pole, which is attached to the top of the net. Expert fishermen are very adroit at this work. Three men work in each fishing gang, two of them operating the net and one boxing the fish. The latter work is done when the fish has been just stiffened by the frost. This is done so that the product will not freeze into a solid mass in the boxes. The shipments of fish are made from Edmonton in refrigerator cars, which secure a cargo both ways by bringing fruit into the country as heated cars and taking out fish as cold storage cars.

* * *

NIAGARA FALLS BOARD OF TRADE.

The Niagara Falls, Ont., Board of Trade, which recently reorganized and amalgamated with the Business Men's Association of that town, has now elected officers as follow:—President, O. D. Glasgow; vice-president, Frank Dalton; secretary, D. B. White; treasurer, William Doran, council, J. G. Cadam, Eugene Menzie, Evan E. Fraser, M.P.P., A. C. Thornburn, Dr. Thompson, Harry Williams, W. E. Arrison, Frank H. Leslie. The town has now a factory in operation turning out machines for making concrete blocks. The Niagara Engine Works at Niagara-on-the-Lake, Ontario, in which residents of Niagara Falls, Ontario, are interested, has been put in operation.

ANNUAL MEETING.

The Annual General Meeting of Shareholders of this Corporation will be held at the Head Office of the Corporation, Toronto Street, Toronto, on Friday, the second day of February, 1906, at 12 o'clock noon, for the reception of the Financial Statement and Report of the Directors for the past year; for the election of Directors and for the transaction of such other business as may be brought before it.

GEO. H. SMITH,
Secretary.

As an . . .
Investment

We believe our **5% DEBENTURES** to be one of the safest and surest that you could possibly enter into. It is safer than a Bank, because you have all of our Permanent Capital Stock, and the whole of our Assets, consisting of first mortgages on improved real estate, as a guarantee behind the Debenture. It is the surest, because the half-yearly coupons are attached to the Debenture and can be cashed at any bank in the country. . . . .
Write to-day for our booklet, entitled, "An Investment of Safety and Profit."

Dr. Webster, of Buffalo, is said to be forming a company to put on steamers on the Niagara and Ogdensburg route and passing through the Thousand Islands. The tourist traffic on this route is now carried on almost entirely by Canadian companies.

Mercantile Summary.

Winnipeg and Toronto capitalists have formed a company to construct an electric line from the former to East Selkirk, going up the east side of the Red River to Fort Alexander.

We learn that W. J. McKissock, who until recently conducted a general store at Strathaven, Ont., has assigned to Osler Wade, of Toronto, with assets and liabilities of about $2,000 each. Mr. McKissock was in previous years a cultivator of the soil, and began to be a merchant in or about 1901.

We are told that the Rolla L. Crain Co., Limited, are meeting with very fair success in the installation of their loose leaf ledger systems. Among the latest financial institutions to adopt these are the Northern Bank, of Winnipeg, for savings and deposit ledgers for their branches, and the Bank of New Brunswick for complete outfits for all their branches in St. John and other points in the Maritime Provinces.

On Thursday last week a serious fire took place in Montreal whereby about $120,000 worth of damage was caused, and a number of men and girls only escaped with their lives with some difficulty. The chief sufferers were the Campbell Clothing Co.; John Fisher, Son & Co., clothing; Allan S. Bain, wholesale dry goods; Reinhardt Manufacturing Co., fancy goods; Besette & Viniberg, furs. The building, we understand, was owned by the Eastern Townships Bank.

COUNTIES Grey and Bruce collections made on commission, lands valued and sold, notices served. A general financial business transacted. Leading loan companies, lawyers and wholesale merchants given as references.

H. H. MILLER Hanover.

The Grenfell Investment Co.

BANKERS

GRENFELL, N.W.T

A General Banking and Financial Business transacted. Special attention given to collections on Neudorf, Hyde, Tiree, Mariahilf and Pheasant Forks.

JAS. YOUNG-THOMSON MGR.

Octave Bureau, engaged in the milling business, at Compton, Que., has assigned to a Sherbrooke accountant, with an indebtedness of about $3,000.

A. A. Paquin, doing a retail dry goods business in Montreal, under the style of the Westmount Dry Goods Store, has become insolvent. He is a young man who succeeded his father, J. R. Paquin, in 1901, the latter having been accidentally killed by a street car.

A failure is announced in the Montreal lumber trade, that of A. F. B. Austin, who is said to owe some $85,000, and to show a poor estate. Mr. Austin was formerly connected with the purchasing department of the Canadian Pacific Railway, and started as a merchant under favorable auspices in 1894, but he has traded beyond his capital, besides living somewhat expensively, it is said.

The Quebec Architects' Association held its annual meeting at the Chateau Frontenac, Quebec City, on the 25th ult., and elected officers as follows:—President, Alcide Chausse, Montreal; first vice-president, R. P. Lemay, Quebec; second vice-president, D. R. Brown, Montreal; secretary, J. Vanier, Montreal; treasurer, J. R. Gardiner, Montreal. Mr. J. S. Archibald, of Montreal, was appointed president of a delegation which will go next year to the International Congress of Architects, to be held in London, England.

The sixth annual meeting of the Canadian Association for the Prevention of Consumption and other forms of tuberculosis, will be held in the railway committee room of the House of Commons on the 28th of March next. The Honorable Senator Edwards is to preside in the afternoon. In the evening a public lecture will be delivered in the lecture hall of the Normal School by Dr. Arthur J. Richer, of Montreal, which will be illustrated with stereopticon plates showing the stages of consumption and some of the appliances now in use to check and cure the disease. The chair will be taken in the evening by His Excellency Earl Grey.

A recent compilation by a mining authority shows that the production of minerals and metals in the United States in 1905 was valued at the enormous total of $1,788,017,836. This has never before been equalled. Compared with 1904 there is shown an increase of $531,909,337 or 42.4 per cent. Among the more important products which show a substantial increase are: Coal, 375,094,349 short tons, valued at $536,501,948; pig iron, 23,025,795 long tons, $377,623,054; iron ore, 45,372,773 long tons, $72,596,437; copper, 417,024 long tons, $146,158,269; gold, $86,298,200; silver, 58,938,355 fine ounces, $35,576,959; lead, 326,500 short tons, $30,691,000; spelter, 204,749 short tons, $24,078,482; white lead, 129,761 short tons, $15,830,842; cement, 38,010,308 barrels, $36,991,630; salt, $25,334,500 barrels $6,956,987, and phosphate rock, 2,024,382 long tons, $8,441,673.

A. Archambault and F. F. Fernet, who engaged in the furniture business in Montreal only as recently as last March, have been called upon to assign, and already owe about $3,000.

A dry goods retailer in Montreal, named A. Leclaire, whom we lately reported as insolvent, has effected a compromise arrangement with his creditors whereby he pays 40 per cent. cash, on liabilities amounting to about $35,000, thus getting off mighty easily.

The MacArthur Construction Company of Canada, Limited, whose authorized capital is $6,000,000, has been granted a charter by the Dominion Government, empowering it to carry on the business of a general construction company and contractors, as well as develop steam, electric and hydraulic power. Archd. and A. F. MacArthur, of Chicago, and W. J. Poupore, of Montreal, are among prominent members of the new company.

The annual meeting of the Maine and New Brunswick Power Company took place last week and the following officers were elected: N. M. Jones, Lincoln, Me., president; A. R. Gould, managing director, Presque Isle, Me.; L. G. Crosby, treasurer, St. John; J. D. Seely, secretary, St. John. This company proposes to obtain power by building a dam at the Aroostook, and it is expected that by November 1st power will be supplied to Andover, Perth, Florenceville and other points on the St. John River, as well as several places in Maine.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO

Mercantile Summary.

J. J. Routledge has sold his dredge concession on Fortymile Creek, Yukon, to a company which announces that during the coming season it will instal a dredge similar to the large one on Bear Creek, which is said to have cost over $150,000.

The Central Heat, Light & Power Company, Limited, has been incorporated. It will carry on in Montreal the business of a light and power company, also as mechanical and electrical engineers, and lay down pipes, cables, transformers, etc. The capital authorized is $500,000. Samuel and W. F. Carsley and Charles Morton, all of Montreal, are charter members.

The insolvency is noted of D. Ducharme, grocer, Magog, Que. It has been generally believed that the business really belonged to his father, R. C. Ducharme, who has had an unfavorable business record, having failed some years ago while doing business in his own name, and later he utilized the names of other members of the family in merchandising, with no better results.

The Reinforced Concrete Company, Limited, of Montreal, has been granted a Dominion charter. Its capital stock is $200,000. It will carry on the business of quarrying and milling in all details, and manufacture and engage in the special treatment of cement, building stone, etc. T. J. Donoghue, of Montreal, and A. W. Powell, of Ottawa, are among the charter members.

Another name is to be added to the already long list of unsuccessful retailers. Charles Choquette, was a farmer somewhere near Chambly Canton, east of Montreal, in a fairly comfortable way. About two years ago he became inbued with the ambition to become a merchant, and he was a man of some little substance. His lack of business experience showed itself soon after he began in complaints of unsatisfactory settlements. Law suits followed, and now his assignment is noted. His place of business was at Richelieu, in the County of Rouville.

Messrs. Marion & Marion, patent attorneys, Montreal, and Washington, report the following Canadian patents secured last week through their agency:—97,061, Messrs. Hubbard & Flay, Middlesex, England, kitchen ranges; 97,068, Joseph Moreau, St. Germain de Grantham, potato digger; 97,097, Charles B. Smith, Dunedin, N.Z. printing machinery; 97,141, Ernest Renaud, Montreal, switch operating means; 97,142, Ernest Renaud, Montreal, train stopping means; 97,143, Ernest Renaud, Montreal, railway cab signalling device; 97,1444, Ernest Renaud, Montreal, train signalling apparatus; 97,147, Messrs. Dutertre & Nodet, Paris, electric lamp for heating; 97,173, Peter Meyer, Coln Nippes, Prussia, means for securing handles to brooms, brushes and the like.

Mercantile Summary.

Cecil Ward, of the Kamloops Irrigation Company, has, in the name of London capitalists, secured control of about half a million acres in Northern Alberta, which will be colonized and developed as rapidly as possible.

It is believed that negotiations are under way by the Canadian Pacific Railway looking to the taking over of the lease of the London & Port Stanley Railway, and the purchase of the Lake Erie & Detroit River Railway from the Pere Marquette.

A dispatch from Edmonton states that the city council are calling for tenders for the construction of three miles of street railway during the coming season, to form the foundation of a municipal car system. We understand that there is a syndicate which held charters both for a city and a radial service, but that that for the former has been allowed to lapse, with the above as a consequence.

The Muskoka Lakes Navigation & Hotel Company held their annual meeting in Toronto, and elected the following officers:—J. S. Playfair, president; F. J. Phillips, vice-president, and W. F. Wasley, general manager and treasurer.

Last week's "Canada Gazette" contained a notice of incorporation of the Canada Starch Company, Limited, with a total capital stock of $2,500,000, and head offices at Cardinal, Ont. The charter members are G. F. Benson, W. Strachan, and C. R. Hosmer, of Montreal; J. J. Warren, of Toronto; and Joseph Ruddy, of Brantford. They will buy and sell and mill grains, make flour, starch, syrup, etc., buy and operate steamers, elevators, warehouses, etc. It amounts to an amalgamation of some of the chief starch manufacturing concerns of the Dominion, for the object of centralizing management, and economizing expenses.

The government of Ontario is asking for the sum of about $3,000,000, as a subsidy from the Dominion towards the cost of constructing the Temiskaming Railway to the point of intersection with the transcontinental. It is pointed out that precedents exist for making the claim. A precedent was established when the Dominion Government, in 1884, granted $12,000 a mile in aid of the C. P. R. North Shore line between Ottawa and Montreal, 120 miles, and a subsidy of $6,000 a mile for the balance between Montreal and Quebec, making in all about $2,400,000. This subsidy was placed to the credit of the Province of Quebec, and is now earning 5 per cent. The deputation, which waited on the Dominion Ministers the other day, dwelt upon the importance of the Provincial line, and the advantage it would be to the national transcontinental system to have supplies brought in over it. It was also pointed out that Ontario paid half the customs revenue of Canada.

Mercantile Summary

On the 25th ult. there was a break in the east bank of the Trent canal, a mile or so south of Peterborough, through which the water swept with great force, flooding the surrounding district and doing considerable damage.

Joseph Israelovitch and Jacob Leilovitch, doing business in Montreal as the National Fur Mfg. Co., since April, 1904, have turned over their estate to the assignee, and file a list of liabilities aggregating $6,850.——A rather more important Montreal failure in the same line is that of A. D. Scheversenski, doing business under cover of his wife's name as Scheversenski & Co., who has assigned on demand, owing about $16,000. The business record of Mr. Scheversenski in the past has been of rather unsavory character, for he failed in 1894, as well as in 1886, and he is reported as having had similar experiences in New York before coming to Canada.

The Sherbrooke, Que., Power, Light, and Heat Company held their annual meeting on the 24th January, and re-elected Hon. Wm. White, president, and F. P. Buck, vice-president. The company contemplates making several improvements in the power house and electrical equipment, in order to be able to turn out a larger amount of power.

Hedges & Burleigh, of Boston, Mass., intend to erect large steel boiler tube works, with a capacity of 1,000 tons, in Port Arthur, Ont., the town having agreed to purchase 100 acres of land for a site at Bare Point, and to take $100,000 of the company's bonds at par. The plant is to cost $750,000, and as soon as this is in working order, a wire mill is to be added.

A man named B. Wittes, formerly a peddler, and since 1903, keeping a regular, if small, stock of clothing and dry goods at East Broughton, Que., has made an assignment of his estate, and is said to owe $5,800.——P. Lavallee, also did a peddling business for a few years about St. Louis de Bonsecours, in the County of Richelieu, and Province of Quebec, eventually settling down into a regular store business, in a moderate way, at St. Victoire. He has been found slow in payments for some time past, and has now assigned.——Another recent insolvent is H. W. Legare, general dealer at Labelle, Que. He was formerly a clerk on the Ottawa River, and started store keeping on small capital in 1897. He apparently worked up a very fair trade, but was crippled by a fire, which did serious damage to the village three years ago.

It is altogether likely, and everyone who prefers wholesome social conditions will rejoice thereat, that the usury evil is to be taken up at the next session of the Dominion Parliament. It is suggested that a remedy may be found by the adoption of the Imperial Money Lenders Act. This law provides that where a money-lender seeks to recover money lent and the court is satisfied that the interest or other demand in respect of the money actually loaned is excessive, and that in either case the charge is a hardship and unconscionable, or is otherwise such that a court of equity would give relief it may relieve the person sued from payment of the amount in excess of such sum as the Judge may hold to be reasonable. If the excess has been paid the court may order the creditor to return it. The court also has power to order the money-lender to indemnify the borrower if the former has parted with any security entrusted to him. False statements or representations made by a money-lender or his agent which have a material effect in inducing any person to borrow money are punishable by imprisonment for a term not exceeding two years or a fine of not more than £500, or both.

❧ ❧ ❧

FIRE INSURANCE ITEMS.

The St. John Board of Underwriters reports a satisfactory year's business. The figures given for the city are as follows: Insurance on buildings damaged, $447,150; loss on buildings, $10,966; insurance on stock and furniture, $85,200; loss on stock and furniture, $21,206; total insurance loss, $32,172; total fire loss $34,157.

More calendars for 1906 have reached us, through the kindness of our friends and subscribers. The quiet colors of the Western Assurance Company's are pleasing; the Dominion Life Calendar is distinctly Canadian. It is a pity that the Intercolonial moose-head, scarlet relieved against grey bark, is too glaring to be effective. Others are from the Alliance, the Sun Fire, the Atlas, the Fire Insurance Exchange, the Anglo-American, the Traders, and the Ontario Accident assurance companies. The National Trust Company, the Standard Fuel Company, of Toronto, and the John Morrow Screw Company, of Ingersoll, are others.

A WARM WINTER.

It will be admitted that the weather deserves a paragraph, for any thing more remarkable for mildness than the winter of 1905-6 thus far must be looked for in the records of fifteen, if not twenty years ago. The thermometer is 60 as we write, on January 23rd, at noon: Toronto Bay is open, and there is no cold weather within ken of the

weather bureau. A letter of Monday last from Amherstburg, Ont., on Detroit River, says:—"This is wonderful weather we are having. Yesterday, Sunday, my thermometer—on the verandah, with the sun behind the clouds nearly all the time, and itself in the shade—showed 64° at two p.m., 62° at six p.m., 58° at twelve, midnight. Bees, ants, flies, were all as busy and as lively yesterday as they are in May. The ice is, of course, all gone from the river. The persistent soft weather has put quite a damper on the business of the shop-keepers; their supply of winter goods has been reduced very little thus far. A fair trade in December, an especially good Christmas week, was a godsend to them all." Notwithstanding reports of extreme cold in January at White River, which is some 500 miles north of Lake Ontario, the southern part of Ontario has had very little frost. No ice has been cut yet, and the brewers and ice dealers of both Quebec and Ontario are becoming disturbed over the prospect. On Sunday last, on the shore of Lake Huron, the glass marked 64, and at various points in South-Western Ontario the temperature had been between 50 and 60 for days together. Ploughing has been done around Guelph, and there was almost no frost in the ground.

FINANCES IN THE UNITED STATES.

Henry Clews & Co., in their weekly circular, dated New York, January 27th, 1906, said:—

Speculation continues on an active and somewhat feverish scale; indications multiplying daily that the market is rapidly approaching a turning point. Efforts to force prices to a still higher level continue with unabated vigor, and stocks are being bought by the public with increasing avidity, and with little regard to intrinsic value. Meanwhile the buying fever is being carefully nurtured, and is not confined to New York, but extends to all parts of the country; a much larger proportion of stock exchange business being over the wire than ever before. These heavy speculative movements are often being conducted by an entirely new and wealthy class of operators, many of whom are young and inexperienced men with lots of money, plenty of nerve, but slight experience and immature judgment. On the other hand, it is very significant that many of the shrewdest and wealthiest operators of long and tried experience have been steadily selling stocks. Even investors' strong boxes have been much depleted during the last month, for shrewd buyers have recognized the un-

Stephen Noxon, Secretary.

usual conditions, turned their holdings into cash, and are now awaiting an opportunity to repurchase at a considerably lower level, which will surely develop before any great length of time. While it is quite possible that prices may be carried to a higher level before reaction sets in, the technical position of the market is growing increasingly hazardous; and, since stocks are rapidly passing into weak hands, the market stands exposed to a severe break as soon as any severe strain is encountered, such as renewed stringency in money, or unexpected disaster of any kind. Just now the financial skies are cloudless, and the only unsettling features are the frequent reactions induced by persistent inside realizing.

Another field in which speculation is becoming irrational is in real estate. Last year building permits to the value of $528,000,000 were taken out in twenty six American cities, compared with $375,000,000 in the year 1904. The climax to all periods of prosperity has been marked by just such a movement as we are now experiencing in real estate from the Atlantic to the Pacific. It naturally follows the exhaustion of other avenues of investment.

So far as the immediate situation is concerned in the stock market, we cannot conscientiously advise the purchase of stocks. Quite possibly manipulation may force prices here and there to a higher level, but it is practically certain that current liquidation will continue until all of the larger interests have parted with their surplus holdings. When that point is reached there will be a scramble among the little fellows to get out, and the market will be left to take care of itself, with no short interest to check the decline. It will then be a case of "the devil take the hindmost."

* * *

UNDUE INTERFERENCE WITH TRADE.

In all parts of the world, the would-be reformer, unless he be a particularly wise and level-headed one, seems apt to prove so crude and ill-advised in the measures he adopts to gain undoubtedly good ends that he does more harm than good. This is apparently what has happened in New Zealand, that land of Utopian ideas and (it must be confessed) fine attempts to reach a social and economic ideal. There has recently been presented for consideration of the Parliament of that country a bill entitled the Trades Monopolies Prevention Act. The admirable object of which indisputably is the prevention of huge and powerful trade combinations such as are known to operate so tyrannically and injuriously in other countries. But it is so framed apparently as to interfere indiscriminately and without due cause with the legitimate workings of commerce. Let us quote, however, from the New Zealand "Trade Review" which, we believe we are right in saying, is a recognized authority on such matters:—

"The provisions of the bill display little or no experience in mercantile business, and leave a conviction on the reader that while the measure would utterly fail of its object it would interfere in an arbitrary and unwarrantable manner with a large proportion of the business carried on in the colony and prohibit arrangements which already exist in many trades, and which are not only perfectly legitimate, but absolutely necessary, to the sound management of business.

"In a small community such as that of New Zealand, any industry, especially if encouraged by protective duties, may soon become overdone, and when this happens the choice lies between two courses: that is, either industrial warfare, ruining the weaker members and inflicting heavy loss on the stronger survivors of the trade till the output is reduced to reasonable proportions; or, a general understanding and combination effecting the necessary reduction of the total output on some equitable basis and agreeing to a uniform price. The latter is, of course, the more sensible plan, and so long as the agreed prices are not unreasonable the entire community is the better for the arrangement. A third course that may be suggested is that the stronger should buy out the weaker, but that is not always practicable.

"Notwithstanding a great deal of outcry in respect of certain trade arrangements in the colony, we hold that in no case has any injury been inflicted on the general public to justify the introduction of such a measure, which would, on the other hand, be productive of widespread inconvenience and loss. We quite admit that it is wise by prudent legislation to prevent the growth of the evils aimed at by this measure, but the bill before us is certainly not the prudent legislation required for this purpose."

WELSH COAL FOR CANADA.

In view of the experiences of our people during the time of the great Pennsylvania coal strike three years ago, the following letter from a Welsh coal exporter to Mr. W. A. MacKinnon, of Bristol, which has been forwarded to the Department of Trade and Commerce, Ottawa, should prove suggestive. Welsh coal, of course, takes the place of hard coal, or anthracite, the lack of which during the aforesaid strike was the cause of so much inconvenience, if not misery. The letter is as follows:—

"There is no doubt in the mind of the Welsh anthracite coal shipper that our anthracite coal is far and away superior to that of our competitors in Canada. From the samples exhibited at the Swansea Exchange, it would appear that the Canadian people require a handy size coal, which we term on this market as cobbles, but there would be great difficulty in making a shipment of 3,000 or 4,000 tons of cobbles, and our suggestion would be that your friends should buy large coal, and break it up to suit their convenience at its destination. With reference to your remark about the wear and tear of Welsh anthracite coal, personally, we think our coals here will stand trans-shipment, etc., quite as well as American anthracite, and certainly far superior in quality in every respect."

Another correspondent writes:—

"In whatever form Welsh anthracite is shipped the method of shipping will break a proportion of it into smaller pieces, and it has to be screened on arrival and divided into various sizes, and when these different sizes are made on the other side the coal will travel any journey by railway and cart without further breakage of any importance, just the same as it does in this country.

"We want to get hold of a good firm of importers who are prepared to handle the matter as it should be handled.

"The question as to whether it is better to take large coal and break it down into the sizes required, or to take a size of broken coal approximating to that which is required by the consumers, is one that can only be decided by experiments. Take, for instance, the Rouen market—at one time nothing but nuts was shipped there, then the importers decided that it would pay them to take large coal and break themselves. This, however, does not mean that the importation of nuts had been stopped there, but that the import has been increased by the quantity of large that is shipped."

Canadian importers should at least keep carefully in mind the possibility of another strike in the Pennsylvanian coal mines. News items from that region have already been published in Great Britain suggesting, in unmistakable language, that there is grave danger of further trouble. Now, Canadians have already had some experience of what the results are when forced orders are cabled to this country by municipalities or others. Forced orders call for no gratitude, and in some cases have been treated in a most off-hand manner, much to the detriment of the reputation of Welsh coal in Canada and the United States. Canadian firms, therefore, who may later on be in need of supplies from this country, should establish their connections now before a pressing necessity arises, and they may then, as permanent customers, look for the best possible treatment.

* * *

ABOUT COPPER.

In view of the extraordinarily high prices which have prevailed for some time past for copper, it is interesting to note the views of Mr. J. Stanton, of New York, an expert who has paid particular attention to the market conditions of that metal. He says there has been no fictitious advance of prices, the gain recorded for the metal being based on the demand, and its scarcity. This resulted in 18.3-4 per cent. copper in New York. Producers in the main, he says, are now sold out to the month of May, so that immediate orders can only be filled at even higher figures. In addition to these strong factors there is no stored copper supply waiting to be disposed of which might tend to curb the present quotations. Several months ago Mr. Stanton forecasted 20 per cent. copper, and two weeks ago two car load lots were sold at that figure for immediate delivery. The outlook for 1906 is very good. Ultimately the prices may be expected to recede somewhat from their present levels but they should easily hold their present levels for some months. It is interesting to note that fifty years ago the total copper output of the United States was represented by 6,300,000 pounds, while the 1905 output will show over 900,000,000 pounds for this country alone, without counting the Mexican and Canadian production of about 110,000,000 pounds, which is almost all handled in the New York market."

Last year the production of copper by the Granby Consolidated Company reached the total of 18,000,000 pounds, and as it has now completed the building of two large additional furnaces, the production for the current year is estimated likely to be in the neighborhood of 24,000,000 pounds. The company is increasing the size of its converter plant by the addition of another stand, making three stands altogether. It is also putting in an automatic hot slag conveyor for handling converter slag. It is contemplated increasing the smelter capacity to 30,000,000 pounds a year.

* * *

TORONTO MARKETS.

Toronto, February 1st, 1906.

Chemicals, Drugs, etc.—A steady trade is being done both in town and country, but there is no feature worth special attention. In all the staples, prices hold very much the same as last month, opium and quinine are rather dull. Carbolic acid is a little on the easy side, and so is camphor. Menthol is firm. Cod liver oil has made no appreciable change.

Dry Goods.—While all the wholesale houses are busy on their spring goods, the situation has developed but few new points since last report. Dress materials seem to be selling well, and all types and colors and designs are shown. The staple cotton, woolen, and linen goods are held very strongly, and there is nothing to warrant any idea of a decline in the near future. Trade has been dampened somewhat, particularly in the country districts by the mild weather and bad roads, but the general opinion is that business is intrinsically in a sound condition, and prospects for the spring are unanimously considered good.

Flour and Grain.—There is a good demand for wheat, both Ontario and Manitoba, but deliveries are light, no doubt owing to the absence of snow and sleighing. No change has occurred in prices since our quotations last week. The movement in flour is not large. Ninety per cent. patents sell around $3.15 for export purposes. The prices of bran and shorts are still very firm, and the scarcity of shorts has not been notably relieved. The value of rolled oats is rather unsettled, owing to the supposed dissolution of the Association. Oats, rye, peas, and barley retain their fairly high prices.

Hides, Skins, and Leather.—No further change has taken place in prices of hides, but the market is weak, and a decline is not altogether unexpected. Tallow is dull. Leather has not experienced any great movement so far this winter, presumably owing to the unseasonable weather, but prices nevertheless are firm.

Groceries.—Prices of sugar continue unchanged, and no large amount of business is being done. In other lines of general goods, the trade movement is hardly up to what might have been expected. Canned goods are in fair demand at firm prices. In teas and coffees there is noticeable quietness.

Provisions.—Butter is coming in in fairly large quantities, but values continue as before. Mail advices from the Liverpool market say that there has been a considerable decline in the value of choicest, supplies having been in excess of immediate requirements, and buyers have been able to fill their wants at several shillings' reduction on the week for Danish and colonial produce. Secondary qualities, owing to scarcity, show little or no alteration, and medium and confectionery butters are about unchanged. Cheese is firm locally, but in England there has been a falling away in demand, which perhaps, however, may be due to the elections. There is a good demand for eggs in spite of their comparative abundance. Not much poultry is coming in, and prices, as a rule, are fair.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Home Office - Toronto, Ont.

AN IDEAL POLICY OF LIFE INSURANCE.
The 20-Year Premium Endowment Plan
ISSUED BY THE

ROYAL-VICTORIA LIFE INS. CO.

Head Office, Montreal.

This policy is a model of simplicity. The Endowment feature is the return of the actual premiums received by the Company. The insured has his life insurance for the interest on his premiums and his full premiums returned, if living. **There are no estimates. Everything is guaranteed.** This is permanent life insurance. There is no assessment insurance as cheap. It is the policy the people want.

In introducing this plan, the Royal-Victoria Life Insurance Company has embodied in one policy the best features of the most popular plans of insurance that have received public approval in the last few years.

The adoption of the 20-Year Premium Endowment Plan is due to a careful observation of the requirements of insurers to have combined in one form of Policy, Whole Life Insurance, Term Insurance and Endowment Insurance at the option of the insured.

This policy is the embodiment of full value for the premiums paid, as shown in the **Guaranteed Interval Values** in the Policy, should the premiums **not be continued** during the 20 full years; or the **Guaranteed Options**, should the premiums be continued to the end of 20 years.

David Burke, A.I.A., F.S.S., General M'g'r.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

UNION MUTUAL Life Insurance Co. of Portland, Maine.

FRED E. RICHARDS, President.
ARTHUR L. BATES, Vice-President.

MANILA ELECTRIC RAILROAD AND LIGHTING CORPORATION.

First Lien and Collateral Trust Sinking Fund 5% Gold Bonds

PRINCIPAL AND INTEREST PAYABLE IN NEW YORK CITY

DATED 1903 DUE MARCH 1, 1953

INTEREST PAYABLE MARCH AND SEPTEMBER

Authorized $5,000,000 Outstanding $4,635,000

Subject to Redemption on any interest day on or after March 1, 1928, and to purchase for the Sinking Fund on or after March 1, 1908, at not to exceed 105 and interest, at which price they can be drawn by lot. Coupon bonds in denomination of $1,000 may be registered as to principal.

Equitable Trust Company, New York, Trustee

Applications will be made to list bonds on the Stock Exchanges of New York and London

Through the ownership of securities of constituent companies operating under a fifty-year franchise, the Manila Electric Railroad & Lighting Corporation controls absolutely the street railway, light and power business of Manila, serving a population of about 300,000.

The above First Lien and Collateral Trust Sinking Fund Gold 5s are secured by a first lien on the entire property of the Manila Electric Railroad & Light Company through deposit of the $3,000,000 authorized issue of First Mortgage 6% bonds and the entire capital stock of the company. They are further secured by deposit with the Trustee of over 98% of the capital stock of "La Electricista" (a company controlling the lighting business of Manila), and the entire capital stock of the Union Truck Company, Neither of these companies has any bonded debt.

EARNINGS AND EXPENSES

The railway has been open only since April last and the entire line is not yet in full operation. The earnings of the corporation for six months ending October 31, 1905, are reported as follows:

Gross Earnings	$429,899
Expenses and Taxes	216,296
Net Earnings	$213,603
Interest Charges	107,310
Surplus	$106,293

These surplus earnings are at the rate of about 4.4% per annum on the $4,870,000 capital stock.

For detailed information reference is made to letters, filed in our office, by Mr. C. M. Swift, President of the company, and Messrs. J. G. White & Co., engineers and constructors of the property.

Summing up briefly the special features of this security, the following may be noted:

Absolute control of the street railway, power and lighting business of Manila.
A fifty-year franchise covering the entire business of the company.
A sinking fund to redeem the entire authorized issue of bonds prior to maturity, and before the expiration of the franchise.
Net earnings of the company, equal to about twice the interest charges.
Excellent construction of the road and its new power plant.

We recommend these bonds for investment.

A large majority of the above bonds having been taken at private sale, we offer the unsold balance at 100 and interest, to yield 5 per cent.

MONTREAL MARKETS.

Montreal, Jan. 31, 1906.

Ashes.—The market is neeless, and values more or less nominal. We quote about $4.15 to $4.20 for first quality of pots, and $7.00 for pearls.

Cements and Firebricks.—Firebricks are in steady moderate demand, and are quoted at $18.00 to $23.00 per thousand as to brand. Cements are seasonably dull; we quote Belgian, $1.90 to $2.10; English and Canadian, $2.00 to $2.20.

Dairy Products.—Neither in the cheese or butter market is there any activity, there being no export demand for cheese, and owing to the continued mildness butter values tend to easiness. For choice creamery the outside figure is 22½c.; undergrades, 21½ to 22c.; choice dairy and rolls, about 20c. For choice Western cheese the quotation is fairly steady at 13 to 13¼c. per pound.

Dry Goods.—While the remarkably mild open weather, and almost total absence of snow, still militate against the clearing out of retail stocks, it has led to many requests for early shipments of spring woolens and other lines of dry goods, and deliveries of these are being made in considerable volume. Values in all lines hold very firm, and some manufacturers of linens have withdrawn quotations. Agents for French manufacturers of fine dress goods, who have been in the city during the past week or two, have quoted prices in some cases from 20 to 25 per cent. ahead of last year, and report their principals all short of stock, on account of the great difficulty in getting the necessary yarns. The Trent Valley Woolen Co. advise an advance of 5 per cent. on all their lines of flannels.

Furs.—The 50 per cent. advance reported in some grades of muskrat early last week at the Hudson Bay sales, was apparently not fully maintained at the Lampson sale, but spring rats sold at 20 per cent. advance on last January prices, and fall rats at 35 per cent. advance. Other lines sold, as compared with figures of last March sales, as follows: South-western coon, 20 per cent. higher; northern and western coon, 10 per cent. higher; skunk, 5 per cent. higher; possum, 15 per cent. lower; marten, 15 per cent. higher; mink, 20 per cent. higher; red fox, same; silver fox, 20 per cent. higher; cross fox, 15 per cent. higher; white fox, 40 per cent. higher; bear, 10 per cent. lower; lynx, 10 per cent. lower; otter, 10 per cent. lower; wolf, 20 per cent. lower; squirrel, 25 per cent. higher; wombat, sold 20 per cent. lower than October, and wallaby 25 per cent. lower than October. Local buyers have not made any material revision in their prices. Receipts at the moment are just moderate, and, owing to the continued very mild winter, it is feared that the catch from this out will begin to be thin-haired, and show general deterioration.

Groceries.—The weakness in the sugar market referred to last week has taken definite shape, the refineries having announced a decline on all lines of 10 cents per cental, the factory figures for standard granulated now being $4.10 in barrels, and for No. 1 yellow $3.70; bags 5c. less. Cables have been received from Barbadoes reporting the opening of the market for new molasses at figures from 2 to 3c. lower than last year. In other lines there is nothing of special interest.

The British Canadian Loan & Investment Company, (Limited.)

Notice is hereby given that the Annual General Meeting of the Shareholders will be held at the Company's office, Equity Chambers, 24 Adelaide Street East, Toronto, on Wednesday, the Seventh day of February next, at noon.

By order of the Directors.

ERNEST S. BALL,
Manager.

NOTICE.

The Queen City Fire Insurance Company.

The Annual General Meeting of the Shareholders of this Company will be held, pursuant to the Act of Incorporation, on **Saturday, the 10th Day of February, 1906,** at 12 o'clock noon, at the Company's Office, Queen City Chambers, No. 32 Church Street, Toronto, to receive the report of the Directors for the past year, to elect Directors for the ensuing year, and for the transaction of such other business as may be transacted at a General Meeting of the Shareholders.

By order, THOMAS WALMSLEY,
Secretary.

Toronto, January 23rd, 1906.

Hides.—The easier feeling noted last week is more pronounced, and it is reported that the quotation for No. 1 beef hides will likely be reduced next week to 11 to 11½c. per pound. Calfskins are also lower in price, and buyers now quote 13c. for No. 1, instead of 15c. as heretofore, and 11c. for No. 2. Lambskins are unchanged.

Leather.—The volume of business is fair. Prices show a continued tendency to strengthen. No. 2 manufacturers' sole is held firmly at 25½c. per pound,

The Hand-In-Hand Insurance Company.

(Mutual and Stock.)

The Annual General Meeting of the Members and Shareholders of this Company will be held on **Monday, the 12th Day of February, 1906,** at 2 P. M., at the offices, No. 32 Church Street, Toronto, for the Election of Directors for the ensuing year, and transaction of other business relating to the management of the Company.

By order. HUGH SCOTT,
Manager and Secretary.

Toronto, 23rd January, 1906.

NOTICE.

The Fire Insurance Exchange Corporation.

Stock and Mutual.

The Annual General Meeting of the Members and Shareholders of this Corporation will be held on **Tuesday, 13th Day of February,** 1906, at the Offices, No. 32 Church Street, Toronto, at the hour of 2 o'clock P. M., for the Election of Directors for the ensuing year, and the transaction of other business relating to the management of the corporation.

By order. HUGH SCOTT,
Manager and Secretary.

Toronto, 23rd January, 1906.

while for slaughter 28½ to 30c. is asked. Best qualities of Western splits are quoted at 23 to 25c., and Quebec, ditto, at 20c.; harness, 34 to 35c.; grain, 17 to 18c.; pebble and buff, 15 to 17c.

Metals and Hardware.—Briskness still characterizes the demand for these lines of merchandise, and general firmness prevails in values. Pig lead shows some little decline from the very high figures that have prevailed, and $4.60 is now quoted in a jobbing way. Spelter is also a little easier at 7¼c.; ingot is firm at 39 to 40c.; antimony, 15 to 15¼c.; copper, 20½c. Pig iron is very firmly held at $25.00 for No. 1 Summerlee, ex-store; in domestic brands Londonderry is about the line offering at $20.50 to $21.00 in an ordinary way. Bars are unchanged at $2.05, and iron pipe at $4.29 per foot. Plates and sheets of all kinds remain at figures given last week.

* * *

The time for receiving tenders for the city of Fernie, B.C., debentures has been extended to March 8th, 1906, instead of, as previously announced, 31st January.

THE TRUSTS & GUARANTEE COMPANY, LIMITED.

Annual Meeting.

The ninth annual meeting of the shareholders of The Trusts and Guarantee Company, Limited, was held in the office of the company, 14 King Street West, Toronto, on Wednesday, January 31st, 1906. There was a large attendance of the shareholders present at the meeting. The President, Hon. J. R. Stratton, was asked to take the chair and the Managing Director, Mr. James J Warren, acted as secretary.

After the notice convening the meeting had been read, the report of the directors was submitted, and the balance sheet read. The statement showed that after the payment of the two half-yearly dividends, at the rate of 5 per cent. per annum, amounting to $49,973.46, a balance was carried forward to profit and loss of $18,029.21, making a total of $118,342.80 at the credit of profit and loss account on December 31st, 1905, representing over 10 per cent. of the paid up capital of the company. The directors' report showed that the company's business continued to show a satisfactory growth. The paid up capital at the end of 1905 stood at $1,037,883.71.

In moving the adoption of the report the President, Mr. Stratton, pointed out that the gross receipts on account of the earnings of the company for the past year amounted to $116,497.46, leaving a balance of $68,002.67, after deducting all expenses of management, as the net profits for the year. It was also shown that the gross earnings of the past year amounted to nearly $20,000 over the preceding year.

The adoption of the report was seconded by Mr. D. W. Karn, vice-president, who observed that the earning powers of the company had been largely augmented, and that there had been a good increase of business and profits. The increased earnings and business of the company were most satisfactory to him, and the complete character of the statement presented was a subject for congratulation.

The report was unanimously adopted, many of the shareholders present expressing their confidence in the management and continued success of the company.

The shareholders expressed regret at the death of Mr. T. P. Coffee, the late manager of the company, and approved of the action of the directors in the appointment of Mr. James J. Warren as director and manager, in succession to the late manager.

A most satisfactory meeting was concluded by the usual resolutions of thanks to the management.

The following gentlemen were elected members of the board of directors for the year: Hon. J. R. Stratton, Hon. Senator McMillan, Alexandria; A. F. McLaren, M.P., Stratford; W. J. Sheppard, Waubaushene; C. Kloepfer, Guelph; W. M. German, M.P., Welland; F. M. Holland, Toronto; D. W. Karn, Woodstock; R. R. McLennan, Cornwall; T. H. Purdom, K.C., London; Wm. Thoburn, Almonte; James J. Warren, Toronto.

At a subsequent meeting of the board of directors, Hon. J. R. Stratton was re-elected president, and Messrs. D. W. Karn, of Woodstock, and C. Kloepfer, of Guelph, were re-elected vice-presidents.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

The Altar Of Friendship

Do not hazard your all on the altar of friendship. Thousands of men have been ruined by going surety for friends. Better far for you to pay a strong surety company the premium on the bond. It will pay you to enquire about our policies.

—The activity in land matters around Edmonton is in no better way illustrated than by a glance at some recent figures published by the land office of that district. Last year there were no fewer than 20,873 letters received and 18,064 letters written, nearly every one of which, of course, would involve some degree of investigation, or making of some new record. The homestead entries numbered 3,099, compared with 2,093 in the previous year. The total quantity of land homesteaded was 493,849 acres, a fair-sized country in itself. Indeed, it is equal to slightly more than 774 square miles, to follow the boundaries of which would take a person one hundred and fifteen miles. That is to say, the sides of the parallelogram would be 36 miles long and the ends 21½. There were 1,320 applications for timber berths, and 1,106 applications for patents to land already settled and proved on; besides which there were numerous miners' licenses issued. Truly, the development of the immense area tributary to Edmonton as a distributing point, has been marvellous during the past two years.

* * *

—The twenty-fifth annual meeting of the Commercial Travellers Mutual Benefit Society was held in Toronto last week. The report showed that at the close of December 1905, there were 1,500 members in the society, representing insurance of $1,875,000. During the year twenty-seven members died; $30,000 was paid out in death benefits and 128 new members were enrolled. The total assets of the society, including a reserve fund of $45,000, are $58,796.89, an increase for the year of $6,578.16, with $563.38 to the credit of the expense fund account. The following board of directors was elected:—President, Jos. Taylor; vice-president, H. Goodman; treasurer, E. Fielding; secretary, Miss E. V. Rowley.

A VISIT TO THE ONTARIO AGRICULTURAL COLLEGE.

The feelings with which the members of the Canadian Press Association and their wives last Saturday reviewed the work and arrangements of the Ontario Agricultural College at Guelph were varied, but were not for that reason difficult of analysis. First and foremost perhaps was the feeling of pleasure at the delightfully cordial reception which they met at the hands of all the staff, from President Creelman down. One and all were made to feel thoroughly at home; incidentally perhaps this feature is one of the strong reasons for the surprising success of the college; its students, as is also the case of those of its sister institution, the Macdonald Institute, live in a home atmosphere where they cannot but feel that their comfort and best interests are held firmly at heart by those in authority. Another point which may be mentioned was the efficiency with which the arrangements for showing the sights to such a large crowd were carried out. There was rapidity and there was ease; and the unanimous verdict, which by the way, throws another light on the success of Mr. Creelman's executive, was that seldom had so much been seen, with so little confusion, and with such admirable facilities.

As to the general impression produced upon the visitors, it is not easy to say whether they were struck most by the self-evident efficiency and thoroughness of the Professors who explained the nature and chief points of their various departments so lucidly; or by the fascinating nature of the subjects treated on. Certain it is that few had before realized the tremendous potentialities of the different branches of agriculture in Canada, not merely in material dollars and cents, but in those incentives which spur a man's intellect to higher endeavor. Here could be seen exemplified tasks calling for all an educated man's observation and shrewdness, skill and judgment; all the knowledge he might hope to acquire in a lifetime; all the fresh bending of old theories and the fashioning of new ones to new conditions necessary to hold his mind constantly on the alert in order to keep pace with Nature's kaleidoscopic changes. In short, the dignity and possibilities of agriculture as a life-work were cast in a lime-light which is not thrown upon them often enough, even in a country like Canada, whose mainstay is the soil.

Should anyone want an unanswerable argument against the criticisms which have been made (though not frequently of late, we are glad to note), of the O.A.C. on the ground that it "did not pay its way," we would advise him to visit the College. The absurdity of such a criticism is shown up on every side. The fact that its professors employ a large part of their time in testing and finding out what the farmers *should not plant*, is sufficient answer in itself to any critic who had believed that their labors should be followed by a direct profit to the College, while as to the profits accruing to the whole community from its work, there is no doubt about those. Take the experiments with Manchurian barley as one example. An increased crop value to the farmers of $2,500,000 per year as the result of one series of tests and improvements is no small matter, surely.

Domestic Science, as exemplified at Macdonald Institute, was not less keenly appreciated than was its agricultural sister at the neighboring College. The way in which luncheon was dished up and served to the hungry pressmen by the dozens of dainty young ladies, and no less the manner in which that luncheon, made up, by the way, all of delicious products of the O.A.C. Farm, had been cooked, was a revelation. Nor must we forget to mention the gymnasium and other means for keeping up the physical tone; nor the wood and metal carving; nor the manual training which is such an important feature of this modern and thoroughly equipped institution. The fact is that both the Farm and the Institute are so complete in every respect, that to make more than brief reference to any special branch is difficult within the compass of one short article. The management of a home and the management of a farm have much in common; each presents plenty of scope for a man or a woman's keenest endeavors and highest trained intelligence. Guelph has the proud distinction of laying the foundation for both, and in a manner which speaks volumes for those entrusted with the executive work.

* * *

MONTREAL BOARD OF TRADE.

As is usual with the Montreal Board of Trade, much that was stated and discussed at its annual gathering, on Tuesday week, (which by the way was the sixty-third in its history), is of an interesting and important character. The address of Mr. W. I. Gear, the retiring president, was cheerful on the whole. Referring briefly to the prosperous state of the country through abundant harvests, great industrial development, growth of the mining and lumbering interests, and so forth, he yet considered it a duty to repeat what a leading Canadian banker had said upon this very point:—"This has clearly produced an optimism which is fraught with great danger and it is to be hoped that everywhere in Canada the many who did not hesitate to incur debt because they believed in the future, will, now that partial fruition of their hopes has come, hasten to get out of debt before they consider what new expenditure the still further removed future will justify."

As to transportation, Mr. Gear was very emphatic in his views upon the freedom of the canals. He said:—

> Our canals should also be free. The Government has remitted the taxes from year to year, but this leaves a doubt on the minds of the merchants as to what will be next season's tolls. We want the shortest and cheapest water rates that can be had, and that route is right at our door in the French River, Georgian Bay and Ottawa River Canal. This route, if constructed, will shorten the distance between Fort William and Montreal to about the same distance as from Fort William to Buffalo, and it is needless to say that a reduction in freight charges will be in a corresponding measure. This canal will enable products of the mines and manufactures in the East to go West, as well as the farm products to come East at the lowest of freight rates. It will open up inter-provincial trade as nothing else will, for I believe it will compel the railways to doubletrack their line between Georgian Bay and Montreal so as to protect their interest, as has been the case between Buffalo and New York, all of which will develop this port, and incidentally benefit you.

The president's views on the tariff show that he is a man who is averse to taking the opinions of any one man or one party, but is prone to think out each of the many doctrines on this particular question on its own ground, and free from the influence of politics. Personally he took exception to the principle which, it is generally believed, is to be placed before Parliament shortly, namely, that of a maximum and minimum tariff, which he considers a policy most dangerous to the country if it be desired to continue the present trade relations with the Mother Country, and other parts of the Empire. If to hurt those who hurt us be the object of a maximum tariff, such an object could be, he thought, more easily obtained by a surtax, which could be levied so as to suit exactly any particular case, as with Germany. For example, with a maximum and minimum tariff the United States would only have to make a pro rata reduction in their tariff, already prohibitive so far as Canada is concerned, to obtain the advantage of our minimum tariff, by which means they would cut off the Empire manufacturer and producer of raw products, and secure our markets, which they would quickly flood.

As to the proposals, as ordinarily understood, for a preferential tariff within the British Empire, Mr. Gear was by no means sanguine as to their success, because they demanded from the British consumer something which he could not fathom. But, he suggested, if the colonies were to go to Britain, and were to say, "put on a tariff against foreign countries, and in consideration of this, the colonies will introduce free trade within the Empire," it would be a case of two men making an arrangement on equal terms, and probably a British statesman proposing such a plan would carry the country.

Several other matters were discussed by the board, such as telegraphic reports of quotations for dairy produce in England; fire insurance rates, one member going indeed so far as to insist that the "exorbitant character of these was really due to a combine;" a railroad line to connect Montreal with the transcontinental railway. The election of officers of the board for the current year resulted as follows:—President, Mr. F. H. Mathewson, by acclamation; first vice-president, Mr. George Caverhill; second vice-president, Mr. T. J. Drummond, by acclamation; treasurer, Mr. C. B. Esdaile. Members of the council: Messrs. John R. Binning, shipping; C. A. Bogert, banking; Geo. L. Cains, dry goods; Duncan A. Campbell, live stock; L. E. Geoffrion, groceries; Harry A. Hodgson, dairy produce; Geo. A. Kohl, metals and hardware; Peter Lyall, contractor; J. L. McCulloch, marine insurance; J. J. McGill, manufacturing; Alex. Ramsay, paints; Farquhar Robertson, coal. Board of Arbitration:—R. M. Ballantyne, W. W. Craig, Sir George Drummond, George E. Drummond, William I. Gear, E. B. Greenshields, Arthur J. Hodgson, Donald Munro, R. W. Macdougall, Alex. McFee, John McKergow, Robert Reford.

* * *

THE SITUATION IN FURS.

Never perhaps has the situation in the fur trade been more perplexing than that which now prevails; nor is it an easy matter to place one's finger on the cause. During the years preceding the present season, there had been a period of strong demand, and always the cry for replenishment of stocks seemed greater than available supplies could fill. This kept on for some time, with nothing distinctive to break the normal course of events until the Russian war. Even this, however, though it lasted through two winters, was not sufficient to affect the fur trade as a whole, appreciably. At length, however, at the close of the war came the social unrest and political revolution through which European-Russia has even now but barely passed. At once the buying capacity of an immense body of consumers was affected, and the onward procession of furs had to call a halt.

Even then, however, taking the world's fur trade in its broader sense—and there is no branch of trade of a wider world-scope than furs—the full effects of what was happening in Russia did not make themselves felt immediately. People had been making money for so long, and they had heard reports of a coming change so often that it was some time before they actually realized the true state of things; and now we arrive at the period at which this season's trade begins to figure. Then, when stocks had arrived, there became visible such a tendency to supply still more new stuff that it could be seen that a spirit of speculation had become rife; and the highest prices in the history of the trade were reached. Notably this was evident in the case of mink, which, as is known, becomes "prime" sooner than most other skins. At the beginning of last December, this fur fetched $9, though, as will be remembered we had already expressed the doubts held by some of the best judges as to whether such prices were altogether justifiable. A recession during the last few weeks of $1 to $2 per skin shows the correctness of this conservative attitude. Similar remarks with somewhat less force may be said of skunk.

The truth is that at the present time the fur trade presents such peculiar problems that novices should be wary of engaging in it. It is perplexing even to the most expert. It may not be out of the way, also, to advise holders of raw skins to market them as speedily as possible. The effects of mild weather have not been so marked as might be imagined by a layman. Even should the local market be affected by such a cause, the markets of the world are not necessarily influenced thereby. Except in the cases of heavy overcoatings, such as coon, wallaby, etc., all classes of fur stuff have moved fairly well in Canada. Apart from these items, the trade in manufactured furs has been about average, and bids fair to be as good next season. Some dealers perhaps have rather a large quantity of stocks left over, but as a general rule they are well cleaned out.

Some of the wholesale dealers are now selling skins at less money than the prices quoted in the chief centres, the explanation being that contracts were made before the above-mentioned new conditions made themselves felt. A great advance has taken place in North-West Coast sealskins, amounting to about 35 per cent. In this item again, local dealers have not raised their prices in proportion, having bought their stocks over two years ago. If prices are to be advanced to the level reached by the last sales, the consumption, in this country at any rate, is likely to be seriously curtailed, for it requires that people be educated up to such a high range of values, even in favorite goods.

It is important that trappers and others should not be misled by the quotations appearing in some of the London and other circulars. Take muskrats for example. In March, last year, there was an advance in this article equalling 40 per cent. over the prices of the preceding January. These circulars now state there has been an "advance of 50 per cent. over last January." This is true in a measure, though many people, we surmise, may have been led thereby to fancy that there has been an advance of 50 per cent. since the last sales, whereas the truth is that 40 per cent. of that advance had been made already, and is therefore covered by present prices. Again, it is only the fall and winter rats that have so gone up in value, spring rats remaining practically the same.

As for Ontario collections of fur skins, it may be remarked that skins of all kinds, owing to the extremely mild weather, are becoming seasonable much later than usual. Generally speaking, in January they are almost as good as in March, but this is not so at present. This is very noticeable in skunks and minks, which already are beginning to look "springy." This, of course, will affect quality considerably.

JANUARY FIRE LOSS.

The losses from fire in Canada and the United States during the month of January amounted to an aggregate of $17,723,800, or over a million and a third of dollars more than in that month last year. The following is a summary of last year's figures of the losses each month, as compiled by the New York Journal of Commerce and Commercial Bulletin:

	1904.	1905.	1906.
January	$21,790,200	$16,378,100	$17,723,800
February	90,051,000	25,591,000	....
March	11,212,150	14,751,400	....
April	23,623,000	11,901,350	....
May	15,221,400	12,736,250	....
June	10,646,700	11,789,800	....
July	11,923,200	13,173,250	....
August	9,715,200	11,435,600	....
September	14,387,650	13,715,250	....
October	12,866,200	12,267,000	....
November	11,515,000	16,178.200	....
December	19,422,350	15,276,600	....
Total	$252,364,050	$175,157,800	

January of this year was a particularly mild month climatically, which acts, as a rule, in a favorable way so far as the interests of underwriters are concerned. It is particularly disappointing, therefore, to find such a large increase in the value of property destroyed compared with the same month last year.

* * *

THE REBATE EVIL IN LIFE INSURANCE.

During the discussion on, and investigation into, life assurance in the past year, the rebate evil was most prominent among matters considered. Rebating in life assurance means the granting by agents of companies, upon the demands of the applicants, of certain special favored arrangements in respect to the first year's premium upon policies. Practically all life agents are paid on a commission basis—that is, they get a percentage on the first year's premium on policies, and a small collection commission on the renewal premiums. Many applicants for insurance, knowing that the agent is paid in this way, have made it a condition precedent to the taking out of the policy that they should share in the agent's first year commission.

The practice is a demoralizing one, for many reasons. In the first place, it destroys the system of equality and mutuality which is at the base of life assurance. No policyholder should receive an advantage over another. All applicants of the same age and expectation of life should be charged the same rate, otherwise discrimination and inequality ensue, and mutuality is destroyed.

The system of rebating is also responsible, perhaps more than anything else, for the increased cost of life assurance in recent years. The fact that certain applicants demand a part of the agent's bread and butter so cuts into the agent's earnings that he may find at the close of the year it is impossible for him to continue in the business and live on the rates of commission he has been receiving, less the rebates which he has been compelled, under penalty of losing the business, to grant to his customers. The result is that agents are obliged to appeal to the life companies for increased pay. The system of asking a rebate when paying premium on a policy is, we are glad to say, scouted by many right thinking and high minded persons. It is regarded by them as a means of depriving the agent of the earnings which he is justly entitled to, and of endeavoring to secure an unfair advantage over other policyholders.

An important step was taken, looking to the cure and elimination of rebating, by the Canadian Life Insurance Officers' Association on Tuesday, the 6th inst., when a number of the members of that body waited upon the Premier of Ontario and the Attorney-General, and asked that the Province would pass an Anti-Rebate Law, under which it would be a punishable offence for an agent to give, or the assured to accept a rebate, and for any company to grant a contract under which a rebate was given. Such a law is in effect in at least twenty of the States in the neighboring republic, and on the whole has been found to give satisfaction. If Ontario, which has always been foremost in sound life insurance legislation, will put such an Act on the statute book, we are sure that the Life Officers' Association will ask that a similar law be passed in the other Provinces of the Dominion.

The deputation which waited upon the Government was a representative one, being composed of: Senator Cox, president Canada Life; Mr. L. Goldman, managing director North American Life; Mr. J. F. Junkin, managing director Manufacturers Life; Mr. E. Marshall, secretary Excelsior Life; Mr. Geo. B. Woods, general manager Continental Life; Mr. J. O. McCarthy, manager for Ontario of the Great-West Life; Mr. F. Sparling, secretary National Life; and Mr. T. Bradshaw, actuary Imperial Life. We are not told what encouragement in the way of promises they received from the members of the cabinet whom they met. Most probably the reply was the usual one that the matter would be considered. But there were some indications that the Attorney-General was impressed by the statements made before him, and especially with the representations made by the legislation in force in many states of the American Union.

* * *

CANADA PERMANENT MORTGAGE CORPORATION.

The proceedings at the meeting of this company on last Friday furnished an illustration of the quick and happy despatch of business. The annual report, albeit dealing with a large aggregate of transactions, was concentrated and brief; the president's address, while full of suggestive facts was not lengthy; few questions were asked, and those few promptly replied to; in fact the yearly gathering of proprietors of this large concern occupied no more than half an hour. A very remarkable and satisfying fact brought out in the president's address was that while having an aggregate of $22,473,000 loaned on mortgage from the Atlantic to the Rocky Mountains, the company had no more than $17,000 of real estate on hand at the close of 1905. This while it testifies to general prosperity the country over, shows also that great vigilance must have been exercised by the company's district managers at Regina, Winnipeg, Toronto, and St. John. It is very likely true, though not so stated, that this corporation has had experiences similar to those of other companies in the like business, namely, that its mortgagors had paid up only too well. But lending on mortgage, while the main, is not the only kind of lending done by this extensive concern.

Net profits of the year, which amounted to $545,205, plus $63,900 brought forward from the previou year, and the sum realized from premium on stock enabled the payment of the usual dividend, writing $20,000 off office premises, and the addition of $200,000 to reserve, while carrying forward $44,700. Liabilities to the public in the shape of debentures and deposits are $22,600,000. Against deposits of $3,443,000 are held $1,506,000 advanced at call or short call on bonds and stocks, $434,900 in municipal debentures owned, and $452,800 in cash—these quickly available assets being thus equal to almost 70 per cent. of its deposits by the public.

In the opinion of the chairman, who noted a recently improved rate of interest obtainable on loans in Eastern Canada, there is to be expected a reduction in the rates obtainable in the newer West at no distant date, though this may be held in check for a time by the new railways opening up new districts to settlement, and by the extraordinary development now proceeding. Alluding to the extent of the company's transactions and their wide diffusion that gentleman declared that Canadian farmers, with whom the great bulk of the company's business is done, are probably in a more independent position than ever before. And he added: "Canada Permanent prosperity is, therefore, a synonym for Canadian prosperity."

Mr. Beatty, who in his capacity of president, moved for the first time the adoption of the yearly report, made touching reference to the death of the late George Gooderham, the first president of the corporation. The chairman also announced that the first vice-president and managing-director, Mr. J. Herbert Mason, had chosen a well-earned retirement from the active management, adding: "His long and brilliant career as a loan company manager will ever remain as an incentive to those who follow." The officers chosen by the newly elected board were:—W. H. Beatty, president; J. Herbert Mason, chairman of the board; W. G. Gooderham, first vice-president; W. D. Matthews, second vice-president.

QUEBEC BOARD OF TRADE.

The sixty-fifth annual meeting of the Board of Trade of Quebec took place on January 30th, with Mr. Geo. E. Amyot, the first vice-president, in the chair. The report of the council indicated what a large number of important matters had been looked into by that body during the year.

Some of these questions are principally connected with the general interests of the country; while others bear more specially on local matters. The most important may be placed under the following headings: The port of Quebec, discrimination of the railway companies in favor of Montreal against Quebec, on import and export traffic; the harbor improvements, the building of another graving dock, in particular; the harbor dues; the establishment of a direct line of steamers between Quebec and Liverpool; the improvement of the ferry service for freight and passengers.

At the present time, it is stated, the Quebec board numbers 307 members. A resolution carried which calls on the Federal and Provincial Governments to render the Quebec and Lake St. John Railway amenable, in questions of rates, etc., to the Railway Commission. The question of the operations of the ice-breaker "Montcalm" above Quebec was brought to the notice of the board by Mr. Wiggs, who said the work performed by that boat was not alone a useless expenditure of money, but that it was detrimental to the harbor of Quebec and an obstruction to the winter service by the ferry steamers. A motion that the council take the matter up for consideration was carried unanimously. The following officers were elected by acclamation: President, Mr. Geo.

Amyot; 1st vice-president, Major T. S. Hethrington; 2nd vice-president, Dr. Ed. Morin; treasurer, Mr. E. E. B. Rattray; auditors, Messrs. L. A. Carrier and Arthur E. Scott. The election of members of the council resulted as follows: Messrs. P. J. Bazin, Geo. Tanguay, V. Lemieux, O. W. Bedard, M. Joseph, W. A. Marsh, G. A. Vandry, N. Drouin, W. Power, M.P., D. A. Drolet, Ed. Picher, V. E. Beauvais.

OUR SAINT JOHN LETTER

Engineer Robert A. Ross, of Messrs. Ross & Holgate, Montreal, put a quietus on the movement to expend a large sum of money to get an engineering opinion on the commercial value of the reversible tidal falls at the mouth of the St. John River. Mr. Ross was here under contract with the city to prepare plans for a municipal lighting plant. He gave a little time to a study of the falls project, and told the committee that while there is doubtless a very great power at the falls the cost of utilizing it would be so great as to make the attempt practically worthless. The problem is a complicated one, because of the fact that the conditions change constantly, the falls reversing themselves twice every day. Mr. Ross has not yet sent in his report on the lighting project, but it is expected at an early date.

The city council of St. John at its meeting on Monday sanctioned some new regulations that are expected to make for better Government. In the past much of the time of the council has been occupied with questions regarding the employment of officials, often for very minor offices, for all appointments were made by the council. Now the head of each civic department has been made responsible for the work of his department and has been given the power of appointment and dismissal. This will enable the aldermen to give much more time to the larger matters before them. .

The export business through St. John during the coming winter will be far in excess of any previous year. The shipments to date amount in value to nearly $10,000,000, and only a year or two ago this would have been considered large for the whole season. At the present time the C. P. R. elevator is full of grain and there are upwards of 1,000 cars waiting on the different sidings to put their grain contents into it. The package freight business also is large and growing. Altogether the outlook is particularly bright and it will make more apparent than ever before the growing importance of St. John as a winter shipping port of Canada. Next winter there will be ready at least one new berth for steamships and then a still larger business will be possible. It is interesting to note in connection with the winter port business that the C. P. R. steamers are carrying away about 53 per cent. of the cargo, although C. P. R. ships only total about 29 per cent. of the sailings.

At a meeting of the Fredericton city council on Monday evening Mayor McNally presented for consideration the request of local capitalists for tax exemptions and a cash loan of $7,000, repayable after three years in seven yearly payments. For this a company will erect and operate a saw mill on the site of a mill destroyed some months ago. The matter is under consideration. Fredericton, like St. John, is just now debating ways and means of attracting new industries and is willing to make exemptions.

The corporation of St. John has concluded an agreement with the local company manufacturing the Mowey Safety Nut and will give the company large powers in return for the expenditure here of $150,000 in the erection of a large factory.

It is announced that a gravitation water supply of excellent quality can be secured for the three towns of St. Stephen, N. B., Calais, Me., and Milltown, N. B., at Maxwell's crossing, only four miles away. Engineer Barboni estimates the cost at $120,000, and these three towns, one of which is on the American side of the line, will join in having the pipe line laid.

The most serious condition of affairs prevails as regards the lumber industry along the Bay Shore section of New Brunswick. The season began well, and a good deal of lumber was cut, but of late the snow has entirely disappeared. Hauling is absolutely impossible and it is now doubtful if the timber operators will be able to get enough to get their logs to the streams in time for the break-up in the spring.

* * *

St. John, N. B., 7th February.

* * *

THE ST. LAWRENCE ROUTE.

In announcing that the Canadian Pacific Railway had decided in favor of making Quebec the western terminus for their new Atlantic steamers, Sir Thomas Shaughnessy gave as the reason for such a step the existence of a state of things to which Canadians cannot afford to blink their eyes much longer. The St. Lawrence route, without a doubt, has been improved, especially of late years; but, equally without a doubt it still leaves very much to be desired in the way of safety. Most of us, certainly most shipping men, have realized this for a long time; but when the president of the C.P.R. puts the thing thus in a nutshell: "We have decided to stop at Quebec until such time as the St. Lawrence is so improved between Quebec and Montreal as to make the route a safe one"—it crystallizes the matter and makes us clearly see the folly of procrastination or half-measures as nothing else can.

Sir Thomas goes on to say: "The very great value of these vessels, which are different from the ordinary vessels that come to Montreal, and the unsatisfactory condition of the channel, its narrowness at the bends and the lack of uniformity in depth, have made us apprehensive of the consequence of bringing them up. In addition to that there are the high marine insurance rates, which impose a very serious burden, apart from the risk."

His subsequent remarks, as reported in the press, are even more incisive:

"Although," says he, "we have been talking about a fast line for the past fifteen or eighteen years, we have not a single port in the Dominion of Canada to-day where vessels of this kind can land their passengers and mails with the requisite convenience—not one. Montreal is being fitted up and will be fitted up with the requisites of a terminus for large steamships, but the channel does not meet the requirements of large vessels. Quebec, after some months' work has been done, will furnish facilities for one or two vessels, but even at Quebec we will have to put up with such very inferior facilities as the port now affords—very inferior as compared with what we ought to have. The port of St. John has been improved at the cost of the city, but it is entirely inadequate for even the present traffic, and there are no wharves at which these vessels can land. Some work is being done at St. John to improve conditions, and we hope that our vessels can be taken care of there next fall in such a satisfactory manner as will encourage the business going that way. Looking at the wharves down there, one gets the impression of a pile of rotten and tottering logs. Halifax is probably somewhat better, but the lengthy rail haul to and from Halifax makes it almost an impossible port. It is to be hoped that the Federal Government will take hold of this matter and have these natural ports put into shape without delay, so that ocean traffic to and from Canada can be retained for Canadian ports."

It was not to be supposed that such strong statements derogatory to our Atlantic coast ports would pass without challenge. And accordingly Sir Thomas has found out from the press that Halifax and Saint John both resent what he has said.

Sir Thomas ventured the opinion that the very minimum depth and width that could be considered satisfactory for the new steamships in the St. Lawrence channel was thirty feet deep, 300 feet wide and 500 feet bends.

* * *

—The Toronto Board of Trade has elected the following officers by acclamation: President, Peleg Howland; 1st vice-president, R. C. Steele; 2nd vice-president, R. J. Christie; treasurer, J. W. Woods.

PROTECTION ON THE PACIFIC COAST.

The terrible catastrophe to the "Valencia" off Vancouver Island has aroused the people of the coast to the necessity of having a good life-saving service in the neighborhood. The Merchant Service Guild for one, an organization of ship-masters sailing out of Victoria, met and devised a general scheme for the protection of the coast, which has been forwarded to the Minister of Marine. This scheme embraces wireless stations at Cape Beale and elsewhere, a highway along the shore between San Juan harbor and Cape Beale, with stations equipped with life-saving apparatus at short intervals, a new light between Carmanah and Beale, two life-saving stations north of Cape Beale, and a vessel equipped with wireless telegraphy to patrol the shore.

Another resolution was passed urging the closest inspection of passenger vessels. In supporting this resolution, C. H. Lugrin, who conducted the investigation into the "Clallam" wreck on behalf of the Dominion Government, condemned in strong terms the character of the inspection given vessels by the officers of the United States Government. He is reported to have said that while the laws of that country were excellent, they are enforced, on Puget Sound at least, in a perfunctory way, with the result that ships are sent to sea freighted with valuable lives but without proper appliances for the saving of life.

This, no doubt, is true in regard to the "Clallam" disaster, and it seems to have been further shown by the disclosures, if they be true, which it is to be hoped they are not, in regard to the life-belts and life-boats carried by the "Valencia."

At the present time an arrangement is in force between the two countries whereby the inspection of passenger vessels in one is accepted, as sufficient in the other. Formerly inspection had to be enforced in both countries, and a demand has now arisen for a return to this system. And it is not to be wondered at. After such awful losses of life as have already occurred, what is needed is that the inspection of foreign vessels carrying passengers to Canadian ports should be especially thorough and painstaking. There can be little doubt that, had the proper boats and equipment been available when the "Valencia" finally broke up, the lives of dozens of helpless people might have been saved.

* * *

CROWN BANK OF CANADA.

Although this new bank opened its doors at Toronto and Ottawa rather more than a year and a half ago, and at a dozen other places for shorter periods, the report now made is practically for sixteen months. In that time, with a paid capital ranging from $350,000 to $737,000, deposits of two millions have been gathered in, circulation of $472,000 has been issued, sixteen branches have been opened and loans of $2,400,000 are now shown, so that the management has been very far from idle. Nor have we heard that its efforts to get business have been of the recklessly competitive kind on the part of bank agents, of which a good many instances have come to our ears of recent years. Net profits of $33,000 are shown, which added to the $71,000 derived from premium on stock made $104,000 to deal with. Of this sum $41,974 is used to wipe out expenses of organizing, $10,000 in reduction of bank premises, the remainder is carried forward. To have done this, after opening sixteen branches, is to have done well.

Some shareholders doubtless look for a dividend—they always do; but it was wisdom on the part of the board to refrain from declaring one though they could have done so. And what is still more unusual, the directors have had no fees, and agree to take none until a dividend is paid to proprietors. This is a sort of self-denial that shareholders will assuredly welcome and perhaps respect. The president also announced that nearly all the agencies of the bank are already on a paying basis, a thing that was by no means to be expected. Mr. Gurney's further statements that offers for stock *en bloc* have been declined in favor of a more general distribution of shares in smaller allotments, and that a good proportion of the assets is intended to be maintained in liquid form, indicate a resolve in the direction of prudently consulting popular favor. The proceedings of this bank thus far appear to have been conducted with a regard for the usages as well as the principles of sound banking.

* * *

ANGLO AMERICAN FIRE INSURANCE COMPANY.

At the annual meeting of this company on Tuesday, which was the seventh, a more satisfactory state of things in its interior economy was made known. The net income for the past year was $287,766, or nearly $20,000 in excess of the year 1904, whereas working expenses of the business for the year were $16,000 less. The fire losses of the year were $171,000, and after paying reinsurances, commissions and other charges there was a balance of income of $28,007. It appears to be generally acknowledged that it was high time for a change of managers, and we have some reason to think that the directors, who are for the most part business men of decided shrewdness, have secured a good one in Mr. Beck.

* * *

THE NEW YORK LIBEL CASE.

Newspaper publishers and editors, whose sometimes thankless task it is to protect the public against swindles and abuses, are to be congratulated on the outcome of the recent action for libel taken by a New York judge against "Collier's Weekly." This journal had exposed the methods or a certain society paper, which apparently was reaping great profits from various kinds of intimidation and blackmail, and incidentally showed up the fact that the latter was being assisted in its nefarious work through the connivance of a man who was supposed to represent the majesty of the law. The libel suit ended disastrously for those who had initiated it, recoiling completely upon their own heads, to the utter ruin of their already tarnished reputation.

In no better way can one of the most important functions of the press be vindicated. The law of libel has its uses, but it has been shown before, as it is shown in this instance, that it must not be used to intimidate public journals from a proper and rightful exposure of flagrant evils. The unanimous verdict of the jury in the case, in favor of the editor of "Collier's," shows that a sound public sentiment will generally be found perfectly ready to support a newspaper when it makes legitimate criticisms on matter affecting the welfare of the community. A later dispatch from New York states that the editor of "Town Topics," the society journal through which all this mud has been stirred up, has been arrested for perjury, so that the ramifications of the case in which "Collier's Weekly" has made such a prominent appearance are even wider than first expected.

* * *

BANKING AND FINANCIAL.

A meeting of the subscribers of the Sterling Bank is to take place on March 7th, for the purpose of electing directors and of determining the day on which to hold the annual meeting.

We are pleased to announce that Mr. James W. Baillie, lately retired from the firm of Baillie Bros. & Co., has open-en up offices at 47 King St. West, where a strictly bond business will be conducted under the firm name of James W. Baillie & Co.

A presentation was made on Saturday last to Mr. Arthur Wickson, Dean of western bank managers, who has had charge of the Winnipeg branch of the Merchants Bank for twenty-five years. The testimonial consisted of a handsome cabinet of silverware, and was presented by the customers of the bank, on the eve of his retiring from his present position.

The Dominion Brokerage Company has just been granted a charter by the Alberta Legislature. The capital authorized is $20,000. Mr. F. G. Dawson, the president of the company, and Mr. R. C. Johnston will assume management of the Calgary office and Mr. J. G. Edgar that of the one in Edmonton.

We hear of the purchase by Messrs. H. O'Hara & Co., of Toronto and Montreal, of $50,000 City of Woodstock bonds, payable at the end of 30 years, bearing 4 per cent., and $7,000 of the same payable at the end of 30 years, bearing 4 1-2 per cent.

For some months the premises at the corner of Yonge Street and Gould in Toronto, have been undergoing alterations for the purpose of being used as a banking office. They have now been occupied by the Bank of Hamilton, and make a very attractive looking office, both inside and out.

The Amherstburg "Echo" learns that the Imperial Bank has awarded the contract for a new bank building to be erected on the site of their present building in the town of Essex, which is to be torn down and a new brick building, 21 by 67 feet, of two stories and a basement erected in its stead.

Word comes from Ottawa under date of 6th inst. of the retirement of Mr. W. L. Marler, who has been manager of the Ottawa branch of the Merchants Bank of Canada. He has been connected with this bank for something like 38 years, and we are told has acted in the capacity of manager for 34 years of this time.

Mr. John T. Knight, of the Montreal Clearing House, referred the other day at a gathering to the New Bankers' joint club institute of that city and its objects. The club is expected to be formed at a very early date. While there would certainly be an instructive end to it, the main object of the new club would be to provide the banker whose home is out of town, with some kind of amusement and pleasure to occupy the spare hours of his time. Games would be furnished and everything would be made as comfortable as possible for those who attend. And there are no fees to be charged in connection with the club. Said Mr. Knight, a great deal of credit must be given to Mr. J. Gillespie Muir, of the Merchants Bank of Canada, for the hard work he put in two years ago to form an institute.

* * *

FIRE INSURANCE ITEMS.

The following about industrial insurance is from the "Citizens" of Lowell, Massachusetts, which place contains a good many mechanics: "Industrial insurance has been talked about a good deal during the investigation, but it is only fair to say that the poor people have to pay a higher rate because they pay weekly, making the collection of premiums a rather expensive proposition for the companies. The proposal, to make this class of insurance illegal is absurd, as it would work more hardship on the poor people than on any other class."

It is like old times to see again a report of the Gore District Mutual Fire Insurance Company, and to find the names of James Young and R. S. Strong appended to it as natural as anything can be, for these gentlemen are valuable old-timers in its service. The year, it is stated, has been one of the most successful in the history of the company. Total income was $154,327; total outgo, $116,184, leaving $38,142 to the good. Premium income was $136,456, losses $61,760, equal to 45.27 per cent. The number of policies issued last year was 4,959, and the aggregate in force was $17,345,283, under 12,921 policies, so that the company's business is no small one. The assets, which were added to last year, now reach the large sum of $527,307, of which $306,354 is in the shape of municipal debentures, mortgages, real estate and cash. The company is in fine condition.

A bill is before the United States Congress directing the census bureau to compile statistics on the electrical industries every five years, and on life, fire and marine insurance every ten years. {What the electrical statistics are wanted for is not stated.

FOR GROCERS AND PROVISION DEALERS.

P. McIntosh & Son, Limited, has received an Ontario charter. The company will buy, sell, and deal in grain, seeds, cereals, etc., and carry on a warehouse, storage and general milling business, and acquire as a going concern the business of P. McIntosh & Son of this city.

We referred last week to figures representing the sugar production at the Wallaceburg factory. Those for the Ontario Sugar Company's works at Berlin are no less satisfactory. Its turn-out last year was 9,487,453 pounds of refined sugar from 48,085 tons of sugar beets. In the year 1904 the output was 7,111,637 pounds.

A Japanese firm has started a canning and fish guano factory on Hot Spring Island, one of the Queen Charlotte group in the Pacific, near the Canadian shore. They have purchased the stern-wheeler river steamer "Dawson" and transformed her into a floating cannery, in which they operate on several species of shell-fish, sea eggs, etc. They are also engaged in gathering and curing a kind of sea-weed and shipping it to Japan, where it has a ready sale. They are also in the whaling business and they use the oil for guano purposes.

* * *

DRY GOODS NOTES.

Henry Morgan & Co. have bought a large building at the north end of Victoria Square, Montreal, occupied until recently by F. Davis & Sons, and will renovate it and establish a factory.

The Montreal Cotton Company held their annual meeting a few days ago and elected the following directors: Senator Forget, Lt.-Col. F. W. Henshaw, Mr. C. B. Gordon, and Mr. David Williamson. It is understood that last year was one of the best in the company's history for business.

The Sellers-Gough Fur Company, Limited, has been granted an Ontario charter. It will carry on in Toronto the business of manufacturers and dealers in furs, skins, hides, clothing, millinery, etc., and will acquire the business now carried on by Cummings & Sellers as furriers in Toronto. The share capital is placed at $150,000.

The Anderson Company, Limited, has obtained from the Ontario Government a charter authorizing it to manufacture, buy and sell dry goods, carpets, clothing, millinery, haberdashery, fancy goods and gentlemen's furnishings. R. M. Anderson, of St. Thomas, Ont., where the company's head office will be situated, is a prominent man in the new company. The capital authorized is $100,000.

* * *

—At the annual meeting of the New York Board of Trade, held on Monday of last week, Mr. W. McCarroll was re-elected president, and Mr. Frank T. Gardiner, secretary.

—Several suggestions for new rules for car service with a view to securing the fullest possible use of railways cars, tracks and equipment, have been finally approved by the Railway Commission. On all cars held over the regular free time prescribed, $1 per day of 24 hours will be charged as demurrage. No fee will be charged for Sundays or legal holidays. The board says that it is lawful for railways to make the charge higher where delays have occurred.

—The New York "Journal of Commerce" refers interestingly to a feature in the business life of that city which is making itself more and more marked. This is the fact that in the down-town districts the first-class restaurant is gradually disappearing and its place being taken by luncheon clubs, each composed of men of one particular branch of business, where they find a neutral meeting ground. The dining-rooms of eighteen of the best-known of these have a seating capacity of 6,000, and it is estimated that from 15,000 to 18,000 people take their mid-day meals at these clubs. These growingly popular arrangements are said to permit of the accomplishment of a maximum amount of work with a minimum expenditure of time and nerve force.

—The New Brunswick Telephone Company proposes to make several important improvements in its service, among them the construction of a fourth copper circuit between St. John and Fredericton for through business; a direct circuit between Canterbury and St. Stephen; and, in the not distant future, the direct connection of St. John with Montreal. Its new exchange at Fredericton is to be completed shortly. The building is to cost $8,000 and the equipment $15,000.

—Judging from the attitude of John Mitchell, president of the United Mine Workers of America, and of the coal mine operators of Illinois, Ohio, and Western Pennsylvania, another great coal strike is not impossible in the near future. The former, speaking at Indianapolis last week, said "there must be an increase in wages, or there will be no agreement." The operators, at a caucus held about the same time, are reported to have stated that they would not grant a mill advance per ton either directly or indirectly.

—E. R. Wright, the president of a typographical union in Chicago, and another member of the same, were last week sentenced to heavy fines and to thirty days in jail for contempt of court, arising from the violation of an injunction to refrain from interfering in any manner with the operation of the printing establishments of members of the Chicago Typothetae and from interfering in any manner with their workmen. In announcing his decision, Judge Holdom said it was not a question whether the injunction was right or wrong. "That," he said, "will be decided by the upper courts; but while it is in force it must be obeyed. In this case it has not been a mere technical violation of the injunction, but a persistent one, and an utter disregard for the order of the court. If this court cannot be upheld, then government is a fraud and a sham." The union itself was also fined $1,000.

—A young lady working in a stocking factory, fearing that her chances for matrimony were small, wrote the following and slipped it into the toe of a gentleman's sock: "A young lady, good looking and of some means, would like to correspond with the wearer of this sock, if he is single, with a view to matrimony." A young man bought the sock and said: "There's my chance." He wrote to the young lady, offering himself as a suitable party, and to his surprise got this reply: "I have been married eight years, and have a family of five children." The man from whom he bought the socks had never advertised, consequently they had lain on the shelves for eight years.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, February 8th, 1906, as compared with those of the previous week:

	Feb. 8th.	Feb. 1st.
Montreal	$31,778,287	$26,261,731
Toronto	23,093,630	21,000,942
Winnipeg	6,703,735	6,727,707
Halifax	2,370,826	1,379,136
Hamilton	1,300,308	1,190,631
St. John	1,158,538	1,006,983
Vancouver	1,897,394	1,652,826
Victoria	826,469	635,200
Quebec	1,973,706	1,450,867
Ottawa	2,697,616	1,949,678
London	1,138,774	872,953
Total	$74,939,283	$64,128,654

Vault doors in Bank of Montreal and Royal Trust Company, Montreal Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

CONFERENCES ON LIFE ASSURANCE.

The life insurance agents and the life insurance journals in the United States are criticizing the character of the proceedings at the conference of Insurance Commissioners from various States. Many of them say that there was "too much politics" evident. It is pointed out that twenty-eight out of the thirty commissioners present were elected or appointed as a reward for political services, and only six had had any previous experience in insurance. Of these but three had been engaged in life insurance, and they as agents, the others having been fire insurance men.

Some of the agents who were present say that they attended the meeting on invitation, thinking that they stood midway beween the companies and the policy-holders, and meaning to make their experience of service to the discussion. The majority of the Commissioners, however, regarded them as the emissaries of the companies, and would have nothing to do with them.

Again, some of the agents have been making an investigation as to the character and experience of the men who assume to sit in judgment and enact laws and regulations. And they quote a statement of one of the members of the Committee on Uniform Laws, who insisted that there was no need for any delay or the employment of experts, and that he wanted to have a code of uniform laws framed that day before adjournment!

Meetings

CANADA PERMANENT MORTGAGE CORPORATION.

The sixth annual meeting of shareholders of the Canada Permanent Mortgage Corporation was held in the head office of the corporation, Toronto, on Friday, the second February, 1906, at 12 o'clock noon.

The president, Mr. W. H. Beatty, occupied the chair, and the secretary, Mr. George H. Smith was appointed secretary of the meeting. At the request of the chairman, the secretary read the report of the directors for 1905, and general statement of assets and liabilities, which are as follows:—

Report.

The directors have pleasure in presenting to the shareholders the sixth annual statement of the business of the corporation, duly certified by the auditors.

The net profits for the year amounted to $545,205.94 which, with the unappropriated profits of the previous year, $63,934.56, and $12,649 premium realized from the sale of a small number of shares of stock unallotted at the time of amalgamation, made the sum of $621,789.50 at the disposal of the directors, which has been applied as follows:—

Two half-yearly dividends of three per cent. each on the capital stock	$357,081 00
Written off office premises	20,000 00
Transferred to reserve fund	200,000 00
Balance carried forward at credit of profit and loss	44,708 50
	$621,789 50

All of which is respectfully submitted.

W. H. Beatty, President.

Toronto, January 22nd, 1906.

GENERAL STATEMENT.

Liabilities.

Liabilities to the Public:—			
Deposits and accrued interest		$3,443,333 68	
Debentures—Sterling—and accrued interest (£1,859,257 2s. 5d.)		9,048,384 63	
Debentures—Currency—and accrued interest		3,860,734 37	
Debenture stock and accrued interest (£91,800)		446,760 00	
Sundry accounts		18,588 97	$16,817,801 65
Liabilities to Shareholders:—			
Capital stock		$6,000,000 00	
Reserve fund	$2,200,000 00		
Balance carried forward at credit of profit and loss	44,708 50	2,244,708 50	
Dividend No. 12	$ 178,540 50		
Dividends unclaimed	63 90	178,604 40	8,423,312 90
			$25,241,114 55

Assets.

Mortgages on real estate	$22,473,550 89	
Advances on bonds and stocks	1,506,184 47	$23,979,735 36
Municipal debentures		434,909 49
Real estate acquired by deed or foreclosure		600 00
Office premises (Toronto, Winnipeg, Saint John and Regina)		372,993 19
Cash on hand and in banks		452,876 51
		$25,241,114 55

R. S. Hudson,
John Massey,
Joint General Managers.

We beg to report that we have made an audit of the accounts, and examined the vouchers and securities of the Canada Permanent Mortgage Corporation for the year 1905. We certify the accompanying statement is a true exhibit of the corporation's affairs as shown by the books as at 31st December, 1905.

A. E. Osler, A.C.A.,
Henry Barber, F.S.A.A. (Eng.)
Auditors.

Toronto, January 17th, 1906.

The president, Mr. W. H. Beatty, then addressed the meeting as follows:—

Ladies and Gentlemen;—It is my privilege for the first time to move the adoption of the directors' report and statement of the business of the Canada Permanent Mortgage Corporation, and I do so for the year 1905 with great satisfaction.

You will probably remember that the managing-director at the last annual meeting stated that it had never been his privilege to present a cleaner or more satisfactory balance sheet than the one that was submitted on that day. I can with confidence say to you that the statement presented this day is even a better one than that submitted one year ago.

If you will compare the statement submitted to the shareholders one year ago with the one now presented you will find that our total assets have increased from $25,122,957.71 to $25,241,114.55. Our mortgages on real estate have increased from $21,554,624.32 to $22,473,550.89, showing that there has been considerable activity in the company's business. The demand for money has been good and I may say at better rates of interest in the older districts than prevailed for some time past.

While that is the case at present, the fact should not be lost sight of that in the older provinces we have in the past had to face a gradually reducing rate of interest and we shall, no doubt, find a similar tendency in the Western Provinces at no distant date, though it may be held in check for a time by the extraordinary development taking place, the opening up to settlement of new districts by the numerous railways under construction, and about to be constructed, and the large amount of capital required in connection therewith. When those reductions take place we do not always find that they are accompanied by a compensating reduction in the rate we have to pay for the money we borrow.

The confidence of the investing public both here and in Great Britain in the security afforded by this corporation has been shown in a marked degree. Notwithstanding the difficulty during the past year experienced by some in placing on the British market bonds and other securities, the debentures of this corporation that matured during the year were largely renewed, and those that were not renewed were more than replaced by new money. It would be difficult to give too much credit to our valued representatives in Scotland who have, as heretofore, managed their share of the business during the past year with great ability. The Canadian public have shown their usual confidence in the corporation by increasing their investments with us to the extent of $801,696.79 during the past year.

In preparing the statement of the net results of the business for 1905 the assets of the corporation have been examined very carefully and dealt with in an exceedingly conservative manner.

As you will see by the statement the net earnings for the year, after providing for the cost of borrowed money, all charges and expenses, were $545,205.94. This sum, in addition to the unappropriated profits of 1904, and the premium realized from the sale of unallotted stock at the time of amalgamation, enabled the directors to declare two half-yearly dividends of 3 per cent. each, to reduce the estimated value of the company's building here by $20,000, to add $200,000 to the reserve fund, and still leave the sum of $44,708.50 at the credit of profit and loss.

A thorough examination of the individual accounts of each of the branches has been made during the past year by a competent officer, and detailed reports furnished to the management, thus placing us in close touch with the details of the business of the corporation at all points. I am happy to inform you that the total properties on hand at all branches at the end of 1905 amounted to less than $17,000, only one of which is in the Province of Ontario, and that offers have been accepted during the past month for about one-half of the aforesaid amount.

This report concerns us as Canadians as well as shareholders, for it must be remembered that the greater part of the twenty-five millions we have invested has been lent to Canadian farmers, who are now probably in a more independent position than ever before in the history of our country. Never before have they paid interest and principal so satisfactorily, and never has there been less in arrears. Canada Permanent prosperity is, therefore, a synonym for Canadian prosperity.

Two principles of action guide our operations. Carefulness in making investments, and watchfulness in securing gradual reductions in individual indebtedness.

The difficulty in securing a suitable office in St. John, N.B., necessitated the purchase of two properties there to provide the necessary accommodation. Part of one of these properties not needed for our purposes, will be disposed of at the earliest opportunity. The building there has been remodelled, and will be fully completed and ready for occupation in a very short time, when we shall have one of the most desirable locations in that city, with an office admirably adapted to our business.

During the year another branch office has been opened at Regina in order to be in closer contact with the business in the new Province of Saskatchewan, where the expansion has been rapid and where it is most likely to be in the future more rapid proportionately than at any other of our branches. Here also we have purchased a lot with the view of erecting a building suitable for our own purposes. Owing to the opening of this new branch during the year many changes in the different staffs were necessitated. Officers and their families had to be transferred from St. John, N.B., to Regina, from British Columbia to Regina, from Winnipeg to Regina, from Toronto to Winnipeg, and Toronto to St. John, entailing considerable additional and unusual expense. In addition to this a considerable sum was expended on the company's building in Winnipeg, in absolutely necessary improvements, which has facilitated the work of the office, all of which expenses have been taken out of the year's earnings.

It is with the deepest regret that I am obliged to refer to the unexpected death of the late Mr. George Gooderham, our first president, the loss of whom is not only a marked one to the board, but a deep-felt personal loss to myself. My long and intimate association with him had taught me to very highly appreciate his excellent qualities, both of head and heart.

It is also with regret that I have to inform you that the first vice-president and managing-director, Mr. J. Herbert Mason, has chosen a well-earned retirement from the active management of the corporation. His long and brilliant career as a loan company manager will ever remain as an incentive to those who follow.

We are fortunate in having two such men as Mr. R. S. Hudson and Mr. John Massey, to take up the reins of government. They, with their long experience in this business, are eminently fitted for the position entrusted to them by the directors as joint general managers.

Without taking up any more of your time I beg leave to move, seconded by the first-president, Mr. W. G. Gooderham, that the report of the directors for 1905 be received and adopted, and together with the general statement be printed, and a copy sent to each shareholder.

The president's motion for the adoption of the directors' report was seconded by Mr. W. G. Gooderham, the first vice-president, and was unanimously carried.

The election of directors was held and resulted in the reelection of Messrs. W. H. Beatty, J. Herbert Mason, W. G. Gooderham, W. D. Matthews, Ralph K. Burgess, George F. Galt, Winnipeg; George W. Monk, S. Nordheimer, R. T. Riley, Winnipeg; J. M. Robinson, St. John, N.B., and Frederick Wyld.

At a subsequent meeting of the board, these officers were re-elected: President, W. H. Beatty; chairman of the board, J. Herbert Mason; first vice-president, W. G. Gooderham; second vice-president, W. D. Matthews.

* * *

THE CROWN BANK OF CANADA.

The annual meeting of shareholders of the Crown Bank of Canada was held at the head office of the bank, 34 King Street West, at noon on Friday, February 2nd, 1906. The chair was occupied by Mr. Edward Gurney, the president of the bank, and among the shareholders present were: Edward Gurney, Chas. Adams, R. N. Gooch, R. Y. Ellis, R. Short, Frank Arnoldi, K.C., John L. Coffee, J. W. P. Foster, J. Hardy, L. E. Cannon, R. A. Nisbet, A. Willis, John Patton, F. J. Lightbourn, J. H. Woods, Dr. Alex. Davidson, Emil C. Boeckh, W. Stewart, C. Gurney, J. R. Hoidge, of Toronto; Chas. Magee, and C. H. Pinhey, Ottawa; John M. Gill, Brockville; John C. Read, Keene; John White, Woodstock; Thos. D. Beddoe, Chicago; Montague A. A. Smith, Forest; Dr. W. C. B. Boyd, Coldwater; Dr. Wm. Kennedy and H. W. Ansley, Port Dover; James Wilson, Thorold; A. G. Peters, London; Frank Heugill, Humber, and others.

The report of the directors, as presented by the president, was as follows:—

Report.

The directors beg to submit to the shareholders the result of the business of the bank for the period ending the 30th December, 1905, with a statement of its affairs as at the same date.

The bank opened its doors for business in Toronto and Ottawa on the 1st of June, 1904, but, owing to structural changes which were being made in the premises provided for occupation, actual business relations with the public were interfered with, and the business of the bank may be said to have commenced practically about the middle of August, 1904, and the period covered by the return now presented, while nominally nineteen months, is only, say, sixteen months.

We wish also to remind the shareholders that, while the business of the bank was commenced on the date mentioned, the capital at its disposal was something under $350,000, and gradually increased to the present figures, the average capital for the period being $620,000.

Branches of the bank have been opened at the following points, viz.:—

Aylmer, Que.
Bracebridge, Ont.
Brockville, Ont.
Burford, Ont.
Comber, Ont.
Enterprise, Ont.
Kingston, Ont.
Odessa, Ont.
Ottawa, Ont. (Sparks St.)
Ottawa, Ont. (Rideau St.)
Port Dover, Ont.
Seeley's Bay, Ont.
Toronto, Ont.
Toronto, Ont. (Agnes St.)
Woodstock, Ont.
Woodbridge, Ont.

It is with sincere regret that the directors have to record the death of their late colleague, Mr. Alexander Lumsden, which occurred during the month of September, 1904.

Although only a short time a member of the board, Mr. Lumsden assisted very materially in promoting the interests of the institution, and we feel that the bank has lost one who, by reason of his recognized ability, would have proved of very great assistance in the development of the business.

EDWARD GURNEY, President.

The financial statement presented was as follows:—

Profit and Loss Account.

Profits to 30th December, 1905, after deducting interest on deposits to date and charges of management ....$	33,198 60	
Premium 10 per cent. on capital paid in	71,275 00	
		$ 104,473 60
Which has been applied as follows:—

G. DE C. O'GRADY,
General Manager.

President's Address.

In presenting the report of the directors the president spoke as follows:—

When last I had the pleasure of meeting the shareholders, we had very little to report beyond the bare fact of having completed the initial acts of organization.

We had in hand some $300,000, and had preparation made

for the opening of our head office and the Toronto branch. The directors had to determine a policy regarding the extent of the operations of the bank, and the initiation and establishment of an entire staff.

It will not be difficult for you to appreciate the time and labor that this entailed, but you cannot know how cheerfully this time and attention has been given, and that without remuneration, the directors having determined that no fees should be paid to directors in advance of the payment of a dividend to the shareholders.

The question of the extent of the bank's operations through agencies was given early consideration, and a policy determined, under which the agencies named in the directors' report have been established.

You will readily appreciate that your directors understood that, under the most favorable circumstances, between the time of the location of an agency and the profitable operation of that agency, a considerable time must elapse, but it was thought better, in the ultimate result, to take a strong initiative, and it gives me great pleasure to announce that the course pursued has been justified by the results, as nearly all the agencies are already on a paying basis, the exceptions being those established within the last few months, and of these we have every reason to be satisfied that they will not be exceptional in this regard.

It also gives me pleasure to report to you that the bank as a whole has reached a paying basis, from which it may be indicated that at an early date the shareholders may expect a dividend.

Great care has been exercised in the selection of our staff, which is made up of men of good character, and ability, who have shown by their industry and attention a keen interest in the success of the institution.

Our stockholders, numbering over 600, are well spread, many of them being at or near some branch, so that we are able to depend upon their co-operation for the advancement of the interests of the bank.

In connection with this subject, I may mention that we have had several offers for the balance of the stock "en bloc," which have been declined, for the reason that the directors preferred that the stock should be held by small investors and not be in the hands of large holders, it being considered inexpedient that so large a power should be exercised by any one individual or syndicate in the dictation of the policy of the bank.

The directors have from the first favored the idea of keeping the assets of the bank as largely as possible in liquid form, and have, therefore, determined not to be owners of real estate to an extent beyond what may be absolutely necessary.

The head office has been inspected by the directors as well as by the Inspector, and besides the regular inspection of the branches by the inspector, most of the agencies have been visited by the general manager, or by a director.

One of the officers, a man hitherto of good reputation and experience as a banker, took from the bank the sum of $40,350.33, $20,000 of which was in unsigned notes, payment of which was stopped by telegraphic advice to every Canadian bank.

Of the above-mentioned sum $18,990, besides the unsigned notes, has been secured by the detectives and one of the officers of the bank, who followed the defaulter's devious route to the Island of Jamaica. The small balance will be fully covered by the guarantee bond.

The balance sheet fully illustrates the condition of the bank, and besides congratulating you on the progress made, I think I may say that the indications of a successful and profitable business are quite promising.

On motion of Mr. Emil C. Boeckh, seconded by Mr. J. W. P. Foster, a vote of thanks was passed to the directors of the bank for their constant and efficient services. A vote of thanks was also passed to the staff of the bank.

The election of directors for the ensuing year resulted as follows: Edward Gurney, Toronto; Charles Magee, Ottawa; John M. Gill, Brockville; Charles Adams, Toronto; John White, Woodstock; R. Y. Ellis, Toronto; J. L. Coffee, Toronto; Lieut.-Col. J. H. Burland, Montreal; Edward Tilden, Chicago.

At a subsequent meeting of the directors of the bank, Mr. Edward Gurney was elected president, and Mr. Charles Magee, vice-president of the bank.

G. de C. O'Grady,
General Manager.

* * *

—Mr. J. Owen James, an English mining engineer, who has been on an extended tour in Nova Scotia investigating mining conditions in that province, is impressed with their possibilities to such an extent that he has induced English capitalists to become interested. He believes that, at depth, several of the mines will be found to contain high values. It may be mentioned that a year or two years ago the provincial legislature passed an act providing payment for half the cost of sinking a shaft to a depth of 2,000 feet. It is believed that Mr. James' project will be the means of drawing a large amount of interest to the mining possibilities of our lower provinces.

UNION BANK OF HALIFAX.

The paragraph about Halifax affairs in our last issue gave but a brief recognition of several interesting features about the Union Bank of Halifax. It mentioned the increase of dividend by that bank to the yearly rate of eight per cent. and its purchase of further real estate for the purpose of extension. Later we received a copy of the "Echo," which gives a cut of the substantial stone premises, corner Prince Street and Bedford Row, just acquired by the bank, which will make a desirable addition to the present head office next door. The present writer first saw Halifax forty years ago, at which time the Union Bank was a modest concern about ten years old. This institution has just celebrated its jubilee, and between 1890 and the present day the price of its stock has advanced from par to 173, not by leaps and bounds but as a consequence of judicious enterprise and prudent management. It is interesting to recall the terms of the original circular issued on June 12th, 1856, when the bank began its career. This was as follows:

"At a meeting of the shareholders of the Union Bank of Halifax held at Mason Hall on Saturday, June 7th, it was resolved: That a committee of five individuals to be denominated trustees, should be appointed to receive from the shareholders the first installment of twenty per cent. required by the Act of Incorporation to be paid on or before the first of July next, when the following named persons were chosen trustees: John Duffus, John Tobin, Edward Kenny, John Gibson, William Stairs."

Shareholders were "respectfully requested" to pay on July 1st, the first installment of five pounds per share. The name signed to the circular as chairman is that of Wm. Stairs, father of the present Hon. Wm. Stairs, and the five signatories were among the grand old men of Halifax commerce and finance.

ANSWERS TO ENQUIRERS.

J. A. B., Marmora.—The headquarters of the company mentioned are in London, Ont. Have written you.

S. S., Halifax.—Received too late for that issue.

"Questioner" asks:—"Would you enlighten me through your paper what is done with the 'Rest' of banks; is it invested or where is it? Also, what is done with the surplus of government money?" We reply that there is no obligation upon banks to invest their rest or reserve fund in any particular way. It is simply a part of their accumulated surplus and belongs to the proprietors, to be used as they think fit. It forms a part of the general assets. As to the second of his queries, suppose "Questioner" asks the government.

H. W. M., Montreal.—The bank is going on, and has some $250,000 capital subscribed. It cannot fully organize, however, until Parliament meets, for it has to get the name in its charter changed from the Pacific Bank to the United Empire Bank. The name of the general manager is George F. Reid; the provisional directors are Samuel Barker, M.P., Hamilton, George A. Clare, M.P., Preston, E. E. A. DuVernet, Reverend T. C. Street Macklem, M. McLaughlin and William J. Smith, Toronto.

Union Bank of Halifax.

NOTICE is hereby given that a dividend of four per cent. upon the capital stock of this Bank has been declared for the current half year, and that the same will be payable at the banking room, on and after **Wednesday the 28th day of February next.**

The transfer books will be closed from the 14th to the 28th of February, both days inclusive.

NOTICE is also hereby given that the annual general meeting of the shareholders of the Union Bank of Halifax for the choice of directors, and other business, will be held at their banking house, at 11 o'clock in the forenoon on **Wednesday, the 14th day of March next,** being the second Wednesday of the month.

By order of the Board,

E. L. THORNE,
General Manager.

Halifax, N. S., 27th January, 1906.

UNION MUTUAL LIFE INSURANCE COMPANY.

At the meeting in Portland on the last day but one of January was submitted the fifty-sixth annual report of that old and sound concern, the Union Mutual Life Insurance Company, of Portland, Maine. The president of the company, Mr. Fred. E. Richards, was in the chair, and between forty and fifty policy-holders were present. Very satisfactory progress on the part of the company for the year and for the past dozen years was made clear from the facts and statistics brought forth. For example, the new insurance written in 1905 was represented by 7,207 policies covering $9,713,736, a gain of $629,000 insurance over 1904. Then as to the aggregate insurance in force, it has gone steadily up year by year from $35,914,000 in 1893 to $64,163,000 in 1905. The amount in force in the State of Maine alone is $11,503,000—a remarkable growth from the $2,778,000 of 1893 and the $8,268,000 of 1900. The growth of assets and of surplus has also been steady. A dozen years ago the assets were $6,453,309, and now they are $12,056,991. Payments to policy-holders were last year more than a million, and the company's surplus was in last December $708,441, as compared with $632,949 twelve months before, and $229,292 twelve years before. It is deserving of remark that the reserve of this company is calculated upon a basis of 4 per cent. on business written before January 1st, 1901, and 3 per cent. on business written after that date, being on a more conservative basis than is required by the laws of any state.

It is to the credit of this long-established and carefully-managed company that its former president strongly advocated the Maine Non-forfeiture Law, now in force a good many years. During the year last past, we are told, nineteen death claims were paid upon policies that had been kept valid wholly by the terms of this law, while since the statute has been in force 539 death claims have been paid under its provisions, the total amount of insurance being $1,058,162. The assets of the company consist of $2,383,000 in real estate and mortgages on real estate, $5,419,000 in railway and other corporation bonds and stocks, government and commonwealth

bonds $342,000, various Canadian securities in Quebec, Ontario, New Brunswick and Manitoba $516,343, collateral loans, bank stock, and various cash items. Indeed, the list is a very good one. The report concludes with some sentiments well worthy of quotation:

"It is in the good which life insurance accomplishes that its most important mission lies, that its real reason for existence appears, and in no better way is this comprehensively expressed than by the large total of payments to policyholders during the fifty-six years that the Union Mutual has been doing business, this sum, with the ending of 1905, aggregating $37,861,527.49. Futile indeed would it be to pretend to state in any other form what life insurance is continually doing for the upliftment of the troubled, the relief of those who might otherwise be needy, yet these very aids which are so varied in operation, so widespread in benefit, so helpful in result as to be beyond enumeration, constitute the underlying cause for the deep-founded popularity of life insurance."

* * *

GIVING BONDS.

There is an old saying that if one wishes to make an enemy of one's friend the quickest way to reach that result is to loan him money. This is often the truth. There is an equal truth, and one that reaches still deeper, in the habit some men have of asking friends to go on their bonds for the faithful discharge of their duties and their continued integrity. There was a time when the only way in which men could give bonds was by securing the assistance of their friends; but there no longer exists the least occasion for asking favors of this sort or of granting them.

The friend who asks you to go on his bond takes a mean advantage of your friendship. He knows that you will not investigate his character; or, if it will bear investigation, you are put in an awkward and embarrassing position if you refuse his request. He knows that your refusal to aid him may be construed as a lack of confidence in his integrity, however earnestly you may profess unbounded confidence in both his honesty and ability.

In no case is it wise to obligate one's self by giving bonds. It is far safer to advance the money necessary to secure the guarantee of a regular surety company, thus knowing the exact liability incurred and having it off one's mind. The guarantee companies are in the business of verifying character. They have excellent facilities for locating weak spots in their prospective clients, and their willingness to say that a man will be honest for a term of years, or else they will forfeit so many dollars and cents, immediately eliminates every element of friendship or sentiment, and puts the whole transaction on a cold, calculating business basis.

The growth of surety companies shows the great confidence the public has in them. Seldom indeed do they fail to pay for misplaced confidence and unsuspected rascality in the hard, metallic coin of the realm; and God help the rascal who has proved himself to be a thief. Thus these companies serve a double need. They make whole the employer, public or private, and they put the dishonest employee where he will have time to reflect and repent.—The Adjuster.

TRADE NOTES.

A persistent and vigorous effort is being made in Winnipeg to create more interest in poultry culture. It is realized that immense quantities of poultry and eggs are imported into Winnipeg, perhaps $75,000 to $100,000 annually. At the same time there are thousands of acres of land suited to the production of large flocks of poultry close to Winnipeg, lying idle and vacant; an equally large number of people are ready and willing to occupy these lands for poultry production, providing a reasonable chance of success is assured. To demonstrate the latter the Winnipeg Poultry Association has entered into an active campaign of instruction in poultry culture and intends holding an annual poultry exhibition in the city, the main features of which will be the "utility" breeds of poultry, prizes will be given for dressed poultry and winter laid eggs. Lectures will be given and illustrated, upon all phases of poultry work. In fact, nothing will be left undone to make poultry raising as a profession attractive.

In Belfast and in several markets of the United States advances of 5 to 7½ per cent. have been lately made in both housekeeping and dress fabrics made of linen. There has been also considerable delay in deliveries. A New York report says that the greatest shortage will undoubtedly be found on linen dress goods. Dress linens will undoubtedly prove to be a very large factor in the spring and early summer seasons' business. Orders already booked for retail account are larger, it is stated, than at any time in the history of the trade. The most exclusive costumers and dress-

CAMPBELLFORD BOARD OF TRADE.

The annual meeting of the Campbellford Board of Trade was held on Monday evening, January 29th. The meeting was largely attended and great interest was shown by the members. The board has practically succeeded in its movement started a year ago for incorporation of the village as a town.

A review of the work of the board for the past year was given, the routine business transacted, new members admitted, and finally the officers for the year were elected.

Th election of officers resulted as follows: President, E. C. West; vice-president, J. A. Stewart; treasurer, W. B. Archer; secretary, H. F. Skey; council, C. L. Owen, A. A. Mulholland, F. J. Golden, J. A. Reesor, A. B. Colville, Dr. J. Macoun, J. C. Fowlds, R. Lowry, D. J. Lynch, Dr. F. H. Scherk, J. B. Ferris.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

makers, both in New York and in Paris, have adopted linens as a basis for many of their costumes and creations. Many of the exclusive dressmaking establishments of New York report that they have had a very large demand for linen gowns, shirtwaist suits, separate skirts and waists from their customers who are now at the various winter resorts throughout the country.

Sir Alfred Jones, president of the British Cotton Growing Association, recently sent to the Prince and Princess of Wales two boxes of handkerchiefs made from cotton grown in the Barbadoes and St. Vincent, from Sea Island seed. The goods, though not mercerized, are said to have every appearance of silk, owing to the gloss of the raw cotton. A report of the Association states that, although it is not desirable that the market should be overdone with cotton of this quality, there is now not the slightest doubt that, should a scarcity arise, or should there be any mishap to the American crop, the West Indies can be depended on to produce all required of the better qualities of cotton. Out of the total crop no less than 1,746 bales of a value of over £28,000 have passed through the association's hands this last season, and the planters are satisfied with the price obtained. The prospects for the coming season are equally good, and there will probably be an increase in the area under cultivation of from 30 per cent. to 50 per cent.

Enquiries were made in January at the Canadian Government Office in London, (City trade branch) by a London maker of cravats, and cravat silk; also shirts, umbrellas and collars for an agent for the sale of their goods in Canada. An Irish firm making grey and dyed linens as used in the tailoring and drapery trades is prepared to appoint a resident Canadian agent. A Lancashire firm desires the addresses of Canadian makers of wheelbarrows, and a Copenhagen firm asks for the addresses of Canadian exporters of resin. At the Canadian Offices, Victoria Street, London, a Welsh firm seeking supplies of copper, silver, lead and antimony ores for re-smelting purposes enquired for addresses of Canadian mines and mine-owners. A North of England importer asked for reliable firms in Canada exporting fresh apples. A London firm makes enquiry concerning the trade to be done with Canada in steam motor waggons, stable fittings, staircases, fireproof doors and general ironwork, and a commercial bureau of Milan, Italy, offer assistance in placing Canadian business firms in communication with Italian exporters in various lines.

* * *

ENCOURAGE HOME INDUSTRIES.

The above is the title of an article in the latest issue of the Summerside, P. E. I., journal, which proceeds to cite Bridgetown, Nova Scotia, a place of, say, 1,000 inhabitants as an example to the first-named place, which has perhaps three times as many people, of enterprise in manufactures. Goods "made in Bridgetown" can be found, says the article, in every important market in Canada between the Atlantic and the Pacific, in Great Britain and Newfoundland, and even in the New England States, where canvassers are selling toilet racks and paper holders—two articles made by a firm in Bridgetown. During the year just closed over 75,000 pairs of Bridgetown larrigans were disposed of throughout Canada and Newfoundland; over 200,000 gallons of cider vinegar left the two factories there, a great deal of it going to Great Britain; from 26,000 to 30,000 barrels were sent to provincial ports, and over 400 cabinets were turned out by the Hicks factory every month. Stores of foundry castings, carriages and sleighs, bricks, liniment, are cited as further manufactures which enjoyed a profitable year.

Nor is Bridgetown the only town in Nova Scotia which has been made prosperous through the efforts of its citizens. There is Amherst, Lunenburg, Truro and other towns where industries have sprung into life as a result of the efforts of their citizens. "Now," says the "Journal," "we would like to see one or two citizens take it into their head to present the advantages of Summerside as a town for enterprises." And the writer complains of the "jealousy, selfishness and politics" which appear to be "the curse of communities in Prince Edward Island." Not every town or village is equally well situated, it must be remembered, for factories, and, therefore, industries are sometimes unwisely planted in the wrong place. Still, our contemporary deserves praise for trying to arouse the citizens of Summerside to the possibilities of that pretty town.

* * *

FAILURE STATISTICS.

We are indebted to Mr. Irving, the Toronto manager, for a copy of the pamphlet just issued by the Bradstreet Company for 1905, entitled "A Record—not a Prospectus." It gives comparative statistics for a series of years of the number of commercial failures in the United States and Canada and their causes, estimates of the amount of their liabilities and assets of failed traders and companies. Some of its statements and moralizings are condensed below:

"Of the 1,352,947 concerns in business in the United States in 1905, 9,967, or seventy-three hundredths of 1 per cent., failed owing their creditors. This is the smallest percentage of failures—or, in other words, it is the lowest commercial death-rate—of which there is record for more than a score of years past. This relatively small and apparently decreasing business mortality, in the face of the rapid yearly increase in the number in business and the presumably greater friction or competition engendered, is certainly evidence of very satisfactory trade conditions in the period under review, more than offsetting all the usual friction arising from normal business conditions.

"Apropos of the feature of yearly decreasing business mortality, it might reasonably be urged that these statistics have value as bearing upon the tradition that the larger portion of those who enter business fail. In showing, as they do, that the business death-rate in recent years has been less than 1 per cent. annually, and has never been over 1½ per cent. yearly, they, of course, absolutely discredit the correctness of the aforesaid tradition."

* * *

THE "WOLF'S" REPLY.

We have had a series of calls from Mr. Maunder, who is now manager of the People's Loan and Deposit Company, Montreal, and was formerly connected with the Sterling Home Buyers' Union, Toronto, which concerns were referred to in "The Monetary Times" of 19th January under the heading "A Wolf in Sheep's Clothing." He has told us a lot about these companies, and declares that neither the Dominion Co-operative Home Building Association, the Sterling Home Buyers' Union, nor the People's Loan & Deposit Co., of Ontario, into which they were merged, ever even received justice from the Registrar of Loan Companies, Ontario. He says that:

> "The co-operative concerns were partnerships which administered the affairs of a number of individuals, who, taking contracts with the concerns and with all others co-operatively, agreed to give to each other in accordance with a plan agreed upon, the use of their money to invest in real estate. No interest was charged, but the officers of the co-operative concerns were allowed a portion of the funds for administrative purposes."

Mr. Maunder objects to being branded as a rogue, when nothing of a fraudulent nature was found in the business of these concerns. As an explanation of lengthy articles appearing in Montreal journals on the subject, he states that they emanated from a discharged employee of one of the concerns, and were the result of private office information derived by this man while in a confidential position. He says, "the company stands ready to prove the absurdity of the charges on the first opportunity, . . . the truth in connection with these events has been grossly distorted and the companies cruelly maligned."

WILLIAM F. BULLEN, Manager.

London, Ontario, 1905.

The haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

Mercantile Summary.

The Fraser saw mill at New Westminster, B.C., which was destroyed by fire a few months ago, is to be re-built at once on an improved model.

The directors of the St. John Exhibition Association have decided on Labor Day, Monday, September 3rd, as the opening day for the exhibition this year. Mr. O. A. Skinner was elected president of the association.

A paragraph from Forest, near Strathroy, Ont., dated February 1st, says that the first maple sugar of the season was made on the farm of Duncan McIntyre, 14th concession of Bosanquet, in Lambton county, on January 29th. The quality was first class.

We are told that the Robb Engineering Company has received an order, through Mr. Martin J. Heller of San Francisco, for a 150 horse power tandem compound engine for the Nipissing Mining Company, of Cobalt, Ont. It might be interesting to learn how the order took so roundabout a course.

The growth in size of average cargoes of iron ore from Lake Superior mines to Lake Erie harbors of recent years is interesting. Figures of the Duluth, Missabe & Northern road for the past ten years, show the increase in annual average cargoes of ore loaded there to have been from 1,860 tons in 1895, to 3,803 tons in 1899; to 4,899 tons in 1902; 5,668 tons in 1903; and 6,101 tons last year. The big steel boats are showing what enormous cargoes they can carry.

R. E. T. Pringle & Co., Limited, are about to erect a large electrical factory in St. Henri (Montreal) at a cost of $30,000.

Work of construction is progressing rapidly on the Vancouver, Victoria and Eastern Railroad, and is expected to reach as far as Molson by June next.

At Charlottetown the chief justice of Prince Edward Island last week sentenced George Loder and Joseph McAleer, convicted of horse stealing, house breaking and larceny, to eight years in Dorchester penitentiary.

A census taken by the local Sunday School Association of Sydney, shows the population of that city to be about what it was generally estimated at, namely, between 12,000 and 15,000, the figures as given out by the committee being 13,168. This is an increase of 3,259 over the population as given by the Dominion census of 1901.

A young man named Holland, formerly accountant for the Ideal Bedding Co., of Parkdale, Toronto, was arrested on leaving the ship which had just brought him to Bristol. A shortage of $13,000 odd is said to have been discovered in his accounts. A despatch from Bristol, dated 3rd inst., stated that he had been remanded to the extradition courts in London.

Mr. D. F. Hamlink, of Goderich, is an extensive exporter of dried and evaporated apples and jelly stock. During the past season, which has not been too favorable for this business on account of the limited crop, he has exported, it is said, over 1,200 barrels of dried apples, netting 225 pounds to the barrel, and some 900 barrels of waste for making jelly.

At the annual meeting of the Grand Lodge of the Shipmasters' Association held in Buffalo last week, the following resolution was adopted: "Resolved, that owing to the numerous collisions with loss of life and property occurring in the St. Clair and Detroit rivers, we earnestly recommend that rules similar to those now in use on St. Mary's river be put in force and made obligatory on all vessels using the dredge channels of said waters."

The "Bulletin" speaks of a busy time among shipbuilders at Collingwood, Ont. It says that Mr. Robert Morrill has just closed contracts for four vessels within the past few weeks. Of the vessels one is a pleasure or tourist steamer, another is a freight steamer, a third is a harbor tug, and the fourth is a spoon-bow tow barge. The tourist steamer is for a mining company operating on Lake Nepigon. It will be constructed of wood, and will be 60 feet in length, twelve feet in width, with a moulded depth of six feet. The freight steamer is also for Lake Nepigon, and will be built to the order of Messrs. Revillon Bros., Limited, Edmonton, a large competitor of the Hudson's Bay Company throughout the West. This boat will be 75 feet in length, 15 feet in width, and 6 feet 6 inches deep.

On the 1st inst. fire broke out in the Shelton block at Ripley, Ont., and completely destroyed it and its contents. The total loss is estimated at $5,000, partially insured.

The Inland Empire Railway Company is said to be making arrangements for the building of an electric line from Spokane to Phoenix and into the Okanagan district.

The route of the proposed Georgian Bay and Seaboard Railway, one of the branches of the Canadian Pacific, will be from Peterborough to Victoria, near Midland, crossing the Grand Trunk three times.

We learn from Montreal that the National Chemical and Drug Company has now taken formal possession of the businesses included in the amalgamation. Mr. D. W. Bole, M.P., is the president of the company, with headquarters at Montreal, and W. J. Kerry the general sales manager.

The Polson Iron Works have provided themselves with new and larger offices, into which they have just removed. This new building is of brick construction. The interior fittings are especially neat, and the general arrangement of the offices is practical in the extreme. There is an abundance of light, and the cheery aspect as one enters the door is certainly worth while. The second floor of the building is occupied by the drafting department of the company. Practically all the interior wood work, counters, grill work, etc., has been done by their own employees.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO

Mercantile Summary.

At the annual meeting of the Canadian Transfer Company, Limited, Montreal, Col. F. C. Henshaw, Hugh Paton, Charles Cassils, George R. Starke, and Sir Montagu Allan were re-elected directors, and Mr. F. M. McRobie, manager and secretary.

A fire at Blairmore, Alta., on the 28th ult. destroyed Maron's general merchandise stock, valued at $8,000, on which the insurance was $3,700; Michel Ross' stock of dry goods worth $2,000, with insurance of $1,000; and D. C. Drain's hotel and contents, valued at $9,000, insured for $4,000. Had the wind been blowing hard, as it quite frequently does in this district, the whole town might easily have been destroyed, say the reports.

A bill in which Dr. Wm. Peterson, of McGill University, Montreal, Hon. F. Carter-Colton, of Vancouver, and others are interested, is being introduced before the British Columbia legislature, to incorporate the Royal Institution for the Advancement of Learning in British Columbia, and to permit of McGill establishing in Vancouver a university college. The plan the incorporators have in mind is said to include the four years' arts and science course, as it is conducted in the parent university in Montreal.

The Grand Trunk Pacific Branch Lines Company is asking the Dominion government for authority to build twenty-one or more branches. The application includes all parts of the Dominion from Halifax to Victoria and Dawson. There will be the branch north from Montreal and Ottawa to the main line, and a paralleling of the Ontario Government's railway from North Bay. In the West there will be branches both north and south. Power is also taken for building a branch from the Grand Trunk Pacific north-east of Fort William to a junction with the Grand Trunk Railway north of Toronto, with the right to pass through or reach by spur line Sault Ste. Marie or Sudbury, or both.

A man who came to Canada in 1860, and had lived an active business life in Montreal ever since, Mr. Edward Hunter Copland, died with comparative suddenness on Sunday last from a fall which caused internal injury. Mr. Copland was first connected with the shipping business, and afterwards entered the firm of Copland & McLaren, wholesale importers. Fifteen years later he established the firm of Copland & Co., carrying on a similar business, and with this firm he was actively connected until his death. Mr. Copland was a member of the Board of Trade, a governor of the Montreal General Hospital, a prominent member of St. Andrew's Society, and was on the board of the Commercial Travellers' Mutual Benefit Association. He was 65 years of age.

CORRESPONDENCE INVITED

54 King Street West, TORONTO

Mercantile Summary.

A project is on foot to build a joint waterworks system for the two cities of Niagara Falls, Ont., and Niagara Falls, N. Y.

Jos. Brunner, of Brussels, and other Belgian capitalists have purchased 50,000 acres of land in the Vermilion district between Edmonton and Battleford, and purpose colonizing it as rapidly as possible.

The Smith's Falls Foundry & Malleable Company, Limited, capital $100,000, has been incorporated for the purpose of manufacturing and selling stoves, ranges, furnaces, gasoline engines, radiators, etc. Adam Foster and Mr. Ryan of Smith's Falls, are charter members.

The Crown Mining Company, Limited, Leamington, Ont., with a capital of $1,000,000, has been granted by the Ontario government a charter empowering it to carry on a mining, milling and reducing company's business. F. S. Moss and J. H. Conover, of Leamington, are provisional directors.

Apparently even now the C. P. R. workshops at Maisonneuve, (Montreal) are not sufficiently large to keep abreast of the company's requirements. We note it has just placed an order with the Dominion Car Company for two hundred steel coal cars, to cost over $1,500,000. Each will have a capacity of 110,000 pounds, and will be used in the coal service on the Port Burwell Ashtabula route.

The Dominion Government has granted a charter to Darling Brothers, Limited, Montreal, whose authorized capital stock is $250,000, and who will take over as a going concern the property and assets and good-will of the Darling engineering and manufacturing business in Montreal and carry on the business of manufacturers and dealers in all kinds of articles made of iron, steel, or other metal; also to acquire hydraulic, electric or other power for the purpose of the company.

We understand that the Western Counties Electric Company has purchased the assets of the Brantford Electric and Operating Company, and is said to be looking for a twenty-five years' franchise in that city. The franchise of the latter company still has about three years to run. The promise has been made to put the whole service into first-class condition, with new street lamps, and an additional steam auxiliary plant installed to guard against interruption in the current. Besides this, should the franchise be granted, the company expects to bring transmitted power into Brantford as soon as possible, and to use it in conjunction with the present operating company's plant, a boon which it is believed would be greatly appreciated by all manufacturers and other power users. The proposition is to obtain power from the Cataract Company, of Hamilton.

Mercantile Summary

The Norfolk and Tillsonburg Telephone Association have decided to build a branch line from Glen Meyer to Kinglake. Later on perhaps it will extend the line to Langton.

The first vessel of the Bucknall Steamship Company, which has the contract for a direct service from Vancouver to New Zealand, is booked to leave New Zealand on April 1st next.

The town of Port Rowan points out that it is a spot admirably adapted to the location of varied industries. It has natural gas in quantity, a surrounding district full of good soil and good railroad facilities.

The Lake Shore Oil & Gas Company, Limited, has been incorporated, with an authorized capital of $1,000,000. The head office is at Brantford, Ont. Jos. Ruddy, of Brantford, and F. M. Lowry, of Pittsburgh, Pa., are named among the provisional directors. It proposes to construct and operate works for the production and distribution of electricity or natural gas for light, heat and power.

The recently incorporated Canada Starch Company held a meeting last week in Montreal for the purpose of completing its organization. The following officers were appointed: Geo. F. Benson, president and managing director; Wm. Strachan, first vice-president; Lloyd Harris, second vice-president; Joseph Ruddy, secretary-treasurer; and Hugh McArthur, assistant treasurer at Cardinal. Mr. Alfred P. Murray retains charge of the selling department in Montreal. It is understood that no radical changes will be made in terms, etc., but that the object of centralizing the management is simply to economize in the cost of production and distribution. The new company is said to have control over most of the best brands.

Port Arthur and Fort William

For information, location and prices, address

R. A. RUTTAN,

Box 195, Port Arthur, Ont. Canada.

The National Association of Marine Engineers held their annual convention last week in Levis, Que., and elected the following officers: Grand president, F. S. Hanning, Toronto; grand vice-president, J. C. Crepeau; grand secretary, Neil J. Morrison, Toronto.

It has been decided by the Ingersoll Board of Trade that the advantages that the town offers to manufacturers shall be advertised. The town council will be asked for an appropriation, and efforts will be made to keep Ingersoll to the front. A committee will arrange for an excursion to some industrial centre.

What is described as the largest contract for electrical apparatus placed in the Southern States for years is that recently closed by the Westinghouse Electric and Manufacturing Co. with the Southern Power Co. at Charlotte, N.C. It is for a large and complete power equipment, consisting of eight 3,000 kw. water wheel type alternators, with a complement of transformers, exciters and switchboards.

Something never known before was done last week on Georgian Bay. A tug left Wiarton (encouraged by the spring-like weather) on Thursday with some twenty-five tons of freight, which had accumulated for what are termed "northern points." On Friday she reached Lion's Head, thirty-five miles along Colpoy's Bay; unloaded and by Sunday night was back in Wiarton. But oh, what a difference! The thermometer was below zero, and the boat had to break her way through four inches of ice to her wharf.

The booklet issued lately by the Canadian Bank of Commerce, which contains the 1905 report and a list of shareholders, contains also two maps, on which, by red marks, are indicated the places—or the principal ones—where the bank has branches. These are located all over Canada, from the Yukon to Sydney, Cape Breton. There are fifteen in British Columbia, thirty-six in the North-West Provinces, forty-four in Ontario and Quebec, and sixteen in the Maritime Provinces, 133 in all. Outside of these are the British and United States agencies.

The shareholders of the Empire Trust Company, a new trust company, promoted in Sherbrooke, and incorporated under charter from the Quebec Legislature, met on February 1st. The company have now organized for active business. The following officers and directors were elected: President, S. H. C. Miner, of Granby; vice-president, James Mackinnon, Sherbrooke. Directors—W. H. Robinson, Granby; Gardner Stevens, Waterloo; A. C. Flumerfelt, of Victoria, B.C., and William Farwell, J. S. Mitchell, Dr. Austin, William Morris, of Sherbrooke. The "Gazette" says that Mr. M. A. Macfarlane is at present acting secretary, and Mr. E. L. Stuart Patterson acting manager of the company.

WESTERN SLANG.

It is a good while since what he called a "gossiping glossary" was appended by Tom Hood the younger to the pocket edition of Bret Harte's short stories, which he edited for the British public. In this glossary he explained the meaning and origin of expressions used in such stories of the Pacific Slope as "The Outcasts of Poker Flat," or "The Iliad of Sandy Bar." These expressions were peculiar to the Californian settlers of long ago; sometimes arising from the slang of the mining camp, sometimes derived from the Spanish or French languages, or even from the Indian; occasionally, too, from the patois of the Canadian *coureurs de bois*.

It might be not an unwelcome thing if some British Columbian should devote his spare time to compiling a list of slang phrases used in the mining camps of that province, giving at the same time their translation, for slang has its development in different localities, and there is recent as well as old slang. The racy and picturesque language used by some of our Western journals, for example, especially in the Kootenay country, may be intelligible to the local reader. But when it gets as far East as Ontario and Quebec the "tenderfoot" reader needs an interpreter. Newspaper reporters and even editors out there get into using this slang and thereby puzzle their confreres in other provinces.

A particularly breezy issue of one of our British Columbia exchanges, the "Golden Star," of Golden, in the east of the province, caught the attention of the editor of the Monetary Times the other evening when a score or two of western newspapers were put into his Saturday bundle of light reading (warranted to contain no eye-trying statistics or brain-twisting economic problems.) And it will do no harm, beyond possibly furnishing novel epithets or expletives for Ontario polemic writers, to introduce our readers to some of the phrases used so freely by this journal of a mining camp. Not far from Golden there exists an opposition paper called "The Outcrop"—the name being itself a mining term—and the "Star" man in the course of three columns of paragraphs, local and otherwise, makes repeated reference to it, and to other journals in a way we feel tempted to quote. For instance: "The insane thinker of the newsless Outcrop says that the Star libels such gentlemen as so-and-so. * * * How long will the people of Golden stand for his spleen? When the Outcrop freak penned the above he knew he was telling a falsehood and the truth wasn't in his upper stope." Stope means a passage in the rock from which the ore has been extracted. Again this scintillator from Golden refers to his neighboring *bete noir* as "The ass who writes the crap for the Wilmer Outcrop"—*crap* being a word used in the West to de-

TOWN OF COLLINGWOOD
DEBENTURES.

Tenders are invited for the purchase of the following debentures:

1. Eight thousand, three hundred dollars ($8,300) Consolidated, Debenture Act 1899 and amendments thereto, interest calculated at 4½% repayable in thirty equal annual instalments of five hundred and nine dollars and fifty-five cents ($509.55) each, comprising principal and interest, payable on Dec. 1st each year, first payment Dec. 1st, 1906.

2. Eight thousand dollars ($8,000) Consolidated, Debenture Act 1899 and amendments thereto, interest calculated at 4½%, repayable in thirty equal annual instalments of four hundred and ninety-one dollars and thirteen cents ($491.13) each, comprising principal and interest, payable Dec. 1st each year, first payment Dec. 1st, 1907.

3. Six thousand dollars ($6,000) Good Roads Debentures, Schedule "B," interest calculated at 4½%, repayable in twenty equal annual instalments of four hundred and sixty-one dollars and twenty-six cents ($461.26) each, comprising principal and interest, on Dec. 1st each year, first payment Dec. 1st, 1905.

4. Six thousand Dollars ($6,000) Good Roads Debentures, Schedule "C," interest calculated at 4½%; repayable in twenty equal annual instalments of four hundred and sixty-one dollars and twenty-six cents ($461.26) each, comprising principal and interest, on Dec. 1st each year, first payment Dec. 1st, 1906.

5. Local Improvement, three thousand, two hundred and fifty dollars ($3,250), interest calculated at 4½%, repayable in twenty equal annual instalments of two hundred and forty-nine dollars and eighty-five cents ($249.85) each, comprising principal and interest, on Dec. 1st in each year, first payment Dec. 1st, 1906.

6. One thousand two hundred and fifty dollars ($1,250) Local Improvement Debentures, interest calculated at 4½%, repayable in twenty equal annual instalments of ninety-six dollars and ten cents ($96.10) each, comprising principal and interest, Dec. 1st each year. first payment Dec. 1st, 1905.

The above Debentures are guaranteed by the County of Simcoe.

Tenders to be given for each separate parcel. Successful tenderer to pay at par in Collingwood and the cost of forwarding debentures. Tenders to be addressed to the undersigned not later than February 20th, 1906.

The lowest or any tender not necessarily accepted.

G. E. McLEAN,
Chairman Finance Committee.

scribe product of the field or rock. And in other paragraphs opinion is expressed of the same man as a "falsifier," "a skunk editor," a "mental light-weight," and of the paper as a "disreputable sheet," and "an alleged newspaper." Once in a while the Wilmer man gets back at his neighbor with a local phrase intended to be cutting. For example he says: "The Star's hot-air pencil-pusher ought to blow in a smelter or two." A later paragraph of 20th January is from the "Sandon Mining Standard," which announces that "Dr. Gomm is the possessor of a unique mineral specimen. It is a pre-historic cephalopod fossilized. We do not know what it is but it must be a rare specimen."

Further specimens of the amenities of Western literature are to be found in such ascriptions of genius or the reverse as "that brainless writer," or "this wandering wind-jammer"—which last seems a particularly potent nick-name.

How much of the above scurrility is good-natured chaff and how much surly abuse, one does not know; but it is the kind of stuff that recent Wild West novels tell us has resulted in the use of bowie-knife and pistol. "When you call me *that*, smile!" said the Virginian to Trampas, in the novel, covering him at the same time with his revolver. And the term Trampas had used, when meant in ill-feeling was hardly more provocative of resentment than some of the language cited in the present paper.

* * *

TORONTO MARKETS.

Toronto, Feb. 7, 1906.

Drugs, Chemicals, etc.—Features in the local drug trade are very few, and prices keep just about steady. Opium and quinine are moving somewhat dully. Other staples are about the same as in last report. The following excerpt from a Manchester circular on chemicals sets forth conditions as they were on January 26th: The new year has opened well, with a good feeling all round. The elections have, of course, interfered with business, but still a good volume has been passing, and with a few exceptions values are fully maintained, and there is a general impression that present indications are all for a good year's trade. In the heavy alkali branch the position of affairs is satisfactory. Bleaching powder, caustic soda, and ammonia alkali are all moving well, and prices quite firm. Chlorates of potash and soda also are steady, but just now some small parcels from last year's contracts are obtainable from second-hands at slightly under the fixed prices. The exports during 1905 as compared with 1904 show in bleaching materials an increase of 7,963 tons, or £32,772, and in soda compounds an increase of 10,304 tons, or £85,247. In general chemicals there is a good business doing. Acetates of lime are by no means plentiful, and values are fully maintained.

Flour and Grain.—No change has been made in quotations of wheat since last report. The market is dull, with deliveries few and uncertain. For ninety per cent. patent flour the prevailing quotation for export is $3.15, in buyers' bags. Great firmness continues in millfeed. For most of the grains the feeling of this market is firm, though no great actual movement is taking place.

Hides and Skins.—It had been anticipated, owing to the decline and easiness of the market in Chicago, that a drop of prices was in order locally. So far, however, it has not come, though trade is on the dull side. Leather is dull, but prices remain as before.

Groceries.—Sugars are unchanged, the movement being normal. There is a good demand for canned vegetables, and they are moving out well. Reports from New York speak of Canadian tomatoes being sold in some quantity in the United States.

Live Stock.—This week the offerings of cattle at the markets were not over large, and everything was cleared up pretty quickly at firmish prices. Sheep and lambs were particularly in request. There was an active demand for butchers' animals, while for exporters prices were well maintained. Hogs were easier, and prices declined 25c. per cwt.

Hardware.—There is a seasonable activity in practically all lines. The prices of articles are firm and show no tendency in an opposite direction. The volume of business being transacted is fully up to expectations, and perhaps better. A report from England of ten days ago stated that during the first half of last month a good business was done in pig iron, and prices advanced a few pence per ton, but since then there has been some falling away, and values of Scotch and Cleveland iron are now lower by 6d. and 10½d. per ton respectively that at the beginning of the month. Latterly there has not been much business doing, but makers have plenty of orders for some time to come. Copper continued steady up to the middle of this month, and then lost £2 per ton, but has since rallied, and is now firm after recovering 27s. 6d. Tin improved strongly during the first fortnight, and after receding has advanced again and is now firm at £5 above the price at the beginning of January. Spelter has lost £1 per ton but is now steady. Lead, after losing some 15s. per ton, has recovered 7s. 6d. and is firm.

Provisions.—Butter is somewhat easier owing to increased receipts, but quotations have made no appreciable drop in the last two or three days. Cheese is fairly firm, but a report from Liverpool just to hand says there has been rather more demand, but here and there some holders have been willing to meet buyers a little and values are 6d. to 1s. per cwt. easier on the week. Medium grades continue very scarce, and sell readily on arrival.

Eggs are firmer owing to more seasonable weather. On the whole, however, this has been a poor season for dealers, the extremely mild weather having thrown out all their calculations regarding the demand for stored stock. Smoked meats are firm, stocks being on the light side.

Seeds.—Not much movement in seeds has gone on this week, perhaps owing to the cold snap. Some think there may shortly be a decline in prices and this induces dealers to go slowly.

ANGLO-AMERICAN FIRE INSURANCE CO.

REPORT OF DIRECTORS

Presented at the Seventh Annual Meeting of Shareholders, held at the Head Office of the Company, 61-65 Adelaide St. East, Toronto, on Tuesday the Sixth day of February, 1906.

Your directors have pleasure in presenting their seventh annual report and financial statement of the company's business for the year ending 31st December, 1905, as duly certified by the auditors.

The premiums for the year ending 31st December, 1905, less rebates for cancellations	$414,095 61
Interest on the company's investments	7,854 37
Total income	$421,949 98

The company's net income for the year after deducting re-insurance, was $287,766.92.

Net premiums on policies written during 1905, being in excess of same for 1904, $19,665.23.

The working expenses of the business for year 1905 were $88,211.62, being $16,250.40 less than for preceding year.

The apparently large amount of unadjusted losses outstanding at 31st December, viz., $28,260, (of which $10,247.13 is re-insured), is accounted for by the fact that these losses occurred at the end of the year, too late to admit of their being adjusted and paid before the closing of the company's books. The majority of these are, however, now adjusted and paid.

Your directors in the interest of the shareholders deemed a change in the management of the company to be necessary, and have been fortunate in securing the services of Mr. H. H. Beck, a gentleman of the highest standing in insurance and financial circles.

Your directors all retire, but are all eligible for re-election.

JOHN FLETT, Vice-President

Financial Statement for the Year Ending 31st December, 1905.

H. H. BECK, Manager.

To the president, directors and shareholders of the Anglo-American Fire Insurance Company:—

Gentlemen,—We, the undersigned, having examined the vouchers, checked the bank balances and made a monthly running audit of the books of the Anglo-American Fire Insurance Company for the year ending 31st December, 1905, certify that we have found them correct, and that the annexed balance sheet is a true statement as at above date.

RICHARD LEE,
J. P. LANGLEY,
Auditors.

Toronto, January 24th, 1906.

MONTREAL MARKETS.

Montreal, 7th Feb., 1906.

Ashes.—In the absence of any transactions of consequence values tend to easiness, and $5.20 would be about the present outside figure for No. 1 pots; seconds, about $4.70. Pearls are variously quoted from $6.50 to $7 per cental.

Dairy Products.—The cheese market continues to rule very dull as far as movement is concerned, but holders of choice Western stock are firm in their quotations at 13 to 13¼c. The colder weather has had something of a steadying effect on the butter market, and, though offerings of roll butter are more liberal quotations are fairly firm at 22 to 22½c. for choice creamery; undergrades, 21½ to 22c.; dairy and rolls, 19½ to 21½c. per pound.

Dry Goods.—The 4th of the month was, as is usual, quite a heavy day for payments, which are reported as having been well up to the average. Travelling salesmen continue to send in very fair orders, and spring deliveries are being actively made. The Dominion Textile Co. has announced an advance in the output of the Magog and Colonial Mills, namely, prints, cretonnes, flags, printed flannelettes, dress sateens, and other lines of printed goods. The advance ranges from 5 to 12½ per cent., and is to take effect on the 15th inst.

Furs.—The prices paid by local buyers of raw furs, as announced at the opening of the season, have not been materially modified as the result of the late London sales, and we quote for prime pelts as follows: No. 1 large beaver, $6 to $7; medium ditto, $5 to $5.50; kilts, $2; black bear, $15 for large No. 1, $10 for medium, and $5 for small; badger, 40 to 60c.; fisher, $6 to $7 for fine dark; red fox, No. 1 Northern, $3.50; Eastern and Ontario, No. 1, $3; No. 1 silver fox, $100 to $175; cross fox, $7 to $10 for dark; wolverine, $7 for No. 1 dark, other grades, $2 to $5; lynx, $6 to $7 for No. 1; marten, Western and British Columbia, No. 1, $6 to $7; Eastern ditto, $4.50 to $5; mink, $7 to $8 for large No. 1, and $4 to $6 for medium; winter rats, 16 to 18c. for large; otter, No. 1 large, dark Labrador, $30, and $15 for Western; coon, $1.75 to $2.50; skunk, $2 for No. 1 prime black, $1.50 for short stripe, other grades $30 to 75c.

Groceries.—The country roads are still suffering from a lack of snow, and traffic in the interior is consequently impeded with the result that business in this line is of a somewhat slow character. The sugar market continues to rule on the weak side, and jobbers are evidently only buying for present wants, in the expectation that still lower quotations may develop. The factory figure for standard granulated remains for the present at $4.10 in barrels, and $4.05 in bags, with yellows ranging from $3.70 to $4. A cable from Barbados to-day quotes new molasses at 13c., a figure materially lower than the quotation of a year ago. Owing to the causes before alluded to, canned tomatoes have been advanced to $1; packers are also reported to be sold out of corn, and higher prices are looked for in this line.

Hides.—As anticipated last week, the easiness in hides has taken definite shape, and buyers are now quoting 11 to 11½c. per pound for No 1. The decline in calfskins is confirmed, the general quotation for No. 1 being 13c., and for No. 2 the figure is 11c. per pound. Lambskins are unchanged at $1.10 each.

Leather.—Though the boot and shoe factories of the city are all busy, they are apparently well supplied with stock, and leather dealers report just a moderate demand. There is, however, a very fair export movement in sole, with firmness in quotations. Slaughter sole is quoted at 29 to 30c., manufacturers' No. 2 at 25 to 25½c., and No. 2 jobbing at 26c. Black leathers all remain exceedingly firm at last quotations.

Metals and Hardware.—There appears to be an impression in some quarters, whether well based or not is hard to say, that iron values have about reached the highest point for the present, and that some gradual decline is likely to develop in the near future. In support of this view it is reported that orders for Canada plates have been booked in Britain at shaded figures, namely, £8 15s. as against £9, the late quotation. Lead has shown further easing off, and is now at $4.40 to $4.45; ingot tin is firm at 39½ to 40c.; copper is a trifle easier at 20 to 20½s.; also spelter at 7 to 7¼c; antimony is again advancing, and is now quoted at 16 to 16½c. Galvanized sheets are steady at $4.10 to $4.35; tin plates, $4.25 for standard charcoals, and $4 for cokes; Canada plates, $2.60; black sheets, $2.40 for 28 gauge; boiler plate, $2.40; iron pipe, $4.37. Bar iron and steel are steady at the late advance.

Oils and Paints.—A firmer market is reported for linseed oil, and 59c. is quoted for boiled in fair lots. Turpentine is firmer at 95c. per gallon, in single barrels. Fish oils are slow of sale, but steam-refined seal is fairly firm at 42½ to 45c.; cod oil, 35 to 40c.; whale oil, 35 to 38c. for best quality, but there is a considerable range. Castor oil has advanced from ¼ to ⅜c. per lb., and we quote 8½ to 9c. for mechanical. Leads, putty, window glass, etc., remain unchanged.

* * *

THE BEGINNINGS OF ONTARIO COMMERCE.

Trade conditions in Ontario in early Loyalist times were as primitive as the country itself. In his Life of Simcoe, the latest volume in "The Makers of Canada" series (Morang & Co., Toronto), Duncan Campbell Scott draws a striking picture of how the early settlers transacted business and how they laid the foundations of the commercial life of to-day:

"They were not greatly troubled with money; they made their own in effect by trade and barter, or, in fact, by writing on small slips of paper, that passed everywhere at their face value until they became indecipherable from soil or friction, when the last holders made fresh copies, and on they went with their message of trust and confidence. The earliest settlers had no means of producing wealth. Their markets were their own simple tables; their exports reached the next concession or the nearest military post. Their first and chief source of ready money was the sale of potash, a crude product from hardwood ashes. In fact, not many years have passed since the disappearance of the V-shaped ash vat and the cumbrous potash kettle. Their next source of revenue was the provisioning of the troops, and in 1794 agriculture had so developed that the commissariat was in that year partly supplied from the provincial harvest. Then timber became the staple, and the whole of the exports—potash, grain and pork—were freighted to Montreal on rafts. Cattle at first were scarce, and hard to provide for. Some of the earliest settlers had cows and oxen at places in the States that had to be driven hundreds of miles through the woods over paths slashed out for their passage. In the first settlement at Oswegatchie (Prescott) for a population of five hundred and ninety-seven there were only six horses, eight oxen, and eighteen cows."

* * *

CHATHAM BOARD OF TRADE.

On the 28th ult. was held the annual meeting of the Board of Trade of Chatham, N.B., with the Hon. W. B. Snowball, its president, in the chair. It was decided to co-operate with the Montreal Board of Trade towards the holding of a conference of boards of trade in that city next summer. The secretary related how beneficial had been the results of the board's efforts during the past year to improve the conditions surrounding local business men. Especially had this been the case in the matter of railroad freight rates, subsidizing the Miramichi Steam Navigation Company, etc. The following gives the result of the election of officers: W. B. Snowball, president; D. P. MacLachlan, vice-president; W. L. T. Weldon, secretary; V. A. Danville, treasurer; J. F. Benson, auditor. The council and board of arbitrators were re-elected except J. F. Benson was substituted for another member.

very reluctantly, an' as a great favor to ye. Says I, 'Hinnissy an' Donohue,' says I, 'ye ar-re rayspictable wurrukin' men, an' I will keep ye'er money f'r ye rather than see ye spind it in riochous livin',' says I. 'As a gr'reat favor to ye I will take care iv these lithographs be lendin' thim to me friend,' says I. 'If ye want th' money back ye can have it anny time between nine in th' mornin' a' three in th' afternoon, except Sundays an' holidays,' says I, 'but don't both come at wanst,' says I, 'or nayther iv ye'll get it,' says I. 'Ye sleep better at nights because ye feel that ye'er money is where no wan can reach it except over me dead body.

"'If ye on'ly knew, ye've not turned ye'er back before I've chased those hard-earned dollars off my premises. With ye'er money I build a house an' rent it to you. I start a railroad with it, an' ye wurruk on th' railroad at two dollars a day. Ye'er money makes me a prominent citizen. The newspapers interview me on what shud be done with th' toiling masses, manin' ye an' Donohue; I consthruct th' foreign policy iv the government; I tell ye how ye shud vote. Ye've got to vote th' way I say or I won't give ye back ye'er money. An' all this time ye think I've that little bundle iv pictures nestlin' in th' safe in my brick house with me settin' at th' dure with a shotgun acrost me knees.

"'But wan day ye need th' money to bury some wan, an' ye hurry down to see me.' 'Sorry,' says I, 'but I've just given it all to a lady who come out iv th' Chinese laundhrey nex' dure, an' said she was an illegitimate aunt iv Jawn D. Rockfeller.' An' there ye ar-re."—F. P. Dunne.

BRITISH COLUMBIA BOARD OF TRADE.

Last week the convention of Boards of Trade of Eastern British Columbia was held at Cranbrook. Among the principal resolutions which were adopted were those calling for an investigation of the alleged combine of powder companies, and for the abolition of the duty on American powder; for the purchase of gold and silver by the Dominion Government at the Trail refinery, and for provincial assistance to the Coast-Kootenay Railway and to the Boundary country in its efforts to secure more power for its mines, as well as the establishment of a 50,000-acre park. Another resolution strongly urged investigation of the British Columbia Southern land grant. This caused a heated discussion.

* * *

BUSINESS AND BENEVOLENCE.

There is a certain wondrously constituted corporation in Montreal, the Mutual Trust Company, which advertises its readiness to loan money at not more than 20 per cent. per annum, and at the same time to allow as interest to its depositors, from whom, presumably, its working capital is to come, 1 per cent. per month, and, in addition, providing the money be allowed to remain in its hands for a full year, a further bonus of (probably) 6 per cent. In other words, it will give 18 per cent. for the use of the money which is to bring in 20 per cent. per year, and the cost of management, advertising, office rent, etc., are to come out of the remaining balance of 2 per cent. No wonder that "vast experience" is bespoken for that man of "unblemished reputation," the general manager of the company. He will need all he possesses of that quality in order to carry on the business in that "vigorous and aggressive, yet conservative," manner, which seems, according to what we see in print, to be the thing nowadays. But we forgot; the business of this concern is to be combined with benevolence, though whether this particular feature is to be at the hands of the management or to be for the behoof of the people who are to borrow money at the cheap rate of 20 per cent. is not stated.

On the authority of a Montreal paper a correspondent was informed that if he was looking for something better than could be obtained at the bank he should send on to this concern a deposit so as to secure his first dividend on February 1st, and every month thereafter. A good many people naturally *are* looking for a better return for their money than they can obtain at their banks, though whether they often get it is another story. Incidentally, another question of importance is brought up. If, indeed, it be true that this company has secured legislation empowering it to be the recipient of moneys from the general public, what safeguard is there that it has either the capacity or the intention to do with them what it promises so fluently? A bank is hemmed in with many restrictions as to the receiving and placing of deposits, and its proper use of these sums is ensured by ample guarantees, governmental supervision, etc. What sort of surety does this company, or any other like it, offer? Benevolence and business are an alliterative combination; often, however, they are not equally profitable to the general public.

KENTVILLE BOARD OF TRADE.

The thirteenth annual meeting of the Kentville Board of Trade was held on the 31st ult., at Kentville, N. S. The board was able to congratulate itself on being in a thoroughly prosperous condition, there being now one hundred active members on the roll. In reviewing trade conditions of the town, the president, Mr. W. E. Porter, stated that the past season had been in some ways disappointing and yet a cause for thankfulness. The year 1904 was an especially hard one in farming communities—on which merchants largely depend for business done in the town. The price of apples was low and the crop was small, also owing to the small crop of hay and the severity of the winter, about all available money had to be sent out of the county to buy hay and feed to win-

Marmora DEBENTURES

Tenders will be received by the undersigned up to 6 p. m. on Monday, February 12th, 1906 for the purchase of $5,500 Debentures of Village of Marmora. These debentures will bear interest at the rate of four and one half (4½) per cent. per annum. Principal and interest will be payable in equal annual payments of $422.78 for 20 years. The highest or any tender not necessarily accepted. Tenders will be received for only the whole issue.

For further particulars address

RENDOL SNELL,
Village Clerk,
Marmora, Ont.

Marmora, Jan. 11th, 1906.

FERNIE, B.C.
DEBENTURES.

Tenders will be received by the undersigned up to Thursday, March 8th, 1906, for the purchase of $45,000.00 Debentures of the City of Fernie. These debentures will bear interest at the rate of five (5) per cent. per annum payable yearly. Principal will be repayable as follows: $40,000.00 Sewer Debentures at the expiration of 30 years. $5,000.00 Fire Equipment Debentures at the expiration of 10 years. The highest or any tender not necessarily accepted. Tenders will be received for the whole or any part of either issues.

For further particulars address,

JOHN W. NUNN,
City Clerk,
Fernie, B.C.

Fernie, B.C., December 22nd, 1905.

ter stock. This made a tremendous drain on the country, using up most of the surplus money left from the prosperous season of 1903. This reflected on the mercantile trade of Kentville, and in the early spring and summer trade was dull. While, however, the first months of the year were severe and trade was dull, yet the fall and autumn proved the best that Kentville had ever had, and trade exceeded even the banner year of 1903. This, in a great measure, is due to the abundant crop of hay, apples and potatoes. He next referred briefly to the natural advantages possessed by Kentville for the location of factories, especially seeing that the headwaters of the Gaspereaux, giving the possibility of unlimited power for industrial purposes, lay at its door. It is calculated that from these waters which cover an area of over 76,000 acres, power could be developed to the extent of ten to fifteen thousand horse power. The question of town sewerage has long been before the town council and it was urged that the board of trade should help along the work if possible. A committee was appointed to render the council any assistance in their power. At the close the gathering sang the National Anthem. The election of officers resulted as follows: President, G. E. Calkin; vice-president, D. J. Murphy; secretary-treasurer, F. C. Rand; auditors, Barry Roscoe, S. L. Cross; council, W. P. Shaffner, J. W. Regan, Jr., H. D. Burns, R. C. Dickey, W. E. Porter, A. E. Calkin, H. M. Bain, C. O. Allen.

CHARACTER IN BUSINESS.

A week or two ago, a Presbyterian gathering in Chicago, listened to a remarkable arraignment of a certain kind of man of wealth, by David R. Forgan, vice-president of the First National Bank. Mr. Forgan spoke on the subject, Character in Business, which he insisted, is the foundation of the world's credit. He was very bitter upon the business men who allow greed for gain to crush out all the better feelings of humanity.

"Perhaps you think it impossible that a man's soul should entirely shrivel up in the pursuit of wealth," said the speaker. "If you know some millionaires as well as I know them, you would agree with me that they had lost the last vestige of the souls they may be presumed to have possessed before the mania for money-getting possessed them. I would like to acquire millions, but if the process is going to make me like some of the old devils I know who are millionaires, I don't want the money. Recently I saw a letter from a millionaire referring to the death of a clerk who had served him faithfully thirty years. The man who wrote this letter is rated at $20,000,000. He is an Easterner. In this letter, after disposing of several matters, he referred to the death of his old employee incidentally, and directed that the exact date of the severance of the clerk's connection with the office, because of his last illness, be ascertained, the exact amount due him for the fraction of the month he had worked be figured up and a check for the amount be mailed to his widow. Do you imagine that old curmudgeon has a soul."

ELECTRICAL FIRES.

The latest quarterly report of the Electrical Bureau of the National Board of Fire Underwriters in the United States is issued, covering from Oct. 10, 1905, to January 10, 1906, a summary of reports received during the quarter, prepared by William H. Merrill, Jr., electrician, gives the following particulars:

Three crosses between high and low potential circuits and ten between light or power wires and signalling systems have been reported. Fifteen fires were due to accidental grounding of circuits, of which two were on gas pipes, the resulting arcs burning hole through pipes and igniting escaping gas, while seven fires were caused by short circuits in interior wiring.

Four reports were received of fires caused by incandescent lamps, in three of which heat from the lamp ignited nearby material. Four fires were caused by electrical heating devices, three of which were assigned to electric flat-irons. Four fires were reported as having been caused by motors, in two of which sparks from brushes ignited inflammable material which was allowed to collect in the vicinity. Three pole and tree fires were reported. Four fires were attributed to loose or defective connections or joints. Three reports were received of fires caused by overheating rheostats.

Reports of twenty other fires attributed mainly to moving picture machines, defective electrical fittings, and poorly installed electrical wiring, were received in that period, making a total of seventy-seven electrical fires that have been reported during the last quarter, the losses aggregating over $65,000.

Manager and Secretary.

Toronto, 23rd January, 1906.

STATISTICS OF CANADIAN TRADE.

The figures of Canada's trade for the latter half of the calendar year 1905, being the first half of the current fiscal year, contain some things that may well afford satisfaction. The aggregate trade in that period shows an increase of $31,516,751 over the returns for the same time in 1904. The aggregate trade was $273,556,221, compared with $242,039,470. The imports, including dutiable and free goods, were $133,814,210, a gain of $10,770,560.

Happily, the exports exceeded the imports. The value of exports was $140,213,846, an increase of $21,218,026, compared with the same six months of previous year. In the exports there is an increase in all branches of trade. In the fisheries for example, there was an increase of over two millions; in ani-

mals and their produce of about four and a half millions; while an increase of twelve million dollars in agriculture was shown. The value of manufactures increased by over one million dollars, and the output of the mine and forest wealth remained about the same as in the year previous.

* * *

J. Willard Smith, wholesale shipping merchant on Ward Street, St. John, N.B., suffered considerable loss by a fire on Monday night. It destroyed his office and did damage in his warehouse.

Messrs. Abraham & Coleman Fine, carrying on a general dry goods business at Hartland, Carleton county, have assigned to J. King Kelley, barrister, of St. John. They show liabilities of $8,000 and assets about $4,500.

The Rockland mill, at the mouth of the Cold Stream, in Carleton county, N.B., was destroyed by fire a few days ago. It was a new industry, owned by B. Frank Smith, of East Florenceville, and had been in operation only a month. The mill was a combination rotary and lath, with a grist mill.

The warm winter, up to the end of January, had given rise to much apprehension among lumbermen and pulpwood men. An Ottawa despatch of 1st February declared that reports from every section of the country, along the Ottawa and all its tributaries, show that there will be a shortage of pulp-wood. The same thing was said on both sides of the St. Lawrence. According to the speaker, the mild weather is responsible for these conditions. The lack of snow in the bush thus late must be a serious handicap to getting out all kinds of timber. The situation cannot but have an influence on the price of paper, even though snow should come in February.

The annual meeting of the Canada Horse Nail Company, Montreal, was held on Tuesday, 30th January, at which, we are told, satisfactory reports were presented regarding the business and condition of the company. In face of increased opposition and the low prices of others, an increase in the sales of the company over the preceding year was reported, and the usual dividend declared.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

MANAGER FOR CANADA:
B. HAL. BROWN.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $151,663,477.29

It exceeds by two millions the entire population of the Dominion of Canada. Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. It has on deposit with the Government of the Dominion of Canada, in Canadian securities, dollar for dollar of its Canadian liabilities. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts.

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $105.83 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policyholders and addition to Reserve
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave, New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $3,000 000.00.

More Than $7,000,000.

Over and above premiums received, more than $7,000,000 has already been paid or credited to its policyholders by the

JOHN MILNE, - Managing Director.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Home Office - Toronto, Ont.

THE NEW ZEALAND EXHIBITION.

Particulars are now to hand concerning the New Zealand International Exhibition to be held at Christchurch, Canterbury, New Zealand, from November of the present year to April of the next. It will be a government exhibition, educational in its purpose, showing the resources of that colony, its scenery, etc. The Canadian Department of Agriculture will erect a special building at this great fair, and will pay transportation one way on all Canadian exhibits. Space, maintenance, and installation will also be free. In a circular to the manufacturers of Canada, Mr. Younge, the secretary of the Manufacturers' Association, calls attention to this important exhibition, in view of the importance of the market, and the preference extended by New Zealand to Canadian goods. He urges that our manufacturers should make a representative display. Any who wish to exhibit should write to Mr. Wm. A. Burns, Exhibition Branch, Department of Agriculture, Ottawa, giving a description of the proposed display and an estimate of the space required for it. Applications for space should be received by him not later than March 1st, and exhibits will require to be ready for shipment about May 15th. Mr. Younge is commissioner in Canada for this exhibition, and Sir Sanford Fleming is an honorary commissioner.

The imports of New Zealand amounted last year to $66,460,000, which is a large sum for a population of 850,000. They were mostly manufactured goods, and more than half of them were from the United Kingdom; $7,640,000 from the United States, $1,545,000 from Germany, $600,000 from Belgium, and lesser amounts from European and Asiatic countries. From Canada she received $565,000 worth of goods. Of this sum, $74,250 consisted of fish, mainly canned salmon, $5,871 of animal and field produce, a little from the mine, a little from the forest, but the great bulk, $450,000 worth in fact, was manufactured goods. Not without reason, then, does Mr. Younge call upon Canadian manufacturers to put themselves forward upon this occasion. Looking up the Trade and Navigation returns we find that the principal items among manufactures exported to New Zealand were agricultural implements, $95,290; cotton fabrics, $77,937; rubber goods, $30,789; hardware, $13,529; boots and shoes, $28,153; paper, $96,945; furniture, $26,752; wood goods, $10,215. Christchurch is one of the four most important towns of New Zealand, situated on the eastern shore of Middle Island in the county of Canterbury.

COAL AND OTHER MINERALS IN KOOTENAY.

The development of mining and other industries in the south-eastern part of British Columbia, and the remarkable growth of demand from both the United States and Canada for the coal found in the pass of the Rocky Mountains known as the Crow's Nest, has resulted in a great increase in the output of coal in that region. The quantity mined last year by the Crow's Nest Pass Coal Company was 831,000 tons; and the quantity of coke it made for the use of smelters in the Canadian Kootenay and in Montana was 257,000 tons. Considering the steady growth of railway construction there is little doubt that these figures would have been even greater if it had not been for the burning of the company's trestle and tipple at Coal Creek in March; but as it is the figures indicate a decided growth in output over the previous twelve months. The comparative table of yearly production since 1898 printed in the company's report is an interesting one. When writing twelve months ago on this subject we noted the 1,100 coke ovens at Fernie, Michel and Carbonado, which have been added to since that date. The population of Fernie has increased till it has nearly 4,000 inhabitants to-day, while Michel has at least 1,200, Coal Creek and Morrissey an increased number.

But the business of the company named is not confined to mining and selling coal or making coke. It provides Fernie with facilities in the shape of sewerage, light, telephones, which that municipality has not provided for itself. As we stated in a résumé last year, the Crow's Nest Pass Company "owns the stock of a local electric light and power company, a telephone system, and a railway six miles in length which connects its mines with the Great Northern Railway, (Jim Hill's road), and the C. P. R. Thus it has grown year by year until now the value of its mines, plant, real estate, machinery, and development is placed at $5,064,000; the stock of the subsidiary enterprises mentioned at $480,000; and its fixed assets at $6,064,000—not including great areas of land which should in the future yield town-sites and further mines." The assets are now, according to the report for 1905, increased to $6,333,518, which, however, must be a merely nominal value, for we have heard of a recent valuation which puts their value at more than three times that sum. This will explain the clause of the president's address at last week's meeting, in which he spoke of a proposed "reorganization of the company so as to bring its nominal capital more in line with the actual value of the company's holdings." There will besides probably be an extension of its operations in the way of developing coal areas in other parts of British Columbia, possibly on the proposed route of the Grand Trunk Pacific. This will necessitate more capital, and it is proposed, we are told, to ask shareholders to agree that the capital shall be $3,500,000 bonds and $11,500,000 stock, shareholders being given a 5 per cent. bond and three shares of stock for each share held. The new stock is expected to receive a 4 per cent. dividend.

Net earnings last year were $497,000, which is almost $100,000 more than in 1904; and after paying ten per cent. dividend and carrying to reserve fund the sum earned by sales of new stock at a premium, that fund is made up to $1,800,000, and there is $351,801 at credit of profit and loss. The year has been a very successful one for the company, and its results reflect great credit upon the management who have brought them about in circumstances of difficulty which would have thwarted less resolute men. The future of the company promises to be a striking one.

* * *

MARITIME PROVINCE BUSINESS.

There is no room to doubt that the vagaries of the weather of late, and especially the phenomenal mildness of January, have proved unsettling to the storekeepers' business as well as to the lumbermen's, and others all over Canada, east of Lake Huron. Business in the Maritime Provinces, under ordinary circumstances, would be exceedingly satisfactory at this time, but the conditions existing at present are most extraordinary, as we learn from our St. John and Halifax advices. The middle of February, and so far as Nova Scotia is concerned, winter still "rotting in the sky!" "The weather since the first of the year on the south shore has been more nearly like that of British Columbia than Nova Scotia," writes our Halifax correspondent. "Not a sign of frost in the ground, no snow to speak of has fallen all winter, trees are budding, sap running and May flowers in bloom." Incidentally there is a great deal of sickness reported, and business has suffered from the fine but unseasonable conditions.

Lumbermen have now abandoned hope of getting into the woods, and the cut of logs will be a small one, it is pretty certain, all over the Maritime Provinces. The disappointment to the lumbermen has also brought the like to the grocery houses, hardware men and others who cater largely to that particular trade. Dry goods houses in the two provinces of Nova Scotia and New Brunswick report a poor demand in seasonable goods, and the hold-over of winter stocks of warm goods will be heavy. So that on the whole business men feel like adopting the words of the litany and praying "Give us snow and frost in their time, O Lord!" "At this date last year the whole country, that is to say, the Maritime Provinces, was snow-bound, and business paralyzed thereby. This year it is tied up by exactly opposite conditions.

* * *

MR. ALLAN'S ADDRESS.

Mr. J. D. Allan's address to the Toronto Board of Trade, as its retiring president, was concise and to the point, but it was full of the things which need to be said to such a body of men, representative as they are of the city's rapidly extending commercial connections.

The progress of the city of Toronto, the speak said, was indicated in the Assessment Commissioner' report, which showed an increase of over $20,000,000 in assessment compared with the year 1904. It was gratifying to note that in the first year in which the new business tax had taken the place of the personalty tax, for the abolition of which the board labored persistently, there had been no impairment of revenue, the figures being: 1905, personalty assessment, $12,224,713; 1906, business assessment, $19,224,628. Of the increase shown, $5,403,780 was in the Third Ward, which contained nearly the entire wholesale district, thus furnishing an effective reply to the statement that the new system would relieve the wholesale trade of its just share of taxation.

After some brief reference to post-office revenue, customs collections, the new Union Station, the enormous increase in building, and other matters, Mr. Allan referred to the entrance into the city of the radial electric roads. As he so aptly said, it would be very greatly in the interests of business houses—and indeed of the whole community—if some definite arrangement could be arrived at for their entry, the city's interests being at the same time fully protected at the expiry of the franchise of the Street Railway.

In regard to technical education, that highly important question to which Mr. Allan has devoted so much of his thought and energy in the past, he had to admit that the merging of the technical with the general school system of the city had not been attended with such beneficial results as had been expected. The commercial department seems to have done good work along the lines advocated by the Toronto board, but in the industrial and scientific departments there had not been a sufficiently well defined specialization in the curriculum to produce notable results, though the staff had not been to blame for this. Mr. Allan considered it a question whether, in the interest of the whole country, such schools should not receive federal as well as provincial government aid.

THE PROVISION TRADE.

It is not too early in the season to say that a considerable amount of money has been lost by dealers who make a prominent feature of eggs. For this the remarkably mild weather is responsible, so opposite in its character has it been compared with that of the last two years. Dealers placed in stock last fall large quantities of eggs for cold storage, paying on the whole high prices for the same, in readiness for the demand which usually springs up a little later on. This season, however, the usual demand never arose in force, the hens practically never stopped laying, with the consequence that the call for held stock has been but a poor one. The cold snap of last week did something to remedy this state of things, but hardly enough to mend matters appreciably for the dealers. It is worth remarking in this connection that Danish eggs are commanding prices within British and other markets higher than ever before, and that this is due almost entirely to their increasing good quality. The exporters in Denmark, aided by the farmers, are continually moving in the direction of improvement of their product. They do not content themselves with "well," but aim towards a "better" without ceasing. We read that, notwithstanding the high values already reached for this class of farm product, the Copenhagen Exchange is working for the production of "brown eggs with thicker shells," which will be distributed all over the country, thus, no doubt, contributing to a still further development in this industry. Quality is what the Danish farmers are constantly seeking, thus presenting a highly useful example for the Canadian egg trade.

Prices of both butter and cheese are firm, especially the latter. The British market for cheese has been a shade lower, but as stocks in this country are so light this is scarcely likely to have any appreciable effect. Indeed, a general impression seems to prevail that, so soon as the above slight reaction shall have passed, prices will again show a rising tendency. Mr. J. A. Ruddick, the Canadian Dairy Commissioner, who has lately returned from a trip of investigation to the United Kingdom and the Continent, expressed an interesting opinion at Cowansville, Que., the other day, that Canada should not take too much credit to herself for the building up of a great cheese trade in Britain, the truth being that we had had very little real competition in cheddars.

Canadian butter has shown up better in the British markets this season than usual, owing very likely to the strenuous efforts of the Government, the Dairy Association and the Guelph College of Agriculture, to improve the quality. There have been some rumors in London and Liverpool of a kind of butter famine, but later reports indicate an easing down, and now prices are about normal with a fairly firm tendency. In the local markets, the quality has not been all that could be desired, though during the last week or so it would appear to have improved a little. The demand is about average.

The decline in prices in the English bacon market has been followed here to some extent and packers have been giving lower quotations on hogs. They claim that a large proportion of the animals offered have graded low, and they have been forced to show a good deal of discrimination. The factories have been making rather slow time.

IMPORTANCE TO ONTARIO OF HUDSON'S BAY.

A conference was recently held at one of the clubs in Toronto, when the pros and cons of promoting railway access to Hudson's Bay via Ontario was discussed, and one of the number requested to prepare a paper on the subject. This was done, and the same sent to the editorial rooms of "The Monetary Times" for an opinion as to the advisability of the publication. This being thought desirable, Mr. Wills gave consent to the use of his name as a guarantee of the reliability of the facts presented, and of the deductions drawn from them.

His long experience as a student of the commercial interests of Toronto, when secretary of its Board of Trade, and at the same time extending his observations to those of the Province of Ontario at large, gives his opinions special weight.

He divided the subject in hand into answers to three queries—of which the caption and first query and answer appear in another page. The remainder will appear in later issues, and will also be printed in documentary form.

That the facts thus set forth will be of inspiring interest to every business man in Ontario can be reasonably assumed; and that public attention being drawn to them should lead to active measures to promote and protect Provincial interests of such overshadowing importance, all thoughtful readers must admit.

Further notice of this subject will be continued from week to week in "The Monetary Times." Here are the queries affecting fundamental interests of the Province of Ontario, serially considered:

FIRST—Why Ontario lacks commercial access to Hudson's Bay.

SECOND—How such success can best be obtained.

THIRD—What Provincial advantages will result from up-to-date transit facilities extending to the great Canadian sea via Ontario.

In answering the first query—**Why Ontario Lacks Commercial Access to Hudson's Bay**, various causes can be mentioned as retarding such access, the most prominent being:—

1.—Absence of General Information Respecting the Contiguity and Conditions of the Great Canadian Sea.

It has been remarked that if an enquirer should go on any principal business street in Toronto and ask the first ten tradesmen he met, whether Ontario has any tide water sea coast, nine out of the ten would say "no—the nearest to it is down on the St. Lawrence River, or Gulf, in the Province of Quebec," and look askance at him as an ignoramus for asking such a question!

They would be amazed and incredulous when informed of the fact that near the centre of Ontario its northern boundary is for two hundred miles along a salt sea coast, where the tides change in level nearly ten feet twice a day, and that it can be reached from the C.P.R. in an air line distance of 250 miles, but as yet there is not a public road, or even a "blazed" trail, through Ontario to that coast, the only access, except by snow-shoes, being by canoe in the summer season along the water courses of lakes and rivers, with several portages, the best route being via C.P.R. station at Missanabie Lake and the west branch of the Moose River to Moose Fort at its mouth; the average time of transit being twelve days going north with the river current, and fourteen days returning against the same. The Anglican Church Bishop Newnham, residing at Moose Fort, started in July, 1902, with his family, to come to Toronto, by canoe as far south as the C.P.R. Owing to sickness among his crew of canoe men, he was obliged to camp midway and wait for relays, and consequently was twenty-eight days in making the passage to the C.P.R.

There are along the Ontario coast over 1,000 persons who can read and write, including native Indians taught at the mission schools, but as yet no regular mail service is afforded them by the Dominion Government. The Hudson's Bay Company employees carry frequent mails in summer, but the residents are without any from November to June. Such non-progressive conditions as these, it is safe to say, cannot be found in any other civilized country on the globe. The cause is not far to seek. The business interests of the Hudson's Bay Fur Company are benefited by the isolation of Hudson's Bay, in the basin of which it has thus far maintained a monopoly of the fur trade, and warded off competition. Hence when the sea coast residents of Northern Ontario petitioned the Federal Government for regular mail service, it was granted as a matter of course, but the Fur Company brought sufficient influence to bear to have the order rescinded and former conditions retained. Commercial access to the northern sea was also materially retarded thereby. This policy from the same source has been manifested in other instances too numerous to mention at this time, but that the effect has been to create erroneous impressions as to the accessibility, climate and resources of Hudson's Bay in the public mind there can be no doubt. Hence the phenomenal ignorance as to its commercial and industrial importance, and the general apathy toward developing the same can be in part explained.

2.—Certain Peculiar Topographical Conditions have Discouraged Railway Extensions upon the Shortest Routes from Existing "Trunk Lines" in Eastern and Central Ontario to the Sea Coast.

The main features are, that the land next south of Hudson's Bay presents a zone over 100 miles wide, which is mainly a treeless and largely-flooded "muskeg," or morass, between the Notaway and Albany Rivers, including the Ontario shore, which must remain an uninhabited waste for all time. But beyond this is a greater disadvantage because of the adjoining marine area being so shallow as to render the safe approach of sea-going steamers impossible. Professor Bell, of the Dominion Geological Survey Department, has mentioned finding the water in that section of the Bay so scant that he touched bottom with his canoe paddle when out of sight of land on a clear day!

At the mouth of the Moose River the moderate-sized vessels of the Hudson's Bay Company are accustomed to anchor some ten miles from the shore and transfer their cargoes from the company's post by barges. It is also reported that the southernmost section of the sea is gradually filling up from the "silt" of the large rivers in the vicinity, and thus the marine difficulty of securing harbor facilities is proportionately increasing.

It will at once be seen that railway extension under such conditions would be a waste of capital, which railway investors and managers will, of course, avoid.

This will explain the reasons why the Grand Trunk and the Canadian Pacific Railways do not propose extensions from their trunk lines to Hudson's Bay, and the most recent project, known as the Algoma Central Railway, has abandoned its original route to Moose River entrance, and seeks a junction with the C.P.R. at White River Station; also why the Provincial Railway from North Bay to Cobalt is not projected to extend north of the junction with the Grand-Trunk Pacific trans-continental line, located south of Lake Abittibi.

Other minor causes for the marvellous want of commercial access to Hudson's Bay might be stated, but will be omitted in this brief statement of salient facts.

* * *

The net earnings of the Cape Breton Electric Railway for December 1905 show an increase of nearly one hundred per cent. over those for the same month in the preceding year.

OUR HALIFAX LETTER.

The annual meetings of several local corporations have been held during the week, including the Halifax Fire Insurance Company and Empire Trust Company. The plan to buy up the uncalled capital of the Halifax Fire Insurance Company from reserve fund was passed unanimously, and certain amendments to the charter were also agreed upon. It was suggested that in future the holder of one share of stock be entitled to one vote at all meetings. At present the holder of $20 of paid up capital has one vote, of $200 two votes, and so on up to the maximum of $1,800, the holder of which has ten votes.

Receipts of Halifax Tramway are showing a considerable increase over last year, one of the few things to be credited to the mild weather. The annual meeting of the company takes place to-day (Monday). The annual meeting of the Acadia Fire Insurance Company also takes place to-day; the Eastern Trust Company to-morrow, and the Royal Bank on Wednesday.

Activity in real estate transfers and enquiries for real estate continues here. The Royal Bank is reported to have purchased the adjoining building on George Street, and the Union Bank has done likewise on Prince Street. The latter bank now owns the block from Hollis Street to Bedford Row, and has one of the finest properties in the city. The Canadian Bank of Commerce building to be erected on the corner of Granville and George Streets is expected to cost over $100,000.

The new drug merger will affect Halifax seriously by removing one of her most progressive and popular business men, in the person of L. J. Mylius, who will remove to the Upper Provinces (Ontario or Quebec) at an early date. The three wholesale drug houses merged here are those of Hattie and Mylius, Brown & Webb, and the Simson Bros. Co., Limited. The business will hereafter be conducted under one roof in the Hattie and Mylius building on Sackville Street, which is being improved for the purpose. The manager here hereafter will be J. B. Hattie, assisted by Daniel Hockin.

The stock of Wellner & Scott, wholesale milliners, is offered for sale by the receivers, the Eastern Trust Company. Mr. S. S. Scott, a partner, committed suicide a week or two ago due, it is supposed, to business worries. He was a very well-known and extremely well-liked citizen.

The death is announced to-day of Geoffrey Morrow, partner in the hardware firm of Stairs, Son & Morrow, one of the oldest houses in the province. Mr. Morrow was only 51 years of age, and was one of the best liked of Halifax business men. He had been a great horseman, and was a noted amateur rider of running horses in the days of the Riding Club here.

Halifax, 12th February, 1906.

* * *

THE LATE E. B. EDDY.

In the death of Mr. E. B. Eddy, Canada loses one of her most prominent industrial kings, though it is true that, by birth he was not a Canadian, but came from Bristol, Vermont, where he was born in 1827. Notwithstanding this, he was a man who in his life-time did much to spread the name of Canada as a manufacturing country, his paper, matches, and woodenware being known throughout the world. First establishing himself in Hull as a manufacturer of matches, he later developed into one of the largest lumber operators in the Ottawa valley. He embarked largely in the pulp and paper business in 1892.

His indomitable spirit of tenacity was sorely needed on several occasions during his business life, for he was often in straits for money, and it is said that he suffered under no less than twenty-seven fires. One in 1882 involved a loss of $250,000, while the one in 1900, by which every branch of his business except the sulphite mill was completely destroyed, will go down to history. It is a wonderful illustration of the spirit of the man on this occasion, when misfortune came sufficient to daunt the heart of the bravest, that, though seventy-three years of age and advised to submit to the inevitable and retire from business, he "started in" afresh. Within three months the match and woodenware factories had been rebuilt and were in full operation, and in less than a year the pulp and paper mills were producing five times more than they had been the year before the fire.

Mr. Eddy did not allow his own business to engross all his care and energy. He sat for one term in the Quebec Legislature in the Conservative interest, and was mayor of the city of Hull for several years. He was married twice, the present Mrs. Eddy being a daughter of the late John Sheriff, Chatham, N.B. The body has been taken to Vermont.

* * *

MONTREAL INSURANCE INSTITUTE.

The annual dinner of the Insurance Institute of Montreal held last week was an enjoyable affair. The chair was occupied by the president of the institute, Mr. Seargeant P. Stearns, and on his right and left were: Rev. Dr. James Barclay and Hon. J. I. Tarte, Messrs. R. C. Smith, K.C., B. Hal. Brown, G. F. C. Smith, W. Hanson, P. C. H. Papps (Toronto Institute), David Burke (president Canadian Life Insurance Officers' Association), F. D. Shallow and T. L. Morrisey. About 140 persons were present. The toast of "Canada" was proposed by the chairman and acknowledged by R. C. Smith, K.C., who spoke of the twentieth century as being peculiarly Canada's. Mr. David Burke proposed the toast of "Insurance," giving some interesting figures in connection with its history and showing its antiquity; Mr. C. R. G. Johnson responded. "Our Guests," the next toast, was acknowledged by Mr. P. C. H. Papps, who pointed out that one side of the work of an insurance institute was the educational—to provide those who were coming after. Rev. Dr. Barclay also acknowledged the toast in a witty speech, after which the chairman gave "Founders of the Institute," paying a tribute to those who had taken an active part in the organization of the Montreal body. Mr. B. Hal. Brown responded, touching on the benefit that had been derived by the members of the Montreal Institute since its founding. He expressed a desire to see a union between the institutes of the two great financial bodies of the city—banking and insurance. The toasts of the press and the chairman were also honored.

* * *

MANUFACTURERS LIFE INSURANCE COMPANY.

We recall that about the first of February last year a convention of the agents of the Manufacturers Life Company was held, with respect to which gathering it was said at the time: "Plans were developed for improving the work during the coming year; and all went away fully determined to make 1905 the greatest year the Manufacturers Life has ever known." It would seem that this resolve has been carried out, for the report of 1905 shows gains in new business and in total business; in premium income and total income; in payments to policyholders, in total assets and in surplus on policyholders' account. If those who have policies in the Manufacturers' Life are not pleased with the results of that company this year, they must be unusually hard to satisfy, for out of a total net income of $1,945,840, the sum of $468,687 has been paid them in cash, $946,828 has been laid by according to Government requirements, to provide for policyholders' future claims, and $135,043 has been added to the surplus from which profits on policies are payable—a total of over one million and a half dollars either paid to, or saved for policyholders.

It is noticeable, as a step towards the thorough disclosure of a life company's condition rendered desirable by recent exposures in the United States insurance investigation, that this company publishes, in addition to its cash account and balance sheet, a complete list of its bonds, debentures, and stocks on hand—their par value; ledger value; market value. And it is satisfactory to see that while the total of these securities as taken into the company's ledger at the close of last year was $4,079,000, their market value was $4,177,000, which in turn was $256,000 greater than their par value. A further feature of the report is that death claims of the year were below the expectation; and that the death rate in the Abstainers' Section of the company's business was particularly favorable. The total assets of the Manufacturers Life reach $7,189,681; and the surplus, $906,912. The net premiums of the year were $1,645,385; and the total paid policyholders was $468,687, of which death claims amounted to $319,855. The reserve, by the Government standard, is now $6,201,905. Such an exhibit as this company makes at the close of its nineteenth year should encourage its energetic management, and satisfy those who insure in it that their premium moneys are well looked after.

* * *

NATIONAL TRUST COMPANY, LIMITED.

Quite evidently the business of this company grows steadily. It has offices in Montreal, Winnipeg, Edmonton, and will presently have one in Saskatoon, while the head office building in Toronto is being remodelled to accommodate the demand for more room. The aggregate of all the company's various operations is $9,420,865, held on both capital and trust account. Of this total the company owns $1,473,374, and holds $3,409,676 on guaranteed trust account. The balance, amounting to $4,537,814 is administered as executor, trustee, or agent. Of the assets held for guaranteed trust account, the sum of $2,444,000 is invested in mortgages, $593,000 in loans on bonds and stocks, $344,000 invested in bonds and debentures, and of the assets held on capital account nearly $700,000 is held in practically cash assets, showing a satisfactorily liquid condition. The net earnings of the year show a considerable increase over those of 1904, amounting as they do to $112,819, and this induces the directors to think that the dividend may be increased during the current year, say from six per cent. per annum to seven. The company's reserve fund is now $400,000, equal to forty per cent. of the paid capital. The increase in aggregate transactions during 1905 has been very marked.

* * *

HOME LIFE ASSOCIATION OF CANADA.

The figures of this company's business for 1905 exhibit a good rate of progress, no small proportion of the gains shown arising from its having amalgamated during the year another company, the People's Life. Assurance in force now exceeds six millions—$6,161,017 under 5,070 policies, as compared with $3,949,053 in the previous year. The new assurance written amounted to $1,404,650, and the cash premium income shows a gain of twenty-seven per cent. Total assets reach $1,534,000, included in which is $788,000 capital subscribed; and the reserves, made upon a standard of three and a half per cent., amount to $602,019. The sum paid in on account of capital stock during the year was $49,320. Death claims, annuities, and expenses of the year were $185,136; and we observe a sum of $11,350 prudently written off ledger assets, the net amount of which is now $668,073. The home office building is taken in at $125,000, which is a low valuation not only when its cost is considered, but when its value as a revenue-producer is regarded. There is evidence in the statement of a judicious regard for the interests of policyholders.

* * *

UNION LIFE ASSURANCE COMPANY.

This company, whose fourth annual report has just been made public, does largely an industrial business, which of course implies a high rate of expense in collecting and looking after premiums, for it issued last year 37,357 policies covering $6,122,000, showing an average of $164 per policy. But the report states that this business is being secured at a cost per thousand considerably lower than other industrial companies. The showing is made that the new insurance is half a million greater than the best previous year; that the premium income increased by thirty-five per cent. over

1904, and that the assets are greater than at the close of the preceding year by forty-two per cent. These assets consist of $215,000 in cash, real estate, and securities such as stocks, bonds, debentures, etc. The reinsurance reserve requires $108,900, and when $13,780 other liabilities are deducted, the surplus to policyholders is $112,041.

* * *

OTTAWA FIRE INSURANCE COMPANY.

We were able to compliment the members of this company, a year ago, upon their plucky acceptance of a disagreeable situation by putting their hands in their pockets to the extent of $150,000 and paying their unusual losses in the conflagration year 1904. Having got its capital reduced, and a larger proportion paid up, the company is now "equal to either fortune." It has done a fairly satisfactory business during 1905, paid out $106,000 for fire losses and had surplus earnings of $20,974. In the profit and loss account we see an addition to reinsurance reserve, and what is more, the sum of $10,000 set aside to form the nucleus of a conflagration fund. This is a prudent thing to do, and evidently the management of the Ottawa, having been forewarned, are determined to be forearmed. The president considers the prospects of the new year good ones, and compliments his agents on their efforts. The company deserves well of its patrons.

* * *

THE BRITISH COLUMBIA PERMANENT LOAN AND SAVINGS COMPANY.

Editor "Monetary Times."

Sir,—In the January 5th issue of your paper appears a letter which was supposed to have been written by an old Ontario loan man now in the Maritime Provinces. I have made investigations as to the source of this letter and find that a part of it was written by the Maritime Province manager of a Toronto loan company and the balance was added at the head office before the letter was given to you for publication.

If the old line loan company which is responsible for the objectionable article will look back over the records of their own company, they will find that it was incorporated and operated for about twenty years as a building and savings society and that when ten years old, it had assets of $1,284,219 including a reserve of $22,104, whereas our company, which they undertake to criticize, has assets of $1,671,843, including a reserve fund of $50,000, at the end of eight years.

The manager of the old line company referred to above stated at the forty-fifth annual meeting of the shareholders of his company that the average annual dividend paid for the whole forty-five years was 11½ per cent., and during the first ten years it paid over 13 per cent. Surely this company cannot find fault with the British Columbia Permanent Loan and Savings Company for paying 9 per cent. to the holders of its $200,000 paid up permanent non-withdrawable capital, 6 per cent. to its full paid stockholders and 5 per cent. to its class "C" instalment stock, which matures a payment of $10.00 per month to $1,000 in seven years.

The Toronto company advertises for debentures at 4 per cent., deposits at 3½ per cent., and pays 6 per cent. on its permanent stock. The Dominion Government report for 1904 shows estimated average yield of mortgages and other securities 6.211 per cent.

Our company advertises for debentures at 5 per cent. and deposits at 4 per cent., and pays 9 per cent. to permanent stockholders. The Dominion Government report for 1904 shows our estimated average yield of mortgages and other securities to be 9.22 per cent. These figures show our earning power to be 3 per cent. greater than the other company and plainly shows why the Vancouver company can pay a higher rate of dividend to its permanent stockholders than is paid by the Toronto company.

Your correspondent insinuates that the "British Columbia Permanent" is like the York County Loan. In this he is greatly mistaken. The York County was run on the building society plan of taking expenses from stock payments. According to their by-laws, the company could use for expenses all of the first three months' payments and 20 cents out of each dollar received thereafter, whereas they issued certificates containing a promise to pay $50.00 in three years and 53 weeks for a payment of 25 cents a week. A school boy could figure out that out of $47.25 paid by the member only $35.20 would go to the loan fund. Add to this dividend at the rate of 5 per cent. per annum (as shown by the Government report for 1904) for the time the company had the use of the money, and find the book value to be $38.28, withdrawal value $50.00, loss on withdrawal of one share $11.22 to be covered by lapses or payments from new members. This system of paying withdrawals at a heavy loss has produced a big shortage. The instalment stock was the principal source of the company's income.

The British Columbia Permanent Loan and Savings Company only runs instalment stock as a side line, taking in from $12,000 to $14,000 per month on this stock out of a total income, running between $100,000 and $200,000 per month. We treat the first month's payment as a membership fee and use it for expenses (agent's commission), and afterwards place the full amount of each dollar in the loan fund and credit dividends at the rate of 5 per cent. per annum. During the term of three years $35.00 goes to the loan fund out of a total payment of $36.00 on one share. Add to this dividends credited at the rate of 5 per cent. per annum monthly compound interest, for the time the company has had the use of the money, and we find the book value to be $37.91. The withdrawal value is the full amount paid in with 3 per cent. monthly compound interest, total $37.71 as per withdrawal table shown on the stock certificate.

As our loans earn about 9 per cent. interest, we have a surplus of 4 per cent. on the earnings of each dollar of instalment stock for payment of general expenses and additions to reserve. The Government inspector's report, as well as our new financial report which appears in another part of this paper, will show that our company pays expenses, dividends and fixed charges from actual earnings, and should convince the old Ontario loan man who is now in the Maritime Provinces that the statement made by a prominent bank manager in Vancouver to the effect that our company is following sound methods and is conducted by honorable business men entitled to the fullest confidence, is correct.

By again referring to the article published in the St. John paper, he will find that it is headed in big black type: BRITISH COLUMBIA'S BEST FINANCIAL INSTITUTION, and a little further down the name of the company in full. Surely it cannot be said that we are trying to trade on the reputation of a well-known Toronto company, when it is made so clear that the company is a British Columbia institution. In fact, we feel proud of having built up in British Columbia the largest loan company in Canada west of Toronto.

Toronto, which is probably the greatest city for headquarters of loan companies on the American continent, has only eight companies reporting to the Dominion Government for the year 1904 with greater assets than the "British Columbia Permanent" had at the end of 1905, and only three of these credited a greater amount in dividends to shareholders in 1904 than our company did in 1905.

Yours truly,

THOS. P. LANGLOIS,
Manager.

Vancouver, B.C., 5th February, 1906.

BRITISH COLUMBIA SALMON PACKERS.

The British Columbia Packers' Association (through Æmilius Jarvis & Co., Toronto) has issued a circular to its preferred shareholders, stating the company's financial situation, and proposing to pay arrears of dividends on a 4 per cent. basis. A syndicate of preferred shareholders has given a guarantee to the banks, so that it was not necessary to sell the bonds, but only to hypothecate them with a trustee as security for this guarantee and for the credit of $1,700,000 granted by the company's bankers. The preferred shareholders are entitled to a 7 per cent. accumulation dividend from May 29, 1902, of which only 3½ per cent. was paid for the first six months. It is now proposed that the shareholders should accept a 4 per cent. rate from May 20, 1902, to May 20, 1906, 16 per cent., crediting on this the 3½ per cent. The circular states that of the full pack of salmon made last year, enough has been sold to pay off a loan secured for working capital, so that the association is now out of debt and has a substantial surplus in unsold salmon, from which it is hoped to realize sufficient to pay the suggested dividend. Of course, the ability to carry out this proposal depends largely on the result of such sales before May 20th next, the officers purposing, of course, to maintain sufficient working capital.

* * *

KENTVILLE BOARD OF TRADE.

The Kentville Board of Trade held its annual meeting recently and elected the following officers:—President, G. E. Calkin; vice-president, D. J. Murphy; secretary-treasurer, F. C. Rand; council, W. P. Shaffner, J. W. Regan, H. D. Burns, R. C. Dickey, W. E. Porter, A. E. Calkin, H. M. Bain, C. O. Allen. The president discussed the proposal to harness the Gaspereaux River, which is capable of giving from ten to fifteen thousand horse-power, and making it available for industrial purposes.

* * *

ROULEAU BOARD OF TRADE.

On the 5th inst. a largely attended meeting was held at Rouleau, Saskatchewan, for the purpose of organizing a board of trade for that district. The business men of Rouleau, like most of their brethren in the West, are very enthusiastic in their efforts for the progress of the place, and without doubt a board of trade will do much in this direction by concentrating effort. The following were the officers elected for the initial year:—President, T. J. How; vice-president, A. E. Westbrook; secretary, P. Murphy; treasurer, R. A. Webster; council, J. H. Craig, H. A. Hastings, Dr. A. C. McKean, S. R. Johnston, Henry Boulding, Thomas McKee, B. C. Jaques, and Martin Roddy.

* * *

AETNA LIFE INSURANCE CO.

This well-known company has issued a condensed statement of its transactions for 1905, which is interesting. The reputation of the Ætna as a sound life underwriting company has long been firmly established; but not every one knows that it also does accident liability and health insurance. There is no larger company in the world, we believe, doing all these three descriptions of business, and it has strength enough to deal with them all. The assets amount to the great sum of $79,247,000, and it has a guarantee fund of $7,000,000 in excess of requirements. It has paid to policyholders since organization $153,000,000. The steady growth of the company's business has been continued during 1905, for there is shown an increase in assets of $5,551,325; increase in premium, $859,696; increase in total income, $1,028,913; increase in life insurance in force, $13,553,576; increase in accident insurance in force, $7,861,854. The chief agents of the Ætna in Canada are W. H. Orr & Sons, Toronto, and T. H. Christmas, Montreal.

BANKING AND FINANCIAL.

Last week a seat on the Montreal Stock Exchange was sold for $22,500, the purchaser being Mr. C. Simpson Garland. There is said to be one more seat available besides the five held by the Exchange at $25,000.

The annual meeting of the Empire Trust Company was held in Halifax on Wednesday, February 7th. The named gentlemen were elected directors for the ensuing year:—J. Y. Payzant, W. A. Black, W. B. A. Ritchie, Hon. Wm. Chisholm, S. M. Brookfield, G. S. Campbell, W. J. Clayton, M. A. Curry, M.D., Rufus Curry, Guy C. Hart, A. MacKinlay, F. B. McCurdy, H. N. Wallace, John McNab, Hon. G. H. Murray, J. C. O'Mullin, B. F. Pearson, O. E. Smith, W. J. G. Thomson. Mr. Payzant is president, Messrs. W. A. Black and W. B. A. Ritchie vice-presidents.

Thirty years ago, the British Canadian Loan and Investment Company was formed in Toronto, and if we do not mistake Sir A. T. Galt was its first president, but in later years Mr. A. H. Campbell occupied that position. The business of the company has been neither aggressive nor very profitable of late years, and it has been now decided to close up its affairs. Efforts have been made within a year or two to realize upon the assets, and it is now claimed that the shareholders will be paid one hundred cents on the dollar. It is not, however, intended to surrender the charter. The company has a Dominion charter, with a capital stock of $2,000,000, of which 20 per cent. has been paid. There was a good deal of Scottish capital in the company, and it owed a year ago $334,000 on debenture.

The keen competition between banks in some of our Western cities leads sometimes to little pleasantries. One of the younger banks had succeeded in securing as a customer a soap manufacturing concern about whose affairs there had been some conflict of opinion in a private way. The bank was not very long in discovering that they might have been as well without the addition on their books. Some few weeks later representatives of two of the competing banks happened in at a club in the city. On proceeding to the wash-room one manager—who had not secured the customer—seeing that his banker friend had an over-supply of cakes of soap in front of him—and finding none anywhere about—was tempted into one of those remarks that are, perhaps, sometimes better left unsaid, and blurted out: "I say, old man; you seem to have rather a monopoly in the soap way." The reply vouchsafed was only from the eyes.—Exchange.

INSURANCE ITEMS.

The Railway Passengers Assurance Co., of which Mr. F. H. Russell is the Canadian manager, has just removed from the Bank of British North America building to the new Home Bank Building, on King St., West.

Some of the "T. I. P. Pointers" to men and brethren at the New Year time are worth reproducing now. For instance: If you began the year right, keep on; if not, begin over.—Do the hard things first.—To earn more learn more.—The smileless face makes a successless agent.—Keep on pushing to the front—door.—Work by your conscience and not by the clock.

Here is something worth remembering: The heavy losses sustained by insurance companies in Nashville, Tenn., is said to be due to the fact that the brick used there is peculiarly susceptible to damage by fire, owing to the large percentage of iron in the clay from which it is made. It is said that when this is exposed to intense heat it is apt to break or crumble, thus materially increasing the building losses.

The Detroit Conference assembles in that city on 28th February. Among the items on the agenda, we notice a paper upon "Insuring Housewives," by G. Leonard McNeill, and one by Horace W. Corey, on "How may a company best find protection against irresponsible and unreliable agents?" There is also a paper promised by E. J. Adams, of Grand Rapids, Michigan, on the subject of "Insurance Litigation."

The Halifax Fire Insurance Company, which is almost a hundred years of age, held its annual meeting on February 5th, when the retiring directors were re-elected. The board consists of William Roche, M.P., C. W. Anderson, John Macnab, Henry G. Bauld, W. N. Wickwire, M.D., E. G.

Smith, E. J. Longard. At a meeting of directors, held immediately after the annual meeting, William Roche, M.P., was elected president; C. W. Anderson, vice-president; Thomas Goudge, secretary and treasurer.

* * *

A correspondent of an Eastern journal writing from Chicago a week or two ago expressed the opinion that the prominence given to Dr. Osler's theory upon the advisability of chloroforming men above the age of 60 has had its effect on suicides above that age. The figures for 1905, as far as regards the city of Chicago, showed an increase of 25.8 per cent. over the figures of 1903 for the suicides of men between 60 and 70 years old, and of 11.4 per cent. over the number of 1904. Between the ages of 70 and 80 there was an increase of suicides equal to 33 1-3 per cent.

—The Grand Trunk Pacific Railway Company, which offered a prize of $250 to the person sending in the best name for the city which is to be established at its western terminus on the Pacific Coast has selected "Prince Rupert." The prize went to a Winnipeg woman.

* * *

—A special meeting of shareholders of the C. P. R. is to be held in Montreal on the 19th March, for the purpose of discussing the recommendation of the directors to increase the ordinary share capital of the company to one hundred and fifty million dollars. In view of the great increase in the company's business and its continued expansion it is felt desirable that immediate provision be made for still further increasing the facilities of the company on every section of its system. The directors have, therefore, decided, subject to the approval of the shareholders, to make an issue immediately thereafter of $20,280,000 of primary capital stock, being $8,600,000 already authorized by the shareholders, and $11,680,000 of the proposed increase, thus making the total amount outstanding $120,680,000, and, as in the case of previous issues of new stock, to give the shareholders of the ordinary capital stock the privilege of subscribing for the same at par, in the proportion of one share of new stock to five shares of their registered holdings.

* * *

—At a meeting a few days ago of the new managing committee of the Corn Exchange Association in Montreal, it was decided to address the Minister of Marine and Fisheries regarding the necessity for reform in the pilotage system on the St. Lawrence; also to petition the Dominion Government for a remission of the canal tolls during the forthcoming season. The hope also was expressed that these tolls would be absolutely abolished.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, February 15th, 1906, as compared with those of the previous week:

	Feb. 15th.	Feb. 8th.
Montreal	$32,253,290	$31,778,287
Toronto	22,092,625	23,093,630
Winnipeg	6,190,160	6,703,735
Halifax	1,470,412	2,370,826
Hamilton	1,060,018	1,300,308
St. John	995,021	1,158,538
Vancouver	1,798,087	1,897,394
Victoria	795,138	826,469
Quebec	1,541,684	1,973,706
Ottawa	2,021,812	2,697,616
London	987,910	1,138,774
Total	$71,206,157	$74,939,283

FORT WILLIAM BOARD OF TRADE.

At the annual meeting of the Board of Trade the election of officers for the ensuing year resulted as follows: President, J. R. Lumley; vice-president, C. H. Jackson; secretary-treasurer, E. R. Wayland, until the election of a paid permanent secretary is held. Committee—Messrs. G. W. Brown, W. Hogarth, Dyke, Jarvis, W. Stevenson, Pelletier, McCuish, Tonkin, Capt. Thompson, R. S Piper, and W. Black. The board has now a membership of seventy.

* * *

WINDSOR BOARD OF TRADE.

On Tuesday evening last, 13th instant, the annual meeting of the Windsor, Ont., Board of Trade was held. The work done the past year by the officers was regarded so satisfactory that the entire number were re-elected for another year. The board has gained twenty-three in membership during the year, and has a snug balance in bank to its credit.

Meetings

NATIONAL TRUST COMPANY, LIMITED.

Annual Meeting of Shareholders.

The eighth annual general meeting of the shareholders of the National Trust Company, Limited, was held in the company's board room, 20 King Street East, Toronto, on Wednesday, 14th day of February, 1906.

Among those present were the following:—Sir Thomas Taylor, Senator Cox, J. W. Flavelle, Alex. Bruce, K.C., Chester D. Massey, William Davies, David Smith, Robert Kilgour, H. H. Fudger, Cawthra Mulock, E. W. Cox, B. E. Bull, Alex. Laird, W. T. White, H. L. Watt, W. E. Rundle, Geo. A. Morrow, Geo. Gouinlock, E. C. Norsworthy.

The president, Mr. J. W. Flavelle, was in the chair, and Mr. W. T. White the general manager, acted as secretary to the meeting.

The secretary read the eighth annual report of the directors, and the financial statement, which is as follows:—

Report.

The directors have pleasure in submitting herewith their eighth annual report showing statement of the assets and liabilities of the company as at 31st December, 1905, together with the profit and loss account for the year ending on that date.

The net profits after providing for all cost of management, salaries, advertising, auditors' fees and other expenses, amount to $112,819.78. The sum of $4,424.02 brought forward from 1904 makes the total at credit of profit and loss account $117,243.80, which has been appropriated as follows:—

(a) To pay four quarterly dividends at the rate of 6 per cent. per annum, amounting to $60,000.00.

(b) To increase reserve fund $50,000.00.

(c) To carry forward in profit and loss account $7,243.80.

The reserve fund now stands at $400,000.00.

Respectfully submitted,

J. W. Flavelle, President.

FINANCIAL STATEMENT, DEC. 31st, 1905.

Assets.

Transferred from profit and loss	50,000 00
	$400,000 00

W. T. White, General Manager.

The president in moving the adoption of the report said:—

The shareholders will, I think, find cause for satisfaction in the result of the year's business, as shown in the report of the directors. The net earnings exceed those of the previous year by over $20,000, and represent 11.28 per cent. upon the paid-up capital of the company. Out of these earnings, after payment of a 6 per cent. dividend, the sum of $50,000 has been added to reserve, which has now reached $400,000, or 40 per cent. of our capital. Throughout the year there was a continuous and most gratifying increase in the company's business in all its departments and at all its offices. At the head office and in Montreal many important financial transactions were, and are now being carried out, through the company as trustee, and the year's addition to our transfer agencies has been marked. As evidencing the progress of the country's development it is interesting to note that the company during the past year was appointed trustee under mortgage securing railway and other bond issues aggregating over $35,000,000.

No department of our business receives more careful attention than that which deals with estates, and the confidence reposed in the company by the public in this regard is evidenced by the large and constantly increasing body of assets under our charge as executor, trustee and administrator. Owing to the increase in the volume of our business and the staff required to handle it properly, it has been found necessary to enlarge the offices of the company at its head office, and the alterations are now being made. When these are completed the company hopes to have large and commodious offices, with new safe deposit vaults ample for our requirements for many years to come. With regard to our offices at Winnipeg and Edmonton, business has continued most satisfactory. The mortgages held by us in Manitoba, Saskatchewan and Alberta have been well selected and interest collections have been uniformly good. Early in the year the company purchased the valuable office site which it now occupies in Edmonton, and, more recently, a prominent corner lot in Saskatoon, where it is our intention to build and open an office during the coming year, our present loaning operations and prospects in Saskatchewan making such a step advisable in the company's interests.

Having regard to the large and increasing earning power of the company and the fact that its reserve has now reached such substantial figures, your directors are of opinion that the dividend might well be increased to 7 per cent. during the coming year. It has been thought advisable that this announcement should first be made to the shareholders at this meeting.

Turning to the statement of assets, you will observe that the aggregate held on both capital and trust account at the end of the year was $9,420,865.08. Of this total the company owns $1,473,374.46, and holds $3,409,676.23 on guaranteed trust account. The balance, amounting to $4,537,814.39 is under our charge as executor, trustee, or agent. Outside of our holdings of real estate, consisting of office premises only, the company's own and guaranteed investments are in mortgages, bonds, stocks and debentures, and in loans upon approved collateral. The proportions in which these several assets are held will, I think, assure the shareholders of the company's strong financial position and the readily available or liquid character of its securities.

All the offices of the company have contributed their share towards the gratifying result shown by the report, and the board takes pleasure in acknowledging the services rendered by the resident directors of Montreal, the advisory board at Winnipeg, and the officers of the company at its several branches during the year.

I move, seconded by Senator Cox, the adoption of the report.

The report was unanimously adopted.

A vote of thanks to the general manager and staff of the company was passed, after which the following were elected directors of the company for the ensuing year:—

President—J. W. Flavelle, managing director The Wm. Davies Company, Limited, director Canadian Bank of Commerce.

Vice-Presidents—Z. A. Lash, K.C., of Messrs. Blake, Lash & Cassels, barristers. E. R. Wood, vice-president and managing director Central Canada Loan Savings Company; director Grand Trunk Pacific Railway Company.

Hon. Mr. Justice Britton.

Hon. Geo. A. Cox, senator, president Canadian Bank of Commerce.

Geo. H. Watson, K.C., of Messrs. Watson, Smoke & Smith, barristers.

Chester D. Massey, hon. president Massey-Harris Company, Limited.

Elias Rogers, director Imperial Bank of Canada.

Robert Kilgour, vice-president Canadian Bank of Commerce.

F. W. Gates, Hamilton, president Hamilton Gaslight Co.; vice-president Canada Life Assurance Company.

James Crathern, Montreal, director Canadian Bank of Commerce.

H. S. Holt, Montreal, president Montreal Light, Heat & Power Company; director Royal Bank of Canada.

H. Markland Molson, Montreal, director Molsons Bank.

Alex. Bruce, K.C., Hamilton, of Messrs. Bruce, Bruce & Counsell, barristers.

E. W. Cox, general manager Canada Life Assurance Company.

H. H. Fudger, president The Robert Simpson Co., Limited; president The Goldsmiths' Stock Company, Limited.

H. B. Walker, agent Canadian Bank of Commerce at New York.

A. E. Kemp, M.P., president Kemp Manufacturing Company, Limited.

William Mackenzie, president Canadian Northern Railway Company; president Toronto Railway Company.

J. H. Plummer, Sydney, N.S., president Dominion Iron & Steel Company.

Alexander Laird, assistant general manager Canadian Bank of Commerce.

Cawthra Mulock, esquire, Toronto.

Advisory Board—Winnipeg Office:—

I. M. Ross, Winnipeg.

Hon. F. W. G. Haultain, Regina, Sask.

Hon. J. D. Cameron, ex-Attorney-General for Manitoba, Winnipeg.

A. McT. Campbell, manager Canada Life Assurance Co., Winnipeg.

F. H. Phippen, of Messrs. Tupper, Phippen & Tupper, Winnipeg.

* * *

SHIPBUILDING IN BRITAIN.

The shipping now being built in British ship yards is greater in total tonnage than at any previous time. Such is the statement made in John White's annual shipping review, and it is added that most builders in the United Kingdom have work enough on hand to keep them going for the whole of 1906. The merchant tonnage built in 1905 was 1,700,000 tons, which comes very near to the highest previous yearly record. While the building of sailing ships has practically ceased there seems no end to the demand for steamers, and that not only from companies but from private firms. One firm has placed orders for steamers with a carrying capacity of 140,000 tons dead weight. The British mercantile marine has not ceased to grow, for there was added during the year 1,300,000 tons of steamers, and 60,000 tons of sailing ships, while during the same period there was removed from the register, including losses and vessels sold to foreigners, about 710,000 tons of steamers, and 210,000 tons of sailing ships, the result being a gain of almost 600,000 tons of steamships, and a loss of 150,000 tons of sailing vessels, the net gain being about 450,000 tons. The increase in steam tonnage amounted to about five per cent., but it is more marked by comparison with that of other nations, the British increase being greater than that of all other nations combined. There are now about 100 steamships of more than 10,000 tons each afloat, half of them belonging to Great Britain. In the matter of speed, however, Britain is not first. Of twenty steamships afloat with a speed of twenty knots or better, only nine are British owned.

First year premiums	309,907 97	35,898 02
Renewal premiums and single premiums	1,357,486 26	192,736 93
Interest and rents	283,813 47	46,053 59
Total income	1,945,840 31	286,732 61
Assets	7,189,681 66	1,077,337 09
Present value of all future obligations to policy-holders (reserve, Government standard)	6,201,905 00	946,828 00
Surplus on policy-holders' account	906,912 64	135,043 52

Safety is the first consideration in the investment of the company's assets. Yet the average interest rate for the year on the ledger assets amounted to 4.80 per cent., irrespective of profit from the sale of securities, which would increase the rate to 5.06 per cent.

The Canadian Pacific Railway Company

NOTICE TO SHAREHOLDERS.

A Special General Meeting of the Shareholders of the Company will be held at the principal office of the Company at Montreal on

Monday the 19th Day of March, next,

at noon, pursuant to the Act of the Parliament of Canada, 55-56 Victoria, Chapter 35. entitled "An Act respecting the Canadian Pacific Railway Company" for the purpose of considering and, if approved of authorizing an increase of the present authorized ordinary capital stock of the Company from one hundred and ten million dollars to one hundred and fifty million dollars, being an increase of forty million dollars, and of determining the amount or amounts and the time or times of the issue or issues of said stock, the purposes to which the proceeds thereof shall be applied, and of adopting such resolutions or by-laws as may be deemed necessary in connection therewith in order to enable the Directors of the Company to give effect to the same.

The Common Stock transfer books will be closed in Montreal, New York and London at 1 p. m. on Saturday, February 24th instant; the Preference Stock books will be closed in London on the same date

All books will be re-opened on Tuesday, April 3rd, 1906.

By order of the Board,

CHARLES DRINKWATER, Secretary.

The Standard Bank of Canada

NOTICE IS HEREBY GIVEN that it is the intention of The Standard Bank of Canada, after publication of this notice for four weeks in the Canada Gazette, and in the Monetary Times, a newspaper published in the City of Toronto, to apoly to the Treasury Board for a certificate approving of the following By-law of The Standard Bank of Canada:

"WHEREAS the Capital Stock of The Standard Bank of Canada is now One Million Dollars, and it is expedient that the same should be increased by One Million Dollars;

BE IT THEREFORE ENACTED as a By-law by the shareholders of The Standard Bank of Canada assembled at a special general meeting called for the purpose of considering and, if thought fit, of passing this By-law, and held in the Board Room of The Standard Bank of Canada, at the corner of Wellington and Jordan streets, Toronto, at 12 o'clock noon, on Tuesday, the thirteenth day of February, A. D. 1906;

1. THAT the Capital Stock of the Standard Bank of Canada be and the same is hereby increased by the sum of One Million Dollars, divided into twenty thousand shares of fifty dollars each.

IN WITNESS WHEREOF the Corporate Seal of the Bank has been hereto affixed, and this By-law has been countersigned by the President and General Manager, this 13th day of February, A. D. 1906.

[SEAL] (Sgd.) W. F. Cowan,
President.

THE CROW'S NEST PASS COAL CO., LIMITED.

A meeting of the shareholders of the Crow's Nest Pass Coal Company, Limited, was held at the offices of the company, Manning Arcade, Toronto, on Friday, the 9th day of February, at which there was a large attendance. Senator Cox occupied the chair. The report of the directors and the financial statement presented are as follows:—

Report.

The directors beg to submit to the shareholders of the company their ninth annual report including statement of assets and liabilities, as of 31st December, 1905.

The balance at the credit of profit and loss account brought forward from 1904 amounts to $203,320.44. To this has been added the sum of $497,898.68, being the company's net profits from the operations of the year; also the sum of $35,400, representing the premium received from final payments on the stock last issued, so that the income of the company for the year is $533,298.68, and the aggregate to the credit of profit and loss account is $736,619.12. From this amount the directors have paid four dividends of 2½ per cent. each, making 10 per cent. for the year, amounting in all to $349,418.05; have transferred to the reserve fund the sum of $35,400, representing the income derived from the premium on calls on the new stock, and have carried forward to 1906 $351,801.07 to the credit of profit and loss account. This amount represents the net profits of the company from operations, after payment of dividends.

During the year there has been spent on improvements the sum of $209,576.55, the larger portion of the expenditure being at Coal Creek, as the result of the destruction of the wooden tipple by fire on the 11th day of March last. This structure was replaced by a modern steel tipple, dump and screening plant, capable of handling 4,000 tons of coal a day, at an expenditure of $196,000.

All of which is respectfully submitted.

G. G. S. Lindsey, General Manager.
Geo. A. Cox, President.

Toronto, 9th February, 1906.

GENERAL STATEMENT 31st DECEMBER, 1905.

Assets.

Transferred to reserve fund	35,400 00	
Balance carried forward to 1906	351,801 07	
		$736,619 12

E. R. Wood, Treasurer.

Toronto, 9th February, 1906.

I have examined these statements of profit and loss, and of assets and liabilities, also the books and vouchers of the Crow's Nest Pass Coal Company, Limited, and find the same correct.

J. G. Langton, Auditor.

Toronto, 9th February, 1906.

In moving the adoption of the report the president, among other things, said:—

"In connection with the report just read, I would like to call your attention to the figures indicating the coal and coke production of your company since its inception, which are as follows:—

"In 1898	8,986 tons coal.	361 tons coke.
"In 1899	116,200 tons coal.	29,658 tons coke.
"In 1900	220,458 tons coal.	73,496 tons coke.
"In 1901	425,457 tons coal.	125,085 tons coke.
"In 1902	441,236 tons coal.	120,777 tons coke.
"In 1903	661,118 tons coal.	167,739 tons coke.
"In 1904	742,210 tons coal.	245,118 tons coke.
"In 1905	831,249 tons coal.	257,702 tons coke.

"On the 11th March, 1905, the wooden trestle and tipple at Coal Creek, constituting the company's whole machinery for handling coal at that point, were completely destroyed by fire. The structures were well insured, so that the direct loss to the company was comparatively small, although our operations were quite seriously retarded at this point during the remainder of the year.

"The changes in the organization, to which attention was called in last year's report, have worked out advantageously, and our present force is an effective and efficient one, working harmoniously in the best interests of the company. The feeling of the miners towards the company is good, and in March last, a new agreement extending two years from April 1st was entered into with them.

"In looking over our balance sheet for the year, I find that our statement of assets and liabilities is practically unchanged, and I will take the liberty of reminding you again that these fixed assets are made up almost entirely of cash investments in plant and development, and that the great bulk of our coal areas can hardly be said to have any representation among them.

"In this connection the directors have had under consideration for some time a plan for reorganization of the company, so as to bring its nominal capital more in line with the actual value of the company's holdings, and it is hoped that at an early date a special general meeting of this company will be called, at which will be laid before the shareholders a plan having this for its object, and which they will be asked to consider and approve of.

"The information submitted to the shareholders to-day will, I venture to hope, be regarded as highly satisfactory, and it would be an injustice to Mr. Lindsey, the managing director, if I failed to place on record and to tell the shareholders how deeply indebted the directors feel to him for the splendid work he has done for the company during the past three years. When he assumed the management there were a number of important matters requiring capable, careful and special attention, and these have all been placed upon a satisfactory basis by the able and untiring efforts of our managing director. In no way has he rendered the company more valuable service than in the selection of the excellent staff of officers with which he has perfected his organization.

"Mr. R. G. Drinnan, general superintendent of the company, has conducted its mining operations during a very trying year with great credit. There has been effected a not inconsiderable reduction in the cost of coal, notwithstanding the difficulties and extra expenses resulting from the disastrous fire at Coal Creek in the early part of the year.

"The company's system of keeping accounts is as perfect and elaborate, your directors think, as that of any coal company in America, and reflects great credit on Mr. Davies, the comptroller, who has brought this department of the company's business up to its present excellent standard."

J. G. Langton was appointed auditor.

A cordial vote of thanks was tendered to the officers of the company for their services during the past year.

The following directors were elected:—Hon. Geo. A. Cox, Robert Jaffray, Lieut.-Col. Sir Henry Mill Pellatt, K.B.; William Fernie,. Lieut.-Col. J. D. Chipman, David Morrice, Thomas Walmsley, E. R. Wood, Lieut.-Col. Jas. Mason, Messrs. Frederic Nicholls, G. G. S. Lindsey, C. C. Dalton and James W. Woods.

At a subsequent meeting of the directors, Hon. Geo. A. Cox was elected president; Robert Jaffray, Lieut.-Col. Sir Henry M. Pellatt. K.B., and G. G. S. Lindsey, vice-presidents, and E. R. Wood, treasurer.

* * *

—Some rich finds of gold are reported from Eagle Lake and from the Laurentian mine in the Manitou district of Western Ontario, perhaps one hundred miles from Rat Portage. In the El Dorado mine, Eagle Lake, the gold on the wall of the vein is described as being half an inch in thickness. At the Baden Powell mine, the average of many assays taking ore all the way down to 1,100 ft. is said to be $28 per ton. As a result of these reports, many enquiries are being made respecting the Manitou and Eagle Lake districts.

BRITISH COLUMBIA PERMANENT LOAN AND SAVINGS COMPANY, OF VANCOUVER.

Eighth Annual Report.

To the Shareholders:—

In presenting the eighth annual statement of the affairs of the company, the directors feel confident that the shareholders will be gratified by the evidences of prosperity and progress shown by the statement herewith submitted. The assets have been increased during the year from $1,400,777.17 to $1,671,843.05, making a total increase for the year of $271,065.88.

The paid-up capital of the company is now over $1,000,000.

The earnings of the company for the year were $127,007.44, and profit on withdrawals, $6,194.57, total, $133,202.01, an increase of $30,028.48 over the previous year. All dividends, expenses and fixed charges were paid out of earnings, and the sum of $1,161.62 carried to contingent fund, leaving a surplus of $5,010.65.

Ten per cent., amounting to $435.90, was written off furniture and fixtures, and $1,657.33 off real estate, to cover depreciation. All premiums received from sale of Permanent stock have been placed in reserve and contingent funds.

Your directors have declared a dividend at the rate of nine per cent. per annum on class "A" Permanent stock, and have credited the usual dividends to class "B" full paid stock, class "D" prepaid stock, and to the various issues of class "C" accumulative stock dividends sufficient to mature the shares in the time estimated, thus continuing the policy adopted some years ago, of first crediting as profits the full amount of dividend necessary to fulfil all promises to shareholders, and keeping expenses of management within the amount left after payment of dividends.

The securities on which our loans were made during the year have been carefully selected, and the cash receipts from mortgagors have been most satisfactory. Five hundred new loans were made during the year, making a total of one thousand seven hundred and fifteen loans now on the books of the company, averaging $860.50 each. The total appraised value of property now under mortgage to the company is $3,280,656.65, thus giving the company security to the extent of $2.22 for each dollar loaned, which is equal to loaning 45 per cent. of the value. All of these loans have been made on improved revenue producing properties.

The demand for loans still continues away in advance of our supply of funds, thus enabling the company to make profitable use of all money received from sale of the stocks and debentures of the company.

As a result of the steady, solid progress made by the company, the value of Permanent stock has advanced from one hundred and forty dollars to one hundred and forty-seven dollars per share, thus giving our company third place amongst the loan companies of Canada.

During the year the sum of twenty-five thousand dollars was added to the reserve fund. The reserve, contingent fund and surplus profits combined now amount to $75,010.65.

Early in the year your directors found that the earnings were more than sufficient to fulfil all obligations to shareholders and to the public, and decided to reduce interest on all mortgage loans, on which payments were made up to date, to 8 per cent. The reduction took effect on July 1st, 1905, and reports have been received from a large number of borrowers, to the effect that they were highly pleased with the treatment accorded them by the company.

We desire to call the attention of our shareholders to class "D" prepaid stock, which provides a splendid investment for surplus funds.

The progress made is highly satisfactory to the directors, and will, we trust, be appreciated by the shareholders. Our prospects for the new year are very bright, and we expect a further substantial increase of assets and earnings before the close of the year.

THOS. T. LANGLOIS, President.

Vancouver, B.C., January 11th, 1906.

Vancouver, B.C., January 10th, 1906.

We have audited the accounts of the British Columbia Permanent Loan and Savings Company, from 31st December, 1904, to 30th December, 1905, and find the transactions of that period accurately recorded in the books of the company; the receipts accounted for; the investments duly authorized, and receipts for all payments produced. We have made a careful examination of the mortgages and have verified the balances in the bank and the cash on hand at 30th December, 1905.

The statement of receipts and expenditures, and also the statement of assets and liabilities are properly drawn up, so as to exhibit a correct view of the affairs of the company.

Wm. T. Stein, C. A.,
A. A. Boak,
Auditors.

GOVERNMENT INSPECTOR'S REPORT.

Vancouver, Canada, January 10th, 1906.

I hereby certify that I have examined the balance sheets and dividends of the British Columbia Permanent Loan and Savings Company, as given herewith, and find the same in accordance with the by-laws of the company, and the laws of the Province. I have also examined the statements submitted to me, upon which are based the profits of the half-year, and upon which dividend No. 15 is declared, and I approve of the principle upon which such dividend has been computed, and, consequently, sanction the payment of the same in accordance with Sec. 52, Chap. 22, Vic. 60.

C. Gardiner-Johnson,
Inspector Investment and Loan Societies.

SHERBROOKE BOARD OF TRADE.

On the evening of Thursday, February 8th, was held the annual meeting of the Sherbrooke Board of Trade. The only business that came before the meeting was the nomination of office-bearers for the coming year. Dr. Bachand was nominated for president, and W. B. Neil, for vice-president, and were declared elected. These gentlemen held the same offices last year. The names of about twenty members were then put in nomination to serve on the council, and at a meeting to be held about 1st March ten of these will be chosen to form a council.

OTTAWA FIRE INSURANCE COMPANY.

Sixth Annual Report.

The directors have pleasure in presenting the sixth annual report and statements of the company's accounts for the year ended 31st December, 1905.

The net premium income for the year shows an increase of $6,439.45 over last year.

Fire losses for the year were about 57½ per cent. of the net premium income. Investments in debentures show an increase of $21,000, and a further payment of $5,000 in reduction of mortgage on real estate has been made.

With the view of lessening the probabilities of calls having to be made to meet possible conflagrations, the directors have set aside $10,000 as the commencement of a conflagration contingency fund, which can be added to year by year as the profits admit.

All of which is respectfully submitted.

Charles Magee, President.

STATEMENT AT 31st DECEMBER, 1905.

Revenue.

Premiums	$258,911 25		
Deduct reinsurance, rebate, abatement and return premiums	75,775 79	$183,135 46	
Interest on investments and rents received		6,878 79	$190,014 25

Expenditure.

License fees	$ 4,048 39	
Fire losses and loss expenses	106,063 76	
Commissions and expenses of management	58,927 51	169,039 66
Surplus of earnings for 1905		$ 20,974 59

Profit and Loss Account.

Credit balance on 31st December, 1904	$ 381 62	
Surplus of earnings for 1905 from revenue account	20,974 59	$ 21,356 21

Appropriated as follows:—

Provision for additional liability for Government reinsurance reserve owing to increase of net premium income over previous year	$ 4,459 92	
Written off office furniture, Goad's plans and stationery	1,050 87	
Amount carried to the credit of conflagration contingency fund	10,000 00	
Credit balance carried forward	5,845 42	$ 21,356 21

I hereby certify that the books of the company have been audited by me; that the vouchers and securities have been examined up to 31st December, 1905, and I find the whole carefully kept and correct.

Jas. F. Cunningham, F.C.A., (Can.).

Ottawa, 7th February, 1906.

President's Address.

The statement we have presented to-day is in every way, I think, an encouraging one. The net premium income is a little more than the previous year. This, the directors consider, a very satisfactory feature, as owing to a general reduction of limits upon risks on nearly all classes of commercial hazards, it would not have been surprising if the net premium income had shown a decrease instead of an increase. The character of the risks held by the company is constantly improving, through careful inspection and the benefit of previous experience.

You will notice that we have added to our reserve for unearned premiums in accordance with the Dominion Government standard $4,459.92, increasing the reserve to $121,148.46, and have made a new departure in setting aside, out of the profits, the sum of $10,000 to form the nucleus of a conflagration fund, and it is hoped that in future years the board of directors who hold office may be able to increase this fund, so that the company will be in a position to meet any such disasters as have occurred in the past, without any undue strain.

The fire losses, I must confess, have been somewhat disappointing, and had it not been for some severe losses during the last days of December, the net profits would have been about $6,000 more. I am glad to say the prospects for the present year are good.

The company is fortunate in having first-class agents, and they all manifest an increasing interest in its welfare and bear testimony to the high standing of the company throughout the Dominion, as well as in Newfoundland.

The president moved, seconded by Mr. C. Berkeley Powell, that the directors' report and financial statement just read be received and adopted.—Carried.

Mr. Jas. F. Cunningham was re-appointed auditor for the ensuing year.

The board of directors were unanimously re-elected with the addition of Mr. Benjamin Rothwell, as follows:—C. Jackson Booth, Hon. W. C. Edwards, (Senator), Allan Francis, Chas. Magee, Denis Murphy, W. S. Odell, C. Berkeley Powell, C. C. Ray, C. Ross, Bennett Rosamond, Benjamin Rothwell.

At a subsequent meeting of the board, Mr. Chas. Magee was re-elected president, and Messrs. C. Berkeley Powell, and C. Ross were re-elected first and second vice-presidents respectively.

A SO-CALLED INSURANCE COMPANY.

The Montreal "Witness" of recent date has an editorial on the Toronto Life Insurance Company, which it seems has the effrontery to solicit subscriptions to its stock in that city. This is the concern which has been described as one of the patent attachments to the York County Loan Company, now in the hands of the courts. We quote portions of the "Witness'" article:—

"It cannot be too forcibly impressed upon the people of this country that insurance, which is to form a safeguard for the home and family in the uncertain future, must be insurance with a company of unqualified prestige and record. To-day, Canadian insurance companies holding a Dominion charter are in a position of strength that speaks well for the individual management of the companies and the oversight of the Insurance Department of the Government. There are other companies, however, which only hold a provincial license, and among these is the Toronto Life Insurance Company, whose prospectus has been sent to us by a Montreal reader. It appears that this company is an Ontario company, but this has not prevented the agents of the company from soliciting subscriptions to stock in Montreal. It it unfortunate that Mr. Joseph Phillips, who is described as being the president of the company, is under a cloud in connection with the York County Loan and Savings Company. . . .

"The agent or agents of the Toronto Life Insurance Company, who are peddling capital stock of that company in Montreal, are asking $150 for a share whose par value is $100. That is to say, they are asking a premium of $50 a share. That shares of any life insurance company should be peddled around from house to house is in itself an extraordinary abnormality; and that a company of the character of the Toronto Life should demand fifty per cent. premium for its shares is equally extraordinary. The shares of a company do not increase in value until profitable dividends are in sight or have been paid. The Toronto Life Insurance Company, so far as we can see from its statistical returns to the Ontario insurance superintendent, has never paid a cent of interest on its capital, and its business would not seem to justify the sale of its stock at anything near par, let alone a premium. . . .

"We advised our readers not to put their savings into the York County Loan and Savings Company, and we even more strongly advise them not to invest in the stock of the Toronto Life Insurance Company. Surely it is the business of the Dominion Department of Insurance to follow up a case of this sort?"

* * *

—The Territorial Grain Growers' Association held their annual convention at Moose Jaw on the 8th inst. A interesting feature was the prophecy of Hon. A. Motherwell, Minister of Agriculture of Saskatchewan, who stated his belief that within five years all Southern Saskatchewan would be covered by settlers at the present rate of immigration, and that by that time it would have a surplus of wheat for export amounting to 100,000,000 bushels.

* * *

—The Consolidated Lake Superior Company's interests at the Soo appear to be in a highly gratifying condition. January was its banner month in rail-making, the quantity made having been 14,000 tons, all for the C. P. R. The company still has contracts for future delivery amounting to over 100,000 tons. Since starting in September 1904, over $500,000 worth of rails have been made for Canadian railways. It is stated that the company is now earning in net profits more than double the amount of $500,000, which is needed to pay the interest on the $10,000,000 of bonds which were issued when the company was reorganized. On May 1 next the Ontario Government will be relieved by the company of its guarantee. Arrangements have been made for resuming work on the Algoma Central Railway. The main line was extended about ten miles last year, and this year it is expected to build the remaining twenty-five miles to connect with the C. P. R. The experiments which are being carried on by the Dominion Government in the electric smelting of ores have been very encouraging.

Mercantile Summary.

An assignment has been made by J. H. N. Vezina, grocer, Quebec. He owes about $1,500, all locally.

Lefaivre & Taschereau, assignees, Quebec, are in charge of the estate of Emile Dumont, of Notre Dame du Lac, Que., a tinsmith by trade, who in 1903 also engaged in a grocery business, which has apparently proved his undoing.

The Home Life Association OF CANADA.

Annual Meeting.

The annual meeting of the Home Life Association of Canada was held at the office of the Home Life, Home Life building, Toronto, on Tuesday, February 13th, 1906, at 11 o'clock a.m.

The statement presented by the company to the shareholders was a most satisfactory one.

The total insurance in force at the close of the year was $6,161,017, an increase of nearly two and one-half millions over the previous year, after allowing for lapse and surrenders.

The cash premium income shows an increase of 27 per cent. over 1904, while 1904 showed a gain of 8 per cent. over the preceding year.

The interest-earning power of the company in 1904 amounted to $15,816.57 as against $26,545.16 in 1905.

The legal reserve had increased from $346,634.18 in 1904 to $602,019.73 in 1905.

The assets for the protection of policyholders now amounts to $1,534,405.37, while the total insurance in force amounts to $6,161,017.

On the 31st of December, 1904, the net ledger assets of the Home Life Association amounted to $467,593.46, while in 1905 they amounted to $668,073.95, a very gratifying increase.

The investments of the company are of an excellent character, and were submitted to the shareholders for inspection. The reserve and surplus amounted to $751,385.37, while the capital subscribed for the security of policyholders amounts to $783,020. The total assets for the security of policyholders amounted to $1,534,505.37.

The following directors were elected for the ensuing year:—Hon. J. R. Stratton, Rev. Wm. Briggs, D.D., John S. King, Esq., Toronto; George E. Amyot, Esq., Quebec; T. W. Boddy, Esq., Portage la Prairie, Man.;; J. K. McCutcheon, Esq., Toronto; E. L. Goold, Esq., Brantford; J. S. Hough, Esq., Winnipeg; D. W. Karn, Esq., Woodstock; J. H. Spencer, Esq., Medicine Hat, N.W.T.; Prof. J. F. Tufts, Esq., Wolfville, N.S.; J. W. Lyon, Esq., Guelph; James L. Hughes, Esq., Toronto; James J. Warren, Esq., Toronto; Rev. A. L. Gee, Brantford.

The following advisory directors were elected:—Hon. J. W. Longley, Halifax; Dr. J. R. Inch, Fredericton, N.B.; Thomas McCaffrey, Esq., Vancouver, B. C.; Ashmore Kennedy, Esq., Winnipeg; H. C. Graham, Esq., Brandon, Man.

At a subsequent meeting of the Board of Directors, Hon. J. R. Stratton was re-elected President, and Rev. Wm. Briggs, D.D., and John S. King, Esq., were re-elected Vice-Presidents.

The Anthony Wire Fence Company, of Canada, Limited, with head offices at Windsor, Ont., and a share capital of $100,000, has been incorporated. D. P. Anthony, of Tecumseh, Mich., is a prominent member.

The Great Western Power and Manufacturing Company, Limited, Peterborough, has been granted an Ontario charter. It will build flour and feed mills, make machinery, generate and distribute electric power and light. J. D. and W. McE. Flavelle, of Lindsay, are provisional directors.

A news item from Woodstock, Ont., states that a large portion of the stock of the Karn Piano & Organ Company, amounting to about $220,000, and formerly belonging to Dr. Adams, of Embro, which was placed on the market some time ago, has been purchased by Mr. W. R. Tudhope, of Toronto, who will now have a large interest in the company.

On the 8th inst., a large brick schoolhouse at Emerson, Man., was destroyed by fire, with a loss of over $12,000. The insurance amounted to between $4,000 and $5,000. On the same day a serious fire took place in Quebec City, whereby Drolet Co.'s and Crespault Co.'s dry goods stocks were badly damaged, the total loss being estimated at nearly $30.000. The loss is partly covered by insurance.

It is the opinion of Mr. H. G. Coram, superintendent of C. P. R. terminals at Fort William, that navigation of the lakes would be practicable until the end of the year. The company has an ice-crushing tug, he says, that can keep Fort William open without difficulty until the end of the year. The greatest difficulty would be in the Soo river at Mud Lake, where the ice could not move out after being broken by the crusher, but would, after being repeatedly broken, finally choke the channel and become impassable. Mr. Coram has no doubt that communication could easily be maintained between Lake Superior and Georgian Bay until the end of the year, and in the concluding weeks of the season many millions of bushels of grain could be forwarded.

The Montreal Street Railway have some large extension plans in view, to meet the large expansion which seems likely both in th population and area of that city. In the first place the company will shortly ask for authority to increase their capital stock to $18,000,000. It has already purchased a plot of land on which it will shortly erect an additional power house fully as large as the one on William Street, and capable of developing over 10,000 horse-power. Car barns also will be built capable of taking care of twice the present quantity of rolling stock, and plans are being made for all the other requisites of a greatly augmented service. The tracks, where not already done so, will be relaid with heavier rails. Altogether, it is calculated an expenditure of something like $5,000,000 will be needed.

BANKERS.

From the following list our readers can ascertain the names and addresses of bankers who will undertake to transact a general agency and collection business in their respective localities.

Mercantile Summary.

Into the harbor of Halifax came eleven ocean liners between Saturday afternoon and Sunday evening last, and customs, immigration and railway officials were kept as busy as ever they were in their lives. Many immigrants were brought.

An application by the Sudbury, Copper Cliff and Creighton Electric Railway for permission to run over part of the public highway, in spite of the permission of the municipality of Copper Cliff not having been granted, has been refused by the Railway Committee of the Ontario Government.

P. A. Desjardins, of Ste. Therese de Blainville, carrying on a grocery and liquor business, as well as a bakery, is offering his creditors 50 per cent. on their claims, aggregating $7,100. He first made a proposition to pay 25 cents, which was not entertained, so then he enlarged his offer.

K. Malouf & Bro., Montreal, Syrian jobbers of fancy goods, etc., have assigned on demand, with estimated liabilities of $11,000. E. Kaltine Malouf, the sole proprietor, claimed a surplus of $23,000 a year ago, but has since made losses, he claims, through endorsations and bad debts, and frequent suits were recorded against him of late.

The Canadian Hardware Association is protesting to the Government against the anti-dumping clauses of its late tariff bill. Hardware men claim it to be impossible of equitable application, an encouragement to fraud, an injustice to the honest importer, and an unwarranted restriction on freedom of purchase; also, that in its working tends to take trade from the Canadian wholesaler and give it to his foreign competitor.

Some people say that advertising is all a matter of luck; that you cannot tell what advertising is going to do, or whether or not it is going to pay. This may be true; but it is very strange that the man who gives intelligent thought to his advertising, and does it in an intelligent, earnest, straightforward way, usually has the luck on his side. He is lucky in his advertising because he reduces it to a science. Advertising is just as certain as paying rent. Advertising is governed by the same common sense business lines that govern buying a lot of tomatoes or codfish.—Grocery World.

Clarence Henderson, a grocer of New Glasgow, N. S., becoming involved, has made an offer of 30 cents on the dollar. He owes about $4,000, and his difficulties are said to be largely due to indiscriminate crediting.—The assignment is noted of Campbell & Tapsche, dealers in dry goods, etc., at the Coke Ovens, Sydney, N. S. They are Syrians, and the senior partner, whose real name is Jameal, Anglicized as above, recently figured as defendant in a law suit entered by a compatriot, who sued him for alienation of his wife's affections. They owe about $4,000.

Mercantile Summary.

Sherbrooke city council has decided to take proceedings to compel the Light, Heat and Power Company to sell its plant at a price to be fixed by arbitration.

A. Boutin, of St. Sebastien de la Beauce, Que., lately reported insolvent, is making an offer of 40 cents on the dollar.—P. Cote, harness-maker, Thetford Mines, Que., has arranged to pay 35 per cent. on liabilities of about $1,000.

An assignment on demand is made by Harry Papkin, of Montreal, doing business under the style of the British American Hat and Cap Manufacturing Co. It is estimated that the liabilities will about reach $10,000, and that the estate will pan out poorly.

Again a new hotel for London, Ont., worthy of the size and importance of the place is talked of. It is said the Grand Trunk Railway have a definite idea in this direction, and that plans are being prepared already. It would be in close connection with the proposed new depot.

The Western Canada Land Company has acquired half a million acres of land from the Canadian Pacific Railway in Edmonton district, the price being $2,080,000, less a certain discount for cash. The land is estimated to be worth from $6.50 to $15 per acre, according to its distance from the railway.

According to the Amherstbur "Echo," the Empire Tobacco Co. pai out $93,111 for tobacco at Harrow dur ing two recent weeks, while O'Brien, of Chatham, paid between four and fiv thousand dollars. During the same tim $4,335 was paid for pork. The farmer of Colchester township never were a well off as this year.

The Ontario Government has cancelled several pulp concessions in th neighborhood of the Montreal river Nipissing district, Lake of the Woods, etc., on account of non-fulfilment of terms. New tenders will be called to cover the lapsed concessions. In future these concessions will be open to public competition. A bonus must be paid in addition to the dues to be fixed by the Lands and Mines Department. From the bonuses alone the Government expects to receive several thousand dollars.

A despatch from Tilbury East states that the oil industry at Stewart, near that place in Kent county, Ont., is taking on a very promising appearance. The M.C.R. have ordered two of their fast trains to stop at Fletcher to let oil men and prospectors off and on, which is a great accommodation. Oil men have been coming in from Pennsylvania, West Virginia, New York, Ohio, Indiana and in fact from every oil field in America. It is agreed that the prospects are fair, but all find it a difficult matter to get territory.

The Dominion Transport Company has received authority to increase its capital stock from $500,000 to $2,000,000. Besides doing a carrying business, it is empowered to engage in manufacturing and cold storage, etc.

Mercantile Summary

John Wylie, of New York, is submitting a proposition to the city of Saskatoon, Sask., offering to instal a complete electric light and power service at that place, and he is asking for a franchise of five years.

Armstrong & Devlin have a contract with the Fernan smelting syndicate at Pilot Bay, B.C., to deliver from their zinc properties at Spillimachene, near Golden, B.C., 500 tons of ore for treatment in as short a space of time as possible. A double shift of men is now working the mines.

Applause greeted the introduction in the New Brunswick Legislature by Attorney-General Pugsley of a bill tha will enable Miss French and any othe woman who desires it and is qualified to enter on the practice of the law The judges whose decision had previously barred Miss French from admission were all present.

A company has been formed under the name of the Canadian Real Estate Company, to have, it is said, a total capital stock of $1,000,000, and the purpose of which is to purchase or lease or otherwise acquire, and to improve and cultivate lands, and to colonize the same. Robert Armstrong, J. W. Mitchell and others, of Toronto, are among the charter members.

Mr. G. H. Ryan, general manager of the Pelican and British Empire Life Office, is in consultation with the Egyptian Government on the matter of its pension fund, and will shortly proceed to the land of the Pharoahs in connection therewith. Mr. Ryan's accomplishments as an actuary doubtless gained him the distinction of this engagement.

Recent Montreal failures are noted among the smaller traders as follows: The British Canadian Clothing Co. has assigned on demand, and the business is being closed out.—Nolan Savage & Co., who bought out the bankrupt dry goods stock of J. O. Betournay, last year, subsequently also opening a branch business in Westmount suburbs, are reported as arranging a compromise at 60 cents on the dollar. F. A. Stephen, eighteen months in business as a retail grocer, has assigned on demand, owing $2,450.—E. Leonard, grocer, has assigned, owing $3,000.—P. Phaneuf has compromised liabilities of $2,450 at 50 cents on the dollar.—C. E. Beauchesne & Co., engaged in business in a small way as publishers of reprints of French novels, have assigned on demand.—Adelard Lebrun, boot and shoe retailer, has assigned to W. Lamarre, and shows apparent assets of $3,000 as against liabilities of $3,500.—A voluntary assignment is made by P. Massicotte & Co., grocer and patent medicine dealer in St. Catherine St. East, a business which apparently was largely dependent upon the trading stamp craze, lately declared illegal in Quebec.

Guarantee and Fidelity BONDS

are as necessary in business as fire insurance.

The smooth operation of a business system is liable to many interruptions, and recent reports would indicate that fire is not the only element which encroaches stealthily and makes devastating sweeps.

Every employer should protect his own interests under the form of insurance a guarantee bond affords.

Every employee in a trusted position should extend to his employer the protection and security a guarantee bond insures.

In this matter write or consult with the institution most widely and favorably identified with this class of business.

Mercantile Summary.

The Anthes Furniture Company, Limited, of Berlin, Ont., has been granted a charter by the Ontario Government. Among the prominent charter members of the new concern are J. C. Breithaupt and J. I. F. Anthes, both of Berlin, Ont.

The British Columbia Coal and Coke Company, Limited, of which as charter members the "Gazette" names several Toronto clerks, has been granted a Dominion charter authorizing it to prospect for and open up gold, silver, coal, and other mines. The capital stock authorized is placed at no less than $12,000,000.

The Canadian Pacific Railway has issued a circular to shippers announcing a reduction in rates from points east to points on the Prince Albert branch from Hague to Prince Albert. The reduction is due to the competition of the Canadian Northern, and is 25 per cent. on first class, with corresponding reduction in other classes.

A. Prud'homme & Fils (Limited), a company recently organized under Dominion charter, with a capital stock of $145,000, will acquire and take over as a going concern the business carried on in Montreal and elsewhere under the names of A. Prud'homme and Canadian Hardware Company. It will carry on a general hardware trading and manufacturing business, produce electric power, make and sell paints, oils, etc.

The large shops and car barns of the International Railway at Niagara Falls, Ont., were on the 12th inst., destroyed by fire, the loss running up to $125,000. The buildings had no fire protection. The shops and barns were headquarters for the Canadian division of the railway. There were complete machine, blacksmith, woodworking, paint and electric shops, all containing valuable equipment.

The Hamilton Cataract Power, Light and Traction Company held their annual meeting on the 12th inst. It was stated thereat that the radial extension from Burlington to Oakville would be opened on May 1st. Business for the year had been very good, and a dividend was declared of 5½ per cent. on preferred, and 3 per cent. on common. Col. J. M. Gibson was elected president; W. C. Hawkins secretary-manager. Total receipts last year were $878,163.

A fire which broke out in the carpenter shop of the Frost and Wood Company's works at Smith's Falls, Ont., on the 8th inst. developed into a disastrous conflagration, which speedily destroyed the large machine shop, with all its expensive machinery, the paint and carpenter shops, and also damaged some of the other buildings. The warehouse however, fortunately escaped. About three hundred men are thrown out of employment. The loss is figured at about $100,000, covered by insurance.

TOWN OF COLLINGWOOD
DEBENTURES.

Tenders are invited for the purchase of the following debentures:

1. Eight thousand, three hundred dollars ($8,300) Consolidated, Debenture Act 1899 and amendments thereto, interest calculated at 4½% repayable in thirty equal annual instalments of five hundred and nine dollars and fifty-five cents ($509.55) each, comprising principal and interest, payable on Dec. 1st each year, first payment Dec. 1st, 1906.

2. Eight thousand dollars ($8,000) Consolidated, Debenture Act 1899 and amendments thereto, interest calculated at 4½%, repayable in thirty equal annual instalments of four hundred and ninety-one dollars and thirteen cents ($491.13) each, comprising principal and interest, payable Dec. 1st each year, first payment Dec. 1st, 1907.

3. Six thousand dollars ($6,000) Good Roads Debentures, Schedule "B," interest calculated at 4½%, repayable in twenty equal annual instalments of four hundred and sixty-one dollars and twenty-six cents ($461.26) each, comprising principal and interest, on Dec. 1st each year, first payment Dec. 1st, 1905.

4. Six thousand Dollars ($6,000) Good Roads Debentures, Schedule "C," interest calculated at 4½%, repayable in twenty equal annual instalments of four hundred and sixty-one dollars and twenty-six cents ($461.26) each, comprising principal and interest, on Dec. 1st each year, first payment Dec. 1st, 1906.

5. Local Improvement, three thousand, two hundred and fifty dollars ($3,250), interest calculated at 4½%, repayable in twenty equal annual instalments of two hundred and forty-nine dollars and eighty-five cents ($249.85) each, comprising principal and interest, on Dec. 1st in each year, first payment Dec. 1st, 1906.

6. One thousand two hundred and fifty dollars ($1,250) Local Improvement Debentures, interest calculated at 4½%, repayable in twenty equal annual instalments of ninety-six dollars and ten cents ($96.10) each, comprising principal and interest, Dec. 1st each year. first payment Dec. 1st, 1905.

The above Debentures are guaranteed by the County of Simcoe.

Tenders to be given for each separate parcel. Successful tenderer to pay at par in Collingwood and the cost of forwarding debentures. Tenders to be addressed to the undersigned not later than February 20th, 1906.

The lowest or any tender not necessarily accepted.

G. E. McLEAN,
Chairman Finance Committee.

The engineering and manufacturing business of Darling Brothers in Montreal, is to be taken over as a going concern by a joint stock company, which has just been organized for the purpose. The capital stock authorized is $250,000.

At St. Irenee, in the Saguenay country lives Ernest Tremblay. He has just assigned to V. E. Paradis, of Quebec. Although in business in a small way since the spring of 1904, he is found now to owe $2,010, and his assets are unequal to paying it.

Mercantile Summary

The failure is noted of Akell Sheyn, a small Syrian trader, at Grand Mere, Que.

About $5,000 is the total obligation of Joseph Silver, in the clothing trade at Kingston, Ont., who has arranged a compromise at the rate of fifty cents on the dollar.

A voluntary assignment has been made by Emanuel Deguire, of Glen Robertson, Ont., formerly in the baking business, and latterly doing a small grocery trade.

As the result of the failure of the United Lumber Co., J. H. Forbes, contractor, of Montreal, who is a creditor of said company for some $3,000, has been obliged to assign.

An assignment has been made to H. Lamarre, a Montreal accountant, by J. D. Lafond, general merchant, at Frelighsburg, Que., near the Vermont line, who is estimated to owe $10,000. Lafond was originally engaged in selling pianos and organs at St. Brigide, and started storekeeping there in 1899, removing last year to his present address.

Upon the petition of a creditor a winding-up order has been granted in the matter of the United Lumber Co, Limited, of Montreal and Three Rivers. The company was incorporated in the autumn of 1904, having an authorized capital of $250,000, to take over and extend the business of the Three Rivers Planing Mill Co., but affairs do not appear to have been very well managed. Thomas Watson has been appointed liquidator.

We have received from Mr. John Armstrong, of Brigden, a thirty-year-old town in Lambton county, near the river St. Clair, a circular, of which the following is the main part. He has sold his stocks of general merchandise in Brigden and Bradshaw to his two sons, Arthur and Robert Armstrong: "I am retiring from the mercantile business, and take this opportunity of thanking you for the liberal patronage extended to me during the past twenty-eight years. Throughout this long period I have endeavored to meet the requirements of my customers and the general public by furnishing goods at the right prices. If it so happened that I was the only merchant in the village who had a certain line of goods for a few days, the price was never advanced in a single instance one cent. I have always refused to join cliques or combinations when approached by other merchants for the purpose of advancing prices. I have always contended that every tub should stand on its own bottom, and have governed myself accordingly. The volume of my trade has steadily increased since the inception of this business. My business for the past twelve months has exceeded by many thousands of dollars the turn-over of any previous year, and now when retiring from this business, I feel that the large trade built up warrants me in saying that my efforts have been appreciated. . . . My sons have experience and business training," adds Mr. Armstrong, "which I did not have to start with, as I was raised on a farm." Many of our most worthy and successful men were raised on the farm. Mr. Armstrong has no need to apologize.

* * *

TORONTO MARKETS.

Toronto, February 15th, 1906.

Dry Goods.—The seasonably cold weather has given a fresh impetus to trade. During January it seemed that some such impetus was needed in order to clear out stocks, and it was feared that the aggregate of trade would show a regrettable falling off. Judging by the satisfactory payments, however, of accounts due on the 5th, this cannot have taken place to any great extent. Prices on many lines of staple goods are firmer than ever. Linens have made still further advances in Old Country markets, and will, of course, have to be followed largely here.

Flour and Grain.—For ninety per cent. patents the ruling quotation for export purposes is $3.15, in buyers' bags, at outside points. Trading is quiet. There has been another cut in rolled oats. No great change has occurred in bran or shorts, while both continue in a strong position. Very little change has occurred in the grain markets. Oats and barley are fairly firm, and wheat is a little on the easy side.

Fruits and Vegetables.—There is no particular feature calling for comment under this head. Oranges are in normal supply, with prices ruling steady. Apples, of course, are very high priced good stock of any of the favorite varieties easily bringing $3.50 per barrel. A few southern strawberries have made their appearance already. California celery is in good demand, though fairly plentiful.

Groceries.—No change has been made in sugars and the movement is abou equal to normal. Tomatoes are now quoted at $1 per case. It is said some Canadians are making their appearance in the United States market, though not, it is believed, in large quantities For dried fruits there is a pretty good demand for this period of the year General trade cannot be said to be very brisk, but the volume is fairly satisfactory.

Hides and Leather.—Sheepskins have gone up 5 to 10c. Tallow also is a fraction higher. Hides keep about steady at previous quotations. The leather trade is quiet just now at unchanged prices.

Live Stock.—In spite of only moderate offerings there was not a keen enquiry for cattle, either export or butchers', at last market. Prices on many lines were distinctly easier. A few extra choice exporters sold at $5.10, but the generality went at $4 to $4.50. Butchers' animals in some cases actually declined, though really good animals held their own. Not many choice milch cows are on the market, and others are easy as to price. Most of the sheep and lambs offered went early.

Seeds.—Prices of seeds are now very firm. Red clover is quoted as high as $7.25 for choicest. Very little alsike is offered, the export trade being about over.

Every Insurance Requirement is Covered by The Policies of THE GREAT-WEST LIFE.

Union Life Assurance Company

H. POLLMAN EVANS, President.

HEAD OFFICE, - TORONTO.

Fourth Annual Report

The fourth annual meeting of the Union Life Assurance Company was held at the Company's offices, Monday, February 12th, when the following statement was presented:—

The directors beg to submit the fourth annual report of the operations of the company, being for the year ending December 31st, 1905. The results of the past year have been most satisfactory in every respect.

The company continues to conduct only a non-participating business, being, it is believed, the only Canadian company transacting insurance exclusively on a pure stock premium basis. The policyholders are not charged for profits, and none are promised or expected to be paid. Eighty-eight per cent. of the insurance in force is on the industrial plan, and, notwithstanding the outlay required to establish industrial business, you will be gratified to learn that the business of your company is being secured at a cost per thousand considerably lower than other industrial companies.

The new insurance issued amounted to $6,122,445, under 37,357 policies, the amount being over $500,000 greater than the best previous year.

The premium income increased by thirty-five per cent. over 1904.

The assets are greater than at the close of the preceding year by forty-two per cent.

The insurance in force increased by forty per cent., being $1,000,000 greater than the gain in 1904.

Toronto, February 12th, 1906. H. POLLMAN EVANS, President.

GENERAL BUSINESS STATEMENT

RECEIPTS.

Net ledger assets, Dec. 31, 1904	$150,464 50

		$234,728 24

AUDITOR'S CERTIFICATE.

I have duly audited the books of the Union Life Assurance Company, and have examined the vouchers for the various receipts and payments, and found the same to be correct.

I have also examined the statement of liabilities and assets, together with the securities and find them correct.

Toronto, February 12th, 1906. (Signed.) GEORGE CLAY, Chartered Accountant.

The following were elected directors: Messrs. H. Pollman Evans, Toronto; George E. Millichamp, M. B., Toronto; Harry Symons, K.C., Toronto; F. G. Hughes, Galt; Charles J. Harvey, F.I.A., New York; G. E. Allen Jones, Quebec; W. H. Carrie, Toronto.

At a subsequent meeting of the board the following officers were elected: President, H. Pollman Evans; vice-president and medical director, George E. Millichamp, M.B.; secretary, Harry Symons, K.C.; cashier, W. H. Carrie; consulting actuary, Charles J. Harvey, F.I.A.

MONTREAL MARKETS.

Montreal, 14th Feb., 1906.

Ashes.—A dull, inactive market has still to be noted, with extremely light receipts, and quotations are more or less nominal at $5.15 to $5.20 for No. 1 pots; seconds, about $4.70, and No. 1 pearls at $6.50 to $7 per cental.

Cements and Firebricks.—The only business doing is a moderate movement in firebricks, which are steady in price at $18 to $23 as to brand. Belgian cements are quoted at $1.90 to $2.10, and English and Canadian brands at $2 to $2.20.

Dairy Products.—The condition of the market in these lines is practically unchanged since a week ago. In cheese there is really no movement, but choice goods are steadily held at 13 to 13¼c. For choice creamery butter 22½c. is about the figure, though a little more is asked for occasional fancy parcels; good to choice, 22 to 22½c.; dairy, 20 to 21c.

Dry Goods.—Travellers have now about finished the spring trip, and, as far as can be judged, the volume of orders is satisfactory. Completed returns with regard to 4th February payments show up better than was anticipated, some of the larger houses reporting from 75 to 80 per cent. of customers' paper as being paid. With regard to values, nothing new is reported this week.

Furs.— Receipts of raw furs are fairly liberal, and show a general assortment, with apparently a good deal of competition among local buyers, the number of whom has much increased within the last few years. We quote for prime pelts as follows: No. 1 large beaver, $6 to $7; medium ditto, $5 to $5.50; kilts, $2; black bear, $15 for large No. 1, $10 for medium, and $5 for small; badger, 40 to 60c.; fisher, $6 to $7 for fine dark; red fox, No. 1 Northern, $3.50; Eastern and Ontario, No. 1, $3; No. 1 silver fox, $100 to $175; cross fox, $7 to $10 for dark; wolverine, $7 for No. 1 dark, other grades, $2 to $5; lynx, $6 to $7 for No. 1; marten, Western and British Columbia, No. 1, $6 to $7; Eastern ditto, $4.50 to $5; mink, $7 to $8 for large No. 1, and $4 to $6 for medium; winter rats, 16 to 18c. for large; otter, No. 1 large, dark Labrador, $30, and $15 for Western; coon, $1.75 to $2.50; skunk, $2 for No. 1 prime black, $1.50 for short stripe, other grades 30 to 75c.

Groceries.—The weakness in the sugar market, referred to last week, developed last Friday into another decline of 10c. per cental on all grades of refined, making the present factory figure for standard granulated $4 in barrels and $3.95 in bags, with yellows ranging from $3.60 to $3.90. Molasses is also easier owing to the low opening prices for new crop, and the local jobbing quotation for single puncheons of Barbados is now 32c. per gallon instead of 35c. as heretofore. A cable from the

SWEET CAPORAL

CIGARETTES
STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

island, received to-day, quotes a slight advance at 13½c., equal to about 23½ to 24c., laid down cost, a figure some 7 or 8c. less than a year ago. Teas continue somewhat slow of movement, but are steady in price. The advance in canned tomatoes is confirmed, $1 being now the general quotation for standard brands. Evaporated apples are high at 10½c., and dried apples cannot be got; for gallon apples $2.40 is asked.

Hides.—The hide market is again weaker, the general quotation for No. 1 beef hides being 11c. per pound; calfskins are also again easier, the quotation for No. 1 being now 12c. per pound, and 10c. for No. 2. Lambskins are unchanged at $1.10 each.

Metals and Hardware. — Continued good demand is reported for all lines of heavy metals and hardware, and the only article showing any tendency to decline is pig lead, which is now quoted at $4.30 to $4.35. Copper is a shade easier at 20 to 20½c.; tin, steady at 39½ to 40c.; antimony, firmer at 16¾ to 17c.; spelter, 7 to 7¼c. Pig iron is unchanged at $25 for small lots of No. 1 from store, and $21.50 for Londonderry. Bars are steady at $2.05 in an ordinary way; sleigh shoe steel, $2.15; tire steel, $2.20 to $2.25. There has been no recent change in nails, $2.15 being the figure for wire, and $2.10 for cut. Sheets, plates, iron pipe, etc., all remain at last week's figures.

Oils and Paints.—Orders for shipment when spring freight rates come into force are being booked in very fair volume. The firmness in linseed oil is maintained, and ground white lead is advanced, some dealers quoting $6 to $6.25 for chemically pure. Putty is still quoted at $1.40 in bulk, but it is thought may shortly be advanced. Paris green, 17½ to 18½. Turpentine is steady at 95c. per gallon, in single barrels; fish oils dull at last week's prices. Window glass firm at $4 per 100 feet for first break.

Wool.—Importers of raw wool report a very limited turnover indeed, millmen buying for pressing needs only. Prices are firm at 18½ to 23c. for Capes; fine B.A., 40 to 45c.; of Australian and North-West wools there is no stock here at present; domestic washed fleece brings 27½c.; domestic pulled, 29 to 30c. per pound.

* * *

SOME COBALT LANGUAGE.

A friend who read the paper in last week's "Monetary Times" entitled "Western Slang," sends us a copy of a new paper published in the famous district of Cobalt, and says: Talk about Western slang, why not Northern? And in this paper published in what some folks call the wilds of Northern Ontario you will find some very outspoken words, and also a few phrases that smell of the mining camp. For instance, the paper had been offered advertising by some Michigan and other operators or speculators, that the editor thought were snide, and refused it, adding:

"If any oily share-shovers come at one of our readers, just tell him to wait. Then acquaint us with the location of the immensely wealthy lot and we'll do the rest. If the scheme is a humbug we'll tell it to you in capital letters and save you your coin. Don't you think it is perfectly absurd that any man would give you a dollar for twenty-five cents? Stop and think, and that's what the share shover tells you so glibly. Our advice to you is don't be a "sucker." Dividend paying shares are not peddled around."

A lady in Colorado wrote asking about a hundred questions, and among them this: Would an American lady be allowed to stake out a silver claim? She got this answer: "No objection at all. However, ladies in Cobalt take to housekeeping in preference to mining and we do not think any of them care to prospect. But a lady can prospect if she wants to. It's a mere matter of taste."

Replying to contemporaries and friends who had said nice things, the editor says: "It is nice to feel that the 'boys' are with us, and we wish to assure them that the Free Press is a goer, and will keep abreast of the times or lose a leg."

There are no "To Let" signs on houses or tents in Cobalt. In fact there appear to be too few habitations for the applicants. The "Free Press" thus describes it: "Talk about rents being high in Toronto. Bah! If you want a one story long shanty in Cobalt sixteen by twenty, with lots of ventilation between the logs, and a stove pipe for a chimney, it's a matter of twenty-five or thirty dollars a month rent in advance."

"He's a goer, is this fellow. Everything is done on the jump in Cobalt. Here is an illustration amongst the many. A jeweler from Ottawa struck Cobalt for the first time at 3.30 p.m., Monday. By six o'clock he had purchased a place of business at a sky high figure. Tuesday he got his goods in order, on Wednesday he was up to his eyes in work, and still more customers crowding in. He's a pacer, and Cobalt is the place where you must get your gait on, or get run over."

But the editor has some rights, and does not propose to be jumped on by people who think they have been overlooked. He heads the following item, "Copper Cliff News," from which it may be guessed that the complainer is living at the Cliff: "We got the d——

FERNIE, B.C.
DEBENTURES.

Tenders will be received by the undersigned up to Thursday, March 8th, 1906, for the purchase of $45,000.00 Debentures of the City of Fernie. These debentures will bear interest at the rate of five (5) per cent. per annum payable yearly. Principal will be repayable as follows: $40,000,00 Sewer Debentures at the expiration of 30 years. $5,000.00 Fire Equipment Debentures at the expiration of 10 years. The highest or any tender not necessarily accepted. Tenders will be received for the whole or any part of either issues.

For further particulars address,

JOHN W. NUNN,
City Clerk,
Fernie, B.C.

AGENCIES THROUGHOUT CANADA.

this week from a subscriber for not chronicling the arrival of a friend of theirs to town. By the pipers that played before Moses! what are some people made of? Do they think for a moment that we have nothing else to do but stand in their back yard and watch their exits and their entrances. (Hem?—Shakespeare) Not by a jugful. If you have a friend visiting you, and care to have it noted in this paper, the least you can do is to inform us at this office and we will be only too glad to publish it. That's what we are here for and not for the benefit of our health."

* * *

TRADE NOTES.

Among the inquiries relating to Canadian trade received at the Canadian Government office, at 17 Victoria Street, London, were these: Manufacturers of steam motor wagons desirous of opening up a trade in Canada are seeking a good agent. The machines can be used as feeders to railways and by farmers for driving agricultural machines, threshers, etc.; a Scotch firm has asked to be put in touch with reliable agents in Montreal and Toronto having a knowledge of the linen and jute trade; a London house is desirous of getting in touch with reliable firms in Canada who are open to take up an agency for motor tyres; an important London firm in the wholesale grocery, wine and spirit trades is anxious to appoint a firm in Canada to act as their agents for wines and spirits.

From the City Trade Branch, at 73 Basinghall Street, London, E.C., these: A Liverpool firm wishes to receive consignments of Canadian hay, and would be pleased to hear from Canadian shippers; a firm at Trieste, Austria, is prepared to submit samples and quote C.I.F. prices for olive oils of all kinds; a Yorkshire company making patent valves and boiler mountings desires Canadian resident agent; a firm of importers in Antwerp would be pleased to hear from Canadian shippers of grain, seeds, hay and fruits wishing to develop trade in Belgium; a London firm manufacturing tarpaulin cloth wishes to get into touch with suitable Canadian firms to take up the sale of these goods; a Lancashire firm enquires as to the production of magnesite in Canada and desires the addresses of shippers, if any; a north country firm purchasing edge tool and file handles, hammer and pick shafts and hay fork, spade and shovel handles invites quotations from Canadian makers.

THE FIRE INSURANCE AT RISK IN LONDON, ENGLAND.

An interesting list in the latest issue of our contemporary, the "Review," shows the amount of insurance done by some seventy-two fire underwriting companies in London, England, and the sum contributed by each company to the maintenance of the London Fire Brigade. The total risks in force on London property amount to £1,023,041,470, or more than five thousand millions of dollars, and the contributions made by the companies are at the rate last year of £35 per million of the gross insurance, totalling £35,806. The largest contribution, £3,804, is made by the Sun Fire Office, which has the enormous amount of £108,687,806 at risk in London; next comes the Alliance, with £82,215,000; the Phoenix, with £72,603,000; the Royal, with £72,274,000; then the "Law" and the "County" companies; the Commercial Union with £48,411,000; the North British & Mercantile, with £43,186,000, and the Liverpool & London & Globe with £40,119,000. The Western, of Toronto, which writes a million and a half sterling in the London district, contributes £51. The Phoenix, of Hartford, is also in the list.

SALE OF TIMBER LIMITS.

Timber limits belonging to the Lumsden estate were offered for sale in the Russell House, Ottawa, on the 13th. There was a big gathering of lumber magnates. Lot 1. 96 square miles, situated on Hay Bay, Ottawa river, was withdrawn, the reserve bid not being reached. The highest bid was $188,000. Lot 2, 166 square miles, Snedden and Bauchene rivers, sold to the Hawkesbury Lumber Company and the W. C. Edwards Company for $200,000. Lot 3, on the Nippewa, 25 square miles, no bid.

* * *

Wm. Clark & Son's woolen mill at Crook's Hollow, near Dundas, Ont., has been burned down.

Mercantile Summary.

A business block in Montreal owned by the Canadian Pacific Railway and occupied by Delevan's hotel and several stores was on the 13th inst. destroyed by fire. The loss is calculated at $50,000.

A couple of small failures are reported from St. John, N.B. James Brickley, tobacconist, has assigned to the sheriff, and Nye & Whelpley, harnessmakers, have suspended payment. The liabilities in both cases are small.

A late despatch to the "Globe" said that fire had broken out in an important business block on King Street, St. John, N.B., and that several concerns had been burned out, including, it is said on the wires, Brock & Patterson, wholesale milliners, the American Clothing Co., and J. N. McDuffee, jeweller.

According to a Canadian Associated Press cable the British Fire Protection Committee offered prizes for the best fable on the subject of "Fire Protection," and 286 competitors entered. The consolation prize of a bronze medal and three guineas for the best fable from the colonies was awarded to J. W. Bengough, of Toronto.

In the case of the frightful calamity to the Brazilian warship is it not highly probable that the true cause of the blowing up of the ship was a diversion of an electric current into the magazine, asks the "Insurance Spectator." The electricity installations in warships are a constant threat on account of the risk to the magazines.

After clerking for eight years Wilfred Gendron began business for himself

last spring with $500 of savings. He sold dry goods—or tried to sell them—in the Point St. Charles district in a small way, but has already assigned.

The solicitor to the Provincial Treasury has received details of the estate of the late T. R. Wood, insurance agent, etc., of Toronto. The estate is valued at $1,300,000, and is practically divided between the two sons. The succession duties will be on the basis of 7½ per cent., and the Ontario Treasury will thus receive about $90,000.

The total output of the Rand gold mines last year was 4,897,221 ounces, valued at $104,250,000, according to a report by Mr. Kittson, the Canadian trade agent in South Africa. This is 601,213 ounces ahead of the best previous year, 1898. Since the discovery of gold on the Rand in 1887 the Transvaal has produced a total of 1,525 tons of the precious metal.

At Edmonton on 10th February in the Supreme Court Judge Scott acquitted Geo. Franklin, charged with obtaining money from Williamson Taylor by false pretences. He sentenced J. B. Johnston to two years at Stony Moun-

tain on the charge of setting fire to his lumber yard at Lavoy in December with the intention of defrauding the Commercial Union Insurance Company of the insurance on the lumber.

It is stated by the London "Review" of February 2nd that a special meeting of the Norwich Union Fire Insurance Society was held at Norwich for the purpose of considering the advisability of confirming arrangements, provisionally entered into, for the amalgamation of the Scottish Imperial Insurance Company with the society. The amalgamation, which has been for some time under consideration, was confirmed.

A compromise arrangement is being sought by A. J. Prefontaine & Co., general dealers, of Beloeil Village, Que. Mr. Prefontaine was at one time a prominent trader of the locality, but made heavy losses in the hay export business, and failed in 1899, owing something like $27,000. Since then he has done a small shoe trade under cover of his wife's name, and his present indebtedness is, perhaps, not more than $3,500.

It is stated that the aggregate value of the contracts for the two sections of the National Transcontinental Railway for which tenders are being invited will run from twelve to fourteen million dollars. For the Winnipeg section a deposit of $400,000 is required with the tender; for the Quebec section $225,000 and for the steel bridge across the Cap Rouge Valley, $35,000.

It is hoped at the Soo that the Lake Superior Corporation will be able to complete their two new open-hearth furnaces, increasing the capacity of the steel plant by 25 per cent., by early in August. The company is also contemplating the building of fifty or more coke ovens, and is asking the Government to rebate the duty on coal for that purpose. With these proposed improvements completed, at least five hundred more men would be required.

A letter of Monday last written at Amherstburg, on Detroit river, says: "Truly we are having a May-like February, and are kept wondering whether we shall have, this winter, any really disagreeable wintry weather. The roads have again worn smooth and the air is balmy. The daily steamers between Detroit and Cleveland advertise to start running on the 15th, but of course Boreas and Jack Frost, powerful pair that they are, may easily put a stop to that."

A general storekeeper of Pont Rouge, Que., named Antoine Garneau, has assigned to V. E. Paradis, Que. He has been in trade some twenty years, and was for a long time associated in partnership with a brother, but upon separating several years ago the latter apparently took most of the business with him. The liabilities of Antoine are reported at $7,100, with nominal assets of only some $4,000. Pont Rouge (Red Bridge) is in the county of Portneuf, west of Quebec city.

The annual meeting of the Montreal Cotton Company took place on Tuesday last. It was stated that the surplus over liabilities now amounted to $845,000. The sales during the year amounted to $2,341,000, while the cloth on hand was valued at $577,000. The number of directors was increased from seven to nine by the addition of Senator L. J. Forget, vice-president of the Dominion Textile Company, and Mr. C. B. Gordon, its managing director, this company having obtained such a large amount of stock that it was felt that representation on the board should be granted. It was explained, however, that this does not mean that the two companies have come together in any way.

* * *

—A meeting of business men was held this week in the town of Ayr, Ont., the intention being to form a business organization. At a fairly representative gathering a board of trade was formed. Mr. Goldie was elected president; C. McGeorge, vice-president; A. E. Watson, first vice-president; and James G. Farr, treasurer.

The Mutual Life Assurance Co. OF CANADA.

—Rodney—Do you have trouble with "shall" and "will?" Dickey—Nope; my wife says "you shall," and I say "I will."—Puck.

"The Unexpected Always Happens."

Who is there but has had brought home to him the truth of the above statement? It is always the accident that was least looked for that actually does occur. Nobody is immune from accident. Your experience and observation confirm that fact.

WISE men prepare for such emergencies by carrying an accident policy. The WISEST men see to it that that policy is an Employers' Liability Combination Policy, issued by

MANAGER FOR CANADA:
B. HAL. BROWN.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $151,663,477.29

It exceeds by two millions the entire population of the Dominion of Canada. Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. It has on deposit with the Government of the Dominion of Canada, in Canadian securities, dollar for dollar of its Canadian liabilities. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts.

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $105.83 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policy-holders and addition to Reserve
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $3,000 000.00.

NORTH BRITISH & MERCANTILE INSURANCE COMPANY.

Total assets	$79,252,646 00

Its policies just meet the wants of the people and are easily sold.

A few good producing agents can secure liberal contracts in desirable territory.

Head Office, — LONDON, Ont.

JOHN MILNE, - Managing Director.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet possesses the advantages of both.

THE SITUATION IN LUMBER.

Present conditions in the lumber trade may be said to be more satisfactory, in spite of a few drawbacks, than before. The drawbacks referred to are the increased cost of stumpage, the high wages, and the heavy cost of provisions and almost every article required in the logging camps. Besides this, the cutters are obliged to go further back every year in order to get their logs. However, the demand for the lumberman's product is so keen that the cost of selling is reduced to a minimum, and with the increased range of prices which has come into effect during the last year, he has met with a considerable degree of prosperity. At the same time it must be admitted that, when the above conditions of enhanced cost of production are allowed for, his net profits have not been so much better as some have anticipated.

The stocks of white pine on hand throughout Ontario are probably lower than was ever before the case, while the demand for that wood has been insistent. The production seems to be only barely holding its own in Canada, while in the United States it has fallen very much behind. This bears out strongly some of the views expressed at the recent Forestry Convention at Ottawa. Indeed, it shows how much real sympathy in aim there exists between lumbermen and foresters, that at a recent meeting of the Lumbermen's Association of Ontario, a resolution carried warmly endorsing the views of the lumbermen expressed at that convention. We may remark, too, that at this meeting, Mr. J. B. Miller, the president, expressed the hope that the Ontario Government would take steps whereby licensees should reap the benefit of timber they had paid for, so long as no hardships would accrue thereby to bona-fide settlers.

In Ontario and Quebec, this winter has not been by any means favorable to lumbering operations, through some reports from the latter province speak as though operators were only two or three weeks behind. As a general rule, however, and with the exception of camps in the farther northern parts of the provinces, logging has been seriously delayed by the absence of snow, and consequently increased difficulties of transportation. Unless the spring be very late, there is bound to be a considerable shortage, the heavy demand both for domestic and export requirements having eaten very materially into last year's surplus.

From New Brunswick the reports that come to hand in respect to lumbering operations are very conflicting. On the Restigouche River they are described as being "none better." Cutting was concluded with the end of the old year, and for hauling off the yards to the brows there have been good hard roads. There is about two feet of snow, and below that is a heavy coating of ice, which means good prospects for stream driving. The cut on the Restigouche is about the same as it was in 1905, and there is every prospect of getting out all the lumber without serious trouble. On the Nashwaak conditions are different. The recent January thaw and the heavy rains which accompanied the warm weather have made it impossible in a good part of the Nashwaak section to continue operations. The snow has gone off in some parts, and lumbermen are somewhat despondent as to the prospects.

* * *

MORTGAGE LENDING COMPANIES.

So recent an event as the amalgamation of the Huron and Erie Loan and Savings Company, and the Canadian Savings and Loan Company, is likely to be in the recollection of most of our readers. The annual meeting of the amalgamated companies, which now bear the name of Huron & Erie, was held last week in London. An elaborate report was submitted, giving the balance sheet and the profit and loss account of each company as at the close of December last, duly certified. The result of the association of these two mortgage loan companies has been to form one large and strong concern out of two which were formerly rivals. The assets of the Canadian Savings and Loan Company were $2,425,934, and of the Huron and Erie Loan and Savings Company $8,756,335; so that the present company has assets of $11,167,269, a very important sum.

The statement of the associated companies for the year 1905 shows interest earnings of $559,587, to be added to which is $35,416 brought forward, and $1,210 earned in rent. Interest on $2,274,000 of deposits and $5,160,000 of debentures absorbed $263,239; expenses and losses on real estate, $78,430; provision for expenses of amalgamation and possible losses, $15,000, leaving $239,554 to be dealt with. Dividend, at nine per cent. for the Huron and Erie, and six per cent. for the Canadian Savings shareholders absorbed $171,000, and taxes, $3,471; $30,000 was transferred to the reserve fund, and a balance of $35,083 carried forward. The subscribed capital of the amalgamated company is $3,500,000; the amount paid up, $1,900,000; and the reserve $1,525,000, equal to 80 per cent.

The cash value of mortgages belonging to the amalgamated company is $10,217,209, of which $7,962,527 appertained to the Huron and Erie, $2,376,943 to the Canadian. The liquid assets, such as bonds, debentures, securities, and cash, amount to $725,535; office premises and other real estate, $35,000; Canada Trust Co.'s stock $189,525. According to the report, the demand for money was active during the whole year at somewhat higher rates. A considerable proportion of current loans were paid off, but new loans of $1,792,000 were made by the Huron and Erie, which has a total of some $600,000 more loaned on mortgage than a year ago. The whole voluminous statement reflects a very satisfactory business.

We gather from the address of the president that the bulk of the business represented in this report is confined to Western Ontario, where properties are frequently inspected, and the mortgage assets of the company kept in good condition. There are nearly six thousand depositors in the savings department, an average deposit of say $380 each. Judge Talbot Macbeth has resigned his seat on the board by reason of recent legislation by the Dominion Parliament affecting the position of judges in such positions, Wm. Saunders, C.M.G., now residing in Ottawa, also a valued member of the board, has resigned as well, in order to comply with the terms of the amalgamation.

The earnings of the Toronto Mortgage Company appear to have been larger in the calendar year 1905 than in the preceding twelve-month, having regard to the smaller balance of profit and loss account brought forward. An addition to dividend is made in the shape of a bonus of one per cent., and after paying this and all expenses, $15,000 is added to reserve, making that fund forty per cent. of the capital, while $15,060 is carried forward. Borrowings on sterling and currency debentures are increased and so are deposits, while capital stock and accumulated profits amount now to something over a million dollars. Mortgage loans are swelled to $2,084,042 and there is a sum of $299,860 held in cash assets. Hon. Mr. Clark, the president, in congratulating the shareholders on the company's prosperous condition, announced the gratifying fact that the arrears of interest and other incidental charges on mortgage securities were only one-sixth of one per cent. of the assets. He referred also to the very satisfactory disposition of some of its city real estate, while what remains in hand is either needed for the purposes of the company's head office, or is yielding more revenue that could be obtained if a sum equal to its value were lent on mortgage security. It is evidence of the directors' confidence in the future of the company that they and the manager and their immediate relatives owned one-fifth of the whole capital stock. The number of directors has been reduced from nine to seven. We have already mentioned the deaths of Dr. Larratt Smith and Mr. T. R. Wood. The surviving directors were re-elected, and Mr. Wellington Francis chosen to the vice-presidency.

Other liabilities	13,903,102	12,218,155
Total liabilities	$667,999,951	$662,160,127
ASSETS.		
Specie	$18,915,429	$19,649,545
Dominion Notes	38,594,778	38,055,620
Deposits to secure note circulation	3,435,334	3,435,334
Notes of and cheques on other banks	23,044,834	28,345,495
Loans to other banks, secured	731,759	684,898
Deposits with other Banks in Canada	6,933,229	8,591,796
Due from agencies or other banks in Great Britain	6,324,571	8,308,239
Due from Banks or agencies in foreign countries	17,923,617	14,344,574
Dominion and Provincial Government securities	8,694,021	9,182,353
Other securities	60,623,180	59,813,007
Call and short loans on bonds and stocks in Canada	54,241,565	49,704,928
Call and short loans elsewhere	68,432,836	61,010,020
	$307,895,153	$301,125,809
Current Loans in Canada	$451,207,327	$458,355,366
Current Loans elsewhere	37,283,534	30,882,959
Loans to Dominion and Provincial Governments	2,006,489	2,063,362
Overdue debts	1,771,370	1,665,732
Real estate	664,083	691,828
Mortgages on real estate sold	502,142	481,970
Bank premises	11,720,650	11,569,131
Other assets	9,908,510	8,696,970
Total assets	$822,959,451	$815,533,302

Average amount of specie held during the month	18,427,212	19,246,431
Average Dominion notes held during the month	36,925,970	38,380,071
Greatest amount notes in circulation during month	69,423,235	75,850,739
Loans to directors or their firms	9,194,198	8,639,244

Owing to the late hour at which the Bank Statement has been received from Ottawa, our usual Financial Review for the month must be postponed till next issue.

* * *

IMPORTANCE TO ONTARIO OF HUDSON BAY.

Second Article.

In answer to the second query—"How such access can be best obtained," certain business axioms will apply with special force:—

A.—That the development of new and extensive industries mainly depends upon adequate and economical transit facilities between producer and consumer.

B.—That industry and commerce only prosper where natural products can be transported under the best conditions from the region where easiest produced to that where most wanted.

C.—That the intrinsic value of transit appliances, whether in the form of railways, canals, or otherwise is determined not by the cost of construction, but by average net earning results.

In applying these axioms to the problems of commercial access to Hudson Bay the main facts relating to its natural products and the best market for the same are as follows:—

Natural Products.

The natural products of the great northern sea are mainly in its immense and practically inexhaustible fish resources.

Its vast area, which including Hudson Straits, is over five times greater than all of the five great lakes in the St. Lawrence basins combined (namely, Lakes Superior, Michigan, Huron, Erie, and Ontario): within its coasts of over 6,000 miles in extent are to be found the cod banks of Ungava Bay and South Shore of the Straits, which are apparently as prolific as those of Newfoundland, and much more accessible. At certain seasons of the year the cod appear in the clear waters in such numbers that Commander Gordon, R.N., in his report, states that he could only describe them as "millions to the acre," and that two of his crew filled a yawl boat in an hour by "jigging," i.e., dropping bare hooks among the cod, and by jerking upward, catch the fish on their sides. The commercial value of this fish is too well known to need special mention.[*]

Next in importance is the salmon, which are known to be of the finest quality of any in the world. They abound in the rivers on the east coast of the bay, but in the northwest section about "Roe's Welcome" and Wager River come in from the sea as at Fraser River in British Columbia, and bid fair to rival the salmon fishing on the Pacific Coast, where over five millions of dollars were paid for the "catch" for canning purposes in one season.[†]

Commander A. P. Low, who explored the coast of Hudson Straits in the Dominion Chartered Steamer "Neptune" during the seasons of 1903-04, reported. (See Department of Marine and Fisheries, Sessional Paper 21, of 1905, page 129):—"That at a point on the north shore of the Straits or adjoining waters, . . . two boats with a small net were sent to the mouth of a little river close by and with four casts of the net both boats were loaded in less than two hours with over 5,000 pounds (two and a half tons) of fine Arctic salmon, there being over 1,000 of the fish weighing from three to ten pounds each, and adds, 'There is no doubt that a profitable fishery could be carried on here.' When it is considered that there are hundreds of such streams along that coast, and that two hours' catch would be worth $750 at wholesale on Ontario lake port docks, some idea of the wealth waiting Ontario enterprise can be formed."

The sturgeon should also be mentioned, which are prolific in the rivers along the eastern shore, of which there are ten, ranging from 300 to 500 miles in length, including connecting lakes. The sportsman will find speckled trout fishing without limit along the numberless smaller streams of the east coast.

White fish, resembling those on the lakes, abound in the waters of the bay, as do the smaller species of herring, smelts, etc. As a proof of their abundance, the phenomenally large "schools" of porpoises and white whales which feed upon them can be cited. Commander Gordon, R.N., reported that near the mouth of the Nelson River he saw the surface of the Bay alive with them as far as the eye could reach. Judging from the results in the North Sea,[‡] it is safe to say that a million or more tons of edible fish could be taken yearly from Hudson Bay and Straits without diminishing the supply.

In former years the whale fisheries there yielded millions of dollars to Massachusetts enterprise, but the discovery of coal oil, and diminished numbers of the whales, has reduced the industry to one vessel from New England and a few occasional steamers from Scotland.

Hudson Bay is navigable the year round, like the ocean, only the shore ports being closed by ice in the winter.

By a singular combination of natural forces the main obstruction of navigation to and from the Atlantic Ocean is outside of the Bay and Straits, in the shape of icebergs and immense "ice floes" hundreds of square miles in extent, and from ten to twenty feet thick, which, moving with the current of the Gulf Stream, pass out of the Arctic Ocean, through, or collect in, Baffin's and Davis Straits, and enter the Atlantic opposite to the entrance to Hudson Straits, oftentimes blocking the latter effectually until nearly midsummer. One hundred and eighty ice bergs have by actual count been seen in the vicinity of Cape Chidley in one day. The Toronto "News," of November 11th, 1905, contains an account of a vessel named the

---

[*] Note—The Toronto "Globe" of Nov. 24 last refers to a report of Manager McKenzie, of the Hudson Bay Company, who had returned to Montreal from a five months' tour in Labrador, in which he says: "The fisheries have yielded a harvest of surpassing richness in the form of cod and salmon."

[†] Note—The Hudson Bay Company one year loaded a small steamer with several hundred tons of salmon taken on the east side, and undertook to send them to market in the British Isles in a frozen state, but before a cold storage system was perfected. The venture was not repeated.

[‡] Note—The North Sea is estimated as yielding over two millions of tons of fish annually.

"Discovery," sailing from London, June 15th, 1905, bound for Charlton Island, which encountered an ice-floe **100 miles east of entrance to Hudson Straits,** which closed around it and held it fast for five weeks before becoming broken sufficiently to free the vessel far southwards.

This feature has prevented Atlantic coast fishing vessels and men from carrying on operations near the Straits or Bay fishing grounds, while the same would be quite accessible from an Ontario port, **which fact renders commercial access from that direction doubly important and assuredly profitable.**

The natural products of Hudson Bay being shown as practically unlimited in extent and value, the next feature for consideration is the best market for them.

* * *

LIFE INSURANCE REFORMS RECOMMENDED.

A forecast of some of the reforms to be recommended by the Armstrong Investigating Committee of the State of New York, quoted by the New York Journal of Commerce, states that one of its leading objects will be to put an end to extravagant expenditures. In order to do this, it is said, a graded scale of salaries will be suggested, with $50,000 per year as a maximum to any president of a company, but with the actual salary for each year depending on the amount of insurance written during the previous year. Besides this, the proposals include the restriction of the amount of insurance to be written by any company in one year to $150,000,000, or less than half of the aggregate reached by some of the large life insurance companies of the United States during recent years. No limit is set to the aggregate, but under this annual restriction some of the abnormal accumulations would, no doubt, be gradually brought down, and the incentive to excessive compensation to agents removed. The compensation would also itself be regulated and all bonuses and rebates and expenses in excess of the "loading" of premiums be abolished.

Another important feature of the proposed reforms is the regulation of investments, the intention being to preclude high directors of insurance companies having a controlling interest in other corporations by prohibiting their holding of more than 20 per cent. of the stock of the latter.

It is believed also that proposals will be made to restrict each company from issuing more than one style of policy. That is to say, if it deals in straight life policies, it will have to confine itself to them and not deal in conditional policies as well.

Without doubt, the suggestions are in the right direction, but it would appear to be open to question if directors or trustees are properly chosen and can be held strictly to account whether they should not be allowed a freer use of their own discretion, based as it would be necessarily upon experience gained in the actual conduct of business.

* * *

THE TRUSTS.

First, the individual, pure and simple; next, the co-partnership; then, the corporation; and now, the abnormally developed corporation, incongruously designated Trust. Such is the gradation of stages through which capital has passed in adapting itself to the modern development of industry and commerce. The three earlier methods of capitalization served well the wants of their day and generation. The fourth came without any foreshadowing, with a purely speculative entourage, and with no avowed purpose beyond that of defeating the moral play of competition. Thus speaks the New York Journal of Commerce; but it at once proceeds to speak of the abnormality of the situation in regard to trusts.

The real test of the Trust system, avers our contemporary, has yet to come, when, coincidently with the violent reaction that always follows speculative over-doing, everything undeserving of confidence is subject to the merciless verdict of the public judgment.

The system must also face an ordeal of a still more trying character. It embraces the weightiest political and social issues, which must be submitted to the judgment of the country in its highest tribunals. Graver issues than those which will then have to be met have rarely been presented for a nation's arbitration. Among the questions then to be adjusted must be such as the following: (1) Did the corporation laws existing at the organization of the trusts authorize the transfer of the rights and powers of such corporations to the Trust companies? (2) If not, are the Trust companies legal? (3) If they did authorize such transfers, is it lawful to use the powers acquired by such transfers for monopolistic purposes? (4) Is the operation of a monopoly compatible with the rights of the citizen to the unhindered pursuit of industry? (5) Is it sound public policy to permit the amalgamation of two or more corporations into one, without concurrent restraint or regulation in the interest of free competition? (6) If monopoly is lawful and the trusts can perpetuate their restraints upon free competition, what effects therefrom may be expected upon the division of wealth, the healthy development of industry, the peace and welfare of the country, and the maintenance of republican institutions? These queries, though no little discussed, are far from having received their final answer.

* * *

HARD-WORKING DIRECTORS.

Probably much may be said to bear out the recently expressed opinion of Mr. Stuyvesant Fish that the trouble that has been going on lately in the large financial institutions of the United States is due to the fact that too few men have undertaken the task of managing them. He calls attention to the fact that the ninety-two directors of the three great life insurance companies in New York, whose affairs have been lately overhauled, held no less than 1,439 directorships in corporations of importance. One of them was a member of seventy-three different boards, another of fifty-eight, another of fifty-four, and so on. The neglect which this multitude of directorships implied was not confined to these insurance companies, but extended to all the corporations for which these men were supposed to be acting in the interest of stockholders or policyholders. It is obvious that in most cases they could exercise no real direction. Whereas it was the purpose of the law, in granting charters, that the directors of a company should meet frequently, have full knowledge of its affairs, discuss them deliberately, and then exercise the best judgment of the whole body, the practice has grown up of delegating all duties to executive committees whose doings are ratified at occasional meetings of said directors. Many directors have thus degenerated into mere dummies, whose names being known to the public in some connection or another are supposed to inspire confidence, the truth being that they have little direct interest in the affairs they are supposed to manage.

* * *

ANOTHER CANADIAN BANK ABSORBED.

A bank which has been established for thirty-five years in the garden Province of Canada, the Merchants Bank of Prince Edward Island, is about to be amalgamated with one of the largest banking institutions of the country. The Canadian Bank of Commerce has agreed to purchase and take over the business of that bank after a full and careful inspection by an officer of the purchasing bank, and on terms mutually satisfactory. This agreement awaits the formal ratification of the shareholders of the local bank on 13th April next. The business of the Merchants is to be carried on as usual in the meantime, and the same official staff employed.

We learn from the Charlottetown "Guardian" of last Saturday—an illustrated issue of twelve pages, giving a picture of the head office of the bank—that in the opinion of the gentleman who has had most to do with negotiating the purchase, Mr. Vere C. Brown, of the inspection staff of the Commerce, the affairs of the Merchants Bank have been administered in a manner which reflects the greatest credit on the directorate and management. Indeed, it has been made a condition of the purchase that those who have had to do with the administration of the Merchants Bank's affairs should continue to direct the business of the bank under the new conditions, and they are to be entrusted with the fullest measure of discretion.

In the year 1870 some of the leading people of the Island formed the Merchants Bank of P.E.I. Its first president was the late Robert Longworth, with Wm. McLean as cashier. Mr. Longworth died, and W. A. Weeks took his place, giving place later to Sir Louis Davies, whose removal to Ottawa caused the election of Ben. Heartz to the presidency, and he helped to increase the business greatly. His death in 1904 occasioned the reappointment of Mr. Weeks. The present board of directors consists of President W. A. Weeks, Vice-President F. R. Heartz (a son of the late president), Premier Peters, A. P. Prowse (of Murray Harbor, a son of the late Senator Prowse), and J. S. Hinton, of Summerside. Branches of the bank were, during the presidency of President Heartz, established at Alberton, Montague, Summerside, and at Sydney, C.B. For ten or twelve years the general manager of the bank has been Mr. J. M. Davison, who possesses the qualities of a successful banker, and has made many friends on the Island.

* * *

OUR AUSTRALIAN LETTER.

Business has been quickened during the last month, and retailers have done a much larger trade during the Christmas time than was expected—all indicating that improvement in business generally has really set in.

The "Monetary Times" has a statement that the lumbermen of British Columbia were taking no interest in this market. That was true, as noted in my previous letters, up to six months ago, but during the last six months a change for the better has set in, and there are now five cargoes for Sydney and one for Melbourne on the way from the Chemainus and Hastings mills, and the number would have been greater had the mills been able to supply the timber. What is even better is that the mills have followed the suggestions in my early letters that they should arrange for agencies in Australia. Some years ago, products of British Columbia—fish and timber—were sold through San Francisco houses, involving extra commission and delays. The salmon trade two or three years ago effected a change, and the timber producers are wisely following their example. The Sydney market is also improving. The demands for compensation for defective quality have become exceedingly small, and there are very good prospects that the evil reputation of this city in this respect will be a thing of the past.

Your columns also contain a sharp criticism upon Australian politics, which the writer of the article, Prof. Goldwin Smith, attributes largely to the female vote. A very large number of Australians will agree with him as to the effects of socialistic legislation, but not so many respecting the effects of female suffrage. The women, particularly of this State, have taken their political duties much more seriously than the men. The effect of their vote has not been as great as the moral optimist hoped for, nor as evil as the social pessimist feared, for to a very large extent it has been a duplication of the vote of the men.

Before the close of the session, the Commonwealth Senate passed a resolution empowering the Government to sign the debated agreement with the Eastern Extension Cable Co. As your readers have been informed, the Eastern Extension Cable Co. effected contracts with New South Wales, South Australia, West Australia and Tasmania, whereby it had the right to have private wires and open offices in the cities of these States for doing of business. Some of these contracts were of a most extraordinary character, and the result has been to very much injure the Pacific cable. Queensland and Victoria refused to make the contracts which they deemed to be dishonorable. The Eastern Extension Co. have endeavored to secure privileges in these States, and the first Commonwealth Government drew up an agreement which provided for the termination of the existing contracts at the end of ten years, more or less, upon notice being given. The Senate refused to assent to the contract until after the Pacific Cable Conference had met, but the Government permitted the Eastern Extension Co. upon its own authority to open offices in Melbourne and the use of a private wire. The majority of the Senate thought it was better to have an agreement that should terminate all contracts within a fixed time. The Senate's resolutions were not, however, referred to the House, and so matters are *statu quo*, with the Eastern Extension Co. in possession of offices in all the States excepting Queensland. It can afford to wait, as the delay is certain to ensure the life of its special advantages.

During the debate a very interesting statement was made that the expenses of the Eastern Extension Co. in doing the Australian business were over £150,000 a year, or very nearly its total revenue. This was three times the expenses of the Pacific Cable, and indicates a pretty liberal sum for miscellaneous expenditure, which is, no doubt, shrewdly entered into to promote its Australian interests. It is not surprising, therefore, that the slow and ineffective methods of the Pacific Cable had not procured a payable business.

There has been another instance of the inability of compulsory arbitration to prevent industrial troubles. In spite of the Act the wharf laborers engaged in loading wheat took advantage of full yards to demand an increase in wages, and the stevedores were compelled to give it to them, though they state that machinery has much reduced the hardest labor, and that they were already paying higher rates than in any other ports of Australia.

Large shipments of apples from Vancouver were brought over by the "Moana," which it is to be feared will entail a heavy loss upon the shippers. It has been pointed out in letters long ago that certain conditions must be observed for a profitable return on the export of apples to this market. (1) The fruit must be suitable to this market; (2) must be of a quality that will carry; (3) properly packed; (4) shipped in cool storage; (5) free from disease.

This shipment per "Moana" violated each of these conditions excepting with respect to packing. As a whole they were too large to bring the best prices. Some of them were not liked, and others were unfit to be sent such a distance. The apples were not shipped in cool storage, and were infected with codlin moth and black spot. The consignees rejected the shipments as they were condemned by the Government and much was decayed. All this involved heavy expense in handling, picking, fumigating and the destruction of cases of damaged fruit. It is no marvel that under such circumstances there must be a heavy loss. The fact, however, that nearly 200 cases of apples thus handled brought over $2.60 per case after deducting duty, commission and wharfage, is an evidence that there is a market here for good fruit properly shipped. It is claimed that most of this fruit originated in the United States, though shipped from Vancouver, and that this explains why they were diseased and damaged by codlin moth. It is claimed in British Columbia that the fruit is perfectly clean. However, they are known here as Canadian apples, and the reputation of British Columbian fruit is damaged thereby. Some Ontario apples brought over by passengers on the same ship carried fairly well, but they too were condemned as being infected with codlin moth and black spot. Particularly was this the case with respect to black spot. There would seem, therefore, not to be much hope of a trade in apples from Ontario in the present condition of its orchards.

It is curious that not a single timber ship of the six on the way to Australia carries the Canadian flag. Canadians were at one time able to build wooden ships, and as wooden ships still carry the timber, it is surely within the power of Canadian yards to construct vessels for this trade.

There are considerable enquiries from Canadian exporters for agents for their goods. Where the firms really mean business, good agents can be secured, but there are still constant complaints that even when contracts are entered into the Canadian houses refuse even to reply to communications, much less to send samples or even prices. Then, too, in their enquiries Canadian houses rarely ever send the price list or catalogue, and when they do, they quote at the mill or factory in Canada instead of quoting laid down in Sydney via Vancouver, and also laid down in New York. As a consequence they have to be written to for the missing but necessary facts, creating a delay of three months. A letter to the Department of Trade and Commerce, Ottawa, asking for information as to how enquiries should be made, might obviate this delay.

F.W.

Sydney, N.S.W., 16th January, 1906.

* * *

OUR SAINT JOHN LETTER.

The most disastrous fire St. John has had in many months was that of last Thursday, which destroyed the big building at the corner of King and Canterbury Streets recently purchased by the Royal Bank, and damaged the adjoining building. The bank only recently purchased the building owned by them and intended to some day tear it down and erect a modern bank building. It was a four story structure, 100 feet long, on Canterbury Street, and 510 feet on King Street. The American Clothing House, dealing in men's clothing, had two floors on the front, while J. W. McDuffee, watchmaker and jeweller, Frank Fales, manufacturers' agent, and Vassie & Co., wholesale dry goods, had stores on Canterbury Street. The two upper floors were occupied by Messrs. Brock & Paterson, wholesale milliners, who were also the tenants of the building next above on King Street. They were the heaviest losers, and while the appraisers have not yet finished their work it is generally believed that the full insurance of $70,000 will be required to make good the damage they sustained. The American Clothing House, McDuffee and Fales also lost all they had in their stores. The total insurance loss will reach $100,000 and the actual fire loss fully $30,000 more. The bank is the only one to derive any benefit. The fire rid it of its tenants, some of whom had six and seven year leases and it nearly demolished a building that was to be torn down anyway and gave them in addition some $18,132.00 of insurance, for that is the amount at which their loss has been appraised. To Brock & Paterson and the others the fire brought a general disarrangement of business, but the firm was fortunate in having one buyer in England and another in New York at the time, so new stocks are already arriving and the firm will be able to fully handle its spring trade.

The lumbermen along the Bay Shore section of New Brunswick who have been worrying over the lack of snow were rejoiced on Friday last by a fall of about six inches. They are working industriously to get all their hauling done while it lasts, but unless more comes soon they will be again down to bare ground, for the small quantity is melting rapidly. The situation spells ruin for many of the smaller operators in New Brunswick unless a change of weather comes speedily. To-day the lumbermen have a new worry to face—an outbreak of smallpox among some who have just left the camps and this will mean a rigid quarantine, but it will not stop work unless the disease breaks out in the camps themselves.

An idea of the boom that is on in the winter port business may be gathered from the fact that the fifty-five steamers that had sailed from here up to Saturday last had taken away cargo valued at $11,448,735, while the first fifty-five steamers last year took away but $7,991,636. Unfortunately the passenger traffic is not keeping pace with the freight business. The number of passengers carried to date is about 1,000 less than for the same period last year.

On one or two occasions reference has been made to the fact that the steamship companies operating on the St. John River had a hard time of it last season and that efforts were on foot to bring about an amalgamation or a traffic agreement of some kind. Seemingly all these efforts have failed and to-day it is announced that one of the steamers, the "Crystal Stream," is to go under the hammer to satisfy a mortgage claim.

A telephone deal of some magnitude is reported. The Central Company operating in the Province of New Brunswick has just absorbed the Union Company, whose lives were mainly along the Upper St. John. This gives the Central Company a pretty general connection in the northern sections of the province. It has not as yet sought entrance to St. John, where the New Brunswick Telephone Company, of which Hon. A. G. Blair is the president, has a monopoly of the business.

Hon. Senator Poirier has begun a suit against the mayor and town council of Shediac that will excite much interest. The Senator owned a grist mill that was burned some time ago. He now claims damages from the city on the ground of inadequate water protection and declares that the town council used for other purposes moneys that were authorized and voted to improve the water supply.

Another law suit that may occasion some interest has just been started by Eben Perkins, late manager of the Portland Rolling Mills, against the company. Mr. Perkins claims that he has not been given $1,000 worth of stock in the company which was promised him under his agreement with them.

The city council of Moncton has decided to ask the legislature for authority to borrow $60,000 to pay off a floating debt incurred in extending the water and light systems. The Fredericton town council after much negotiating has finally agreed to improve its water system at a cost of $45,000. The council also decided to grant concessions to the Whelpley slate factory, with the idea of having them establish their factory at the capital city.

* * *

St. John, 20th February, 1900.

* * *

QUEEN CITY FIRE INSURANCE COMPANY.

A feature of this company's report for 1905 is a marked increase of income. The aggregate of premiums received, interest earnings, and rents amounts now to $105,969. Allowing for reinsurances and cancellations, the ratio of losses and expenses to premium income was only 57 per cent., a condition of things on which the management is entitled to congratulation. The regular dividend has been paid to shareholders, as it has been for thirty-five years past, $25,537 carried to reserve, and a balance is shown of $18,377, surplus over all liabilities. The company's assets of $195,000 are in substantial shape, and it has now besides $100,000 paid up capital stock, a reserve of $50,000; and (including reinsurance reserve) a profit and loss balance of $45,462. In the face of competition, which was last year unusually keen, this result is one which does the Queen's City credit.

* * *

MILLERS & MANUFACTURERS INSURANCE CO.

A sentence in the report of this company reads as follows: "There has been a substantial increase in the premium income and the amount underwritten during the year, notwithstanding the fact that the same careful scrutiny and conservative spirit which has always characterized the management of this company, has been maintained in the selection of the risks assumed." This must mean that in spite of a rigorous inspection and in spite of their insisting on improvements in mill and other premises, and restrictions which other companies do not impose, the managers of this company are being backed up by manufacturers, who insure with them in an increased degree. If this is so, then more credit to both for helping to reduce the fire waste. An effect of this cautious underwriting and careful supervision is seen in the results of the year, namely that losses and expenses of the year were only 57.19 of the net cash income, and that $44,551 has been carried to profit and loss account. We are told that the underwriting profit on the operation of the four companies which Messrs. Scott & Walmsley manage, was over $100,000 last year.

* * *

CONTINENTAL LIFE INSURANCE COMPANY.

A comparison of this company's business in 1905 with that of the previous year shows progress in the amount of insurance in force and in premium income; a growth in reserves and in total assets, together with a decrease in death claims. The net premium income was $143,958, as compared with $127,631; the insurance in force $4,483,000, as against $4,053,000; the reserves $347,788 as compared with $269,342 in the previous year. Not without reason does the management thank the field officers and agents for their exertions in the face of strong competition. It is creditable to the company that the efforts to keep down expenses have been so far successful that the ratio of premium income is this year, the report tells us, nearly five per cent. less than in 1904. An increase of $89,000 in assets is shown by the balance sheet. Besides the sum of $418,402 in cash, bonds, debentures, and first mortgages, there appears $80,000 in minor assets and 80 per cent. of subscribed capital uncalled. The auditors compliment the company on well-kept books and records, as well as on efficient work by the company's employees.

* * *

GODERICH BOARD OF TRADE.

The Board of Trade of Goderich held its annual meeting in the council chamber on February 19th. There was a larger attendance and more interest manifested than has been for years past. The president, Charles A. Nairn, in his address, made reference to the progress made by the town during the past year, over sixty new dwellings having been erected, all of them of a substantial character; also a handsome new church for the Methodist body on North Street. The various industries of the town have had active business. The completion of the Guelph-Goderich branch of the C. P. R. will help to increase the development of other lines of industries.

It was decided to ask the Minister of Education to locate one of the Ontario normal schools in Goderich, as being one of the prettiest and healthiest towns in Canada.

The following are the names of officers elected for the ensuing year: President, Charles A. Nairn; vice-president, J. A. Rumball; secretary, James Mitchell; treasurer, W. A. McKim.

The following comprise the council of the Board: S. A. McGaw, J. B. Hawkins, George Porter, W. H. Robertson, H. E. Hodgins, W. T. Murney, Wm. Campbell, Chas. C. Lee, S. E. Hick, James A. McIntosh, J. H. Colbourne, Alex. Saunders, and the following were appointed a committee to look after the development of manufactures: H. E. Hodgins, J. B. Hawkins, J. A. Rumball.

* * *

TORONTO BOARD OF TRADE.

An excellent spirit is being shown by the members of the Toronto Board of Trade generally with respect to the attitude and work of that body for the current year. The first meeting of the new council was held on Wednesday last, and was quite enthusiastic. Almost every member of it had some suggestion to make, and we are told that a comprehensive policy has already been mapped out. Thirty-two new members were received on that day, and there are many more in sight. Evidently, therefore, there are busy days in store for both council and secretary.

The council meeting was preceded by a luncheon at the National Club, tendered by the president, Mr. Peleg Howland. The main business at the meeting was the striking of standing committees, nine in number, namely: Railway and Transportation, Freight Rates, Legislation, Municipal Taxation, New Industries, Insolvency, Technical Education, Membership, and the Reception Committee, which last has also in hand city development and tourist travel.

* * *

HUMBOLDT BOARD OF TRADE

We are interested in receiving this week an account of the formation of the Humboldt Board of Trade. This is one of the modern towns which have sprung up in our North-West largely by reason of the recent construction of railways north and west. It is in Saskatchewan province, 425 miles west of Winnipeg and 400 miles east of Edmonton; is on the line of the Canadian Northern Railway; has a detachment of the North-West Mounted Police; and has an agency of the Union Bank of Canada.

On Wednesday evening, 7th February, a meeting of the business men of Humboldt was held in the parlors of the Windsor Hotel, called for the purpose of organizing a local Board of Trade. F. I. Hauser was elected chairman and F. K. Wilson secretary of the meeting. After the advisability of forming such an organization had been discussed, it was moved and carried unanimously that a Humboldt Board of Trade be formed. The election of officers was then proceeded with, which resulted as follows: Hon. president, Dr. D. B. Nelly, M.P.P.; president, E. T. Wallace; first vice-president, F. I. Hauser; second vice-president, F. Heidgerken; secretary-treasurer, F. K. Wilson; councillors, J. W. Wanless, J. W. Lowes, Robert Telfer, J. H. Lyons, J. Lindberg.

The matter of drawing up rules and regulations was left in the hands of the council, who were instructed to submit same at the next meeting of the board, which will be held on the first Wednesday in March.

An important result of the meeting was the passing of a strong resolution to be forwarded to the Provincial Government asking that a well boring machine be sent to Humboldt with a view to relieving the present difficulty in securing water.

The following signed a charter membership list which was opened: Rev. Jos. Hunter, Dr. D. B. Nelly, M.P.P., J. W. Lowes, J. H. Lyons, J. G. Yoerger, F. K. Wilson, E. J. Walker, Robert Telfer, Fr. I. Hauser, L. J. Linberg, John Schaeffer, F. Heidgerken, F. Imhoff, S. B. Biehn, E. T. Wallace, J. W. Wanless, J. H. Thiemann.

* * *

BANKING AND FINANCIAL.

Branches have lately been established by the Merchants Bank of Canada at Carstairs, Alta., and Orillia, Ont.

In his budget speech on Monday night Premier Tweedie of New Brunswick estimated the receipts of the province in 1906 at $897,650, and expenditures at $878,398.

In a previous issue we made reference to the formation in Sherbrooke of the Empire Trust Company. There is already an Empire Trust Company in Canada, with headquarters in Halifax, and one will have to change it title. It seems that the Act of Incorporation was obtained by each in the respective Legislatures—Quebec and Nova Scotia—about the same time, and the question now is which company is really entitled to preference. One solution of the difficulty, it has been suggested, would be to unite forces and retain the name, but otherwise it will be necessary for one or the other to change it in some respect.

Apparently indignant at the unwisdom shown by some Canadian banks in abandoning legitimate sources of profit, the manager of a branch in Bruce county of one of the smaller banks issues a printed card bearing the following: "Owing to the absurd abuse of banking privileges and usages by some of our chartered banks in reducing their collection rates to seven cents per item, regardless of the amount, and the return without charge of all unpaid items, we have decided to meet this ridiculous method of doing business by collecting at par for all chartered banks sending their collections to us at this point, and we will also pay, without charge, all their drafts or certified cheques duly advised and crossed at this office." Several copies of this circular have reached the "Monetary Times," not from the issuing bank but from merchants or other bankers. One of the latter writes, bitterly: "We run our business as a giddy pastime, not to make money—nothing so vulgar. I think we ought to give free drinks to valued customers."

To show how some, at least of Old Country bankers, look upon the probable effects upon British trade and finance, should Mr. Chamberlain's proposals ever be adopted, we quote the following from a letter written by Mr. Felix Schuster, chairman of the Union of London and Smith's Bank, Limited, to a member of the London Stock Exchange as reported in "Commercial Intelligence." In the opinion of this gentleman, the business of the stock exchange and all engaged in the money market would suffer very seriously if the proposed policy tariff reform was adopted. This, he contended, aimed at a reduction of our foreign commerce for the alleged benefit of home industries and colonial trade. That such benefits could be obtained was more than doubtful, and, to his mind, the injury inflicted through interference with, or restriction of, foreign trade would be grievous and irremediable. It was no mere accident that London was the banking centre of the world. It had become so because it was the centre of the world's commerce, and if that commerce was restricted, their banking supremacy disappeared. There were keen rivals only too ready to grasp it. Owing to this supremacy, their money market was, until the out-break of the South African war, the cheapest in the world, and would unquestionably become so again provided their trade remained undisturbed.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, February 22nd, 1906, as compared with those of the previous week:

	Feb. 22nd	Feb. 15th.
Montreal	$29,538,996	$32,253,290
Toronto	23,233,022	22,092,625
Winnipeg	6,808,428	6,190,160
Halifax	1,606,859	1,470,412
Hamilton	1,253,790	1,060,018
St. John	1,003,203	995,021
Vancouver	1,989,032	1,798,087
Victoria	612,117	795,138
Quebec	1,453,897	1,541,684
Ottawa	2,249,656	2,021,812
London	985,408	987,910
Total	$70,734,408	$71,206,157

Vault doors in Bank of Montreal and Royal Trust Company, Montreal Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

IMPROVING NAVIGATION ON THE ST. LAWRENCE.

Mr. Hugh A. Allan, representing the Shipping Federation of Montreal, placed before the Minister of Marine and Fisheries on the 21st instant the vessel-owners' views on what is required for the improvement of navigation on the St. Lawrence. Among several matters touched on were wharf improvements at Father Point and Rimouski, new lighthouses, dredging of the channel between Murray Bay and Quebec, improvements to lights in the channel from the Lower Traverse to Orleans Island, Quebec harbor light, the deepening and widening of the channel between Quebec and Montreal, Montreal entrance lights, dredging the channel between Batiscan and Sorel, sweeping the channel, floating cranes for the port of Montreal, and a wrecking plant for Quebec; besides this, a dry-dock for the harbor of Montreal was deemed an urgent necessity, and also the enlargement of the dry-dock at Quebec. The federation also recommended that Pilotage Boards be established, both above and below Quebec, and that pilotage in the harbors of Halifax, St. John and Sydney should be brought under the control of the Minister of Marine. In reference to hydrographic surveys it was pointed out that the British Government had ceased to take surveys of the Canadian rivers and coasts, and it was, therefore, necessary that this work be taken up without delay by the Canadian Goverment.

The Canadian Pacific Railway Company

NOTICE TO SHAREHOLDERS.

A Special General Meeting of the Shareholders of the Company will be held at the principal office of the Company at Montreal on

Monday the 19th Day of March, next,

at noon, pursuant to the Act of the Parliament of Canada, 55-56 Victoria, Chapter 35, entitled "An Act respecting the Canadian Pacific Railway Company" for the purpose of considering and, if approved of authorizing an increase of the present authorized ordinary capital stock of the Company from one hundred and ten million dollars to one hundred and fifty million dollars, being an increase of forty million dollars, and of determining the amount or amounts and the time or times of the issue or issues of said stock, the purposes to which the proceeds thereof shall be applied, and of adopting such resolutions or by-laws as may be deemed necessary in connection therewith in order to enable the Directors of the Company to give effect to the same.

The Common Stock transfer books will be closed in Montreal, New York and London at 1 p. m. on Saturday, February 24th instant; the Preference Stock books will be closed in London on the same date.

All books will be re-opened on Tuesday, April 3rd, 1906.

By order of the Board,

CHARLES DRINKWATER, Secretary.

The Standard Bank of Canada

NOTICE IS HEREBY GIVEN that it is the intention of The Standard Bank of Canada, after publication of this notice for four weeks in the Canada Gazette, and in the Monetary Times, a newspaper published in the City of Toronto, to apply to the Treasury Board for a certificate approving of the following By-law of The Standard Bank of Canada:

"WHEREAS the Capital Stock of The Standard Bank of Canada is now One Million Dollars, and it is expedient that the same should be increased by One Million Dollars;

BE IT THEREFORE ENACTED as a By-law by the shareholders of The Standard Bank of Canada assembled at a special general meeting called for the purpose of considering and, if thought fit, of passing this By-law, and held in the Board Room of The Standard Bank of Canada, at the corner of Wellington and Jordan streets, Toronto, at 12 o'clock noon, on Tuesday, the thirteenth day of February, A. D. 1906;

1. THAT the Capital Stock of the Standard Bank of Canada be and the same is hereby increased by the sum of One Million Dollars, divided into twenty thousand shares of fifty dollars each.

IN WITNESS WHEREOF the Corporate Seal of the Bank has been hereto affixed, and this By-law has been countersigned by the President and General Manager, this 13th day of February, A. D. 1906.

[SEAL] (Sgd.) W. F. COWAN,
President.
(Sgd.) G. P. SCHOLFIELD,
General Manager.

Meetings

THE HURON AND ERIE LOAN AND SAVINGS COMPANY.

The Canadian Savings & Loan Co., The Huron & Erie Loan & Savings Co., Amalgamated January, 1906.

The forty-second annual general meeting of shareholders was held at the company's office in London, Ontario, on Wednesday, February 14th, 1906.

Present:—Messrs. J. H. A. Beattie, F. P. Betts, S. V. Blake, A. A. Booker, Geo. T. Brown, J. A. Cairncross, John Christie, Major Hume Cronyn, V. Cronyn, K.C., A. Durand, F R. Eccles, M.D., Chas. H. Elliott, Robert Fox, Alex. Fraser, Geo. F. Jewell, F.C.A., John Labatt, J. W. Little, John X. Logan, Judge Talbot Macbeth, A. T. McMahen, T. G. Meredith, K.C., James T. Moses, M. H. Rowland, Geo. A. Somerville, and others.

The president, Mr. J. W. Little, took the chair, and the manager, Mr. G. A. Somerville, acted as secretary.

Report.

The annual report and financial statement were submitted as follows:—

The directors of the Huron and Erie Loan and Savings Company have pleasure in submitting herewith their forty-second annual report, showing the result of the company's operations for the past year.

An agreement for the amalgamation of the Canadian Savings and Loan Company, and the Huron and Erie Loan and Savings Company was approved by the shareholders, December 7th, 1905, and subsequently received the assent of the Lieutenant-Governor of Ontario in Council. Adjusters were appointed on behalf of each company, Messrs. A. T. McMahen and H. S. Blackburn representing the Canadian, and Messrs. T. G. Meredith, K.C., and G. A, Somerville, acting on behalf of the Huron and Erie. These adjusters, after examination of the books and securities have certified to the correctness of the last financial statements of both companies. The business of the two corporations having been carried on separately for the whole of the year, a report of each is given, as well as a financial statement of the amalgamated company.

The demand for money throughout the year was active, at higher rates of interest, and the funds of both companies were kept fully employed. In the case of the Huron and Erie, new loans to the amount of $1,792,361.60 were selected from applications for over $3,867,000, and after re-inspection, maturing mortgages amounting to $792,053.92 were renewed for a further term; the cash value of first mortgages on real estate at December 31st, 1905, amounted to $7,962,526.79, an increase for the year of $595,400.89.

After paying all expenses and charges and the usual half-yearly dividends at 6 per cent. per annum, the surplus profits of the Canadian Savings and Loan Company were $13,173.50, in addition to the balance of $5,815.32 brought forward from the previous year's accounts. The net profits of the Huron and Erie Loan and Savings Company after defraying the expenses of management and all other charges, were sufficient to pay two half-yearly dividends at the rate of 9 per cent. per annum, and leave a surplus of $31,493.58, in addition to the undivided balance of $29,600.67 brought forward.

From the profits of both companies the sum of $15,000 has been set aside for possible losses, expenses of legislation, re-inspection and other outlays re amalgamation, $30,000 has been added to the reserve fund, and $35,083.07 carried forward as undivided profits.

The subscribed capital of the company now amounts to $3,500,000, of which $1,900,000 is paid up, and the reserve fund is $1,525,000, being over 80 per cent. of the paid-up capital.

The officers of the company continue to discharge their respective duties to the satisfaction of the board.

All of which is respectfully submitted.

J. W. Little, President.

London, Ontario, February 1st, 1906.

STATEMENT FOR YEAR ENDING DEC. 31st, 1905.

G. A. SOMERVILLE,
Manager.

We hereby certify that we have carefully audited the books and accounts of the Huron and Erie Loan and Savings Company for the year ending December 31st, 1905. The cash and bank accounts have been audited monthly, the postings and balances of all the company's ledgers examined quarterly; and we find the whole correct. We have also checked the balances in the books of the Canadian Savings and Loan Company, of London, Canada, at the close of the year, as taken into the above statement, and have examined the securities held by both companies, and find them in order.

GEO. F. JEWELL, F.C.A.
ALFRED A. BOOKER,
Auditors.

London, January 31st, 1906.

The president, in moving the adoption of the report, said:—

In submitting for your approval the report which has just been read, it is very gratifying to be able to point to a substantial advance in all branches of the company's business.

In the case of the old Huron and Erie, our funds were kept well employed throughout the year, rates of interest on mortgage were better and although we had to provide for some unusual items of expenditure the net earnings were very satisfactory

Payments of principal and interest have been very well met, compulsory proceedings were necessary in only four instances, we have no real estate (other than office premises) on hand, our losses amounted to $234.07, and the arrears of interest as at December 31st last were slightly over one-half of one per cent. on our loans.

The bulk of our business has, as heretofore, been confined to Western Ontario, our inspectors have been kept constantly in the field, our system of frequent re-inspection of properties held under mortgage rigidly carried out, and I believe it can safely be said that the assets of the company were never in a better condition than at present.

In the savings department we have nearly 6,000 depositors and for the year our increase in deposits and Canadian debentures is $218,387, and in sterling debentures $209,763, a total increase in deposits and debentures of $428,150—a very good indication of the continued confidence of the public, especially in view of the greatly increased competition owing to the large number of new branches of banks opened up recently and the efforts made in certain quarters to discredit loan corporations generally and to connect those doing a legitimate and legal business wth certain so-called loan companies who were attempting to do business on an entirely different basis, and in some cases, at least, paying no attention to the restrictions placed on them by law.

During the year one or two changes have taken place in the Board of Directors. Owing to certain legislation by the Dominion Parliament, Judge Talbot Macbeth, one of our most valued colleagues, whose calm judgment and sound common sense we had all learned to appreciate, tendered his resignation. The board reluctantly accepted the resignation and elected T. G. Meredith, Esq., K.C., to fill the vacancy. At the end of the year, in order to comply with the terms of "Amalgamation," it became necessary to reduce the old Huron and Erie board from six to five. Dr. Wm. Saunders, C.M.G., of Ottawa, therefore, voluntarily retired. Dr. Saunders has been identified with the Huron and Erie for many years, and had rendered invaluable service, and though recently he was not able to attend many board meetings, yet he was always ready to do anything he could to assist us. It is to be hoped that his services may not be entirely lost to the company, but that some means may be found of retaining his connection with us.

With reference to the amalgamation of the Canadian and Huron and Erie Companies, which took effect on January 1st, it is not necessary to say much, as full details were given in the circulars sent to the shareholders. A very pleasing future of this amalgamation was the satisfactory condition in which the assets of both companies were found to be. In accordance with the terms of the agreement adjusters were appointed "to investigate and verify the financial statements and examine the books and securities." After a most careful examination and a re-valuation by expert inspectors where the margin of security appeared to be small, the adjusters certified that the financial statements of both companies were "correct and accurate" and the amalgamation was finally completed on the basis of the last annual statement prepared by each company for its own shareholders. The amalgamated company now has a paid-up capital of $1,900,000, and a reserve fund of $1,525,000, the reserve fund being a little over eighty per cent. of the paid-up capital—the total assets are over eleven millions of dollars,, and now with our ample capital and increased connection, we may safely look forward to a period of continued prosperity.

Mr. Robert Fox, in seconding the motion, said:

"It has been a source of very much satisfaction to me to learn by personal observation as well as from the adjusters appointed by the Canadian Savings and Loan Company, of the very high standard of the securities held by the Huron and Erie. As a member of the board of the Amalgamated Company during the past month or so I have been very much impressed by the excellent business methods of the company, and the great care exercised by the directors in the selection of investments for the company's funds.

"It is unnecessary for me to enlarge upon the statement showing the result of the business done by the Canadian during 1905, which you will see has been about the same as in previous years.

"From my knowledge of the affairs of the Canadian, and the information I have recently obtained regarding the business of the Huron and Erie, I am more firmly convinced than ever that the amalgamation will prove a substantial benefit to the shareholders of both companies.

"In union there is strength, and the two corporations, who for thirty years past have been strong opponents, being now united, will, without doubt, as a combined company, enjoy greater prosperity in the future than they have in the past.

"I have much pleasure in seconding the adoption of the report."

In supporting the motion, Mr. V. Cronyn referred to the company's policy of inspection by its own officers of all properties offered as security for loans before advances are made, and of re-inspection from time to time, as one of the foundation stones in the exceptional success of the Huron and Erie. He also considered the appointment of energetic men in the prime of life to the board of directors a step in the right direction, and predicted a bright future for the company.

The usual resolutions fixing the compensation of directors and of appointing auditors were passed; also resolutions rescinding the old rules and by-laws and adopting the new by-laws.

On motion of Mr. J. H. A. Beattie, seconded by Mr. A. T. McMahen, the actions of the directors re amalgamation were confirmed, and they were authorized to make such arrangements respecting the office staff, either by re-engagement or compensation, as they deemed wise.

Mr. Alex. Fraser, seconded by Mr. C. H. Elliott, moved a hearty vote of thanks to the president, directors, manager and other officers of the company, and attributed the success and excellent record of the company largely to their energetic efforts.

Mr. T. G. Meredith replied on behalf of the directors. As a new member of the board he expressed himself as much pleased with the policy and management of the company.

The sums expended from year to year for land inspection he considered an excellent investment, as the chief aim of the company should continue to be for absolute safety and security rather than for increased profits.

The retiring directors were unanimously re-elected.

NORTH OF ENGLAND LETTER.

A complaint of an exceptional kind reaches me from a manufacturing friend in Canada who has been endeavoring to buy from England a particular sort of labor-saving plant for his factory. He counted on making his purchase on the best terms and on suffering no disability from the circumstance that his mill is outside the United Kingdom. To buy more cheaply than English manufacturers is hardly possible in these days of anti-dumping regulations. My friend counted merely on equal terms and these, to his extreme disgust, he cannot get. The machinists hold a monopoly and demand a substantial advance on home prices for any machines sold to Canada. This is wrathfully described as "robbery," and the hint is dropped that actions of this kind are likely to prove unhealthy to the British preference.

Of course, high State policy is a matter to be considered apart from the vagaries of individual business firms in either country. One must rush to the conclusion that English machinists are benevolently protecting internal industry. So far from acting so, they are more often accused of giving advantages away to outside competitors. More explanations than one of this demand for a higher price in Canada are plausible. Iron, which enters largely into the construction, is up. There may be commissions to some concessionaire to pay. Perhaps the makers erroneously suppose Canadians to be well able to pay the excess of profit. All or any of these explanations may be true and to them one more may be added. Canada is close to the United States and there are machinists in plenty who grumble against the tactics of Americans. Specimen machines are imported with less view to further purchases from the original source, than to imitation or improvement behind the Dingley Tariff. It is not wonderful that some English firms should have put excess-profits on any machinery wanted for America. That one of them should have included Canada in the same class is doubtless deplorable, but at least the motive leaves less room for finding fault.

One of the abuses of insurance which is rife secretly in England is to the discredit of the baser industrial offices. Their agents stimulate ignorant young people into insuring the lives of aged relatives in feeble health. At a cost of pence the insurer has the gambling prospect of pounds and as no medical examination is made the transaction seems simple enough. But let the insured die quickly and what happens? The obsequious agent is a changed man. Together with a blusterous superintendent, he scares his dupe with threats of a prosecution for fraud, and between them they contrive to compound the claim for a partial return of the premiums paid. Such repudiations are never allowed to see light of day. In law the company is liable to the full, but there are enough people blankly ignorant of law to make this swindle profitable. Quite as well as anybody else, the agent knows the precarious condition of the life he accepts. And very well too does he know the measure of the creatures whom he preys upon.

The last was not a signally good year for British banks. London banks relying on the money-market for profits found it impossible in some cases to maintain dividends at the 1904 level. Country banks did little more than repeat their previous success and their gains arose rather from charges on private overdrafts than on operations in the open market. Taking the rosier results for their basis, some suffering men of business have written in the usual way to the papers to know whether the enormous profits of banking do not justify a more liberal treatment of customers. Most of us understand that banking profits are built out of an infinitude of small things and that only the utmost skill in management brings them to book at all. Bankers in the North are distinctly hopeful about the future and though higher prices always bring added caution, our banks are not in their most illiberal mood. Most chairmen in their annual addresses have laid emphasis on the perfect genuineness of their showings and on the low estimates put on securities. A rise in Consols during this year would be welcomed by those who wish to show well next January.

The thing that most inflames a creditor's rage is to find that the debtor has assigned his book debts. We have long known that a trader may hypothecate existing debts. From a recent decision it appears that he may commit the horrible improvidence of assigning future book debts. That is not a condition that can be continued, for a debtor may secretly throw everything into the lap of one special creditor to the

---

Coaticook wants aid from the province of Quebec to rebuild the bridges over the streams running through the town. There are in all eleven of these structures.

The quantity of ore treated by the Hall Mines smelter at Nelson, B. C., in January was 4,198,000 pounds. The lead contents were 1,162,823 pounds. It came from 24 mines, the St. Eugene furnishing 1,332,000 pounds of ore, the Arlington Erie, 582,487, the La Plata 495,000, the Krao 236,000, the Ymir 190,000, etc.

Gradually the Americans are learning something about Canada: "When I left Denver I had an idea that British Columbia was about the size of a couple of counties, instead of four or five states," said Mr. J. P. Smith, who is selling Wilfley tables at Nelson. "I thought I could cover the country in 60 days. I wouldn't venture to put any time limit on my task now. I have been here 60 days now, and am only beginning. I have already seen many mining properties that I think would cause sensations if they had been discovered in Colorado or New Mexico."

THE CRAIN CONTINUOUS LEDGER

ROYAL BANK OF CANADA.

The annual meeting of the Royal Bank was held at the head office in Halifax on Wednesday, 14th instant. A resolution was adopted instructing the directors to apply to Parliament for an act authorizing the removal of the head office of the bank from Halifax to Montreal. The number of directors was increased from seven to eight and F. W. Thompson, of Montreal, was appointed, thus giving three directors to Montreal, where the meetings will be held when the change goes into effect. It was also resolved to issue about $1,000,000 of new stock, power to do which was taken three years ago.

The shareholders elected as directors were: T. E. Kenny, Thos. Ritchie, Wiley Smith, H. G. Bauld,, Hon. David McKeen, Jas. Redmond (Montreal), H. S. Holt and F. W. Thompson (Montreal). The last named is well-known in connection with the Ogilvie flour milling concern.

At a meeting of the board held subsequently to the annual meeting T. E. Kenny was re-elected president and Thomas Ritchie vice-president.

—The Molsons Bank has just added new branches at Ste. Flavie Station, Quebec, Maisonneuve, Montreal; Merlin, Ont., and has also made Dutton, Ont., a branch, it having been a sub-agency.

Continental Life Insurance Co.

ANNUAL REPORT FOR 1905.

INSURANCES.—During the year there were received 1,143 applications for new insurance and revival of policies amounting to $1,372,622; fifty applications for $58,000 were rejected or deferred, or were pending at the end of the year. The policies issued and revived were 1,112, aggregating $1,319,155.

The insurance in force on 31st December, 1905, reached the satisfactory total of $4,483,235, a net gain of $429,679 for the year.

INCOME.—The income, as in previous years, shows a gratifying increase, the net premium income, after deducting amounts paid for reinsurance, being $143,958.30, and the interest and other revenue receipts amounting to $19,791.37. The total revenue receipts were $163,749.67, and the total income, including $8,922.29 on capital account, was $172,671.96.

EXPENDITURE.—Policies on eleven lives became claims during the year, through death, to the amount of $10,735. This was much below the expectation, in fact, was considerably below the amount for 1904. The total payments to policyholders and annuitants was $12,965.85.

The expenses of management have been carefully watched and kept as low as was consistent with obtaining a fair share of new business, and the ratio of expenses to premium income was again considerably reduced, the decrease being nearly five per cent.

After paying all death claims, expenses, etc., the assets amounted to $498,029.30, an increase of $89,826.84, or twenty-two per cent. during the year.

RESERVES.—The net reserves for assurances and life annuities have been increased by $78,446.02, and now amount to $347,788, according to the Dominion Government standard. The surplus to policyholders has been increased to $140,636.49, and in addition to this large margin of security they have a further guarantee of safety in the uncalled capital and premium thereon amounting to $999,400, showing a total surplus to policyholders of $1,140,036.49.

INVESTMENTS.—The company's investments have been carefully looked after during the year, and the interest on mortgages and other securities has been promptly met, only $113.49 being in arrears at the end of the year.

The usual comparative statement of the company's business for 1904 and 1905 follows:—

		1904.	1905.	Increase.
1.	Policies issued and revived	$1,342,628	$1,319,155	....
2.	Net premium income	127,631	143,958	$ 16,327
3.	Interest income	12,402	17,975	5,573
4.	Income from premiums and interest	140,033	161,033	21,900
5.	Death claims	15,750	10,735	......
6.	Total assets	408,202	498,020	89,827
7.	Reserves	269,342	347,788	78,446
8.	Insurance in force	4,053,556	4,483,235	429,679

CASH STATEMENT, 1905.

Receipts.		Expenditure.	
Total receipts for premiums, interest, etc.	$172,671 96	Death claims, annuities, expenses, etc.	$ 81,494 98
Balance December 31st, 1904	327,225 92	Balance December 31st, 1905	418,402 90
	$499,897 88		$499,897 88

BALANCE SHEET, DECEMBER 31st, 1905.

Liabilities.		Assets.	
Net reserve for policies and annuities per Dominion Government standard	$347,788 00	First mortgages on real estate	$127,832 58
All other liabilities	9,604 81	Loans on policies	9,112 83
		Bonds and debentures	243,016 95
	$357,392 81	Cash on hand and in banks	38,405 54
Surplus on policyholders' account	140,636 49	Amount advanced for fire insurance premium re mortgage	5 00
			$418,402 90
		Other assets	79,626 40
	$498,029 30		$498,029 30

At the annual meeting held February 14th, 1006, the following gentlemen were elected directors for the ensuing year:—Hon. John Dryden, president; J. W. Scott, Esq., first vice-president; G. T. Somers, Esq., second vice-president; Emerson Coatsworth, Esq., A. F. MacLaren, M.P., Angus McKay, M.D., J. A. Jackson, Esq., Sidney Jones, Esq., Joseph Rosser, Esq., Thomas L. Metcalfe, Esq., Dr. H. Wilberforce Aikins, George B. Woods, Esq.

GEORGE B. WOODS, Managing Director, CHARLES H. FULLER, Secretary and Actuary.

TORONTO MORTGAGE COMPANY.

The annual general meeting of the shareholders of the Toronto Mortgage Company was held at its offices, No. 13 Toronto Street, at 11 o'clock, a.m., on Wednesday, the 7th day of February, A.D. 1906.

There were present: Hon. Wm. Mortimer Clark, Ira Standish, G. F. Burns, C. S. Gzowski, H E. Hamilton, Theron Gibson, George Martin Rae, George Porter, William Spry, Herbert Langlois, George R. R. Cockburn, David Carlyle, Wellington Francis, Bernard Saunders, Alexander Smith, Dr. H. B. Yates, Edward R. Greig, George Murray, Edward Galley and others.

On motion of Dr. Yates, seconded by Mr. C. S. Gzowski the president, Hon. Wm. Mortimer Clark, took the chair, and the manager acted as secretary. The secretary read the notice calling the meeting. The minutes of last annual meeting were taken as read, and confirmed. The secretary read the financial statement and profit and loss account for 1905, and the annual report.

Report.

The directors of the Toronto Mortgage Company beg to submit the usual financial statement of the company's affairs, for the year which ended on 31st December, 1905.

The gross earnings, including the balance of $19.483.33 brought forward from 1904, amount to		$142,476 52
After deducting cost of management, interest on debentures and deposits, and all other charges, amounting in all to		68,943 49
There remains a net profit of		$ 73,533 03
Out of which dividends at the rate of 5 per cent. on the capital have been paid, amounting to	$36,227 50	
Together with a bonus of 1 per cent. on the capital stock, amounting to	7,245 50	
		$ 43.473 00
Leaving a surplus of		$ 30,060 03
From which there has been transferred to reserve fund the sum of		15,000 00
Leaving a balance to be carried forward to 1906 of		$ 15 060 03

The reserve fund is now equal to 40 per cent. of the capital stock.

Debentures matured during the past year amounted to $187,940, to renew which, and for the new moneys, new debentures of the company have been issued to the extent of $273.500.

Loans were made amounting to $609.500, and mortgages aggregating $125,900 were renewed on further terms, after re-valuations of the properties in question by the company's inspector.

The revenue taken credit for has been actually exceeded by the cash receipts for interest and net rentals.

The directors have to record with deep regret, the deaths of Mr. Thomas R. Wood, formerly vice-president, and of Dr. Larratt W. Smith, one of the original directors of the company. In accordance with the notice already in the hands of the shareholders, a by-law reducing the number of directors from nine to seven, will be submitted to-day for confirmation.

The office staff have performed their duties to the satisfaction of the directors, and the books and accounts, and all securities held by the company, have been regularly audited.

All of which is respectfully submitted.

WM. MORTIMER CLARK. President.

FINANCIAL STATEMENT FOR THE YEAR ENDING 31st DECEMBER, 1905.

Liabilities.

To the Public—

Debentures, sterling	$884,231 37	
Debentures, currency	316,850 00

WALTER GILLESPIE, Manager.

We have audited the books and accounts of the Toronto Mortgage Company for the year ending 31st December, 1905. We have examined the vouchers and securities relating thereto. We find the books carefully kept, and hereby certify that the foregoing statements are correct.

E. R. C. CLARKSON, F.C.A.,
HENRY WM. EDDIS, F.C.A.,
Auditors.

Toronto, 12th January, 1906.

The chairman, in moving the adoption of the report, stated that the only matter which cast something of gloom over the meeting and the prosperous condition of the affairs of the company, was the absence of Mr. Wood, the late vice-president, and of Dr. Larratt Smith, one of the directors. Mr. Wood was the largest shareholder, and gave much time and attention to the management of the company, and his business ability was often of much value. Dr. Smith was first president of the company, and had been long president of the Building and Loan Association, which formed one of the companies which united on the formation of the present company. He was a man very highly esteemed by the directors and his genial presence will be long missed by them. The board, in order to carry out the understanding arrived at on the amalgamation of the uniting companies, did not fill up the vacancies occasioned by the death of Mr. Wood and Dr. Smith, and now submit to the meeting a by-law to reduce the number of the board from nine to seven. The board appointed Mr. Wellington Francis to be vice-president. Mr. Francis was president of the Union Loan and Savings Co., and took a very active and important part in bringing about the amalgamation of the companies constituting the Toronto Mortgage Company.

The chairman congratulated the shareholders on the very prosperous condition of the company in all departments of its business. He informed the meeting that all moneys credited to Revenue Account had been actually paid, and not merely charged against loans. He further mentioned that during the past year the sterling debentures have increased $63,000, the Canadian debentures $22,000, the savings deposits $19,000, and the mortgage loans $198,000. The rest has been considerably increased, and now amounts to forty per cent. of the capital. It is the policy of the board, he said, to maintain a substantial reserve, not only to sustain the credit of the company in the money market, but also to secure the payment of a dividend to the shareholders, without danger of diminution.

The chairman called the attention of the meeting to the desirability of the currency debentures as investments for trust funds, and moneys which have to be invested for given periods. Under the Statute respecting investment of trust funds by trustees, the debentures of the company are included among the authorized securities.

The demand for money last year was good, and the rate of interest obtainable on the whole was fair, but great care requires to be exercised in the selection of business, so as to eliminate, as far as possible, the speculative element.

As an illustration of the prosperity of the company, and the care with which the funds have been invested, the chairman said that the arrears of interest, insurance premiums, taxes, and other incidental charges on mortgage securities, amounted to the unusually small sum of $4,156.28, or only one-sixth of one per cent. of the assets.

He informed the meeting that, since the last report, one of the three large office buildings held by the company had been sold at a net profit of $4,000. Another produced more income than if the amount invested in it had been lent on mortgage security. Many enquiries are being made by purchasers of real estate regarding this valuable property. The other building is the office of the company, which is needed for the purposes of the business. The profit on the sale of the building referred to has been credited to the amount charged against the offices of the company, and does not appear as swelling the revenue.

The chairman thanked the meeting for the confidence reposed in the directors, and assured the shareholders that they would pursue the same conservative policy as that which they had followed in the past. He stated, as an example of what the directors thought of the stability and prospects of the company, that they and the manager and their immediate relatives owned one-fifth of the whole capital stock.

It was then moved by the president, and seconded by the vice-president, "That the annual statement and report, as read, be adopted." Carried.

It was moved by Mr. Bernard Saunders, and seconded by Mr. Theron Gibson, "That the thanks of the shareholders are due, and are hereby tendered to Messrs. Allan, Buckley Allan & Co., advocates, Aberdeen; Messrs. J. & A. F. Adam, W.S., Edinburgh; and Messrs. Fraser, Stodart, & Ballingall, W.S., Edinburgh; the British financial agents of the company in Scotland, for the valuable services they have rendered this company during the past year." Carried.

It was moved by Mr. David Carlyle, and seconded by Mr. William Spry, "That Messrs. E. R. C. Clarkson, F.C.A., and H. W. Eddis, F.C.A., be appointed auditors for the current year, at a salary of $300 each." Carried.

It was moved by Mr. George Murray, and seconded by Mr. Edward Galley, "That by-law No. 21a, passed by the directors on the 11th day of January last, as follows:

> 'Whereas the number of directors of the Toronto Mortgage Company is nine, and it is expedient that the number should be decreased, now, therefore, the Toronto Mortgage Company enacts as follows, that the number of the directors of the said company be, and the same is, hereby decreased to seven
>
> (Signed) Wm. Mortimer Clark, President.
> (Signed) W. Gillespie, Manager.'
>
> (Seal.)

"be, and the same is, hereby confirmed." Carried.

It was moved by Mr. George R. R. Cockburn, and seconded by Mr. Edward Galley, "That the annual remuneration to the directors be increased by the sum of $500." Carried.

It was moved by Mr. George R. R. Cockburn, and seconded by Mr. George Porter, "that a poll be opened for the balloting of votes, for the election of directors, to be closed, if, at any time, three minutes should elapse without any votes being polled. Also that Messrs. E. R. Greig, and T. Gibson, be appointed scrutineers for the occasion." Carried.

The scrutineers reported as follows, "We hereby certify that the following gentlemen have been unanimously elected directors of the Toronto Mortgage Company, at the seventh annual meeting held at the offices of the said company, this day, at 11 o'clock a.m., Hon. Wm. Mortimer Clark, Wellington Francis, Thomas Gilmour, C. S. Gzowski, Herbert Langlois, George Martin Rae, and Henry B. Yates."

(Signed) T. Gibson,
(Signed) Edward R. Greig,
Scrutineers.

At a subsequent meeting held by the board, the Hon. Wm. Mortimer Clark, LL.D., W.S., K.C., was re-elected president and Mr. Wellington Francis, vice-president.

PROPOSED NEW BANKS IN CANADA.

Enquirer, Saskatoon, Alta., wants to know names and addresses of the provisional secretary and general manager of five proposed new banks, viz., the United Empire, the Monarch, the Sterling, the Farmers, and the Citizens. We reply that the provisional secretary and intended general manager of the United Empire Bank is Mr. Geo. P. Reid, whose address is Lawlor Building, Toronto; the projectors of the Monarch Bank have an office in the Queen City Chambers, Church Street, Toronto; we have heard of two rival contestants for the general managership, but cannot tell who is provisional secretary; the Sterling Bank has an office in Manning Chambers, Queen Street, and the provisional secretary is G. T. Somers; the Farmers Bank has an office in the North American Life Building, King Street West, and its secretary is Mr. C. H. Smith. They profess to have enough money subscribed to start. About the "Citizens Bank of Canada" we have been able to learn nothing definite.

An article in the "Journal of the Canadian Bankers' Association" has some information on the general subject. It is entitled "The Bank Changes of Five Years," and gives a list of banks now doing business, which have begun operations since 1900, thus: The Sovereign Bank, the Metropolitan Bank, the Crown Bank, the Home Bank, the Northern Bank. All these are in Toronto except the last, whose head quarters are Winnipeg. Also those banks absorbed since 1900, and a list of new banks chartered during the past three years and what has become of them. Thus:—

New Banks Chartered in Past Three Years.

Capital Authorized.	1903	No. of Bill Incor.
$5,000,000	—The Alliance Bank of Canada.. Extended in 1904. Expired 1st July, 1905.	3 Ed. VII.-C. 79
$1,000,000	—The Bank of Winnipeg...... Apparently expired.	3 Ed. VII.-C. 83
$2,000,000	—The Citizens Bank of Canada.. Extended in 1905.	3 Ed. VII.-C. 106
$1,000,000	—The City and County Bank of Canada .... Taken over by the Crown Bank.	3 Ed. VII.-C. 107
$1,000,000	—The Home Bank of Canada.... Extended in 1904. Now in business.	3 Ed. VII.-C. 127
$2,000,000	—The Northern Bank.......... Extended in 1905. Now in business.	3 Ed. VII.-C. 168
$2,000,000	—The Pacific Bank of Canada.. Extended in 1905. Acquired by United Empire Bank.	3 Ed. VII.-C. 174
$1,000,000	—The Sterling Bank of Canada.. Reconstructed in 1905.	3 Ed. VII.-C. 194
	1904.	
$1,000,000	—The Farmers Bank of Canada.. Extended in 1905.	4 Ed. VII.-C. 77
	1905.	
$2,000,000	—The Monarch Bank of Canada.. Not yet in business.	5 Ed. VII.-C. 125
$1,000,000	—The Sterling Bank of Canada.. Not yet in business.	5 Ed. VII.-C. 160

Banks Absorbed or Failed Since 1900.

Bank of Yarmouth; failed.

The Halifax Banking Company; absorbed by Bank of Commerce.

The Exchange Bank of Yarmouth; absorbed by Bank of Montreal.

The People's Bank of Halifax; absorbed by Bank of Montreal.

The Commercial Bank of Windsor; absorbed by Union Bank of Halifax.

The Summerside Bank; absorbed by Bank of New Brunswick.

To this last list falls to be added the Merchants Bank of Prince Edward Island, which has just been absorbed by the Canadian Bank of Commerce.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st Jan., 1906.

General Managers and Underwriters

BOOKS AND PAMPHLETS RECEIVED.

The jubilee of the "Montreal Witness" may with great propriety be called an event in Canadian journalism. The paper was launched at a time when readers were few compared with to-day, and under difficulties that would have daunted less resolute people. It laid down for itself principles which were rightful and wholesome, and although not on the broadest grounds perhaps, or always with generous expressions has kept to them with a consistency that is rare. To have adhered to rules of conduct that were often unpopular; to have refused advertising that its management deemed improper; to have maintained a high standard in advocating public measures, has had the effect in the long run of compelling admiration in quarters where the paper was at first accused of puritanical narrowness, and making friends out of former fierce opponents or disdainful cavillers. Messrs. John Dougall & Son merit congratulation on the influential position the "Witness" has attained, and the "Monetary Times" wishes them the continued success which their enterprise as publishers and their upright attitude as journalists for fifty years deserves.

With very great satisfaction we find realized in the new London weekly entitled "Canada," to a degree uncommon with new ventures, the ideal laid before the editor of the "Monetary Times" a year or two ago of an illustrated journal which should worthily present this Dominion to English readers. Mr. Lefroy has justified his prospectus, and presents in the issue before us, that of January 27th, a publication which deserves high praise. It depicts this country in many aspects—commercial, social, sporting, literary, political, indeed in every aspect which commends Canada as a home for the Anglo-Saxon who desires a field for his energy. The editorial is not obtrusively wise or fulsome; the papers on St. Jean Baptiste and the Poets of Quebec are admirable; Mr. P. B. Ball's interview on how to do business with Canada is valuable, and the portions dealing with the physical beauties of the country are excellent. Among the many illustrations, that one representing a lad with a fishing rod in his hand "dreaming the happy hours away," is a realization of many a scene on an Ontario lake. The pictures are capitally done; in fact the publication generally merits the encomium, so often heard but by no means so often realized, of a high class periodical.

THE MILLERS AND MANUFACTURERS INSURANCE CO.

(Stock and Mutual).

Established 1885.

JAMES GOLDIE, President. J. L. SPINK, Vice-President.

The twenty-first general annual meeting was held on Friday, February 16th, 1906, at the company's offices, 32 Church Street, Toronto, when the following financial statements were presented. The president in moving the adoption of the report stated: "That the TOTAL LOSS AND EXPENSE RATIO COMBINED, to the net cash income, WAS ONLY $57.19 for the year.

Attention was also drawn to the exceptionally satisfactory results of the year's transactions, as emphasized by the large credit balance of **$44,551.00** carried from the revenue account of the year to profit and loss account.

REVENUE ACCOUNT FOR YEAR ENDING 31st DECEMBER, 1905.

General Managers and Underwriters

ANSWERS TO ENQUIRERS.

Imperialist, Quebec.—It is not of much avail to give lengthy lectures to people who feel that they know better than you do, and who are not likely to be persuaded. The stubbornness of the Englishman is hard to overcome. We have ceased to care for elaborate argument on the subject, and prefer to give such concrete instances as the following from our editorial of 26th January, on "Why British Exports to Canada Do Not Grow.":

> If the British exporter desires to sell goods in Canada he will have to learn. He will have to take some trouble. The United States have learned, and have taken trouble for many years. And this is one of the reasons why for twenty years that country has been selling to this country more than Great Britain does. Up to 1882 or thereabout, Great Britain's exports to Canada were greater than those of the United States. But in every year since that date the United States has sold more to us than Britain. In each of the last six years the exports of the United States to Canada have exceeded $100,000,000. But Great Britain's exports to us in the first of these years were $44,789,000, and in the last, namely, 1905, they were only $60,342,000.

This concrete fact is something which cannot fail to strike even the most opinionated of our dear English cousins, however he may try to explain it away. And we believe it is just such facts as these that Mr. Chamberlain sees, and tries to get the British publicist to see.

J. H. Windsor.—(1) Yes, we purpose having a further series of articles on the subject of Ascertaining the Causes of Fires. Two or three have already appeared. (2) We have no information as to the intentions of the Government in the matter.

* * *

—The annual report published by the Toronto Electric Light Company shows that net earnings last year amounted to a little over 10 per cent. on the capital. The net revenue was $304,630, or an increase of $2,588 over last year. It was stated that the new sub-station on Teraulay Street, for receiving and distributing Niagara power was nearing completion, and that a large portion of the machinery had been installed already.

* * *

—A valuable discovery has been made in Eastern Nova Scotia of a mineral substance greatly used in arts and manufactures. A deposit of graphite has been discovered at French Vale, Cape Breton, by Mr. Neil D. Campbell, says a Halifax item. At a depth of twenty-five feet he found a thirteen foot seam. Samples analyzed were found to contain 70 per cent. of graphite. The I. C. R. line passes within four miles of the property, while natural harbor on the Bras d'Or Lakes is found at six miles distance. The greatest deposit of graphite is found on the Island of Ceylon. The Ceylon product finds ready sale in New York at $120 a ton. A number of minor deposits are found in the United States, but both in quality and quantity are inferior to the Ceylon article. This mineral has also been found in the Lake Superior district of Canada, at Silver Islet, for example.

It is stated that a United States company are preparing to put on a fleet of grain-carriers on the route from Duluth and Chicago to tidewater by the Welland and St. Lawrence canals.

Mercantile Summary.

British Columbia hops are in increasingly large demand on the London market, and a large trade is being worked up in this line.

The Warden King Company, Montreal, who manufacture the Daisy Heater specialties, are about to erect large warehouses in Toronto at an estimated cost of between $40,000 and $45,000.

The Vancouver, Fraser Valley and Southern Railway Company wants authority to construct and operate a line from Vancouver to Blaine, in the State of Washington, with branches to Chilliwack.

The Churchill Manufacturing Company, Limited, Toronto, has been granted an Ontario charter empowering it to purchase the patents of T. H. Churchill, G. H. Harper and others, relating to beds, cots, and household novelties. The capital is placed at $100,000.

The Erie and Ontario Dredging Company, Limited, has been incorporated with a capital stock of $96,000. It proposes to carry on business as a general contracting, towing, wrecking and salvage company, and to build steamboats, tugs, dredges, etc. E. J. Hingston, of Buffalo, and E. A. C. Pew, of Toronto, are members.

The Huron and Ontario Railway Company are asking the Railway Committee for further bonding power and the right to build branches from Port Perry to Whitby or Oshawa, and from Goderich south through Huron, Middlesex, Lambton, Kent and Essex counties to Windsor and Sarnia, touching at Parkhill and Strathroy.

The Ontario Power Company is installing the fourth section of its powerhouse equipment, which, it is said, will be the largest unit for the generating of electricity in the world. Its capacity will be twelve thousand five hundred horse power. It is expected to be ready for operation in March, and a fifth unit of equal size will be ready during April.

At the annual meeting of the Kingston & Pembroke Railway Company, on the 15th inst., Hon. W. Harty, R. V. Rogers, R. Crawford, Kingston; A. R. Creelman, James Osborne, W. R. Baker, Montreal; W. D. Matthews, H. P. Tummerman and W. B. Hart, Toronto, were elected directors. W. D. Matthews is president; W. R. Baker, vice-president and general manager, and Archibald MacNaughton, secretary-treasurer.

Vancouver newspapers speak of English capitalists having recently acquired the Potlatch Creek mine, on Howe Sound, six miles south of the Britannia mine. Some months ago an important discovery of galena was made on Howe Sound by a prospector who was associated with Vancouver men. The ore then assayed very high in silver and lead, with some gold. The Potlatch Creek mine is half a mile from deep salt water. Two ledges show plainly on the face of a bluff flanking the creek.

Messrs. Purdom & Purdom are asking for the privilege of building a "scenic" railway at Springbank, London's pretty park.

Fire did considerable damage last week to the large packing-room of the Tillson Company at Tillsonburg. The loss will be severe, but the dry kiln, elevator and oat mill were uninjured.

Sheldons Limited, Galt, will carry on business, making and installing heating, ventilating and drying systems, making and selling light, structural or sheet steel or iron articles, also carrying on a general foundry business.

Mr. C. Milliken has purchased the sawmills and large timber limits of the Van Buren Lumber Company, near the St. John River and elsewhere in New Brunswick. Mr. A. E. Hammond, formerly connected with the company, will continue in the business with the new purchaser.

A letter from London, Eng., states that the Dominion Steamship Line will add several new vessels to its service. It is controlled by the International Mercantile Marine Company, and it is supposed that corporation proposes to compete more actively for the Canadian trade.

A company which has just been granted a charter by the Ottawa Government is the Dominion Stove and Heater Works, Limited, with a capital of $500,000. L. E. Kimpton and H. L. Mitchell, of Montreal, are charter members. The company will make and sell stoves, furnaces, radiators, machinery, etc., and will take over as a going concern the business of any other company of similar character.

The steamship "Telemachus" sailed last week from Vancouver for Tacoma and Yokohama with a valuable cargo, comprising canned salmon, lumber, salt herring, hops, fish oil, tallow, and pig-lead, totalling in all at about two thousand tons. Thirty thousand cases of salmon, 1,110 tons, valued at $90,000; 656 boxes of salt herring, for Japan, 131 tons, valued at $2,350; 285 pieces of lumber, about 200,000 feet; 300 bales of hops; 219 barrels of tallow; 295 barrels of fish oil; 2,342 slabs of pig-lead, 100 tons, and a few odd shipments of general merchandise composed the freight taken from that port.

The manager of the London branch of the Bank of Montreal has cabled to Hon. Mr. Matheson, stating that the experiments by the great Rothschilds' financial firm in the smelting of Cobalt ores are being carried on with pronounced success. The Rothschilds have already made an advance payment to the bank of £100 on each ton of the trial shipment of twenty tons of ore, sent through the Lands and Mines Department by various mine owners in the rich Cobalt district, and it is expected that further payments will be made soon. There is reason to think that the result of the experiments will be the opening up of a market in England for Cobalt ores.

BANKERS.

From the following list our readers can ascertain the names and addresses of bankers who will undertake to transact a general agency and collection business in their respective localities:

MEAFORD—Grey County. C. H. JAY & CO'Y Bankers, Financiers and Canadian Express Co Agents. Money to loan.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Canadian Portland Cement Co. has ordered from the Robb Engineering Company, two 150 h.p. boilers for their plant at Marlbank, Ont.

The annual meeting of the British Columbia Fruitgrowers' Association, which has always hitherto been held in Victoria, is this year to be held in Nelson.

Mullarkey & O'Brien, of Montreal, have a contract to build for the Great Northern Railway 80 miles of track from Garneau Junction to Quebec, and 20 miles from Montfort Junction to St. Jerome.

The "Nelson News" of February 10th makes the statement that the shipments of ore from the various mines of Kootenay-Yale for that week have broken the record, totalling 34,302 tons. The previous record was established for the week ending December 17th, 1905, 33,594 tons.

Reviving activity in the Lardeau District of British Columbia is reported, prospectors declaring that decided values are to be found there. At the Sunshine mine, close to the Silver Cup, W. Davis says much has already been accomplished in drifting and crosscutting at low levels, and that a vein of high grade galena, 14 inches wide, has already been traced for more than 50 feet.

At the annual meeting of the Essex County Savings and Loan Co. directors in Windsor last week, Judge McHugh resigned from the directorate, as there is a provision in the law prohibiting judges from being directors of such companies. F. H. Macpherson was elected to the vacancy and the other directors were re-elected by a unanimous vote. A. F. Falls was appointed an auditor of the company in place of F. H. Macpherson.

W. Stevely & Son's stove and graniteware store-rooms in London, Ont., were badly damaged by fire on the 19th inst. The loss is estimated at $15,000, covered by insurance. At Edmonton, Alta., on the same day, Cameron & Company's hardware store was burned, at a loss of $10,000, with only partial insurance. T. Hill & Son's general store at Russell, Man., has been burned down, loss $6,000, covered by insurance. At Thetford Mines, Que., the Roman Catholic Church has been destroyed, the loss being $45,000, and insurance $30,000.

On February 10th, the steamer "Loftus Cuddy" was launched at Lorain, Ohio. The big freighter, whose capacity is 10,000 tons, was christened by Miss Ethel Cuddy. The dimensions of the new steamer are: Over all, 545 feet; on the keel 525 feet; beam, 55 feet; depth, 31 feet. She has Scotch boilers and triple expansion engines. The new boat is named after a gentleman who left Strathroy many years ago, founded the Cuddy-Falls Banking Co., in Amherstburg, and then went to reside in Cleveland, where he is much respected as a successful and wealthy coal operator.

CORRESPONDENCE INVITED

54 King Street West, TORONTO

Mercantile Summary.

The Merchants Bank of Canada has opened a branch at Orillia, Ont., under the management of Mr. F. L. McGachen.

It is announced that the Provincial Department of Agriculture is arranging to have experiments carried on this year at the horticultural experimental station, Ruthven, Essex county, in tobacco culture. Special attention is to be paid to the matter of curing. Tests of different varieties will be made.

A demand of assignment has been made upon T. E. Lafrance, of L'Annonciation, Que. He was formerly a tailor in a small way, and blossomed out into a general merchant last July, succeeding J. P. Lee, *and got credit.* His indebtedness is put at as much as $7,000, and the estate is likely to turn out poorly.

The assignment is announced of Fine Bros., dealing in dry goods, clothing, etc., at Hartland, N.B. They show liabilities of $8,600, and recently tried to effect a compromise arrangement at 25 cents on the dollar. Their business has been to some extent of a small jobbing character, supplying pedlars and the like.

Formerly a barber at Manchester, New Hampshire, and for a short time in the hotel business at Stanfold, Que., Amedee Brunelle has assigned. He is said to owe $5,500, while showing only about $700 of assets. Amedee was cute. Maybe he learned it down East, and considered 12½ per cent. of assets was enough to show.

An offer is made, as appears elsewhere in to-day's paper, of a cash bonus, a free site, and other advantages to any responsible milling firm which will erect a two-hundred-barrel flour mill at Fort Saskatchewan, which is a live town of Alberta, some twenty miles north-east of Edmonton. It has a population approaching 2,000, and the Bank of Nova Scotia and the Union Bank have branches there.

A demand of assignment has been made upon A. N. Drouin, keeper of a general store and a jobber in logs at L'Annonciation, in Labelle county, Que., whose liabilities are said to be fairly heavy. He has been engaged in litigation for some time past with the Riordon Paper Co. in connection with a contract to supply their mills at Hawkesbury with pulp-wood, and was also unfortunate in having a fire last December.

The Cataract Power Co. contemplates erecting in Hamilton a large building for its electrical terminal station. The idea is only to put up four stories now, but to so arrange as to render feasible the building of six additional floors as soon as required. The building will include all the company's offices, storerooms, warerooms, a large assembly hall, ticket offices, etc. The estimated cost is $250,000.

Mercantile Summary

A by-law in Niagara Falls, Ont., to raise $26,000 on debentures in order to instal a waterworks system was defeated.

It is reported that liquidation proceedings are being instituted in the matter of the Ottawa Furnace and Foundry Co. The company was first organized in 1900, with a capitalization of $40,000, to take over the business of the Ottawa Stove Company, and in 1904 the necessary powers were obtained increasing the capital to $250,000.

At Edmonton on Monday last P. Cunningham, a fur trader, arrived from Lesser Slave Lake with 24 packs of furs valued at $25,000. He made the trip of 300 miles in ten days. Freighters in the far North have had, he says, a bad winter owing to the lack of snow.

We hear that J. B. Martel, of Quebec, engaged in the crockery business under the style of Martel & Martel, has placed his affairs in the hands of V. E. Paradis, of that city, for liquidation. His liabilities are figured at about $7,000, with assets approximating the same figures, but likely to realize less.

In August last Geo. H. Poirier, Jos. A. Poirier, and John F. Curran started a clothing business at Montreal under the pretentious style of the Provincial Clothing Company of Canada. In January they began to show signs of financial distress, and now Wilks & Michaud have been appointed assignees to their estate.

The Canadian Shipbuilding Company are about to build for the St. Lawrence and Chicago Navigation Company a large, modern, steel freight steamer for the northern lake trade. She is to go into commission in the spring of 1907. The dimensions are not yet definitely decided on, but she will be between 450 and 500 feet in length, and probably of 10,000 tons.

Among the new companies which have recently been granted charters by the Manitoba Government, are the Western Canada Coal Mining Company, with a capital of $50,000, and in which J. W. Cockburn and J. A. Christie, of Winnipeg, are interested; and the Allward & McCormick Glass Co., Limited, capital $100,000, with J. R. Allward and Alex. McCormick as members.

The Hardware Association of Western Canada met in Winnipeg a few days ago and discussed matters of general interest to the trade, about 125 merchants from various parts west of Winnipeg being in attendance. The following officers were elected for the ensuing year: A. J. Falconer, of Deloraine, president; J. B. Curran, first vice-president; W. M. Gordon, Winnipeg, second vice-president, and J. E. McRobie, secretary-treasurer.

After being for twenty years a dry goods clerk, P. E. Plante thought he would start business for himself last summer in Montreal, buying an old stock, part at 80 cents and part at 62½ cents on the dollar. He has already assigned, and shows liabilities of about $4,000.—Consent to assign has been filed by J. W. Cadieux, of Montreal, who only started in the grocery business last fall. He shows assets of $1,600 to pay liabilities of $2,550.

On demand an assignment has been made by Abraham Assad, general dealer, of Buckingham, Que. He is a Syrian, formerly engaged in peddling about Montreal, who opened a store at the above location four years ago. He was burned out in December, and apparently had difficulty in reaching a settlement of his insurance, with the result that several law suits were entered against him, culminating in insolvency proceedings.

BRITISH COLUMBIA AGENCY REQUIRED
By commercial traveller who has represented a leading Canadian manufacturer for fifteen years—Either Clothing or Dry Goods. Address Commercial Agent, Box 29, Victoria, B.C.

The annual convention of the Retail Merchants' Association of Western Canada took place in Winnipeg on the 13th inst. This association represents practically every branch of retail trade in Western Canada except hardware. President T. J. Lawlor, of Killarney, presided, and the proceedings were characterized by enthusiasm. Addresses were delivered by Mr. E. M. Trowern, secretary-treasurer of the Toronto association, and Mr. W. A. Coulson, organizer of the western association. The most important matters dealt with were insurance, discussion of proposed legislation, getting the legislation committee in shape for work and the laying out of new ground for organization.

Here is a little story of mercantile life that is almost typical of scores of cases heard of in the Province of Quebec in recent years. After being born and brought up on a farm, and reaching the age if not the stature of a man, Guillaume Guimont, of Ste. Angele de Rimouski, Que., thought he would essay the role of a merchant, and some twelve years ago he married the widow of a deceased country storekeeper, continuing the business of the departed one. In 1895 he failed, but, nothing daunted, resumed business under cover of his wife's name. The year 1901 found the assignee again in possession, and this time he again opened up, using the name of his son Ernest, who has just assigned to a Quebec firm of accountants.

FIRE INSURANCE.

Further particulars are now to hand regarding the disastrous fire in St. John, N.B., last week, which broke out in J. W. McDuffee's jewelry store at the corner of King and Canterbury Streets. The fire had gained great headway when discovered, but, according to the local papers, it was rendered infinitely worse by the wretched water supply, the streams falling harmlessly back on the outside of the building, not being able to reach

the upper floors at all. It rapidly spread to the Royal Bank building, the American Clothing store and the Brock & Paterson millinery warerooms. The American Clothing store loss is estimated at $25,000, with $6,000 insurance; Brock & Paterson, $10,000, fully insured; Royal Bank building, $40,000, insured; Lears' picture store, $10,000, insurance small. Altogether, the losses are calculated to have been over $100,000.

Large fires continue to occur in the United States. On Saturday night last the wooden working house of the Duluth grain elevator plant of F. H. Peavy & Company, of Minneapolis, was burned to the ground, with its contents, consisting of about 1,000,000 bushels of grain, principally wheat. Loss not far from $1,000,000, insured. There was not a hydrant within half a mile of the scene of the fire. At four o'clock on Sunday morning last six brick blocks in the business section of Rutland, Vermont, were destroyed by fire. The loss is estimated at three-quarters of a million dollars. The fire went beyond the control of the local department, and help was summoned from Whitehall, N.Y., and Burlington.

It is something like forty years since the establishment of the New York Underwriters' Agency, a successful fire-underwriting organization, which has earned a good name as being honorable and prompt in settlements. We observe that the company's assets amount to $18,061,926, and that it has a net surplus of more than five millions. Its reserves have been built up by careful underwriting and its policyholders are in good hands. The company is doing an excellent business in Canada, its Toronto representative being Mr. T. D. Richardson, whose office is at 16 Wellington St. East.

* * *

DOMINION COAL COMPANY.

The annual report of the directors of the Dominion Coal Company, Limited, for the year ending December 31st last, which has just been issued, contains some interesting figures of progress. It is seen therein that the business of the company for the year was satisfactory, but that on the other hand the largely increased requirements of the Dominion Iron & Steel Company, the contract with which is not largely remunerative, had taken an increased proportion of the output from the mines. The average price received from sales therefore was less than in 1904.

The output of 1905 was 3,189,657 tons, as compared with 3,023,522 tons for 1904. The net earnings from the operation of the company's mines, steamships, railway, stores, rents, etc., for the year 1905 were $1,573,832.19, as compared with $1,620,475.33 for the year 1904.

The statement was made on behalf of the directors that the programme of operations decided upon some time ago for the purpose of placing the company's property and equipment in a state of thorough efficiency has been steadily prosecuted during the year 1905, these improvements including the opening up and developing of the new mine "Dominion 6," new electric plant at Dominion 2, to be used for furnishing auxiliary power for pumping, ventilation and underground hauling, increase in rolling stock, including 150 steel cars, etc., etc. The total amount expended during 1905 on capital account was $497,605. The company's balance sheet shows its financial position has materially improved during the year, the arrangements for the consolidation of the indebtedness of the company, agreed on last May, having apparently worked satisfactorily. It was decided not to declare a dividend on the common stock for the present, it being deemed wiser to provide first for the efficient equipment and development of the mines and all the properties.

RICHELIEU & ONTARIO NAVIGATION.

The annual meeting of the shareholders of the Richelieu & Ontario Navigation Company took place in Montreal on Monday last. The report showed that the gross earnings for the year amounted to $1,217,373.61, an increase of $217,504.10 over 1904, and the net profits, after providing for fixed charges, interest, etc., $239,294.55, being an increase over the previous year of $144,981.62. The operating expenses were 78.86 per cent. of the gross earnings, as against 88.64 per cent. for the year 1904. The net earnings were the largest in the history of the company. The bond issue of the company originally amounting to $571,833.33, now stands at $351,373.35. During the past year the company has redeemed $27,253.33, of said issue, and the company has in its treasury $1,946.66 of bonds redeemable March 1st, 1906.

It was stated that in view of the heavy traffic last season, steamers of large capacity have been rendered necessary. A new vessel therefore is being built for the St. Lawrence River Rapids, and they are preparing to build one for the Montreal-Quebec route, larger than the "Montreal." During the past year the company's hotels, shops, wharves, and shore properties have been thoroughly

Bonus for Flour Mill.

The Council of the town of Fort Saskatchewan are open to negotiate with any reliable firm engaged in the milling business, and have the following inducements to offer any firm erecting and maintaining a two-hundred-barrel flour mill:

maintained and a number of other general improvements have been made. A proposal by the directors to secure power from the Government to make a further bond issue of $1,000,000 was ratified by the shareholders.

* * *

LIFE INSURANCE MATTERS.

Says John F. Dryden, of the New Jersey Prudential office: "I believe industrial insurance stimulates the virtue of thrift as does no other single force operative in America to-day."

The Washington correspondent of the Chicago "Tribune," who signs himself "Raymond," in a recent letter to that paper, said: "There will be no radical insurance legislation either at this session or the next one. Leaders of Congress have determined the question is far too complex and the demand for federal supervision as yet is too uncertain to make immediate action either necessary or desirable."

The London "Review" of recent date has an item about "American Extravagance" as dealt with by "Insurance Engineering." We extract the following: "It is not a financial diatribe, but deals with the recklessness incidental to the construction of buildings, and mainly refers to the number of fires occurring in North America and the statistics as to lives lost thereby. . . . The plea of the article is a laudable one, viz., that something more effective than even the increase of fire brigades should be enforced to stem this appalling loss of life. The writer advocates houses of better design and the larger use of fireproof materials. He urges that the latter, in the long run. are found cheaper than the building materials ordinarily in use."

* * *

—The Board of Trade of Summerside, P.E.I., held a special meeting on the 29th ult. to discuss the subject of increased wharfage rates, and also that of placing the Cape Traverse train on the regular schedule to Summerside. Freight rates on the Prince Edward Island Railway also came in for some harsh criticisms.

* * *

TORONTO MARKETS.

Toronto, Feb. 22nd, 1906.

Dry Goods.—An improvement has set in in nearly all branches of the dry goods trade during the last week or two weeks and affecting both the city and country business. Sorting orders have been more frequent. There is a certain degree of dullness in the enquiries for heavier goods, but those of a light description have on the other hand done much to keep a proper balance. The demand for light dress goods and for millinery has been quite striking for this time of the year. Both woolen and cotton staples are quite firm and reports from Old Country centres do much to strengthen this feeling.

Flour and Grain.—There are but few features in the grain trade this week. Prices remain much as before, but business is dull, the bad roads affecting the movement very adversely. Flour also is dull, the best bid for export being $3.10 for ninety per cent. patents. Millfeed is quite strong still, and prices have an advancing tendency rather than otherwise. Oatmeal is dull and unsettled.

Groceries.—Since last report trade has been carried on in the even tenor of its way with little of a new character to report. The strongest feature is canned vegetables. Tomatoes are moving well at the recent advance. Dried fruits, too, are in fair average demand for this period of the year.

Hides and Skins.—Prices would appear to have reached now a definite level. Business however, continues quiet in view of the poor quality of the offerings. In tallow not much trade is passing. Leather maintains its values, but the movement is slow.

Live Stock.—Prices in most lines at the cattle market were this week perceptibly firmer, owing to the light run. There were a few good exporters offered, and these were picked up early. Butchers' cattle advanced 10 to 15c per cwt. There is a good demand for short-keep feeders and prices are quite firm. Trade in sheep and lambs is steady. Hogs retain a firm tone this week.

Provisions.—Dairy rolls of butter are coming in plentifully, and prices are easier. Heavy offerings of new laid eggs are coming in and prices are very easy. Good choice chickens are wanted. Smoked meats, etc., are very firm in sympathy with the better prices for hogs. Beans are fairly firm.

Seeds.—The market for seeds is quite active and weed-free clover is in strong demand. The movement has been brisk latterly, owing to mild weather.

The Record for 1905

of the Great-West Life affords striking proof of the constantly increasing value of Great-West Insurance.

During the year over Six Millions of new business has been placed, giving a total business in force of over $24,000,000.

The Surplus to policyholders amounts to $612,213.45; the Reserve stands at $2,467,842.16; and the funds, all invested in the West, earned over 7% on the total ledger assets.

Again the Directors are able to state that since the inception of the Company, not one dollar has ever been lost on investments.

SWEET CAPORAL CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, 21st Feb., 1906.

Ashes.—There is an almost total absence of business, and quotations are more or less nominal at $5.15 to $5.20 for first pots; seconds, $4.65; thirds, $3.70; No. 1 pearls, $6.50 to $7 per cental.

Dairy Products.—In cheese there is really nothing doing of any consequence, and quotations are barely steady, with about 13c. quoted for finest Western makes. For best grades of creamery butter 22 to 22½c. is quoted, with under grades ranging down to 20½c.; dairy makes quote all the way from 18 to 20c. per pound.

Dry Goods.—A good many of the travellers are now home from their trip, getting samples revised, and it is not calculated that much can be done in the way of sorting business until after the spring millinery openings, which are fixed for the 5th, 6th and 7th of March, both here and in Toronto. Deliveries from warehouse are brisk, and a fair proportion of orders are being booked for fall underwear, etc. The Canadian Colored Cotton Co. advise an advance in cotton blankets.

Furs.—Raw furs keep coming in quite freely, the assortment offering being well varied, and the quality as yet showing no deterioration. Prime skins readily command good prices, and we quote: No. 1 large beaver, $6 to $7; medium ditto, $5 to $5.50; kilts, $2; black bear, $15 for large No. 1, $10 for medium, and $5 for small; badger, 40 to 60c.; fisher, $6 to $7 for fine dark; red fox, No. 1 Northern, $3.50; Eastern and Ontario, No. 1, $3; No. 1 silver fox, $100 to $175; cross fox, $7 to $10 for dark; wolverine, $7 for No. 1 dark, other grades, $2 to $5; lynx, $6 to $7 for No. 1; marten, Western and British Columbia, No. 1, $6 to $7; Eastern ditto, $4.50 to $5; mink, $7 to $8 for large No. 1, and $4 to $6 for medium; winter rats, 16 to 18c. for large; otter, No. 1 large, dark Labrador, $30, and $15 for Western; coon, $1.75 to $2.50; skunk, $2 for No. 1 prime black, $1.50 for short stripe, other grades 30 to 75c.

Groceries.—Business is reported better than in January, but collections are not altogether as good as they might be. The American sugar market is reported rather firmer, but local quotations remain at $4 for standard granulated in barrels, and $3.95 in bags, with yellows ranging down to $3.55 in bags. A cable received yesterday from Barbados quotes new molasses at 14c., first cost, being an advance of half a cent since last week. At the late reduction the local jobbing quotation for Barbados in single puncheons is 32c.; barrels 34½c., and half-barrels, 35½c. Rice, which has been subject to some fluctuation, is now steady at $3.15 for standard B quality. Sago keeps advancing, and it is figured would now cost 5½c. to lay down. Valencia raisins are held quite stiffly, with reported light stocks both here and abroad. In evaporated apples the advance is phenomenal, packers now quoting 11½c., while ordinary dried apples are held at 6 to 7c. in a jobbing way. Canned tomatoes are further advanced to $1.05, and an advance in corn is shortly looked for.

Hides.—Owing to deterioration in quality and impaired demand there is, if anything, a tendency to further easiness in the hide market, and dealers claim to be only paying 10½c. per pound for No. 1 country hides, and 11c. for No. 1 city stock. Calfskins are easy at 12c. per pound for No. 1, and 10c. for No. 2. No new lambskins are yet being received, and quotations in this article remain as before.

Leather.—While the present demand is not particularly brisk, and the hide market shows some weakness, all values in leather are very firmly held. No. 2 manufacturers' sole is held at 25c., some asking 25½c. for selected lots; jobbing sole is scarce, and No. 2 is quoted at 26c.; slaughter sole, 29 to 30c. All lines of black and fancy leathers are very firmly held.

Metals and Hardware.—About the only change to be noted since a week ago is a decline in lead pipe, owing to the recent easing off in pig lead, but almost immediately after the local manufacturers had decided to increase the discount from list from 15 to 20 per cent. pig lead began to crawl up again, and is now quoted about ten cents higher at $4.40 to $4.45. Copper is steady at 20 to 20½c.; ingot tin, 39½ to 40c.; spelter, 7 to 7¼c.; sheet zinc, 8 to 8¼c.; antimony, 16½ to 17c. All manufactures of iron are steady at last week's figures.

Oils and Paints.—Turpentine has shown a rather strong tendency to advance of late, and is generally held at 96c. per gallon for single barrels, while some are of the opinion that quotations may run up to the dollar mark. Linseed oil is steady at 56c. per gallon for raw, and 59c. for boiled in an ordinary way. Ground white leads are firm at the advance noted last week. Paris green is a shade easier at about 17½c. in pound packets. Window glass, putty, etc., remain as last quoted. All gums for the manufacture of varnishes, shellacs, etc., show a steady strengthening.

* * *

TO COBALT IN THE SPRING.

In that breezy weekly of Pratt & McIvor, the Cobalt "Free Press," is a poem written by "Heraldo Rosario Holmes," which is a good name for a poet. We give the main part of it:

Cobalt is *the* Silver Camp
Of silver camps the king,
And, like Aladdin's famous lamp,
'Twill be shining in the spring.

Chorus—In the spring, in the spring,
We are all bound for Cobalt in the spring.

The prospects there are bright, they say,
There's no corner in the ring,
So I'm longing for the May day,
And Cobalt in the spring.

Chorus—In the spring.—

'Tis far away in Northland,
Close to deep Temiskaming,
Where they've found that silver treasure
That will lure me in the spring.

Though the water be off color,
And in hammock one must swing,
We will coin the silver dollar,
There in Cobalt in the spring.

The bloom is bright and shining,
And has proved the surest thing
That has yet been found in mining,
So 'tis "Cobalt in the spring."

The Argentina miner;
With his kit and camp a-sling,
Will be on the Grand Trunk diner,
Bound for Cobalt in the spring.

California's "forty-niner"
Cobalt's fame is sure to bring,
When the sun becomes a shiner,
On the mossy banks in spring.

The Mexican vaquero;
And Slocan's silver king,
Will race like a ranchero
To reach Cobalt in the spring.

From Rosario to Tokio,
They are packing everything
That the grub-staked hardy miner
Will be wanting in the spring.

Through the deep shade of the pine tree
There's the cloud with silver lining
That the whole world wants to see
Over Cobalt in the spring.

TRADE OPPORTUNITIES IN YORKSHIRE.

In the district of which Leeds and Hull are the centre there would appear to be a growing appreciation of Canadian produce. Mr. J. B. Jackson, who is the Canadian trade agent there, writes interestingly on some points connected with this trade. Many enquiries have been made about apples; the excellence of the fruit and the improved methods of packing and grading, though much still remains to be done in this latter respect, being very greatly appreciated. As a rule the XXX apples seem to be well graded and packed, but this is not the case with the XX fruit, which should not be the case. Second class apples should be as well graded and packed as the first class, and it is Mr. Jackson's opinion that the former could be sold in the proportion of three to one of the others, and that growers would make from them their largest profit, because if not shipped they are an absolute loss. This is an opinion, however, which we believe is scarcely shared by the best authorities.

Speaking of lumber, Mr. Jackson says: I am of the opinion that the Canadian exporters overlook the possibility of the North Country trade; especially is this the case with regard to timber. Hull is one of the largest timber ports in Great Britain, and there are upwards of seventy firms doing business, either directly or indirectly, in connection with the importation of timber, pit props, mining timber, lumber, telephone poles, etc., and it has an excellent market for Canadian woods. Canada is very greatly hampered in this direction by not having a direct line, and this lack of communication will be more intensified in the future owing to Australia having entered the field as a direct shipper. I had the pleasure of a conference the other day with the managing director of two of the largest collieries in South Yorkshire. With regard to pit props and pit timber he said: "We need hardly say that we should hail with delight the advent of a colonial competitor into our pit wood market." These two collieries pay for pit props alone on an average about £6,000 per year, and in addition to this about one-half as much in mining timber. The sizes that would be required for the main roads would be at least eight inches in diameter at the small end and averaging from six to eight feet in length.

Pit Prop Prices.

The prices that these companies are paying for pit props delivered at their collieries are as follows: The prices per 72 lineal feet: Four-inch pit props, 4s. 3d.; five-inch pit props, 5s. 4d.; five-inch pit props, 7s.; six-inch pit props, 8s. 3d.; six-inch pit props, 9s. 6d.

It is gratifying to learn that the appreciation of Canadian bacon is increasing, and is gaining in popularity every day as against American bacon. A large Sheffield produce merchant said the other day: "We are more than satisfied with the Canadian bacon; it is making wonderful advances, and our customers, especially the better class, invariably prefer Canadian to American, and, although we are generally able to judge from appearances as to whether the sample produced is American or Canadian, still we should like to have a skin brand on the Canadian, so that we can always be sure we get the genuine article. Whenever a certain line of bacon is in demand, inferior kinds are often foisted on the English buyer, instead of the original, but a skin brand would solve the whole difficulty." It would be better for the Canadian bacon trade, if at any time it were absolutely necessary for packers in Canada to import American hogs, that the bacon from these imported hogs should be branded, "Canadian cured from American hogs." The English consumer would still prefer that Canadian bacon should be harder cured, and more after the style of the salt cure used in England.

Mr. Jackson also mentions that there is a very large and increasing demand for Canadian tinned tomatoes. These should be packed in 2, 2½ and 3 pounds. English tomatoes, either home-grown under glass or imported from Spain or the Canary Islands, are not at all the equal of the Canadian tomato, either in size, color or flavor. It also has a greater quantity of seeds, and, although, whilst fresh and uncooked, it is not such a poor imitation of the Canadian one, but when canned it is not at all to be compared with the Canadian goods. English dealers express surprise that Canadian canners do not push these goods more.

FIRE INSURANCE ITEMS.

On Tuesday last Mr. A. Howard, late of the London, Ont., fire department, was appointed chief of Berlin fire brigade, succeeding Frank Seibert. Chief Howard has already taken charge.

The Kingston Fire Insurance Company, a St. John, N.B., concern, has declared a 6 per cent. dividend. This, we are told, is the first dividend the company has paid since its reorganization several years ago.

* * *

LIFE AND ACCIDENT.

A compilation of the accidents which happened in Chicago last year shows that there were 9,371 accidents, 865 of them being fatal and 8,506 non-fatal. The street car casualties alone numbered 2,491, of which 115 were fatal and 2,376 non-fatal. The total railroad casualties were 959, of which 246 were fatal and 713 non-fatal. Accidents from other causes numbered 5,921, of which 504 were fatal and the remainder were not.

There is a regulation passed by the French Government last month, says the New York "Globe," whereby hereafter a French insurance company on ordinary life policies is limited to the expenditure of 3½ per cent. for management, 6 per cent. for premium collection, and 1 per cent. for canvassing for new business, and on endowment policies the deductions may not be more than 5 per cent. for management, 2½ per cent. for premium collections, and ½ per cent. for canvassing. This should make American and Canadian life underwriters rub their eyes. How is it these

French companies can do for 8 to 10½ per cent. what it costs companies on this side the Atlantic from 20 to 30 per cent. to accomplish?

Mercantile Summary.

The Montreal Street Railway, says a despatch from that city, has acquired control of the Terminal Railway, a competing line running to the eastern part of the island, with a view, it is supposed, of considerably extending the suburban service.

A recent shipment of Manitoba flour by the steamer "Wyandotte" arrived at Cape Town in bad condition. It is said that Canadian flour shipped during the winter south always shows a larger percentage of damage than when forwarded during the summer. It is thought, says Mr. Kittson, Canada's trade agent in that country, the cause is possibly that the transfer of cargo at St. John from cars to steamer takes place during the wet weather, and the flour absorbs moisture, with the result

that it is liable to sweat while in transit through the tropics.

Revillon Brothers, of Edmonton, the well-known fur dealers and factors of Edmonton, Alta., are applying for enlarged powers under their charter, which already authorizes them to build vessels to bring in supplies to the Grand Trunk Pacific from Lake Superior. They wish now to be able to make contracts for the carriage of the mails, to build and operate passenger and freight ships, to build and operate telegraph and telephone lines, to build and operate sawmills and their accessories, to buy, lease and sell timber limits, to exploit and develop water powers and their accessories, buy and operate mines and mining claims, buy, exploit and develop colonization lands, to buy and make use of fishing rights and privileges, to preserve and can fish, to carry on a general wholesale business, to carry on the business of a savings bank, and to carry on the business of a money forwarder by post or telegraph.

The Minnesota and Ontario Power Co., of which Mr. E. W. Backus, of Minneapolis, is the head, are applying to the Ontario Government for an extension of time in which to complete their works on the Canadian side of Rainy river. This being an international stream, the company is working on the Canadian side under an Act of incorporation obtained from the Dominion Government, as well as the charter from Ontario. Under the Dominion Act the company must develop power on the Canadian side concurrently with development on the American side, the Railway Commission to fix conditions as to the transmission of surplus energy from side to side as the demand warrants it. At present between 150 and 180 men are engaged on the Canadian works, and arrangements are being made to put a night gang of the some strength on in order to complete them as quickly as possible.

* * *

—The town council of Waterloo, Ont., will shortly submit a by-law to the ratepayers to grant a bonus of $8,000 to Mr. George Moore, who intends taking over the woolen mills there that have been lying idle during the last two years. Mr. Moore agrees to pay the county and school tax, as well as local improvement taxes. He is to employ no less than sixty hands when he starts, and at least seventy-five at the end of the first year. No money is to be paid until the required number of hands are employed.

The Mutual Life Assurance Co. OF CANADA.

MANAGER FOR CANADA:
B. HAL. BROWN.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $151,663,477.29

It exceeds by two millions the entire population of the Dominion of Canada. Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. It has on deposit with the Government of the Dominion of Canada, in Canadian securities, dollar for dollar of its Canadian liabilities. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts.

This Company's Policy-claims paid in 1905 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $105.83 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policy-holders and addition to Reserve
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $3,000 000.00.

More Than $7,000,000.

Over and above premiums received, more than $7,000,000 has already been paid or credited to its policyholders by the

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Home Office - Toronto, Ont

THE ROYAL-VICTORIA LIFE INSURANCE COMPANY

Has several good General and Special Agencies for productive men. Liberal contracts. Address (confidentially if desired),

DAVID BURKE,
A.I.A., F.S.S.,
General Manager,
MONTREAL.

CONSERVATIVE
PROGRESSIVE
FAITHFUL

Some of the cardinal aims of the Union Mutual management are—to be conservative in the choice of investments—to be progressive in the prosecution of the business—to be faithful to the interests of policyholders.

Agents of like inclination cordially welcomed.

UNION MUTUAL Life Insurance Co.

Portland, Maine.

FRED E. RICHARDS, President.
ARTHUR L. BATES, Vice-President.

HENRI E. MORIN, Chief Agent for Canada,
151 St. James St., Montreal, Canada.

For Agencies in the Western Division, Province of Quebec and Eastern Ontario, apply to
WALTER I. JOSEPH, Manager,
151 St. James Street, - Montreal.

For Agencies in Western Ontario, apply to

MORTGAGE LENDING COMPANIES.

The funds of the Ontario Loan and Debenture Company were kept well employed in 1905, all but about five per cent. of its assets consisting of first mortgages. And it is able to make the pleasing statement that it has no real estate on its hands as a result of default in payments. Apart from interest the company's debenture obligations are $1,534,062, and it owes depositors $578,990; in all, $2,113,052. Against these it has $163,875 in cash or readily available assets, $40,000 in head office premises, and mortgages to the extent of $3,873,945. The capital stock paid up is $1,200,000, and the reserve is now $655,000, the addition to this fund from the earnings of 1905 being $30,000.

Allowing for increased assets, the ratio of net earning is about the same as in the preceding year. New loans amounted to practically as much as was received in repayments, showing an active business. Out of $110,867 net earnings, and $32,161 brought over, the usual six per cent. dividend and a bonus of one-half per cent. absorbed $78,000; $30,000 was added to reserve; and $35,028 carried forward at the credit of revenue account. The report makes reference to the activity of general business caused by good crops, increasing immigration, and the larger advent of foreign capital, and thinks the prospects for the current year good. At the same time, there are cities and towns here and there in the Dominion where the future is being possibly overestimated, and the price of building land is too high.

The thirty-second annual report of the London and Canadian Loan & Agency Company has been submitted. It shows gross earnings of $208,714 (including $24,000 brought forward), and net earnings of $91,796, which is about five thousand dollars more than in the previous year. After paying usual dividend, $15,000 has been added to rest, and $15,753 is carried forward. New loans were about twenty per cent. more than in the preceding twelve months. The company's total assets amount to $3,556,000 of which loans on mortgage constitute $2,400,000; other loans on call or short date, $600,000; municipal and other debentures owned, $380,000; cash in Canada and Britain, $89,532. There is a marked reduction in real estate owned by the company, apart from the company's building in Toronto.

Ontario, Manitoba, and Saskatchewan are the provinces in which the company's loaning operations are carried on, and the prosperity of these is indicated by the promptness with which borrowers met their payments. Its business is increasing steadily. Two of the best known directors of the company were removed by death during the year, Dr. Larratt W. Smith, and Mr. Thomas R. Wood. They had served long and faithfully. In their room Messrs. F. Barlow Cumberland and A. H. Campbell, Jr., were elected members of the board.

An active and satisfactory business is reflected in the annual report of the Landed Banking and Loan Company, whose funds were well employed during 1905, its customers' payments well met, and whose net profits were some seven thousand dollars more than in the year before. The company's borrowings on sterling and currency debentures were some $90,000 greater than in the previous year, amounting to $1,073,000, while deposits were slightly less, the aggregate borrowed reaching $1,479,970. To this add $970,000 of shareholders' capital and reserve, and a total lending power of $2,450,000 is reached. The cash value of mortgage securities is $2,292,984, while $136,400 has been invested in the purchase of municipal and other bonds; $21,801 is loaned on stocks and bonds: while $26,526 was on hand in cash at the close of the year, an increase of assets equal to $112,907, which brings the total up to $2,493,719. The company is managed with prudence, as its steady rate of earning shows. It is stated in the report that all its securities have been examined by a committee of directors, and full provision made for known losses and probable shrinkages.

FINANCIAL REVIEW.

The January Bank Statement, which we published last week, is perhaps rather more interesting than usual. In the first place, notes to the extent of $9,000,000 have been redeemed during the month, and the total bank circulation now stands at $60,986,000, which will almost certainly be the lowest point reached during the season. The reduction during the month has been 12.8 per cent., which is considerably greater than usual. The reduction for the month in January, 1905, was $6,486,000, about 10 per cent., and in January, 1904, $5,566,000, a trifle under 9 per cent. In November and December, however, notes did not return from circulation quite as rapidly as usual, and the percentage of reduction between 31st October,—the date of the highest level,—and 31st January, when the lowest level for the year is reached, shows little change.

For the last three years the figures have been:—

	October.	January.	Percentage of Reduction.
1903-4	..$70,480,000	$56,973,000	19.1
1904-5	.. 72,216,000	58,021,000	19.6
1905-6	.. 76,890,000	60,986,000	20.7

February should show a slight increase in notes in circulation. Whether the present abnormally mild winter, with the absence of snow, will affect the well established order remains to be seen.

Public deposits in Canada have grown during the month by $8,995,000, a marked contrast to January last year, when there was a reduction of $2,179,000. About $3,460,000 of the increase is caused by the deposits of the Home Bank of Canada being included for the first time. The balance is chiefly in the figures of three or four of the larger banks.

For the last five years public deposits in Canada have been:—

			Increase over previous year.
January,	1902	...$332,856,000	10 per cent.
"	1903	... 366,784,000	9 "
"	1904	... 394,572,000	7 "
"	1905	... 451,233,000	12 "
"	1906	... 521,222,000	13 "

Deposits outside Canada increased during the month by $3,128,000, almost the whole of this increase being in the figures of the Bank of Montreal. Total liabilities are $668,000,000, an increase during January of $5,840,000.

Important increases are:—

Home Bank of Canada (new)	.....$3,521,000
Bank of Montreal	 1,353,000
Merchants Bank of Canada	 2,177,000
Canadian Bank of Commerce	 1,104,000
Bank of Ottawa	 1,458,000
	$9,613,000

Banks which show considerable decreases are:—

Dominion Bank	................$1,650,000
Imperial Bank of Canada	 1,253,000
	$2,903,000

Other banks show unimportant decreases sufficient to reduce the net increase to the figures given above. During the year total liabilities have grown by a little over $90,000,000.

Total cash held is $57,510,000, being 8.6 per cent. on the total liabilities to the public. Last year the percentage was 9.6, while in January, 1904, it was 9.1 per cent. The expansion in business during the last twelve months has no doubt used up any loose cash the banks held; but a reduction of 10 per cent. in the cash reserve is not a favorable result of a large year's business.

The ten banks showing the highest percentages are:—

Northern Bank	............13.77 per cent.
Imperial Bank of Canada	....13.5 "
Bank of Ottawa	...........12.73 "
Bank of Nova Scotia	.......12.08 "
Royal Bank of Canada	.....10.59 "
Union Bank of Halifax	......10.19 "
Metropolitan Bank	.... 9.77 "
Traders Bank of Canada	.... 9.2 "
Canadian Bank of Commerce	.. 9.16 "
Dominion Bank	.... 9.13 "

The ten showing the lowest percentage are:—

La Banque d'Hochelaga	...... 6.2 per cent.
Bank of British North America	6.08 "
Standard Bank of Canada	.... 6.05 "
St. Stephen's Bank	.... 5.87 "
Sovereign Bank of Canada	.... 5.05 "
Ontario Bank	.... 4.54 "
La Banque de St. Jean	...... 2.34 "
La Banque de St. Hyacinthe	.. 1.99 "
Western Bank of Canada	.... 1.58 "
Provincial Bank of Canada	.... 1.07 "

It must, of course, be understood that these figures refer only to the actual cash held, and do not tell the whole tale with regard to a bank's readiness to meet sudden demands on it. In many cases the larger banks have large amounts due them in London and New York, either in the form of balances with their agents, or call loans which are strictly on call. The Bank of Montreal, for instance, has $4,894,000 in balances due from agents, and $35,959,000 in call loans outside Canada. The Canadian Bank of Commerce has $4,605,000 due from agents, and $8,673,000 in foreign call loans. In addition, each of these banks carries several million dollars in securities. The smaller banks frequently carry their real reserves in the shape of balances with other Canadian banks, the Western Bank of Canada, for instance, showing no less than $1,286,000 on deposit with other banks in Canada, while the Provincial Bank of Canada has $138,000 on deposit, and in addition has $1,200,000 in securities, and $1,113,000 in Canadian call loans. But a sufficient supply of actual cash is one of the first requisites of careful banking, and each bank should either carry a sufficient supply for itself, or should definitely arrange with another bank to perform this duty on its behalf. The bank with which the Western Bank of Canada keeps it balances should, and doubtless does, hold sufficient cash not only for its own needs, but also for the needs of the Western Bank.

Balances due from the United Kingdom have fallen off by about $2,000,000, the balances due to the Bank of Montreal being reduced by $3,622,000, while those due to the Canadian Bank of Commerce increased by $2,950,000. Balances due from foreign banks or agencies increased by $3,559,000.

Call loans in Canada on bonds and stocks rose from $49,704,000 in December, to $54,241,000 in January, while call loans outside Canada increased from $61,010,000 to $68,432,000, a total increase in these two items of $11,959,000. In January last year total call loans were reduced by $3,333,000, while the previous year there was practically no change during the month. The large increase this year is, of course, the complement to the increase in deposits, accompanied as it is by a decrease in current loans in Canada of $7,100,000, the figures representing the latter having fallen off from $458,555,000 in December, to $451,207,000 in January, this being the first month since August in which current loans have not shown a substantial advance. At the end of August they stood at $437,440,000; four months later, they had grown to $458,355,000, and have now fallen back to $451,207,000, being a net increase in the five months of $13,767,000. During the same five months last year the increase was $4,661,000. During the twelve months ending 31st January, the increase has been $48,306,000, compared with $28,147,000 for the previous year, and $62,157,000 for the year ending 31st January, 1904. Amongst the more important individual increases during the year are:—

Canadian Bank of Commerce....	$10,853,000
Dominion Bank	3,852,000
Bank of Montreal	3,110,000
Traders Bank of Canada	2,653,000

Current loans outside Canada now stand at $37,283,000. They have increased by $6,401,000 during the month, and by $18,959,000 during the year, being now rather more than twice what they were in January, 1905. In the Bank of Montreal figures alone the increase is $8,454,000, while a growth of $3,000,000 is shown by the Bank of British North America, $2,000,000 by the Bank of Toronto, and $3,500,000 by the Merchants Bank of Canada.

Total assets have increased to $822,959,000, being a growth of $7,416,000 during the month, and $102,083,000 during the year.

The merry work of opening new branches still continues, and this, coupled with the tales we hear about the rates at which some banks are willing to canvass for business, gives color to the supposition that in some quarters Providence is being depended on to supply those profits without which not even a bank can long continue to do business. Many of the banks are admittedly making handsome profits at the moment, but the whole business world is doing the same, and banking profits have certainly not increased in larger proportion than have those of the manufacturers, wholesalers, etc. Those banks which are planting new branches in towns where one bank has hitherto made not more than a comfortable living, or any new banks which think that because old established banks after long years' of experience have been able to return large profits in a time of abnormal prosperity, they can rush into the field, open branches by the wholesale in charge of inexperienced men, and then come comfortably through the next period of depression, are likely to have a rude awakening. The craze for opening new branches, which has been epidemic throughout the Province of Ontario during the last year or two, is now running riot in Toronto, to the amusement of the business community. The pace can hardly be maintained much longer. But with the additional offices to which Canadian banks, old and new, are already committed, we cannot but think that for the next few years we shall have in Toronto, instead of a reasonable number of fairly profitable branches, an unreasonable number of offices, many of which will be a steady drain upon the profits of their respective institutions.

IMPORTANCE TO ONTARIO OF HUDSON BAY.

Pressure upon our columns has compelled us, most unwillingly, to hold over for a week the third article on this subject. It is a lengthy, but our readers will find, an interesting one.

* * *

THE INSURANCE COMMISSION.

Announcement was made on Monday last, that the Dominion Government had appointed a commission to investigate the conduct of insurance companies. Next day, the names of its members were made known. They are, Mr. Justice McTavish, Ottawa, senior judge of the County of Carleton; Mr. J. W. Langmuir, of Toronto; Mr. A. L. Kent, of Montreal; with Mr. A. C. Ross, of Bridgewater, Nova Scotia, as secretary. The announcement of the names has been received with general favor. Mr. McTavish has the reputation of being well informed on the legal aspects of insurance, having a good knowledge of the various amendments made to the Insurance Act. Mr. Langmuir is a man who stands deservedly high in business circles of Ontario. His knowledge of the value of securities will prove especially valuable. Mr. Kent made a good record for himself in connection with the winding up of La Banque Ville Marie. He is regarded as a thoroughly honorable man, who has been a success in his special line as an accountant and assignee. While not reputed to possess brilliant actuarial skill, those who know him closely say he is a plodder, who is bound to get at the bottom facts of doubtful dealings, and will persistently delve away till he reaches them. Presumably, the commission will have the advantage of the advice of the Ottawa Insurance Department, which will often be needed in matters involving actuarial skill. The full scope of the commission has not yet been made known; but it ought to have power to command books and papers of companies, and the attendance of persons if necessary to explain anything and everything connected with a company's affairs. The more thorough the enquiry, the more certain will its findings be to set at rest the minds of many who have been rendered uneasy by the results of the New York enquiry. If any such "American" methods have been in vogue in Canada as were there found out, the sooner we know it the better.

* * *

FIRE INSURANCE IN CANADA.

It is possible to chronicle an improved condition of affairs among fire insurance companies in the United States and Canada. More encouraging loss ratios, fair underwriting profits, additions to surplus, have been the rule among American companies in 1905. Whether it be from the efforts of the National Board of Underwriters in the United States or from a fresh realization by the people of both countries of the duty of greater care in matters of building, and of fire protection, there is in many districts a distinct lessening in the ratio of fire waste, especially in the United States. The two largest Canadian companies have shared in the betterment which these conditions have effected, and show considerable additions to surplus.

It is very agreeable to learn from the address of the president of the Western Assurance Company that the management of this company is working upon conservative lines, making volume of business a secondary consideration, but securing the largest share possible of the classes of risks that yield a profit, and keeping expenses at the lowest point consistent with proper selection and supervision of fire business. And he further announced their policy to be to curtail marine business, especially in inland hulls, unless higher rates are secured. The year resulted in an underwriting profit of $219,595. While in the fire branch the losses were only 53.59 per cent. of premiums, heavy expenses and vexatious losses on the Great Lakes ran away with a great sum. After paying dividend it was possible to put $133,000 to reserve fund, which is now $1,742,020, making the surplus over capital and all liabilities $419,836. A good report is given of the company's British and Foreign branch, in which losses have been light and which is showing a profit, marine as well as fire business being written.

It was stated a year ago, at the annual meeting of the British America Assurance Co., that the eight last months of 1904 had yielded a rate of profit which went far to make up excessive fire losses of the first four. And it would seem that this favorable condition has characterized the year 1905, in the fire branch, which reports the encouraging ratio of 55 per cent. of loss to premiums, as against 77 in 1904, the conflagration year. Marine did not do so well, owing to unusual losses, but a slight profit was effected. The profit balance was in all $139,216 on the year, interest and rents bulking more largely than usual, out of which sum $50,000 was paid in dividend, $11,000 written off securities and office furniture, and $77,000 added to reserve, making that fund $1,101,607. The president congratulated the shareholders on the improved conditions in fire insurance now prevailing on this continent, resulting in better profits by reason of increased premium rates and lessened losses.

* * *

THE WHEAT AND FLOUR TRADE.

While the extraordinary snowless winter must, without a doubt, have affected clover very injuriously, it would appear to be the general opinion among farmers in Ontario that the fall wheat has so far escaped, though it must be admitted that there is still ample time for grave damage to ensue between now and the growing season. This doubt would appear to be having no little effect in maintaining a degree of strength in the wheat market even in the face of recent declines in Chicago. At any rate, a certain section of the trade is to be found who place much stress on arguments based on a probable or at least a very possible crop shortage in the coming year, although we believe that statistics show that mild winters in the past have not been by any means followed always by poor yields. A factor which has influenced in the same direction the tone of the market in Britain has been in the form of cables from the Argentine to the effect that the surplus available for export in that country would not exceed 85,000,000 bushels. It does not seem unlikely, however, judging from other apparently well authenticated rumors, that this estimate is below the true mark, for current exportation is freer and in greater volume than the above figures, if true, would indicate. There are signs, too, from Europe that the demand from that quarter is bound to be a large one, before the new crop becomes available, probably indeed larger than usual, owing to the state of things in Russia.

The last figures we have seen respecting the statistical position of wheat on this continent show that the visible supply in the United States and Canada was 47,250,000 bushels, compared with barely 37,500,000 bushels a year ago, while the quantity (including flour equivalent to wheat,) in transit to Europe plus visible supply in the two countries mentioned, was 91,300,000 bushels, as against 76,594,000 bushels a year ago.

The flour trade presents no strikingly new feature, either locally or in the export branch. The ruling quotation for ninety per cent. patents is $3.10 in buyers' bags, eastern or western freights, and this is a figure which has prevailed for some time. The tone of the market seems to be only inappreciably affected at present by that in wheat. Bran and shorts retain the exceeding firmness which has characterized them all through the winter, making feeding a materially more expensive operation this season than usual.

* * *

LIFE ASSURANCE.

Editor "Monetary Times":

The following paper is the result of some study of a subject which is of general and very great importance. It is submitted in the hope that its statements and conclusions may conduce to a better understanding of the essentials of Life Assurance:

Two of the essentials in the conducting of a life assurance company are Security and Economy. The first of these is provided for in the limitations of investments in which the insurance reserve funds may be placed. This is regulated by the Acts of Parliament, and special officers of Government are appointed for the purpose of checking the actions of the assurance companies. If there is any deviation or variation in the administration of the law, the Government of the day is responsible, at least in theory.

The second of these essentials is apparently not so guarded. The revenue of life assurance companies is obtained primarily from premiums. These premiums as they appear in the rate-books are made up of two parts.

First, the Net Premium.—From this is paid the annual mortality, the remainder being set aside to meet the benefits at maturity. For the purpose of determining the net premium the annual mortality is based upon certain tables, which are in use by all companies alike, and the benefit is based upon calculation mathematically, which is fixed and unchangeable. It may be assumed, therefore, in respect of the net premium that it is uniform over all life assurance.

Second, Operating Expense.—To the net premium as above is added a percentage known as the "Expense Load." The combination of the net premium and the load make the office premium, or the rate which is to be paid for the benefit. The percentage added for load is largely under the control of each individual company, the theory being that it will be sufficient for the purpose, and that at least it will provide for all expenses. While this percentage is optional, it will be readily understood that any variation will diminish or increase the Office Premium, and to that extent will act for or against the volume of business derived in competition.

For the purpose of showing the relative cost of life assurance some figures are given, covering three groups of companies—Canadian, British, and American. These figures are based upon Dominion Government reports as published for years 1901 and 1904, covering Canadian companies and such foreign companies as do business in Canada, and show the relative proportion of Operating Expense to Premium Income over the entire business of each group in those years:

	1901.	1904.
Canadian companies	31.13	34.23
British companies	19.33	19.68
American companies	27.22	27.14

Dividends paid to shareholders are included in the percentage of operating expenses. The proportion that these bear to premium income in 1904 are respectively:

Canadian	1.43
British	2.64
American	0.11

The percentages of operating expense as given are over the groups as units. The individual company percentages vary as follows:

Canadian	21.90 to 65.70
British	15.47 to 24.30
American	18.27 to 44.86

There is a theory among life assurance companies that a 25 per cent. addition to the net premium for expense load should cover the cost of operating expense. This addition is equivalent to 20 per cent. upon the office premium or total premium income. The following figures show the percentage addition to net premium necessary to cover the respective operating expense ratios for 1901 and 1904:

	Ratio, 1901.	Load Necessary.	Ratio, 1904.	Load Necessary.
Canadian companies....	31.13	45.2	34.23	52.4
British companies......	19.33	24.0	19.68	24.5
American companies...	27.22	37.4	27.14	37.2

If the expense load increase required, as given above, has been made in the usual way by additions to the net premiums, wide variations would be apparent in the premiums charged by the different companies as shown in their rate books. The alternative is that if the competitive rates approach one another closely, the companies with excessive percentages of operating expense are not living within their income, and that the over-expenditure is defrayed from other sources, to name which would be mere conjecture.

The foregoing refers to life assurance without profits. There is, however, a very large proportion of assurers who have not yet learned that this is the true method, and to meet their views policies are issued carrying profits. This necessitates a further load upon the net premium, which may be called Load for Profits, and which creates a fund for the purpose of making profits for the benefit of those who prefer such policies. It would appear reasonable that those who pay increased premiums for future profits should be informed in some degree as to how that fund is disposed of. It may be taken for granted that the form at present in use for Government reports was not designed to give detailed information, and without special criticism it may be said that such reports should be extended to include, for the benefit of profit-sharing policy-holders, a distribution showing the percentage of load for expenses and the percentage of load for profits, by which means they would be able to determine for themselves whether in any way the one draws upon or infringes upon the other. The fortunate holders of non-participating policies have no concern in this, as their interest in the company is limited to the stability of the reserve, which is under the superintendence of the Government of Canada.

W. S. Andrews.

Toronto, 28th February, 1906.

* * *

TORONTO GENERAL TRUSTS CORPORATION.

The figures of this company's statement for the past year show how extensive are its interests, and how great a variety of functions it exercises. The new work undertaken during 1905 was more than three times as great as in 1904, and the aggregate of its assets approaches thirty millions of dollars. Besides $1,378,000 under capital account, it has $14,509,000 in trust, guarantee, and agency accounts, and $13,208,000 in trust estates and agencies—in all, $29,096,478 to handle. There are, among its activities, executorships, trusteeships, administrations, committeeships, guardianships, estate and investment agencies, lunatic estate agencies. It is able to point to many instances in which eminent persons have appointed the Corporation their executors and trustees.

One thing strikes the careful reader of these accounts, and that is the comparatively small sum obtainable by this concern in the way of profit upon its extensive operations. Its commission earned for managing estates was much less than the earnings from interest and rents. The whole gross earnings of the year were $234,331, deducting from which its expenses, fees, and disbursements of various kinds a net profit remains of $119,732. This suffices to pay 7½ per cent. dividend, to write off $11,071 from various accounts, and to add $25,000 to reserve fund. These are no extravagant profits, certainly, for the administering of so many millions. This corporation does business from Montreal to British Columbia, having branches in Ottawa and Winnipeg. It has been nearly a quarter of a century before the public, and has received—and earned—encomiums from those who have utilized its services for discharging well its many obligations. People are learning, as the years go by, that it is better to have a sound and well-officered company to act as executor, trustee, or administrator than to trust to the more precarious services of individuals in these capacities.

* * *

BANK OF NOVA SCOTIA.

The annual meeting of the Bank of Nova Scotia was held on February 21st. The shareholders decided to change the date of the annual meeting from the third Wednesday in February to the fourth Wednesday in January, and it was announced that in future dividends would be payable quarterly instead of semi-annually. It was also announced that the $500,000 new stock, authorized a year ago, would be offered to shareholders at an early date. The head office of the bank will be retained in Halifax. The general manager, however, will continue to reside in Toronto.

The board of directors, who are all local men, were re-elected as follows: John Y. Payzant, Charles Archibald, R. L. Borden, Geo. S. Campbell, J. W. Allison, Hector McInnes, H. C. McLeod. Mr. McLeod, who is also general manager, left Halifax on the 22nd for Cuba via New York.

* * *

CANADA LIFE ASSURANCE COMPANY.

Comparison of the condensed annual statement of this company for last year as it appears on one of our pages with the like report for 1904 it is seen that there are very considerable gains. For example, a gain of a million in policies paid for and a gain of nearly six millions in business in force. And the statement is made that the paid-for new business was greater than that of any year since the company's founding. The gain in assets is $1,255,000; the increase in net premium and annuity income, $203,329. But it is when we turn to payments to policy-holders that the most marked difference appears. Here are shown cash dividends to policy-holders, $390,067; cash dividends to buy bonus additions and cash dividends to meet minimum policy bonuses, $804,621; endowments paid, including bonuses, $402,730; death claims and bonuses, $1,389,053. Adding other items, the total amount paid policy-holders was $3,272,081, which is a million and a half more than was paid to them in the previous twelve months. After this liberal distribution of surplus in this first year of a new quinquennium there still remains a surplus on policy-holders' account of $1,393,000, or, excluding capital, a net surplus of $393,000 over total liabilities of $28,935,962, of which $28,505,936 consists of re-insurance fund at 3½ and 3 per cent. It is noticeable that out of a total in force of $107,681,000 about forty per cent., or $42,464,000, is valued on the Hm. 3 per cent. table, which is that now and since 1900 in use by the company.

It is satisfactory to learn from the Dominion Superintendent of Insurance, who is quoted in the report, that the company's reserves, which have been undergoing a steady strengthening, are now greater by $2,596,239 than is required by the present Government standard, an evidence of strength that cannot be gainsaid. A fully detailed statement of the securities owned by the company and of its collateral loans was, we are told, submitted at the annual meeting. There were not, as might have been expected from certain newspaper and other criticisms or innuendoes of late, any enquiring shareholders at the gathering. But there had been a letter from an Ontario policy-holder asking a dozen questions or more about the company's management, etc., to all which the chairman replied in a full and painstaking way. Several of the directors made addresses repudiating any suggestion of improper handling of funds; and the president in his lengthened remarks spoke of the examinations the company had undergone, his efforts to secure still further examination into its affairs, and he welcomed the proposed Government Insurance Commission. It does not appear that the Canada Life people have any dread either of trial by newspaper or of trial by Commission.

* * *

EXCELSIOR LIFE.

The growth looked for in the report of this company's operations a year ago is, in some measure at least, realized in its statement for 1905. There is an increase in new insurance and an increase in the total in force from $7,646,000 to $9,008,000. The rate of earning power of its assets, already last year markedly large, is now stated at the unusual figure of more than seven per cent. Concurrently with this is the pleasing announcement of a decrease of 7¼ per cent. in expense ratio, which policy-holders should be glad to hear. The customary low mortality of this company persists—it has much to be thankful for in this respect. Among the satisfactory items in the present report we remark the growth of net assets from $840,000 a year ago to more than $1,000,000 now; the growth of reserve fund from $744,074 to $894,025; and the net surplus on policy-holders' account from $88,141 to $105,551. Shrewdness and care in management are evident in the affairs of this company.

* * *

SOVEREIGN BANK OF CANADA.

The object of the special meeting of shareholders of the Sovereign Bank of Canada yesterday was to obtain their approval of an increase of the bank's capital to $4,000,000 and their assent to a proposal from the Dresdner Bank of Germany to invest a large sum in the increased capital stock of the Sovereign Bank. The proposal is, we understand, that the German bank buys 15,625 shares of the Sovereign's stock at a price of 130, making the cash investment $2,031,250. The Canadian shareholders of the bank had been requested by circular to postpone their desire of purchasing shares of new stock so as to allow this large purchase by the German institution, and they agreed with practical unanimity to do so. Two-thirds of the bank's increased capital will be held in Canada. Several of the shareholders present expressed with warmth their concurrence in the proposed sale, one of them characterizing the introduction of outside capital in this way as "one of the most important features in the development of the country." After an explanatory address by Mr. D. M. Stewart, the general manager, the resolution accepting the proposal was unanimously carried.

* * *

STANDARD TRUSTS COMPANY.

This Winnipeg company, which is scarcely more than two years old, has already more than a million of assets, which goes to show that there is room in Manitoba for an institution of the kind. Indeed, there is room for more than one, since we find the Toronto General Trusts Corporation and the National Trust Company and a Montreal company already represented there. However, Manitobans have shown their especial regard for the "native born" institutions, so to speak, in mortgage loaning and insurance, and we may be sure that the Standard will get its share of such fiduciary business as is going. The report of the directors shows a creditable rate of earning, and the management has prudently placed half the net profits of the year to a reserve fund. Of the half million stock subscribed, $138,886 has been paid up; and of the trust and estate funds placed in its hands, $372,000 has been invested in mortgages or is held in cash, while the unrealized assets of estates under administration amount to $476,000.

The address of the president discloses that the company is looking to the future, for it already lends in Saskatchewan and Alberta, those growing Provinces, and has in contemplation the placing of agencies, say, in Calgary and Edmonton. It is significant, too, that a St. Paul gentleman has been chosen among the directorate. In the absence of Mr. William Whyte, first vice-president, the manager, Mr. Harvey, paid a marked tribute to the members of the board, particularizing Mr. W. R. Mulock, the company's counsel, "whose infant the Standard Trusts Company really is."

* * *

LONDON LIFE ASSURANCE COMPANY.

The outcome of the thirty-first year of this company's business is no exception to the usually satisfactory results of its operations in recent years. Business written during 1905 exhibited an increase of twelve and a half per cent., and the aggregate in force is increased by more than ten per cent. The amount paid policy-holders or heirs was $99,779, which is almost exactly the same as in the year preceding. And the remarkable statement made by the president that interest receipts sufficed to pay death claims, stockholders' dividends, rent and head office salaries is a decided tribute to the shrewd and economical conduct of the company's affairs. The proportion of different branches of the business of the London Life is given as 4,781 ordinary and 55,624 industrial policies, covering, in all, $9,113,000, premiums on which amounted to $137,885 for the ordinary and $246,257 for the industrial.

A very satisfying statement made is that the gain in business has been accomplished, not only without increasing the ratio of expense to income, but at a ratio about two per cent. less than in 1904, leaving out of account the outlay for new head office premises, which were rendered necessary by growth of business. The concluding paragraph of the president's address, noting the growth of Canadian companies in the estimation of the Canadian people is, we are glad to think, well founded. An interesting statement is made by the actuary to the effect that the basis on which the company's reserves are computed is more stringent than the law requires. It is further made known by Mr. Reid that in addition to the extra reserve in connection particularly with the industrial branch of the business, a special reserve, which amounts already to $18,000, with contingent fund, is being accumulated to place all the old business on a 3½ per cent. basis. The company's total assets amount now to the large sum of $1,866,425; and the surplus on policy-holders' account is $111,148. There is an increase of $10,657 on the year in the net surplus.

* * *

GREAT FIRE IN THE I. C. R. SHOPS.

The greatest disaster in the history of Moncton, N.B., took place on Sunday night last, when at least half of the Intercolonial Railway shops, situate at that place, were wiped out by fire and six hundred men thrown out of employment. The shops were Moncton's industrial mainstay, so that practically every one of its citizens is affected. The loss, according to most of the estimates which have reached us, was in the neighborhood of $1,000,000. The fire started in the paint shop, and soon reached the freight car repair shop, the brick shop, and finally the electric light, engine and boiler-rooms. It then burnt clear through to the machine shop, the office of the master mechanic, Mr. A. B. Machaffie, with some valuable papers being destroyed. Several diners and private cars were burned. One man, Abraham Jones, an employee in the paint shop, went back for his personal effects and was killed. The most generally accepted theory of the origin of the fire is that it started through spontaneous combustion in some oil waste. The conflagration seems to have spread with appalling rapidity, due partly perhaps to the fact that much of the woodwork of this building was saturated with grease and other inflammable matter. It is deemed highly fortunate that there was little or no wind at the outbreak of the flames; had there been, it seems likely that much of the city might have fallen a prey. The firemen, it is said, were at the beginning somewhat seriously handicapped by the weak flow of water, though other reports say the pressure was quite up to the average. The general presumption based upon statements made by the Hon. H. R. Emmerson, is that the works will be rebuilt as speedily as possible. Being Government property that was destroyed, it is presumed there was no insurance.

* * *

KILLARNEY BOARD OF TRADE.

The town of Killarney is one of the rising places in southern Manitoba, being in a good farming district, and being also a popular summer resort, being situated upon a pretty lake. In January, 1905, a Board of Trade was organized there; its first annual meeting has just been held, and the secretary, Mr. W. J. Harris, has just made his report, which we summarize from the Killarney "Guide" of February 16th. Through the efforts of the board a new and more commodious station and freight shed have been erected there by the C.P.R. The board is making enquiry into electric lighting, and looks forward to having an installation of that sort soon. Neepawa has electric light and telephone systems, operated under municipal ownership at a profit, and Carberry is submitting a by-law to expend $15,000 for a similar plant. So Mr. Harris concludes that Killarney should own its plant, too. The new buildings of the past year in the town, which amount in value to, say, $25,000, included the C.P.R. station, Mr. Liddle's store, and some half dozen residences. All the dwellings and business places are occupied. No less than 3,500 bushels of wheat have been marketed at that place in 1905; also, say, $54,000 worth of cattle and hogs. A cement walk has been laid down on the west side of the main street. The Bell Telephone Company has installed an exchange, and the Bank of Hamilton has opened a branch under the management of Mr. A. W. Nelles, The 1905 fair of the Southern Manitoba Agricultural and Arts Association was a successful event, and a winter fair was held by the same body during the present month. These and other matters form the text of a very full report.

* * *

TRADE ENQUIRIES.

Enquiries were recently made at the Canadian Government Office, 17 Victoria Street, London, as under:

By a North of England firm for Canadian exporters of Canadian oak, cut lengths 12 in. long by various dimensions. A London produce merchant wants to represent Canadian houses exporting cheese, butter and canned goods. The Canadian Office in London (city trade branch) has the following enquiries: A firm in Cardiff, Wales, desires the addresses of Canadian manufacturers of broom handles and of washing boards.

A French importing house possessing warehouses on the west and south coasts of France would be pleased to hear from Canadian makers of doors, sashes and mouldings.

* * *

BANKING AND FINANCIAL.

A presentation was made last week to Mr. James Elmsly, superintendent of branches for the Bank of British North America, by members of the staff of the bank, Mr. A. E. Ellis, the manager of the Montreal branch, being the spokesman. The occasion was the forthcoming marriage of Mr. Elmsly, and the present consisted of an oak cabinet of silver and a mahogany cabinet for china.

We are advised by the head office of the Bank of Toronto that a branch of that bank has been opened at Pilot Mound, Man., under the management of Mr. J. M. Fraser.

Our Halifax correspondent tells us that of the $3,000,000 of Royal Bank of Canada stock issued and paid up $1,687,600 is held in Halifax, and of $2,500,000 of Bank of Nova Scotia stock, $1,278,000 is held in Halifax.

It is the intention of the Bank of Hochelaga to open branches in Ville St. Louis, Maisonneuve, on the Island of Montreal, and at St. Jacques, in the county of Montcalm. Mr. Lemoine, now of the Hochelaga branch, will, it is said, manage the Maisonneuve branch.

The Edmonton "Bulletin" of 19th February says that the Calgary manager of the Molsons Bank has secured temporary premises, and opens a branch in that lively place on 1st March. This, with the Bank of Hamilton, will make ten banks having branches in Edmonton.

It is stated by the "Chronicle-Telegraph," of Waterloo, Ont., that the Bank of Toronto, which has been looking for a suitable location for a branch of their bank in Waterloo, has secured the premises now occupied by Mr. H. Urstadt, the jeweller, as temporary quarters, which they will occupy about March 1st.

Paris papers are commenting on the fact that the value of notes issued by the Bank of France has reached over 4,000,000,000f,, or about $800,000,000. The limit of the note issue, as fixed by law, is 5,000,000,000f., or $1,000,000,000, and the narrowness of the margin is said to be causing concern among business men. It is pointed out by the financial editor of the London "Standard" that if a run on the ordinary banks occurred, and they went to the Bank of France for supplies, notes would soon be exhausted, and the gold reserve would have to be drawn on.

* * *

—We hear from Montreal that La Banque Provinciale is about to increase its capital. Its authorized capital is one million, and it is said to intend asking that it be allowed to double it. The next issue of the "Canada Gazette," it is expected, will contain the announcement as to the proposed changes. The subscribed capital of the bank is $846,000, and paid-up capital $823,000. The stock of this bank is selling around 80. The Board of Management consists of: President, J. N. Ducharme; vice-president, G. B. Burland; directors, ex-Mayor H. Laporte, Samuel Carsley, and the Hon. Louis Beaubien.

—Some time ago the Board of Trade of Halifax passed a resolution, noted at the time in our Halifax correspondence, urging the Dominion Government to grant a bonus in aid of steel shipbuilding. This has been endorsed, we are told, by the boards of trade in the following places: Lindsay, Ont.; Winnipeg, Man.; Cornwall, New Westminster, B.C.; London, Ont.; Dawson, Selkirk, Man.; Montreal; Rossland, B.C.; Chatham, N.B.; the Canadian Manufacturers' Association, and various other boards and organizations of influence.

—Long ago Canadian boys at school regarded, and were taught to regard the Peace river, the Athabasca river, the Greater, and even the Lesser, Slave lake as out of civilization, and as good as in the dim vastness of the Arctic regions. Now, after thirty or forty years, we find some of these localities at any rate quite within the current commercial circle, to say nothing of the Arctic. For example, the Edmonton "Bulletin" of last week says: "P. Cunningham, of Lesser Slave Lake, fur buyer for Bredin & Cornwall, came in from the north last night with twenty-four packs of furs, valued at approximately $25,000. He made the trip of 300 miles with two teams in ten days. . . . On the last stretch there is scarcely any snow, and the sleighing is very poor." Up by Lesser Slave Lake, he adds, and about Peace River Crossing snow is scarce, and waggons have been used all winter. There are one hundred freighters working on the Lesser Slave trail this winter, Mr. Cunningham adds, and more freight is going inward than ever before.

—The dispute between United States insurance companies and the French Government regarding the deposit of reserves on French policies in France, these having formerly been kept abroad, has been ended in favor of the companies. The companies did not object to the new law in itself, excepting in so far as it had been made retroactive, including policies that had been taken out prior to the passage of the law. This would, if carried out, have entailed, of course, an enormous transfer of money to Paris. The Government now agrees that the rules shall not apply to old policies, and has applied to the Council of State to alter the rules accordingly.

* * *

—A far-reaching decision has been arrived at by the Supreme Court of the United States, affecting the Interstate Commerce law. The bench unanimously laid down the principle that railways cannot deal in the commodities which they haul over their lines. This decision falls principally on the railways which directly or indirectly own coal mines, and sell their products, but if the courts sustain the claim of the Interstate Commerce Commission that private car lines are common carriers the principle laid down may also include them, so that the owners of refrigerator cars would be prohibited from using their own cars for the transportation of their products.

* * *

—With the laudable intention of protecting the public in their relations with promoters of new companies, the Ontario Government will introduce a bill requiring that all prospectuses, including notices, advertisements or statements for the purpose of securing subscriptions for stock, must be signed by responsible parties connected with the actual or proposed concern, must show what properties are being bought, what capital is invested therein, and who are the directors, and must be filed with the Government. In this way a prospective purchaser of stock may obtain all the information he desires before completing the transaction. The Act will apply to all concerns, wherever incorporated, which issue prospectuses in Ontario, that is, which endeavor to sell their stock in the Province. Another bill, to be adopted when the statutes are consolidated in 1907, will provide for uniform oversight over all concerns doing business in the Province. At present there is a long array of enactments dealing with such subjects as mining companies, Act for the construction of piers, trusts companies, cheese and butter concerns, co-operative societies, investments by companies and the like. These are all to be included within one Act.

* * *

—Some radical changes in the lumber policy of the New Brunswick Government were announced last week by Premier Tweedie. Among the proposals was one that lumbermen must remove the tops and branches of trees cut down from the forest, as they are a menace in regard to fires. Hemlock trees must not be cut for bark alone, for similar reasons. The Crown lands will be re-surveyed, and all tracts where the growth is stunted will be set aside for pulpwood. Reservations will be made at the headquarters, and along the various streams to prevent drought. A forestry convention is to be held at Fredericton next August to discuss these matters.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, March 1st, 1906, as compared with those of the previous week:

	March 1st.	Feb. 22nd.
Montreal	$29,282,207	$29,538,996
Toronto	19,798,781	23,233,022
Winnipeg	6,489,285	6,808,428
Halifax	1,305,461	1,606,859
Hamilton	1,140,534	1,253,790
St. John	958,103	1,003,203
Vancouver	1,912,858	1,989,032
Victoria	688,939	612,117
Quebec	1,425,524	1,453,897
Ottawa	1,824,177	2,249,656
London	900,960	985,408
Total	65,685,829	$70,734,408

UNCONSCIOUS HUMOR.

"Very frequently," says a New York lawyer, "there is an element of unconscious humor in the findings of a jury. To my mind, the best I ever heard in this connection was the verdict brought in by a coroner's jury in Michigan, who were called upon to pass upon the case of a sudden death of a merchant in Lansing. The finding was as follows: "We, the jury, find from the physician's statement that the deceased came to his death from heart failure, superinduced by business failure, which was caused by speculation failure, which was the result of failure to see far enough ahead."
—Harper's Weekly.

* * *

The committee of the Manitoba Legislature appointed to enquire into the telephone question have issued their report. They urge the Government ownership of all long-distance telephone wires and also municipal ownership of local systems, the latter to be operated in conjunction with the Government long-distance lines. A bill embodying this finding has been introduced in the Legislature. It provides for expropriation of the existing lines, and the Government, in admitting that they have not power to do this, intimate that power will be demanded of the Federal Parliament.

The Standard Bank of Canada

NOTICE IS HEREBY GIVEN that it is the intention of The Standard Bank of Canada, after publication of this notice for four weeks in the Canada Gazette, and in the Monetary Times, a newspaper published in the City of Toronto, to apply to the Treasury Board for a certificate approving of the following By-law of The Standard Bank of Canada:

"WHEREAS the Capital Stock of The Standard Bank of Canada is now One Million Dollars, and it is expedient that the same should be increased by One Million Dollars;

BE IT THEREFORE ENACTED as a By-law by the shareholders of The Standard Bank of Canada assembled at a special general meeting called for the purpose of considering and, if thought fit, of passing this By-law, and held in the Board Room of The Standard Bank of Canada, at the corner of Wellington and Jordan streets, Toronto, at 12 o'clock noon, on Tuesday, the thirteenth day of February, A. D. 1906;

1. THAT the Capital Stock of the Standard Bank of Canada be and the same is hereby increased by the sum of One Million Dollars, divided into twenty thousand shares of fifty dollars each.

IN WITNESS WHEREOF the Corporate Seal of the Bank has been hereto affixed, and this By-law has been countersigned by the President and General Manager, this 13th day of February, A. D. 1906.

Meetings

THE LONDON AND CANADIAN LOAN AND AGENCY COMPANY, LIMITED.

The thirty-second annual meeting of the company was held at the company's offices, 103 Bay Street, Toronto, on Wednesday, 21st February, 1906, at 12 o'clock noon.

On motion the president, Mr. George R. R. Cockburn, M.A., occupied the chair, and the secretary of the company, Mr. W. Webb, Jr., acted as secretary of the meeting.

The following report was unanimously adopted.

Report.

The directors have pleasure in submitting to the shareholders the 32nd annual report of the company, and the statement of accounts for the year ending 31st December, 1905, the result being as follows:—

The gross earnings, including the balance ($24,078.39) brought forward from last year, amounted to	$208,714 15
After deducting the cost of management, interest on debentures, and all other charges, amounting in all to	116,917 84
There remains a net profit of	$ 91,796 31
Out of which two half-yearly dividends at the rate of 6 per cent. per annum, and the usual tax on capital and income have been paid, amounting in all to	61,043 00
Leaving a balance of	$30,753 31

Of which $15,000 has been added to the company's "Rest Account," and $15,753.31 is carried forward at the credit of "Revenue Account" to next year.

The total assets of the company now amount to $3,556,544, and the reserve and surplus funds to $265,335, over all liabilities.

During the year applications for loans on mortgages were accepted to the amount of $627,129 on real estate valued at $1,553,000.

The company's business is steadily increasing in a safe and satisfactory manner. The prompt payment by borrowers in all departments of the company's operations indicates the prosperity of Ontario, Manitoba, and Saskatchewan, in which provinces the company's loaning operations are at present carried on.

With great regret the directors have to report the death of two of their colleagues during the past year, namely, Dr. Larratt W. Smith and Mr. Thomas R. Wood, both of whom rendered for many years most valuable service to the company. Their places on the board were filled by the election of Messrs. F. Barlow Cumberland and A. H. Campbell, Jr., well-known business men of the city of Toronto.

The various officers of the company have performed their duties faithfully and to the satisfaction of the directors.

The books, accounts, vouchers, and securities, have been carefully examined by the auditors, and their certificate of audit is hereto appended.

G. R. R. Cockburn, President.

Toronto, 3rd February, 1906.

Auditors' Certificate.

To the president and directors of the London and Canadian Loan and Agency Company, Limited:—

Gentlemen,—We have completed the audit of the books and accounts of the company for the year ending 31st December, 1905.

We have also examined the mortgages and debentures and other securities for loans, together with the various statements thereof, and find that they agree with their respective entries in the ledger, and we hereby certify to the correctness of the accompanying statements of "Assets and Liabilities," and "Revenue Account" for the past financial year. We are, gentlemen, yours faithfully,

G. H. G. McVity,
J. George, F.C.A., (Can.),
Auditors.

Toronto, 3rd February, 1906.

At a subsequent meeting of the newly-elected board, Mr. George R. R. Cockburn, M.A., was elected president, and Mr. Thomas Long, vice-president.

* * *

—According to a despatch received at Ottawa on Monday last from British Columbia, the total salmon pack of British Columbia last season was 1,167,460 cases. Of this quantity 1,080,673 cases were packed in the Fraser river, and 290,324 cases in the northern canneries. The total pack is considerably less than in 1901, the last previous large year in the four-year-cycle, when the quantity packed was 1,236,156 cases. In 1897, another of the regular years of abundance, the pack was 1,015,477 cases.

THE ONTARIO LOAN AND DEBENTURE COMPANY.

The thirty-fifth annual meeting of the shareholders of this company was held at their office in London, Ont., on Wednesday, the 14th inst., when the affairs of the company were shown to be in a very satisfactory state, two half-yearly dividends, at the rate of 6 per cent. per annum, with a bonus of ½ per cent., altogether $78,000 has been paid to the shareholders, $30.000 added to the reserve fund (now $655,000), and $35,028.69 carried forward.

The annual report, as follows, was adopted by the meeting:—

Report.

The directors have pleasure in presenting to the shareholders the thirty-fifth annual report and balance sheet of the company, showing the result of the past year's business, which they trust will prove satisfactory.

The net earnings, after deducting the cost of management, and all other charges, amount to $110,867.63 (as against $103,251.54 the previous year); this, with $321,161.06 which remained at the credit of revenue account, amounts to $143,028.69, and from this sum two half-yearly dividends at the rate of 6 per cent. per annum, with a bonus of ½ per cent., altogether $78,000, has been paid to the shareholders, and $30,000 added to the reserve fund (now $655,000), leaving $35,028.69 at the credit of revenue account.

The sum of $957,879 has been loaned, and $958,506 principal and interest has been repaid during the year.

The company's funds have been well employed, and almost its entire assets are invested in first mortgages on real estate. We have no property on hand.

The general business of the country has been exceptionally good through large immigration, increased investments of foreign capital, and unprecedently good crops in practically all parts of the Dominion. As a rule our cities and large towns are having apparently a healthy growth, there is considerable increase in the building trade, and conditions look well, though some exceptional sections may be over-estimating the future.

The outlook for the coming year is good, and all monetary institutions should participate in the general prosperity of the country and prospective advancement under prudent management.

Messrs. Wm. Home Cook & Co., C.A., of Edinburgh, our general agents for Scotland, have been active in renewing and placing new debentures during the year.

All of which is respectfully submitted.

John McClary, President.

London, Ontario, January 26th, 1906.

To the shareholders of the Ontario Loan and Debenture Co.:

We hereby certify that we have audited the books and accounts of the Ontario Loan and Debenture Co. for the year 1905, comprising a monthly cash audit, and the verification of the postings and balances in all the company's books, and we find the whole correct and in accordance with the above statements. We have also examined the securities and find them in order.

THE LANDED BANKING AND LOAN COMPANY.

The twenty-ninth annual meeting of the shareholders of The Landed Banking and Loan Company was held in the company's office in Hamilton on 21st February at noon, the following shareholders being present: Rev. George Forneret, Matthew Leggat, John Waldie, Hon. Thomas Bain, C. S. Scott, Charles Mills, John Proctor, E. B. O'Reilly, M.D., E. G. Payne, W. A. Robinson, A. H. Moore, G. A. Gates, James Angus, W. W. Osborne, W. H. Wardrope, S. F. Lazier, K.C., Hon. J. M. Gibson, W. H. Ballard, Thomas Hobson and E. R. Niblett.

The president, Matthew Leggat, occupied the chair, and the treasurer, C. W. Cartwright, acted as secretary.

The secretary read the motion convening the meeting, also the minutes of the meeting held the previous year, which were confirmed.

Report.

The directors submit to the shareholders the twenty-ninth annual report of the company's affairs, together with the profit and loss account and balance sheet for the year ended 31st December, 1905, as duly certified by the auditor appointed by the shareholders.

The net profits for the year after deducting all charges amount to	$77,839 58
Added to which is the balance carried forward from last year	3,565 43
	$81,405 01

Which amount has been appropriated as follows, namely:—

Two half-yearly dividends at the rate of six per cent. per annum with the government and income tax	$43,040 00
Added to the reserve fund	30,000 00
Carried forward to next year	8,365 01
	$81,405 01

The company's securities have been thoroughly examined by a committee of your directors and full provision made for known losses and probable shrinkages.

The company's funds have been well and profitably employed and mortgage repayments exceedingly well met.

The reserve fund with the $30,000 added now amounts to $270,000, or slightly over thirty-eight and one-half per cent. of the paid-up capital.

The company's assets amount to $2,493,719.44, an increase of $112,907.39 for the year.

The directors record with regret the death of W. F. Findlay, who for so many years had been one of the auditors of the company.

Debentures, both currency and sterling, show a gratifying increase, indicating continued confidence here and in Great Britain in this class of investment.

The directors again acknowledge the efficient services rendered to the company by their agents in Scotland, Messrs. MacAndrew, Wright & Murray.

The officers of the company have performed their several duties to the satisfaction of the directors.

All of which is respectfully submitted.

Matthew Leggat, President.

Hamilton, 29th January, 1906.

GENERAL BALANCE SHEET, 31st DECEMBER, 1905.

C. W. Cartwright, Treasurer.

I hereby certify that in conjunction with W. F. Findlay (now deceased) I examined the books, accounts and vouchers of The Landed Banking and Loan Company for the year ended 31st December, 1905, up to the first day of the said month of December, up to which date he and I found the same correct; and that since the said last mentioned date I alone (owing to his death) have examined the same up to the end of the said year and have found the same correct; and I further certify that the foregoing statements are in conformity therewith.

I have also examined the securities and find them in perfect order, and correctly set forth in the above statement and in the securities book.

Wm. Marshall, Auditor.

Hamilton, Jan. 23, 1906.

The adoption of the report was moved by Matthew Leggat, seconded by John Waldie, and was carried unanimously.

On motion the following were re-elected directors for the ensuing year:—Samuel Barker, M.P., Hon. Thomas Bain, M. Leggat, Charles Mills, C. S. Scott and John Waldie.

Ralph E. Young, C. A. and G. E. F. Smith, C.A., were elected auditors for the ensuing year.

The usual vote of thanks to the auditors and directors having been passed, the meeting adjourned.

At a subsequent meeting of the directors, Matthew Leggat was re-elected president and John Waldie vice-president.

* * *

THE LONDON LIFE INSURANCE COMPANY.

The thirty-first annual meeting of the shareholders and policyholders of the London Life Insurance Company was held at the company's new head offices, Nos. 422 to 426 Wellington Street, London, Canada, February 12th, 1906.

The president, Mr. John McClary, occupied the chair, and there were present a number of shareholders and policyholders.

The notice calling the meeting was read by the manager and secretary, J. G. Richter, F.A.S., after which the following report and financial statement were submitted:

Thirty-First Annual Report.

The directors of the company beg to submit annual report and duly audited financial statement for year ending December 31st, 1905.

During the year, 15,532 applications for insurance, amounting to $2,360,906.50, were accepted and policies issued therefor.

The net premium and interest receipts of the year were respectively $384,142.33, and $90,873.07, totalling $475,015.42, an increase of $45,188.79 over the previous year.

The sum of $99,779.81 was paid for death claims, matured endowments, surrendered policies and cash profits during the year, an increase of $323.41 over previous year.

The insurance in force on the company's books at the close of the year, after deducting all re-insurances, amounted to $9,113,001.31, under 4,781 "Ordinary," and 55,624 "Industrial" policies—an increase of 3,572 policies for insurance of $912,704.09 for the year.

The assets of the company, exclusive of uncalled but subscribed capital, amount to $1,866,425.80, an increase of $223,241.88 for the year. The company's investments are of undoubted character, and would in the aggregate yield considerably more if realized on, than the amount at which same are taken into account in the financial statement.

The liabilities of the company, under existing policies, and in all other respects, have been provided for in the most ample manner, the whole amounting to $1,755,277.54. The surplus on policyholders' account, exclusive of uncalled but subscribed capital, is on the company's standard, $111,148.26, and after deducting paid-up capital, there remains a net surplus over all liabilities and capital, of $61,148.26, an increase of $10,657.67 for the year.

The company's business having outgrown the available accommodation for rental, it was necessary to purchase a building for head office requirements. The directors beg to report that they purchased building Nos. 422, 424, and 426 Wellington Street, this city, which is being remodelled in such manner as will answer the company's probable requirements in this connection for many years to come. The contemplated improvements were only partially completed at the close of the year, and the building was taken into account in the financial statement at the conservative valuation of $10,000, in accordance with its then state of advancement.

John G. Richter, F.A.S., Manager and Secretary.
John McClary, President.

Actuary's Report.

In harmony with the practice of the past six years, the bases upon which the reserve liabilities of the company have been computed are as follows. For all business issued previous to January 1st, 1900, the interest basis is four per cent. in both the Industrial and Ordinary branches; and for the business issued since that date, the interest basis is 3 per cent. in the Industrial branch, and 3½ per cent. in the Ordinary branch. Not only is the basis upon which the reserves are computed in itself more stringent than the law requires, but in the details of the valuation, particularly in the Industrial branch, reserves are provided by this company in a much more comprehensive manner than is customary with companies doing an Industrial business. As an example of this, it may be mentioned that for whole life policies the reserve is provided from date of issue both for infantile and adult ages. The almost universal practice with industrial companies is to provide no reserve for the new whole life business for year of issue; and no infantile policies to provide a reserve only after the insured have reached the age at which the maximum benefit is attained.

In addition to the extra reserve resulting from the practice of the company as above indicated, a special reserve is being accumulated for the purpose of placing all the old business on a 3½ per cent. interest basis. This fund, with the contingent fund, now amounts to $18,000.

The plan of dealing with accruing but unallotted profits, which has been followed by this company for many years and which has always been one of the distinguishing characteristics of the annual statement, has been continued; as strict regard being given to the future liabilities of the company in this connection, as to the liabilities under the guarantees in the policies.

If the reserves were computed strictly in accordance with the Government requirements and no special provision for unapportioned profits made, the surplus on policyholders' account would be $220,000 instead of $111,000, as shown by the statement.

In the case of outstanding and deferred premiums, deduction is made for the collection of both renewal and new premiums. In the latter case, although the bulk of the business has been actually paid for, only 60 per cent. of the premium is treated as an asset. If this item were taken into account at full face value, as is often done, the surplus would be further increased accordingly.

The amount of insurance represented as being in force is very considerably less than would be the case if all the industrial infantile policies were counted in full benefit as is the general practice. Since 1900 the policies issued at ages under ten have been treated as being in force only for the amount payable in case of death, and not for the maximum amount for which the policy will ultimately be in benefit. This applies to all plans and necessarily results in making the showing in regard to business issued and in force, considerably smaller than would be the case were the ordinary methods followed.

It is satisfactory to again note the fact that the profits estimated five years ago have been fully realized.

Ed. E. Reid, A.I.A., Actuary.

The president, Mr. John McClary, in moving the adoption of the report, said:—

The directors' report and accompanying financial statement present the year's operations, and the position of the company at the close of the year, in such detail as to be readily comprehended by anyone having even a limited knowledge of the matters dealt with.

The record of substantial progress that has been characteristic of the company in the past, has been added to the past year; steady and solid progress being apparent in every department of the company's affairs. The new business of the company exceeded the like business of any previous year, and the net increase in total business in force on the company's books at the close of the year also shows a very substantial increase over the business previously in force.

The particulars of the company's investments show that about 85 per cent. of the company's funds are invested in mortgages on real estate. It affords me very great pleasure to be able to say that notwithstanding the large percentage of mortgage investments, yielding a much larger interest return than would bonds and debentures, the company has never lost a dollar on this class of investments because of insufficient security, while the losses from every source in this connection aggregate less than $200 during the whole period of the company's history. The other assets of the company are all of undoubted character, and are taken into account at a valuation which is considerably below what could be realized at the present time if it were necessary, or advisable to dispose of these securities.

While it is of the greatest importance that the funds of the company be safely and profitably invested, it is of equal importance that the liabilities of the company in respect of its outstanding obligations, be ascertained and recognized in a proper manner. The real test of solvency is not determinable by taking into account the assets of a company only, but rather by the surplus of assets over liabilities fully ascertained and recognized. The certificate of the actuary shows how fully every requirement has been met, and that the company's own standard in this connection is much more stringent than the law requires.

With the assets of the company on a thoroughly sound basis, and the liabilities provided for in the most comprehensive manner, the surplus of $61,148.26 over all liabilities and capital, proves beyond question that the company's position financially is all that could reasonably be desired.

I have much pleasure in moving the adoption of the report.

The vice-president, Mr. A. O. Jeffery, K.C., LL.D., D.C.L., in seconding the adoption of the report, said:—

As the president has dealt more particularly with the financial position of the company, I wish to direct your attention to other features of the report.

The business issued during the year shows an increase of 14 per cent., the amount in force shows an increase of 11 per cent., and the amount gained, an increase of 24 per cent. over the previous year.

These favorable results have been accomplished without any increase in the ratio of expense to income. Leaving out of account the cost of alterations in office building, this ratio was nearly 2 per cent. less than for the year previous, or 32.9 per cent.—a very low rate for a company conducting an "Industrial" as well as an "Ordinary" branch.

The interest receipts for the year exceeded the amounts paid for claims, dividends to stockholders, rent of head office, and salaries of head office staff. Such a statement cannot probably be paralleled in the history of Industrial Life Insurance companies.

In view of the more enlightened interest taken by the public in regard to life insurance matters, it may be noted with satisfaction that this company has never issued tontine policies in the ordinary sense of the term; that an annual accounting of profits has always been made; that the estimates placed in the hands of agents have been fair and honest, as is indicated in the last clause of the actuary's report; that the investments are made on an absolutely non-speculative basis, and that in all respects the interests of the policyholders are carefully safeguarded.

The position of Canadian companies in the estimation of the people of this country is undoubtedly more favorable than ever before; and inasmuch as the unsound basis upon which assessment organizations are working is becoming more and more apparent this company may confidently look forward to a constantly increasing patronage.

The report was adopted unanimously.

The following directors were re-elected for the current year, viz.:—

John McClary, president; Mr. A. O. Jeffery, vice-president; Wm. Bowman, A. S. Emery, W. F. Bullen, George C. Gibbons, Thos. H. Smallman, T. W. Baker and Judge Bell.

* * *

WESTERN ASSURANCE COMPANY.

The annual meeting of shareholders was held at the company's offices, Toronto, on Thursday, 22nd February, 1906. The president, the Hon. George A. Cox, occupied the chair.

The following annual report of the directors, with accompanying financial statement, was read by the secretary:—

Fifty-Fifth Annual Report.

The directors have pleasure in presenting to the shareholders their report on the business of the year ending 31st December last.

The following is a summary of the results of the year's transactions as shown in the accounts submitted herewith:—

The underwriting profit, together with the interest received on investments, amounts to		$219,594 81
Out of this two half-yearly dividends have been provided for at the rate of six per cent. per annum, amounting to	$ 86,340 12	
And the reserve fund has been increased by	133,254 69	
		219,594 81

Reserve Fund.

The total reserve fund now amounts to	$1,742,020 42
The liability for unearned premiums on unexpired risks is estimated at	1,322,183 46
Deducting this from the reserve fund there remains a surplus over capital and all liabilities of	419,836 96

The directors take this opportunity of acknowledging the faithful and efficient services rendered by the officers and agents of the company during the past year.

FINANCIAL STATEMENT OF THE WESTERN ASSURANCE COMPANY, FOR THE YEAR ENDING DECEMBER 31st, 1905.

Geo. A. Cox,
President.

J. J. Kenny,
Vice-President and Managing Director.

Western Assurance Company's Offices,
Toronto, February 14th, 1906.

Auditors' Report.

To the President and Directors of the Western Assurance Company:—

Gentlemen,—We hereby certify that we have audited the books of the company for the year ending December 31st, 1905, and have examined the vouchers and securities relating thereto, and find the same carefully kept, correct and properly set forth in the above statement.

(Signed) Geo. Edwards, F.C.A.
R. M. Walton,
Auditors.

Toronto, February 14th, 1906.

The president, in moving the adoption of the report, said:—

In the report which has just been read by the secretary, the directors have, I think, presented very clearly the transactions of the company during the past year and its financial condition at the close of 1905, so that I feel that it is unnecessary for me to enter upon any extended remarks with reference to it.

The adverse experience of 1904, which was common to all companies doing business on this continent, has had the effect that we anticipated, of increasing rates and improving conditions generally, and the directors cannot but feel that the present outlook for fire insurance business is such as to warrant the expectation of a fair return to shareholders We are continuing to work upon conservative lines, making volume of business a secondary consideration. If we had desired to do so, there would have been no difficulty in showing a large increase in our premium income, but we have deemed it wiser to devote our efforts to securing as large a proportion as possible of the classes of risks which our experience has shown to yield a profit and at the same time to carry on the business with as moderate an outlay for expenses as is compatible with a proper selection and efficient supervision of our risks. In spite of an increase in the burden of taxes and fees imposed by a number of the jurisdictions in which the company operates, the expense ratio has been kept at about the same figure as for 1904.

As you will note from the figures which have been read, the net profit on the year's transactions is $219,594, out of which two half-yearly dividends have been paid at the rate of 6 per cent. per annum, and the balance, namely, $133,254, carried to the reserve fund. In other words, the company has earned nearly 15 per cent (or, to be exact, 14.62 per cent.) upon the capital invested, a result which must, I am sure, be satisfactory to the shareholders—particularly when it is borne in mind that this has been accomplished in the face of exceptionally heavy inland marine losses. As you will doubtless remember, in the fall of 1905 a period of unseasonably warm weather was followed by a succession of very severe gales, which entailed losses of life and property never before equalled on these waters. The storm of November 28th alone caused losses to marine property estimated at nearly $2,000,000. The season closed with a record of 79 vessels totally destroyed, and losses on hulls and cargoes estimated at nearly $5,000,000, as against $2,600,000 in 1904. The Lake Marine, as was to be expected under these conditions, showed an adverse balance for the year for the companies engaged in it, and it is probable that a general increase in rates will be adopted for the forthcoming season. Unless this expectation is realized, the policy of the company will be to materially curtail its operations in this department, at least so far as relates to the acceptance of inland hull risks.

Shareholders will, no doubt, be especially interested to learn of the progress that is being made through its British and Foreign branch, conducted through the office in London, England. It is now six years since we opened this branch for the transaction of fire business, and I am glad to say that the results which have been secured under the efficient management of Mr. W. B. Meikle, (whom we are pleased to have with us to-day) have justified the extension of the company's operations. Although the expenses of opening agencies throughout a new field have necessarily been heavy, as compared with those of conducting business in places where we have been long established, this branch has been successful in earning a fair margin of profit after providing for these exceptional charges. While the growth of the business there must naturally be slow; our experience in the matter of loss has been so favorable—especially upon business in Great Britain—as to make us feel reasonably assured of a steady return in the way of profits from this field hereafter. When the fire branch had been running two years it was decided to conduct marine insurance in connection with it, and although the business to date has been comparatively small, the uniformly profitable results it has shown, tend to confirm the opinion we entertained, that with the addition of an experienced marine underwriter to our staff there, our marine business could be successfully extended to our London branch.

It is also satisfactory to note that the interest earned on investments during the past year was more than sufficient to pay the dividends, and while the profits realized on the underwriting might have justified a larger dividend being declared, I feel sure that the shareholders will concur in the view held by the directors that the wiser course was to apply the excess of profits over the amount required for the dividends to making a substantial addition to the reserve fund.

The vice-president seconded the adoption of the report, which was carried unanimously. The election of directors for the ensuing year was then proceeded with, resulting in the unanimous re-election of the following gentlemen, namely: Hon. George A. Cox, Hon. S. C. Wood, Messrs. G. R. R. Cockburn, George McMurrich, H. N. Baird, W. R. Brock, James Kerr Osborne, E. R. Wood, and J. J. Kenny.

At a meeting of the board of directors held subsequently the Hon. George A. Cox was re-elected president, and Mr. J. J. Kenny, vice-president, for the ensuing year.

* * *

—A bill has been introduced in the British Columbia legislature to improve the chances of mining prospectors. It proposes to increase the quantities of land held under each claim to 500 feet along the creek or extending into the hillside 500 feet. This permission of larger latitude, it is believed, will enable the claim-owner to find the pay-streak under all ordinary circumstances.

BRITISH AMERICA ASSURANCE COMPANY.

The seventy-second annual meeting of the shareholders was held at the company's offices, Toronto, on Wednesday, 21st February, 1906.

The president, Hon. Geo. A. Cox, occupied the chair. The secretary read the following annual report.

Report.

The directors beg to present their report on the transactions of the company for the past year, with a statement of assets and liabilities at 31st December last.

The total income for the year from all sources was	$2,526,682 49
And the total expenditure for the year was	2,387,465 58
Leaving a profit balance of	$ 139,216 91

This has been appropriated as follows:—

Dividends Nos. 123 and 124, at 6 per cent. per annum	$50,417 90	
Written off securities and office furniture	11,234 10	
Balance added to reserve fund	77,564 91	
		$ 139,216 91

Reserve Fund.

The total reserve fund now stands at	$1,101,607 86
The liability for unearned premium on unexpired risks is estimated at	909,820 32
Leaving a surplus over capital and all liabilities of	$ 191,787 54

The directors desire to express their appreciation of the services of the officers and agents of the company during the year.

All of which is respectfully submitted.

Geo. A. Cox, President.

FINANCIAL STATEMENT FOR THE YEAR ENDING DECEMBER 31st, 1905.

Fire losses	$1,139,583 03
Marine losses	374,940 81
Commissions, taxes and other charges	872,941 74
Dividend No. 123	25,143 02
Dividend No. 124	25,274 88
Profit and loss account	11,234 10
Reserve fund at December 31st, 1905	1,101,607 86
	$3,550,725 44

Reserve fund at December 31st, 1904	$1,024,042 95
Fire premiums	2,065,828 34
Marine premiums	404,512 22
Interest and rent accounts	56,341 93
	$3,550,725 44

Assets and Liabilities.

Office furniture	24,762 81
Agents' balances	345,582 68
Cash on hand and on deposit	176,769 87
Bills receivable	5,402 52
Interest due and accrued	18,000 27
	$2,119,347 89

Capital stock subscribed	$850,000 00	
Less calls in course of payment	1,773 46	
		$ 848,226 54
Losses under adjustment		144,238 61
Dividend No. 124, payable January 5th, 1906		25,274 88
Reserve fund		1,101,607 86
		$2,119,347 89

J. J. Kenny, Vice-President and Managing Director.

P. H. Sims, Secretary.

We hereby certify that the books of the company have been audited, and the vouchers and securities relating thereto have been examined for the year ending 31st December, 1905, and the same are carefully kept, correct and properly set forth in the above statements.

Geo. Edwards, F. C. A.,
R. M. Walton.
Auditors.

Toronto, February 14th, 1906.

In moving the adoption of the report, which was seconded by the vice-president, the president said:

At the last shareholders' annual meeting I ventured the prediction that the higher rates and improved conditions resulting from the adverse experience of the year then under review would lead to fire insurance on this continent being placed on a more satisfactory footing than it has been for some years past. I am pleased to be able to say that during 1905 these expectations have been fulfilled, and the figures in the report before you demonstrate that we have shared in the profits which have been realized by companies engaged in this branch of business.

The total fire premium income of the company was $2,065,828.34, and the fire losses incurred amounted to $1,139,583.03, making a loss ratio of 55 per cent. In 1904 this ratio was 77 per cent., the losses being $1,665,504.82, including some $430,000 involved in the Baltimore and Toronto conflagrations, so that the fire losses in 1905 were $525,921.79 less than in 1904, or $95,921.79 less, leaving the losses by these two exceptional disasters out of consideration.

In the marine branch the premiums are $40,091 less than those of the preceding year, this reduction being due to our having cut off some unprofitable branches, and to the fact that we refrained from entering into the keen competition for business via the St. Lawrence, much of which was written at absurdly low rates, and proved, I believe, generally unprofitable to those engaged in it, although on the comparatively small amount of this business we transacted we succeeded in realizing a profit. The marine losses account, however, on the whole shows an increase of $57,534 over last year, this adverse experience being mainly due to the disastrous storms which prevailed on the Great Lakes during the closing months of last season's navigation.

It will be gratifying to shareholders to note the material increase in the earnings from interest and rent, which amounted for the year to $56,341.93, and was more than sufficient to provide for the dividends declared during the year.

Taken as a whole, the report must, I think, be regarded as eminently satisfactory, showing as it does net earnings of upwards of 15 per cent. on the capital, an increase in the reserve fund of $77,564, and a gain in net surplus of $106,600 over all liabilities, after making provision for running off the liability on unexpired risks.

The following gentlemen were re-elected to serve as directors during the ensuing year:—Hon. Geo. A. Cox, J. J. Kenny, Augustus Myers, Thomas Long, John Hoskin, K.C., LL.D., Hon. S. C. Wood, Robert Jaffray, Lieut.-Col. Sir H. M. Pellatt, E. W. Cox.

At a meeting of the board held subsequently, the Hon. George A. Cox was re-elected president, and Mr. J. J. Kenny, vice-president.

* * *

THE TORONTO GENERAL TRUSTS CORPORATION.

The seventh annual meeting of the shareholders of the Toronto General Trusts Corporation (being the twenty-fourth of the Toronto General Trusts Company), was held in the board room of the corporation, on the corner of Yonge and Colborne Streets, Toronto, Wednesday, 28th February, 1906.

There were present John Hoskin, K.C., Hon. S. C. Wood, Robert Jaffray, Dr. James Digby, J. L. Blaikie, W. R. Brock, Aemilius Irving, K.C., Fred. Wyld, J. G. Scott, K.C., Hon. Richard Harcourt, Hon. J. J. Foy, K.C., Col. G. A. Stimson, A. E. Gooderham, J. W. Langmuir, E. T. Malone, K.C., D. R. Wilkie, J. Kerr Osborne, E. B. Osler, M.P., James Hedley, J. J. Kenny, S. Nordheimer, Alex. Nairn, H. B. Hodgins, E. R. Greig, A. D. Langmuir, Frederick Jarvis, George S. May, Donald Mackay, John Y. Reid, E. Galley, J. H. Ingersoll, George Porter, John Paton, W. G. Watson, W. H. Cawthra, James Henderson, R. M. Waddell, A L. Malone.

The president, Dr. Hoskin, took the chair, and Mr. A. D. Langmuir, the assistant manager, was appointed to act as secretary.

The various financial statements showing the operations of the corporation for the year ended 31st December, 1905, were submitted by the managing director, Mr. J. W. Langmuir, and commented upon by him.

The report to the shareholders was then read, as follows:

Report.

Seventh annual report of the directors of the Toronto General Trusts Corporation for the year ended 31st December, 1905.

The directors of the Toronto General Trusts Corporation beg to submit their seventh annual report (being the twenty-fourth of the Toronto General Trusts Company), which together with the accompanying financial statements, shows the operations of the corporation and the financial results of the same for the year ended 31st December, 1905.

The new business taken over by the corporation for the year amounts to $7,974,745.57, as shown by the following summary:—

Executorships	$6,404,611 32
Administrations	248,568 71
Trusteeships	849,710 66
Investment agencies	20,944 24
Estate agencies	148,727 00
Guaranteed mortgage investment agencies	164,317 23
Committeeships	65,266 60
Guardianships	22,509 97
Lunatic estate agencies	50,089 84
Total	$7,974,745 57

In addition to the foregoing the corporation has during the year acted as trustee for the issue of bonds and debentures for a large amount, and has also been appointed registrar, transfer agent, and in other capacities not included in the above summary.

The profit and loss statement shows the gross revenues of the corporation for the year, and plainly sets out the sources from which they were derived, and also the charges against the same. The net profits, after making provision for every ascertained loss, amount to $119,732.31, which includes a balance brought forward from the preceding year of $11,271.20. Out of these net profits your directors have declared two semi-annual dividends at the rate of 7½ per cent. per annum, amounting to $75,000, have written off $11,071.55 from the vaults and furnishings of the head office and the Ottawa and Winnipeg branches, carrying forward to the credit of profit and loss $8,606.70.

Your directors announce with deep regret the death of three of their colleagues during the past year, viz.:—The Hon. Senator Fulford; Mr. John Bell, chief counsel of the Grand Trunk Railway in Canada, and Mr. George Gooderham, two of whom showed their appreciation of the aims and objects of the corporation by appointing it their executor and trustee.

All of which is respectfully submitted.

J. W. Langmuir, Managing Director.
John Hoskin, President.

Toronto, February 28th, 1906.

ASSETS AND LIABILITIES STATEMENT,

Year Ended 31st December, 1905.

Assets.

	$119,732 31
By balance brought down	$119,732 31
	$119,732 31

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of the Toronto General Trusts Corporation to the 31st December, 1905, and find same to be correct and properly set forth in the above statement of profit and loss. We have examined and find in order all the mortgages, debentures, bonds and scrip of the Corporation, as well as those negotiated for the Supreme Court of Judicature for Ontario, and trusts, estates and agencies in the Corporation's hands, and have checked same with the mortgage and debenture ledgers and registers.

The bankers' balances, after deducting outstanding checks, agree with the books of the Corporaton. We have also examined the reports of the auditors of the Winnipeg and Ottawa branches, and find that they agree with the head office books.

(*Signed*) R. F. Spence, F.C.A., "Can.",
George Macbeth,
Auditors.

The president, Dr. Hoskin, in moving the adoption of the report, said:—

It is my duty, as also pleasure, to move the adoption of the report which has just been read. At former annual meetings this motion has been accompanied with an address from me which sometimes has been lengthy. On this occasion I propose to depart from the custom. My remarks will be few, and instead you will have the pleasure of hearing from the managing director, Mr. Langmuir, what we have been doing during the past year, what the character and volume of the work have been, and what progress has been made, all which, I am sure, will be eminently satisfactory to you.

Notwithstanding the many difficulties encountered in the strenuous work entailed in the administration of the Corporation's affairs, the directors have pleasure to report continued and substantial progress. One of the evidences of the progress we are making you will have observed, namely, the alterations which are being made for the purpose of enlarging our office accommodation; in fact, it has become necessary to double our space.

Without encroaching in any way on the ground the managing director will shortly cover, I may refer to a matter to which on former occasions I have directed some remarks, namely, as to the reasonable charges made by the Corporation for their services in the management of estates. More than once I have fully dwelt upon this subject, and I can only repeat what the files of the courts will show, that we ask, and consequently receive, less than is usually paid to private individuals. This alone should be an inducement to persons seeking the services of trustees to appoint the Corporation.

That the benefits arising from appointing the Trust Corporation are becoming widely known and taken advantage of is manifested by the fact that recently persons of high standing in the various walks of life, and some of them very wealthy, have appointed us their executors and trustees; for instance, a Judge of the Court of Appeal, a Judge of the High Court of Justice, a member of the Dominion Government, a senator, the counsel and chief solicitor of the Grand Trunk Railway, and the counsel and chief solicitor of the Canadian Pacific Railway, some of whom were shareholders and others directors of the Corporation.

Vice-president, the Hon. S. C. Wood, seconded the adoption of the report.

The managing director, Mr. J. W. Langmuir, being called upon, said:—

The statements of the Corporation's business for the past year, which have just been submitted to you, and the net results of the year's business for the past year, which should, I think, assure the shareholders that their interests as such are on a thoroughly safe foundation.

The profit and loss statement shows that the gross earnings, including $11,271.20 brought forward, amounted to $234,331.28, and after payment of all charges of management, at the head office and its branches (which, owing to the varied and technical character of our work, requiring a skilled and experienced staff of officials, are necessarily large), the net profit is $119,732.31. Out of these profits a dividend at the rate of 7½ per cent. per annum, amounting to $75,000, has been paid; $11,071.55 has been written off the safe deposit vaults and other capital holdings at the Ottawa and Winnipeg branches; $25,000 has been carried to reserve (increasing that fund to $325,000), and $8,660.76 has been carried forward to the credit of the account.

I may here state that in dealing with commissions earned for the management of estates, nothing is taken into profits until the estate or trust accounts are passed by the courts, or until the compensation is agreed to by the beneficiaries. It will, therefore, be seen that a very considerable revenue is held in reserve from year to year, in addition to the amount appearing in the profit and loss sheet.

An examination of the assets and liabilities statement accompanying the report shows a very large increase in the volume of our business. During the past year alone 215 executorships, administrations, trusts and estates of various kinds, having an inventoried value aggregating close upon $8,000,000, were placed under our charge, and since the establishment of the Corporation, in 1882, over fifty millions of estate, trust and investment business has been committed to the care of the Corporation, apart altogether from trusteeships for the issue of bonds. Out of this amount, after distribution and settlement, nearly $30,000,000 remained with us at the close of 1905.

In addition to the performance of our duties as executor and trustee in connection with this large and varied business, the Corporation now ranks as the second largest mortgage and debenture investment company in Canada, our friend, the Canada Permanent Mortgage Corporation, coming first.

These statements, I think, will convince you that the Corporation is making sure, and sometimes very marked, progress from year to year. To be sure, our net profits, having regard to the great volume of business we have in our hands, are not large. In this connection, however, I have again to repeat what our reports have set out time and again: that this organization is simply a corporate manager of estates, trusts, etc., and investments connected therewith, and that for such management we receive such moderate compensation as the courts allow us. We do not speculate with our own capital funds, and most certainly not with trust moneys; all our securities come strictly within the Trustee Investment Act, and, therefore, our own and our clients' profits, although perhaps moderate, are as safe as human care can make them.

In commenting, on occasions of this kind, on the operations of the Trusts Corporation, regard must always be had to a much larger, and, I may be permitted to say, a more deeply interested class than our shareholders, viz.: the thousands of beneficiaries, legatees, widows, minors and other persons whose business affairs are now in our hands, and a still greater number of persons possessed of larger or smaller means, whom the Corporation desires to reach, in order that we may endeavor to convince them of the great advantages of appointing a corporate executor and trustee, instead of nominating in their wills and trust deeds individuals to act in these capacities.

There might have been some room for doubt on this point when the Corporation was first organized, and when it was passing through its experimental stage, but after an experience extending over a quarter of a century, during which time, as I have already stated, over $50,000,000 of trust and agency business has been dealt with by us, the superiority of the corporate over the individual system is placed beyond all doubt. Abundant proof of this is constantly coming to the surface through legal reports of breaches of trust and loss of estates' assets, occasioned by the want of experience, defalcations of individual trustees, and the still greater number of cases that are never made public.

That the corporate system has its opponents goes without saying. Not a few wish to keep control of estates, not only for the compensation, but also for other personal reasons. There are also legatees and beneficiaries who want things done contrary to the terms of wills or trust deeds, and who believe that if individual executors and trustees had been appointed they would have obtained all they asked for, even if it involved breaches of trust; other parties think that powers of discretion should be exercised in their favor, even if clearly in violation of the intentions of a testator or creator of a trust; and others who for purposes of their own (never contemplated by the creator of the trust) desire to get possession of the estate, regardless of the means resorted to for that purpose, which means are frequently of a very crooked character. While yielding to requests of this kind might probably save the Corporation from frequent importunities and temporary inconvenience, it is almost certain that in nearly every case such yielding would have disastrous results. Indeed, if the truth were known, it is probable that the Corporation in most cases of the kind was appointed executor and trustee instead of individuals, in order that the testator might feel assured that such importunities might be resisted and such results as I have indicated might be avoided.

The drawbacks referred to which the Corporation has occasionally to contend with are, however, infinitesimally small and insignificant as compared with the acknowledgments which we are constantly receiving of the great benefits and advantages derived from the appointment of the Corporation through its methodical care and supervision of the business committed to it.

During the year we obtained a license to do business in British Columbia, so that the Corporation is now chartered and equipped to do business in the Provinces of Ontario, Quebec, Manitoba, Alberta, Saskatchewan and British Columbia, and also in the North-West Territory.

In closing I may be permitted to express my thanks to the staff of the Corporation, both at the head office and branches, for the zealous and efficient manner in which they performed their duties.

The report of the directors was adopted, as well as the report of the inspection committee as presented by Mr. W. H. Beatty.

Certain by-laws and amendments were confirmed.

Election of Directors.

The following shareholders were elected directors:—

John Hoskin, K.C., LL.D.; Hon. S. C. Wood, W. H. Beatty, Jno. L. Blaikie, W. R. Brock, J. W. Digby, M.D.; Hon. J. J. Foy, K.C., M.P.P.; T. J. Kenny, J. W. Langmuir, Thos. Long, W. D. Matthews, Hon. Peter McLaren, E. B. Osler, M.P., J. G. Scott, K.C., Wm. Hendrie, Aemilius Irving, K.C., Robt. Jaffray, B. E. Walker, D. R. Wilkie, Albert E. Gooderham, Frederic Wyld, Samuel Nordheimer.

At a subsequent meeting of the board of directors Dr. Hoskin was re-elected president and Hon. S. C. Wood and W. H. Beatty vice-presidents.

* * *

THE STANDARD TRUSTS COMPANY.

The third annual meeting of the shareholders of the Standard Trusts Company was held at the offices of the company, corner Portage Avenue and Fort Street, Winnipeg, on Thursday, the 15th day of February, 1906.

There were present:—Messrs. J. T. Gordon, P. C. McIntyre, John A. Girvin, W. R. Mulock, John B. Persse, N. Bawlf, Wm. Harvey, Hon. J. D. Cameron, Dr. Popham, John Arbuthnot, D. J. Dyson, W. R. L. Watt, A. Wright, W. E. Lugsdin, J. T. Robarts, R. D. Richardson, R. J. Shrimpton, Alan Ewart, T. W. Taylor, Prof. Hawley, Dr. S. C. Corbett.

The president, Mr. J. T. Gordon, took the chair. Mr. J. A. Little, the company's secretary, acted as secretary of the meeting. Messrs. R. J. Shrimpton and Alan Ewart acted as scrutineers.

The directors' report and financial statement showing the operations of the company for the year ended December 31st, 1905, was presented as follows:—

Report.

The directors beg to submit their third annual report and financial statement to the shareholders for the year ended 31st December, 1905.

The balance at credit of profit and loss account on 31st December, 1904, was		$ 687 73
The net profits for the year ended 31st December, 1905, after deducting cost of management, and writing off office furniture account were		15 316 15
		$16,003 83
From which have been declared two half-yearly dividends at the rate of 6 per cent per annum	$6,489 57	
Carried to reserve fund	8,500 00	
		14,989 57
Leaving balance of profit and loss account carried forward		$ 1,014 31
		$16,003 88

The directors desire to point out that after paying the dividend of 6 per cent., they have been able to place $8,500 to reserve fund, which is now $12,500, or nearly 10 per cent. of the capital called, and that the earning power of the company on average capital paid up for the twelve months was over 14½ per cent., which they deem very satisfactory.

J. T. Gordon,
President.

Wm. Harvey,
Managing Director.

FINANCIAL STATEMENT,
For the Year Ended December 31st, 1905.

Liabilities.

Capital Account—			
Capital stock, $500,000 subscribed, of which is paid up			$138,886 07
Reserve fund, at credit, December 31st, 1904	$4,000		
Transferred from profit and loss.	8,500		
		$12,500 00	
Dividend No. 3, payable Jan. 2nd, 1906		3,743 35	
Profit and loss account		1,014 31	
			$156,143 73
Trusts, estates, guaranteed and agency accounts			372,499 23
Trusts, estates and agencies—Unrealized assets of estates under administration			476,500 00
			$1,005,142 96

Assets.

Capital Account:—		
Mortgages on real estate		$156,143 73
Trusts, Estates, Guaranteed and Agency Accounts:—		
Mortgages on real estate	$352,306 44	
Cash in banks	20,192 79	
		$372,499 23

Trusts, Estates and Agencies:—		
Unrealized assets of estates under administration		476,500 00
		$1,005,142 96

Profit and Loss Account.

Balance, December 31st, 1904	$ 687 73	
Net profits for the year after deducting cost of management, directors' and auditors' fees, commissions, etc.	15,794 25	
		$16,481 98
Appropriated as follows:—		
Dividends, Nos. 2 and 3, at the rate of 6 per cent. per annum	6,489 57	
Office furniture account written off	478 10	
Transferred to reserve fund	8,500 00	
Balance carried forward	1,014 31	
		$16,481 98

Auditor's Certificate.

I beg to report that I have examined the accounts of the company to the 31st December, 1905, with the books, and in my opinion the above accounts are properly drawn so as to exhibit a true and correct view of the state of the company's affairs.

I have also examined the mortgages held by the company and found them to be in order.

R. J. Shrimpton, Auditor.

Winnipeg, January 31st, 1906.

The president, Mr. Gordon, in moving the adoption of the report, said:—

Gentlemen,—The statement submitted is, I think, fairly self-explanatory. The two previous reports published by the company were very modest in character and in neither of them did we show the unrealized assets of that portion of estates committed to our care for sale and general disposition and, to this extent, our statement shows a slight departure from those years; but it is a change for the better in that I feel our shareholders and the public, too, will be interested in learning what we are doing, to what extent we are developing, and how greatly we are enjoying the patronage and confidence of the public. Assets from all sources, therefore, turning the million mark for an institution a little more than two years old, indicate a reasonable healthy growth.

Our funds have been actively, carefully and profitably employed during the year. We have selected localities for our own investments known to your executive as safe fields to lend in. We have followed our established custom of lending on improved farms and never, at any time, a sum greater than half the appraised value of the security, which must always be highly cultivated, with the usual complement of buildings, fencing, water supply, etc., and always occupied by the borrower as his own home.

Nor have we confined our operations to Manitoba. The new Provinces of Saskatchewan and Alberta have afforded us splendid opportunities for investment, and that at satisfactory rates, evidenced as it is by an average rate over the whole of our mortgage investments of 8 per cent.

During last spring and summer your manager was busily engaged appointing fresh agencies in those new provinces, at least in those parts that had heretofore been inaccessible for lack of railway facilities. Considerable travel was involved in this. In driving alone 1,200 odd miles were covered, and on the railways not less than 6,000 miles more, and that through districts where, for the company's future requirements, it was advisable and desirable that your management should know something of the conditions of climate, soil, and the general development and adaptability of the settlements from the standpoint of investments. Many of the legal profession were called upon, and much profit and advantage resulted from those interviews.

The day is not far off, gentlemen, when we shall be compelled, on account of our large and developing areas, to establish, if not branches, at least important agencies at such points as Regina or Saskatoon as a representative centre for Saskatchewan, and at Calgary or Edmonton as another point for Alberta. From both provinces we have already been favored with estates for administration, and I must admit that to handle those with sufficient despatch and care, we must have capable representation at one or other of those points. This is a matter that your directors will probably deal with at an early date.

Outside of our lending operations we have the trust side of our business, which is really the important and principal function of the company. We feel that we have received our full share of business of this class, and as our relations with the legal profession at large are and always have been cordial and harmonious, there is no reason to doubt that this source of patronage will steadily increase. A great many estates have been committed to our care, some small, it is true, but a respectable number large and important in character, involving considerable care and responsibility on the company. With the administration fees earned from this source, and the satisfactory interest rates on capital and other moneys invested, we have earned, I am pleased to say, the respectable rate of 14½ per cent. on our paid-up stock, which, of the million authorized, we have had subscribed $500,000. A year ago when we considered our position as of the 31st December, 1904, we had but $200,000 subscribed, and your directors issued early in the year 1905, an additional $300,000 of stock. I felt that the company's success was amply assured, and when your manager personally interviewed the shareholders in turn, he found his task made very easy by the many kind allusions to the company, the confidence they reposed in it and the alacrity with which they took up the fresh issue of $300,000. We did not have to go to the public with our proposal, and the subscription of the second issue, like the first, did not cost the company one dollar of expense.

While your directors' aim has been to do the maximum of business on the minimum of capital, thereby enabling us to build up our reserve fund the more quickly, they are alive to the fact that as the business grows, more capital will be required and you may be asked not to pay up the uncalled 75 per cent. on your existing stock, but to subscribe to a further issue or issues until the total capital of $1,000,000, is reached; but this is not in immediate contemplation. It is a likelihood only, contingent upon our growth and progress. With about 10 per cent. of our paid-up capital already in reserve fund, it will be but natural to suppose that any new issue will command a premium.

Consequent upon the Northern Bank acquiring our old premises and the building in which we were, we, of necessity, had to move upstairs into our present quarters which are, however, more commodious. But, gentlemen, the move is but a temporary one, for at our present rate of growth, we shall outgrow them in a year or two, and the necessity for larger premises will confront us. By that time we may with more reasonable values than now prevail in the city get a suitable site on which to erect our own premises.

We have to record, with deep regret, the death of Mr. Thomas Gilroy early last year, and shortly after we held our second annual meeting. In him the company sustained a distinct loss, as at both the executive and general board meetings of the company, his sound judgment and conservative tendencies were always in evidence. His zeal for the company's welfare and his unfailing courtesy towards all of his fellow-directors were characteristics that endeared him to all. His place on the board has been filled by the appointment of Mr. O. A. Robertson, of St. Paul, Minn., a gentleman of high financial standing there as well as in the Canadian North-West, where he has many large and varied interests. The vacancy on the executive rendered by the same death was filled by the appointment of Mr. Nicholas Bawlf, of Winnipeg, who is too well and favorably known to you to be specially referred to. In securing the services of both those gentlemen, the company has cause for congratulation.

Your executive has met regularly every fortnight throughout the past year, and the quarterly meetings of your full board have also been regularly held. All have been well attended, and considerable enthusiasm and interest manifested.

Before I close my remarks I want each and all of our shareholders, those present as well as those absent, not only to actively interest themselves in the company, but to see that their friends do so also. A great deal can be accomplished by such co-operation; and while simply wonders have been done already, I think it but right that a share of the burden in making the Standard Trusts Company a signal success (as in reality it is now), should be borne by yourselves as shareholders as well as by your manager and his board of directors. We purpose standing behind Mr. Harvey and giving him, as a board, all the assistance that lies in our power, and I feel that I have but to make this reference to obtain from you similar active co-operation.

It affords me, gentlemen, much pleasure in moving the adoption of the report.

Mr. Wm. Harvey, the second vice-president and managing director, in seconding the adoption of the report, said:

Mr. Chairman and Gentlemen:—In the absence of Mr. Wm. Whyte, our first vice-president, the duty devolves upon me of seconding the motion adopting the third annual report.

For the good fortune that has attended us so far, I must attribute that to the exceedingly loyal and enthusiastic support lent to the young institution by your president and vice-president respectively, your executive and the rank and file of your directors, and of the latter, I would be lacking in gratitude if I did not specially refer to Mr. W. R. Mulock, our counsel, whose infant the Standard Trusts Company really is. He conceived it, nursed it, and to-day he loves it and fondles it as only an affectionate parent can. He has been ever ready to assist and advise, and we are much indebted to him for his disinterested co-operation. Besides those gentlemen, I would also like to acknowledge the valuable aid rendered me by your treasurer, Mr. W. E. Lugsdin, and your secretary, Mr. J. A. Little. Both those gentlemen have worked early and late in the company's interest, and it affords me much pleasure to testify to their value and worth to the company, apart altogether from their amiable personal qualities.

With so much zeal within our walls, and an equal amount without amongst you, my fellow shareholders, can there be any question about the brightness of the company's future?

A word now regarding the Trust Company Idea, which I always like to discuss. Would it surprise any one in this room to know that in the United States, where the Trust Idea found first an abiding place, there are to-day some 1,600 companies in active operation all fulfilling well their functions and doing good work for the different estates committed to their care. There is, too, no class of stock that intrinsically is worth more or that yields better returns to the investor. I am indebted to "Trusts Magazine" for the following figures:—

"In each of eight States there are companies showing upwards of $100,000,000 of resources.

"In New York City alone there are seventy-eight companies showing resources together of $1,510,000,000.

"In October, 1870, the resources of 1,615 national banks did not show those of the seventy-eight trust companies to-day in New York.

"To-day there are 5,757 national banks, with no less than $7,342,000,000 of total resources, but it is interesting to note that this sum is only about twice the amount of some 1,115 trust companies having at present nearly $4,000,000,000 of resources.

"The average resources of the national banks are a shade under $1,300,000, while the average trust company is in excess of $3,400,000.

"By way of further contrast the total assets of life companies in the United States at the beginning of last year were less than American trust companies; of savings banks, 1,157 had $3,175,000,000, or $600,000,000 less than the trust companies.

"Commercial values of steam railways in the States, $11,250,000,000, or a sum only three times the total resources of the trust companies.

"One illustration more: The comptroller of the currency estimated last year that the banking power of the world, i.e., bank liabilities, excepting balances due other banks consisted of:—

Banking power of U.S. and Island possessions	$13,826,000,000
Banking power of foreign countries	19,781,000,000
Total estimated throughout the world of	$33,607,000,000

"The United States trusts companies with their resources of $3,750,000,000 offer as their contribution to the vast total of banking power, a volume of credits equal to one-tenth of the aggregate banking power of the world over."

In Canada we have, relatively speaking, not started to grow yet, but our dozen or more trust companies are serving the public well, and if their assets are to-day incomparable to those of our giant companies south of the 49th parallel, I am one of those who believe that the twentieth century has wonderful things in store for that part of the North American Continent that flies the Union Jack, and more particularly for the prairie section of it in which it is our good fortune to be operating to-day.

With the steady co-operation of our stockholders and their friends, asked and invited by our chairman in his remarks to-day, there should be a steady accretion of business for the company in the future.

I have much pleasure in seconding the motion that the report be adopted.

Mr. W. Redford Mulock, K.C., the company's counsel, returned thanks for the kindly reference made to him by the manager, and in commenting upon the report emphasized the general satisfaction experienced from a legal standpoint by the placing of estates in the hands of a trust company, as compared with a private executor or administrator. The results experienced through the agency of a trust company were in all cases highly satisfactory to all concerned.

He also commented upon the large number and high class of wills drawn, nominating the Standard Trusts Company as trustee and executor. Of these he had himself drawn a number which together with those coming from other sources assured the company many valuable estates to manage in the future.

After further remarks from Messrs. Richardson, McIntyre, Persse and Watt, all of a congratulatory character, the report was unanimously adopted.

Mr. R. J. Shrimpton was appointed auditor for the company for the ensuing year.

The following gentlemen were re-elected directors for the ensuing year:—J. T. Gordon, M.P.P.; Wm. Whyte, Wm. Harvey, B.L.; M Bull, John Arbuthnot, John A. Girvin, R. J. Blanchard, M.D.; Arthur M. Fraser, O. A. Robertson, John B. Persse, Chas. C. Castle, P. C. McIntyre, G. F. Stephens, William Georgeson, N. Bawlf, E. S. Popham, M.D.; Kenneth MacKenzie, W. Redford Mulock, K.C.

At a subsequent meeting of the directors, Mr. J. T. Gordon was re-elected president; Mr. Wm. Whyte, first vice-president; Mr. Wm. Harvey, second vice-president and managing director; Mr. W. E. Lugsdin, treasurer, and Mr. J. A. Little, secretary.

The executive committee was re-elected, Mr. Wm. Whyte being appointed chairman.

* * *

SPECIAL MEETING OF SHAREHOLDERS OF THE SOVEREIGN BANK OF CANADA.

Proceedings of special meeting of shareholders of The Sovereign Bank of Canada, held at the head office of the bank, 28 King Street West, Toronto, the first day of March, nineteen hundred and six.

Sixty-five shareholders were present:—

The chair was taken at 12 o'clock, noon, by the president, Mr. Randolph Macdonald.

Mr. L. P. Snyder was appointed secretary of the meeting.

The secretary then read the notice calling the meeting.

The president then addressed the meeting as follows:—

Gentlemen,—The notice which has just been read explains the purpose of this meeting.

The ordinary growth of the bank's business would have necessitated an increase in our capital at the present time, and while this was being contemplated, we received a proposal from a great bank in Europe to invest a substantial amount in the capital stock of The Sovereign Bank. The investment was to be made, by, and on behalf, of the bank itself and some of the most powerful financial interests in the world, and without going into details of subsequent negotiations, I may say that the arrangement was concluded beween the officers of both institutions, whereby a block of our stock was sold, as you have already been advised, and now only awaits ratification by the shareholders. The institution in question is the Dresdner Bank, of Berlin, Germany, one of the largest chartered banks on the Continent, and I feel that the shareholders of our own bank are to be congratulated upon an alliance of this kind with such strong and powerful interests.

As you are aware, the whole of the new capital will not be issued to the Dresdner Bank and its associates, it being our intention to allot new shares to the present shareholders, in the proportion of one in two of their holdings at date of allotment. It must; however, be a source of gratification to all who are interested in the material welfare of the Dominion that European money is being attracted to our shores. As citizens of Canada we welcome the advent of outside capital. It is our duty to see that such money is handled to the advantage of those who intrust it to us. I believe that when rightly directed, no country in the world affords greater opportunities for sound and profitable investment than the Dominion of Canada.

I must tell you that we are indebted for the attractive arrangement submitted to you to-day to the indefatigable efforts of our second vice-president and general manager, whom I will now ask to address you. Before Mr. Stewart speaks I now move, seconded by the first vice-president, Mr. Allan, that the following by-law be enacted:—

"Whereas, the capital stock of The Sovereign Bank of Canada is now two million dollars ($2,000,000), and it is expedient that this capital should be increased to four million dollars ($4,000,000);

"Be it therefore enacted, and it is hereby enacted:

"That the capital stock of The Sovereign Bank of Canada be and is hereby increased by the sum of two million dollars ($2,000,000), to wit: from the sum of two million dollars ($2,000,000) to the sum of four million dollars ($4,000,000); and that the directors of the said bank be and they are hereby authorized and empowered to apply to the treasury board for the issue of its certificate approving such increase of the capital stock of the said bank, as required by Section 26 of the Bank Act."

First vice-president, Mr. Allan.—I have much pleasure in seconding the resolution.

The chairman then called upon Mr. D. M. Stewart, second vice-president and general manager, who spoke as follows:—

This is the fourth time it has been my privilege to address the shareholders of The Sovereign Bank of Canada, and it has been my good fortune to have appeared before you on every occasion with a satisfactory statement and good news. The present instance is no exception, but it is the most auspicious and important one in which I have addressed you.

It was only a few days after our bank opened for business in Toronto in 1902, that Mr. Ellert, the London manager of the Dresdner Bank, called upon me in this very office. From that day to this, we have had business relations with his institution and these have increased in importance from time to time and have been uniformly satisfactory. The Dresdner Bank is one of the most progressive and powerful institutions on the Continent of Europe, and has large dealings with both Canada and the United States. It has a paid-up capital and surplus of over £10,000,000 sterling and assets of some $225,000,000, and I consider it a great compliment to have such a splendid institution associated with the Sovereign Bank. I need scarcely say that the Dresdner Bank did not make this investment haphazard or without careful investigation into the affairs of this bank. A representative of theirs came to Canada, and between him and some friends of theirs on this side, looked carefully into the situation, after first of all having decided that Canada afforded excellent prospects for the legitimate investment of capital. These gentlemen are all impressed with the immediate future of this country, and they wished to be associated with its development through some institution which might be expected to keep in touch with the progress of the Dominion.

You have doubtless heard, as I have heard, a great deal of nonsense about this being simply a move to obtain control of The Sovereign Bank, and I wish to assure you in the most positive manner that our friends have no such desire. In fact, they do not even ask for representation on the board, although, in justice to ourselves, I have urged this very strongly upon them. There are no sinister or ulterior motives behind this investment beyond what I have mentioned. The management of the Dresdner Bank and the management of The Sovereign Bank feel that the association in this way will be advantageous to both institutions.

Other statements, which have reached you, no doubt, are to the effect that this bank will have difficulty in employing the whole of the new capital. It is reasonable to suppose that your directors and myself know more about this bank's business than any outsiders, and I take this opportunity to inform you that we will be able to employ every dollar of it to your advantage.

When the new shares have been paid for in full, The Sovereign Bank will have a capital of $4,000,000 and a reserve fund of not less than $1,250,000 without taking into consideration additions made to the reserve fund out of profits. This will mean that the security which we can offer to the public who do business with us will amount to over $9,000,000, in the form of shareholders' liability alone, and a total security of not less than $20,000,000.

We have enjoyed the confidence of the public to a marked degree, and this increased security will undoubtedly lead to a still larger increase in our deposits. Probably very few shareholders really know what a splendid connection this bank has in Canada. If they did, they would realize how comparatively easy it is for the bank to invest with safety the steadily growing deposits and increased capital.

It would not be proper for me to conclude without expressing my heartfelt appreciation of the confidence which you and the shareholders of the bank generally have shown in the directors and myself by the magnificent response to our request that you relinquish your rights to the amount of stock necessary to deliver to the Dresdner Bank. We have actually received the written relinquishments of 968 shareholders out of over 1,000 which is as nearly unanimous as we could have expected. This is one of the best evidences of your confidence and one which we all appreciate very highly. It is a pleasure to work for shareholders who express their feelings towards the management in this way, and I look forward with confidence to appearing before you again at the fourth annual meeting in about three months from now, when I hope to have at least as satisfactory a statement to place before you as I had at the last annual meeting. The directors and myself, as well as the senior officers of the bank, all feel that, although the bank has had phenomenal success up to the present, a new era has now dawned for us by which the scope and earning power of our business will be materially enhanced, not only with advantage to our own shareholders, but to the people of Canada in those sections of the country to whom it is our privilege to administer.

The resolution was then put to the meeting and carried unanimously:—

Several shareholders addressed the meeting complimenting the management and expressing confidence in the future of the bank.

A. E. Dyment, M. P., spoke in part as follows:

I think this is one of the most important events in the financial history of Canada, and as a shareholder in The Sovereign Bank, I give the proposal my hearty support.

The bank has been successful from the outset owing to its able and efficient management, and I feel that this action of theirs in getting in touch with a large European bank and bringing in so much additional capital is one of the best strokes they have yet made for the bank and its shareholders.

As a public man, I admire the enterprise of The Sovereign Bank in making known to the world that Canada offers such inducements, as all we who live here know it does, for investment. The introduction of outside capital is one of the most important features in the development of the country, and I feel sure that the present action presages the investment of many more millions of dollars in Canada, and I have no doubt that as The Sovereign Bank has initiated the movement it will be the means through which large sums of money will be distributed throughout the Dominion for many years to come.

The Honorable E. J. Davis, former Commissioner of Crown Lands of the Province of Ontario, said in part:

I am very glad to be here and to give my hearty approval of the proposition submitted to the shareholders. Under its able management, The Sovereign Bank has proved to be one of the most successful institutions ever established in this country. The advent of The Sovereign Bank was a good thing, not only for all of us as shareholders, but for the business people and the small depositors all over Canada. It established several new and beneficial features in banking with advantage to itself and to the country, and this latest move of bringing in capital from Europe is something that must commend itself to every citizen who has the country's interest at heart.

Mr. G. C. Martin spoke as follows:

I am only a small shareholder, but I am one of those who came here as a "kicker." I believe in speaking out my mind, and what I have heard here to-day has convinced me that although I objected at first, this increase in capital and sale of stock is in the interests of all the shareholders, and I am, therefore, prepared to support the resolution. When I first objected the general manager wrote me very fully, and although I am but a small shareholder, he treated me in the most courteous manner. Some of the older banks consider people like me as "small fry" and pay no attention to us, but Mr. Stewart has been uniformly courteous and obliging in supplying information. I thought that if the bank wanted more capital, the existing shareholders should be given the opportunity of supplying it, but after getting Mr. Stewart's letter, and after the explanations made here to-day I quite see that the sale of stock to outsiders is the best thing that could be done.

Mr. Stewart, the general manager, spoke as follows:—

In reply to Mr. Martin I wish to thank him for his free and frank remarks. We are not infallible and we welcome the criticism and advice of our shareholders.

Please let me make it clear to everyone here, and to all who are interested in The Sovereign Bank, that it makes no difference to us whether a shoreholder holds one share or one thousand shares so far as our treatment of him, and the protection of his interests are concerned. In fact, it has always been our policy to consider the small shareholders, and it was in their interests that we did not issue more than $812,500 of stock to the existing shareholders at the present time. This amount is all they could have conveniently absorbed, and what they relinquish would have been taken up by the larger and wealthier shareholders without particular advantage to the bank generally.

Mr. Martin refers to the courtesy he has received as something unusual but we only regard it as his right. You must all understand that we are simply the paid servants of the shareholders, and that it is our duty to furnish you with information, and there is really nothing, short of our customers' accounts—which we regard as absolutely sacred—that a shareholder cannot ascertain if he applies for it. I appreciate Mr. Martin's remarks, and if there are any other "kickers" here I only hope that they will speak as frankly as he has done, and that after administering the kick they will leave the same kind of a mark that he has done.

Mr. J. A. Halstead spoke as follows:

I must admit that I had my doubts about this matter when I received the first circular, but upon thinking it over, I saw that the only way for the bank to keep pace with the growing business of the country was to increase the capital. Like some others, I am a Liberal in politics, but a Conservative in business, but I am glad to see the bank progressing along the lines it has done, and I am sure there is a splendid future for it.

Mr. Stewart said:

If there are any questions to be asked I shall be only too happy to answer them as far as I am able.

Speaking of politics, I may say that we have no "entangling alliances," but like the Irishman who was about to depart from this world, and on being urged to give some of his money to the Church, because if he failed to do so, he would promptly proceed to the Nether Regions, replied to the Priest, "Sure Father, I have friends in both places." We have friends amongst both parties, and it is immaterial to us whether a man is a Liberal or a Conservative, a Presbyterian or a Roman Catholic, provided he is a good business man and his account is safe.

The motion was then put and carried unanimously.

* * *

—The Hall Elevator and Grain Company, who recently erected a grain elevator with a capacity of 100,000 bushels in Vancouver, propose now to establish a flour mill with a capacity of 500 barrels in the twenty-four hours. They are asking for exemption from taxation for twenty years on plant and machinery, and for free water.

Mercantile Summary.

The town of Carberry is submitting a by-law to its ratepayers for the voting of $15,000 for the installation of a municipal electric lighting plant.

A large building on the corner of Paul and St. Peter Streets in Quebec has, we hear, been purchased by the Canadian Pacific Railway, presumably for the purpose of forming offices.

A dispatch from Montreal states that the Canadian Pacific Railway have decided to rebuild the bridge over the Ottawa River at Ste. Anne's, and to lay double tracks as far as Vaudreuil.

The Ben Allen Portland Cement Co., Owen Sound, has been incorporated with an authorized capital of $500,000. Charles Payton, of Owen Sound, is one of the provisional directors.

The Atikokan Iron Co., of Port Arthur, is installing two 75 kilowatt direct connected units, consisting of Robb-Armstrong engines and Westinghouse generators.

The Lillooet Lumber Company, Limited, Vancouver, has received a Dominion charter. It will carry on all branches of the lumber business, and will manufacture and deal in logs and wooden products.

The Foster Cobalt Mining Company, whose authorized capital stock will be $1,000,000, has been granted a charter by the Ontario Government. C. W. Kerr and C. S. MacInnes, of Toronto, are provisional directors.

The Grand Trunk Pacific Railway has purchased 14,000 acres of land more in the vicinity of the proposed terminus at Kaien Island, the deal being made with the Indians at the rate of $7.50 per acre.

Mr. R. S. Williams, of Toronto, the well-known manufacturer of musical instruments, died on Saturday of paralysis. He had been in failing health for some months, but was actually ill only a few days. He was born in London, England, in 1834.

Consent to assign has been fyled by P. J. A. Collins, scale manufacturer, of Montreal, doing business at the P. Collins Scale Co. His father had originally established the business as far back as 1858, he succeeding to it in 1901. He has done only a small trade and is reported to owe $3,550.

The Standard Envelope Company, Ltd., has been granted a charter by the Ontario Government, authorizing it to manufacture and sell envelopes, bill-heads, paper and stationery, photo mailers, news wrappers, etc. The share capital of the company is placed at $100,000.

The Novi Modi Ladies' Costume Wardrobe, the J. H. Superior Phonographic & Music Company's store, and several smaller business establishments near the corner of Windsor and St. Catherine Streets in Montreal were badly gutted by fire on Tuesday last.

CORPORATION LIMITED
26 KING ST EAST TORONTO.

Mercantile Summary.

We note the assignment of X. Bilodeau, operating as a general merchant and lumber dealer, at Baillargeon, near Levis, Que. He is said to owe close on to $9,500. He failed before in 1895, and has since made use of his wife's name as a cover.

The municipal light and power plant at Westmount, (Montreal) is now practically completed and is to be in full operation by June 1st. The electric lighting rate for residences will be 15c per kilowatt hour, with a discount of 33 1-3 per cent. for cash within ten days.

The large saw and shingle mills and timber limits at Thessalon, Ont., owned by N. and A. Dyment, have been taken over by a syndicate of American capitalists headed by F. P. and Geo. Nester, of Duluth, and W. Bishop, of Chicago. The purchase price is understood to have been $650,000.

The Canadian Ramapo Iron Works, Limited, Niagara Falls, Ont., in which Adam B. and R. O. MacKay, of Hamilton, are interested, has a charter to manufacture, operate, etc., switches, frogs and other apparatus for use in connection with railroads. The capital is $300,000.

Some time ago the secretary of the Board of Trade at Davidson, Sask., inserted an advertisement in the "Free Press" that there was an opening for an enterprising man to start a bakery in that town. The advertisement had the desired effect, and a baker has since located there.—Winnipeg "Free Press."

We see by a Montreal paper that Henry Morgan & Company have acquired the business of the Dominion Motor Co., Limited, and will open, they say, the largest automobile establishment in the Dominion, under the auspices of Mr. F. B. Stockwell, the former managing director of the former company. They will also cater to the motor boat business.

The General Development Corporation of Canada, Ltd., Montreal, is the name of a company in which several Old Countrymen are interested, including Lord Templetown and W. G. P. Morden, of London, which has just received authority from Ottawa to carry on a general construction and development business, conduct electric lighting operations, lease lands and carry on many other functions.

The Vancouver, Fraser Valley & Southern Railway Company propose to build and operate an electric railway line from Vancouver to New Westminster, and to the boundary line somewhere near Blaine, with the probability of ultimately connecting Vancouver with Portland by way of Seattle. The company is also seeking powers to build and operate branch lines up the Fraser Valley to Chilliwack and down to the Delta, and to build such other branches as may be deemed advisable.

The Toronto General Trusts Corporation

Mercantile Summary.

The Moffat Fuel Saver, Limited, Ottawa, capital stock $1,000,000, has been granted a charter by the Dominion Government. It will manufacture and deal in all kinds of appliances for the purpose of smoke consuming and fuel saving, and will act as manufacturers and merchants in all kinds of things composed wholly or in part of iron, steel, wood or other material. Newton J. Kerr and E. Seybold, of Ottawa, are interested.

The assignment is noted of J. Dominique Miller, for the past five years doing a general store business at Nominingue, in the Laurentides Mountains, north of Montreal. He owes $7,233, and is trying to put through a compromise at the rate of 40 per cent.—J. O. Leduc, a smaller general dealer at St. Emile de Suffolk, in the same section, is also reported to be seeking compromise indulgence.

A. H. McDowell, who has been doing a thread commission business in Montreal for several years, and who recently endeavored to obtain bonuses from several country municipalities for a proposed company to operate a spooling factory, has become involved. He has proposed that creditors shall accept 20 per cent. of their claims amounting to about $5,500, and it is doubtful if they could realize this much under liquidation.

Several Canadian and American capitalists, including J. T. Marchand, of Montreal, and J. C. Heintz, of New York, are applying to the Dominion Government for incorporation under the name of the North Eastern Railway Co., with a proposed capital of $1,000,000. Their proposal is to construct lines from Lake Temiskaming to a point at or near Quebec City, and to a point on the Grand Trunk Pacific near Lake Abittibi, from somewhere near Lake Kakebonga, to Maniwaki in the county of Ottawa, from the Gatineau river to Nominingue, county of Terrebonne. In addition to the above the company proposes further to construct branch lines from any point or points along its main line or extensions.

For many years, Harvey Goodwin, of Pubnico, N. S., followed the sea, as the captain of a fishing schooner. In 1899 he thought he would try and secure a snug berth by means of a moderate general store trade, but his venture has not proved a success, and he is reported to be asking his creditors to accept 50 per cent. on their claims.—A. J. Doucet, of Glace Bay, in the same Province, was formerly a telegraph operator in his native town, and then went to Boston for a time, where he worked on the elevated road, but returned to Glace Bay two years ago, and opened a small grocery. He has now assigned, owing about $1,200.—John Gregor, carrying on in a confectionery way at Old Bridgeport, N. S., has assigned.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Mercantile Summary

F. X. Hudon, doing a general store business at Ste. Angele de Rimouski, on the lower St. Lawrence, Que., under the style of P. Hudon & Co., has placed his affairs in the hands of V. E. Paradis, assignee, at Quebec. Hudon has had a somewhat unfavorable business record, having previously failed, it is reported, in his own name, as well as when doing business under cover. Latterly his brother, P. Hudon, a farmer, has been registered as the legal proprietor.

A bill to incorporate the Southern Electric Company, the incorporators of which were Hon. Robt. Mackay, John E. Aldred, Howard Murray, Julien C. Smith, all of Montreal, and Thos. McDougall, of Quebec, was thrown out by the Private Bills Committee at Ottawa. It gave the company power to acquire and dispose of in any manner whatsoever, light, heat and power in the counties of Nicolet, Yamaska, Arthabaska, Drummond, St. Hyacinthe, Bagot, Megantic, Wolfe, Beauce, Richmond and Sherbrooke.

The Quebec Central Railway proposes to connect its existing lines with that of the Temiscouata Railway, and asks the Quebec Legislature for power to construct a Quebec Central Chaudiere extension by diverting and rebuilding that portion of the present line from Beauce Junction to Beauceville, and building a line from Beauceville to the River Famine, and thence following the water shed of the River St. John through the southern parts of Beauce, Dorchester, Montmagny, L'Islet and Temiscouata counties to near Cabano Station; in all, 175 miles.

Mr. J. S. Larke, the Canadian trade agent in Sydney, New South Wales, announces in a recent report that the Commonwealth Government has ratified the agreement with the Eastern Extension Telegraph Company with the understanding that it is to expire in 1915. Two wireless telegraph companies are proposing to open stations and conduct business in Australia, one between Tasmania and Australia, and the other between Australia and New Zealand. The former would improve the revenue of the Pacific Cable, but the latter might affect the amount of business done over the same cable between Australia and New Zealand.

Plans are now said to be complete for the reconstruction work and additions to the Windsor Hotel, which recently suffered so badly from fire in Montreal. The hotel will be extended on Peel St., up to the corner of Cypress St., and the ground floor of this section will be occupied by a ladies' café, 75 feet by 50 feet, accommodating two hundred and fifty people. A dining room, capable of accommodating five hundred people, will also be provided. The present large dining room will be used for concerts, and instead of there being a dome over it, a hundred bedrooms will be built above. The present entrance on Peel St. is to be greatly improved.

OUR TRUCKS are fitted with rubber tires that do not come off. . . . .

Debentures for Sale.

Tenders will be received by the undersigned up to March 15th, 1906, for the purchase at not less than par, of $88,000.00 Town of Strathcona Waterworks debentures, bearing interest at 4½ per cent, payable in fifty annual instalments, as follows:—

First five instalments of interest only, $3,960.00 each; remaining forty-five instalments of principal and interest, $4,593.80 each.

First instalment due Dec. 1st, 1906.
Last instalment due Dec. 1st, 1955.

GEO. F. DOWNES.
Sec. Treas.
Strathcona, Alberta.

FERNIE, B.C.
DEBENTURES.

Tenders will be received by the undersigned up to Thursday, March 8th, 1906, for the purchase of $45,000.00 Debentures of the City of Fernie. These debentures will bear interest at the rate of five (5) per cent. per annum payable yearly. Principal will be repayable as follows: $40,000,00 Sewer Debentures at the expiration of 30 years. $5,000.00 Fire Equipment Debentures at the expiration of 10 years. The highest or any tender not necessarily accepted. Tenders will be received for the whole or any part of either issues.

For further particulars address,

JOHN W. NUNN,
City Clerk,
Fernie, B.C.

Fernie, B.C., December 22nd, 1905.

The Chatham and Wallaceburg Electric Railway authorities propose to extend their line to Petrolea.

The Canadian Rubber Company, of Montreal, has declared a dividend of 5 per cent., payable on the 5th inst.

Wall Street Methodist Church, in Brockville, was damaged last week by fire to the extent of $10,000. It was covered by insurance.

Mr. W. S. Dunnell, of Duluth, Minn., who has established a tannery and belting factory at New Westminster, B.C., proposes to erect a boot and shoe factory in connection with the same.

T. Hill & Son's general merchandise store at Russell, Man., has been destroyed by fire at a loss of $15,000, covered by insurance. The building, owned by Dr. T. A. Wright, cost in addition $5,000. About half insured.

What will doubtless prove a welcome present to the victims of the rice famine in the north of Japan has been determined upon by the Canadian Government. It consists of $25,000 worth of Manitoba wheat, ground into flour on the Pacific coast. It is being put up in 20,000 bags of forty-nine pounds each, and the first shipment will leave on 5th March.

It is understood that the Grand Trunk Railway intends to run its trains through London on elevated trestle work, so as to do away with level crossings. It is said to expect to spend $1,000,000 in this work and in providing for a new station and a new steel bridge over the Thames.

The will of the late E. B. Eddy, of Hull, Que., which was probated last week, makes provision for the carrying on of the present business for ten years. The widow continues to be a member of the company, and all real estate, household effects, etc., are to become her property. At the expiration of two years the widow comes in for an income of $6,000 annually and takes five-eighths of the entire estate. Several bequests are made to charitable institutions.

Contracts for the construction of the section of the Grand Trunk Pacific between Touchwood Hills and Edmonton, 457 miles, have been awarded in two parts, the first part, 140 miles, from Touchwood Hills to Saskatoon, going to the Canadian White Company, Montreal, and the second part, 317 miles, from Saskatoon to Edmonton, going to Foley Bros., Larson & Co, St. Paul. This work, together with work now in hand between Fort William and Lake Superior Junction, and Portage la Prairie and Touchwood Hills, makes a total of 942 miles under contract.

* * *

TORONTO MARKETS.

Toronto, March 1st, 1906.

Drugs and Chemicals.—Wholesale druggists report moderate sales at steady prices. The volume of business keeps fully up compared with previous years, but there is little of a startling character to comment on, either in the way of price changes or in general features of the trade. Staple lines are rather on the dull side.

Dry Goods.—More seasonable weather has given the required fillip to trade amongst the retailers, and sorting orders have been coming into wholesalers' hands at more frequent intervals as a consequence. While it is true that in some cases, stocks still unsold, especially in the heavier character of winter goods, are rather larger than is entirely desirable, yet this is not by any means so palpably the case as was feared a month or two ago. At any rate the mild weather has had no tangible influence over prices, but these being based so largely on world-wide conditions, such a result was scarcely possible. In many lines prices are even stronger now than they were a month ago. The spring trade is opening up well, and the prospects are believed to be very good for the whole season.

Flour and Grain.—There has been a decline in wheat on the Chicago market, but so far values seem to be keeping up fairly well. There is a good demand for export purposes. Flour is not appreciably altered from last week, ninety per cent. patents being quoted around $3.10. Bran and shorts continue firm. Oatmeal is dull at easy prices. Other grains present little of a new character.

Fruits and Vegetables.—The vegetable most in evidence is celery from California, which sells at good figures. Oranges are normally plentiful and values are steady. A few southern strawberries have been on the market spasmodically for some time past. Apples are scarce and prices are high.

Groceries.—A firmer tone prevails in the sugar market, though the movement is not appreciably brisker than it has been. Canned goods are particularly firm, and tomatoes have been advanced another 5c., making them now $1 to $1.05 per case. Further advances in vegetables are not entirely unexpected. On the whole, trade in general groceries is of a fairly satisfactory character.

Hides and Leather.—There has been a sharp decline in hides since our prices-current went to press. For steers, No. 1, 9½c.; No. 2, 8½c.; inspected cows, 10½ and 9½c.; country hides, flat, 7½ to 8c. are the quotations. Sheepskins retain their firmness at last week's prices. The trading in leather is rather on the quiet side just now, but prices retain a fair degree of strength.

Live Stock.—At both the city and Junction yards this week there has been a very good demand for cattle, the offerings being on the light side. Quotations remain practically as before, though greater firmness is discernible. Everything in the export line was quickly bought up at satisfactory prices. Not many really fancy stock were on the market. In butchers' animals, too, the receipts were scarcely sufficient to meet current requirements. A better demand has developed for stockers and feeders, and the few shown sold quickly at good values. Sheep were in good demand, but lambs were dull, and fell off slightly in prices.

Provisions.—Choice butter this week is rather scarce, but ordinary is in plentiful supply. Cheese is quite steady. Eggs are firmer in keeping with the colder weather and the good demand. Not much is doing in poultry.

The Record for 1905

of the Great-West Life affords striking proof of the constantly increasing value of Great-West Insurance.

During the year over Six Millions of new business has been placed, giving a total business in force of over $24,000,000.

The Surplus to policyholders amounts to $612,213.45; the Reserve stands at $2,467,842.16; and the funds, all invested in the West, earned over 7% on the total ledger assets.

Again the Directors are able to state that since the inception of the Company, not one dollar has ever been lost on investments.

MONTREAL MARKETS.

Montreal, 28th Feb., 1906.

Ashes.—The market is easy at $5.15 to $5.20 for first pots; second pots, $4.60 to $4.70; pearls, about $7. There is only from thirty to forty barrels in store, but the demand is very slack.

Dairy Products.—Some English enquiry has recently developed for cheese, with an advance in the cable quotations, and holders of prime stock are firmer in their ideas, some of them asking 13½c. For butter there is a comparatively light demand, and 22c. appears to be the top figure for choicest creamery, with prices ranging down to 19 to 19½c. per lb. for dairy makes.

Dry Goods.—Quite a fair number of buyers have been in town this week from points as far west as Windsor, Ont., and as far east as Sydney, N.S. They are reported as making purchases of very fair extent, but they all say they are carrying over a considerable proportion of winter stock. The millinery openings on Monday, Tuesday and Wednesday next are also expected to bring into the city a good number of buyers. Deliveries of spring goods are active, but importers tell of great difficulty in getting needed supplies of English prints and French dress goods. Following the example of the Canadian Colored Cotton Co., noted last week, the Dominion Textile Co. has also advised a general advance in all lines of cotton blankets, rugs, etc., of 10 per cent.

Groceries.—Local jobbing quotations for molasses are again easier at 30c. per gallon for single puncheons, and it is reported there have been some offerings of new Barbados, brought in via Halifax, at 27½c. in quantity. Sugars are barely steady at $3.95 for granulated, in bags, and $4 in barrels, with yellows ranging down to $3.55. The great firmness in canned goods noted last week is fully sustained, with anticipations of further stiffening in tomatoes, corn and tinned apples. Primary markets for all kinds of dried fruits and nuts are reported strong.

Hides.—Beef hides now offering are reported as being pretty grubby in quality, and it is claimed 10½c. per lb. is now the general price for No. 1, only odd lots realizing 11c. Some few odd new lambskins have been received, for which the price is 10c. Calfskins are quoted at 12c. per lb. for No. 1, and 10c. for No. 2. No great volume of business is passing.

Metals and Hardware.—The movement in these lines is well sustained. Summerlee No. 1 pig iron is quoted at $21.50 for delivery on opening of navigation, but $25 is exacted for present delivery from store in ordinary lots; Londonderry and other domestic brands cost about $21. Bars are steady at $2.05; cut nails, $2.10, and wire nails, $2.15; boiler plate, $2.40, and iron is steady at last quotation. American manufacturers of sheets are quoting somewhat lower figures than British makers, and are reported to have recently secured some good orders for tinplates and galvanized Canadas. Local jobbing prices for the latter are $4.10 for fifty-twos, and $4.35 for sixties; black sheets, $2.40 for 28-gauge; ternes, $6.85; galvanized sheets, $4.10 to $4.35, according to width; tinplates, $4 for cokes, and $4.25 for charcoals. Tin, lead and copper remain at last week's figures.

Oils and Paints.—As expected last week, turpentine has taken quite a strong upward turn, and is now quoted at 98c. per gallon, in single barrels. Linseed oil is barely steady at 55 to 56c. per gallon for raw, and 58 to 59c. for boiled; castor oil, 8 to 9c. per lb., according to quality. Fish oils are but little asked for. White lead is very firm at $6 for pure; putty, $1.40 in bulk. Window glass is unchanged at $4 per 100 feet for first break.

Mercantile Summary.

It is announced that the railroad between Victoria and Sydney, B.C., and the ferry system connecting the latter with Port Guichon will shortly become the property of the Great Northern system.

The business carried on by Prowse Bros. & Crowell in Sydney, C.B., has been made into a joint stock company, "Crowells, Limited," with a capital of $100,000. Besides Sydney men, a number of Halifax and Montreal capitalists are interested.

At the annual meeting of the shareholders of Frothingham & Workman, Limited, held in the office of the company in Montreal the following directors were re-elected: Messrs. Ed. Archbald, president; C. D. Monk, W. G. LeMesurier; E. C. Eaton, manager, and G. C. Davis, secretary-treasurer.

A NEW ASPECT OF THE BANK OF ENGLAND.

In the London "Financial Times" of recent date there is a semi-humorous article by Mr. W. R. Lawson on some peculiarities of that venerable institution, the Bank of England, and its varying relationships with other financial concerns. He pictures the legendary Bank of England which enthusiasts are so prone to prate over as the hub of the world's money market, and again he portrays the everyday Bank of England with worries and perplexities like the rest of us. The theory held is that the Old Lady of Threadneedle Street can do no wrong, but new elements in Lombard Street, domestic and foreign, are breaking down old-fashioned ideas, and now in practice she suffers quite a lot of criticism. This change of ideas affects the fundamental relations of the Bank with the outside money market—an institution even more important than the Bank itself. "At the head of it are the great joint stock banks, which in some respects continue to be rivals of the Bank of England. Behind them is a phalanx of private banks, discount companies and merchant bankers. Standing apart, but also to be seriously reckoned with, is the steadily strengthening group of foreign and colonial banks. The flanks of these competing forces are surrounded by flying columns of bill brokers, exchange brokers and financiers at large In the ideal Money Market of the world à la Schuster, these British and foreign banks, discount houses and bill brokers all work together like international cherubs, and the Bank of England guides them. When anything gets loose, touch a button in Threadneedle Street and the cherubic choir instantly comes into line again. In real life, the British and foreign banks, the discount house and the bill brokers are much more like half a dozen football teams turned loose against each other. Each of them fights for its own hand, with the least possible regard either for the ideal Money Market or for the pretty legends which surround it. So far from being surprised at occasional spasms of friction, we ought to be thankful for the prolonged periods of harmony that intervene. The whole arrangement is artificial, and its smooth working is a pleasant fiction. It does not break down, simply because all the combined ingenuity and experience of its operators are exercised to avert its natural effects."

The real cause of most of the trouble that arises between the various branches of the Money Market in London is, says our contemporary, the self-made necessity of keeping up a reservoir of ready-made sovereigns, of administering a continuous supply of gold for other countries. But this compels every bill discounter and bill broker in the city of London to become a gambler against his will, and not in bills which he understands, but in the movement of gold which neither he nor anyone else can foresee from day to day.

THE B. C. SALMON PACK.

Through the courtesy of Mr. Robert Henry, of Windsor, we have been placed in possession of a copy of a circular showing in detail the pack of salmon last season in British Columbia, as compiled by the Fraser River Canners' Association. The pack by canneries on Fraser River was as follows: Sockeyes, 1,080,673 cases, red and white springs, 28,359; humpbacks, 13,970; cohoes, 44,458; or a grand total of 877,136 cases. The pack by canneries at northern points was: Sockeyes, 243,184, red and white springs, 22,852, humpbacks, 10,666; cohoes, 13,622; or a total of 290,324. Grand total for B. C., 1,167,460. Another section of the tabulation classifies the pack by shapes. These are divided as follows: 1 lb. Tails, 405,606; 1-2 lb. Tails, 5,578; 1 lb. Flats, 432,654; 1-2 lb. Flats, 272,147; 1 lb. Ovals, 7,033; 1-2 lb. Ovals, 8,186; Squats, 36,256. As to the figures for the various districts in which the canneries are operated, the following is a summary: North Arm district, total pack 127,473; Steveston, 397,216; Canoe Pass, 152,263; Westminster, 120,674; Victoria, 30,138; outlying canneries, 49,372; Skeena River district, 114,085; Rivers Inlet, 83,122; Naas River, 32,725; Lowe Inlet, 8,056; Dean Channel, 13,890; Bella Coola, 10,029; Smith's Inlet, 7,942; Alert Bay, 8,728; Clayoquot, 4,596; Alberni, 4,813; Quathiaska, 2,338.

Another interesting feature of this exhaustive compilation is a detailed statement of the disposition of the pack for the last ten years. To London direct of the 1905 pack went 105,088 cases; to Liverpool direct, 320,039; ditto with option to London or Glasgow, 16,904; to the United Kingdom overland, 100,637. In 190[illegible] to the United Kingdom, (all told) were shipped 181,109 cases. To Eastern Canada last year went 152,118 cases, compared with 160,258 in 1904. To Australia and New Zealand, the shipments last year were 53,847 cases against 37,050 the year before. To "other destinations" last year were shipped 4,556 cases. "Sold but not delivered" accounts for 136,982 cases. Last year the local sales were 37,037 against 15,919 in 1904. The stock on hand at the present time is 211,252 cases compared with 68,275 at the corresponding time in 1904.

ANCIENT ORDER UNITED WORKMEN.

The New York State Grand Lodge of the A.O.U.W. is face to face with financial trouble. A recent despatch from Syracuse says that with surplus of but $29,000 and with beneficiary claims aggregating $706,440 the Grand Lodge officers are preparing to appeal to the Supreme Lodge for relief in the general crisis in the history of the organization. Grand Trustee F. B. Garrett and Grand Master Workman August Steinbicker, of that city, are making efforts to secure the necessary assistance which it is claimed is due from the Supreme Lodge, and to pull the State organization from its financial straits for the protection of thousands of members of the 425 lodges in the State. A call was issued by Mr. Steinbicker for a meeting of the Grand Lodge in Syracuse on March 6th. At that time the order will be brought to the attention of the Grand Lodge officers and representatives of all the lodges of the State. A course of action will then be determined.

According to the claims of its officers the Grand Lodge of the State of New York is entitled to financial assistance from the Supreme Lodge to the extent of upwards of $600,000 under the rules of the Order. The call was issued by Mr. Steinbicker upon the petition of ten lodges in five counties, and provides for the consideration of the financial condition of the Grand Lodge and its relations with the Supreme Lodge. It also provides for a revision of the rules for the purpose of reducing expenses and increasing the income.

The Grand Trunk Pacific Railway will apply for legislation amending their Act of 1903 by authorizing the company to issue debenture stock to the amount of $25,000,000, instead of preference stock to the amount of $20,000,000, as now provided.

The Similkameen Mining and Smelting Company has several claims on Bear Creek, in the Similkameen district of British Columbia, covering an area in all of 200 acres, which it is preparing to develop on an extensive scale. The ore is said to be plentiful and rich in quality. Three or four shafts are down fifty feet, all in ore, the vein widening with depth and the values increasing. The vein is from seven to eight feet in width, and has been proved by continuous shafts and open cuts for a distance of 3,000 feet. Assays show that the values of the ore in gold, silver and copper run from $12 to $280, the samples being unselected. With its own smelter, the company expects to make handsome profits. A waggon road to connect the mines with the Great Northern Railway at Tulameen City, which is to be completed by next summer, has already been constructed at a cost of several thousand dollars.

Mercantile Summary.

The official assignee offers the estate of D. H. Campbell, grocer, of Halifax, at auction. Campbell ran for mayor in a three-cornered contest last year and was third.

The Hon. Wm. J. Stairs, the senior member of the well-known wholesale hardware firm of Stairs, Sons & Morrow, Halifax, died in that city on the 27th ult. Mr. Stairs was born in the year 1819, and went into the retail and wholesale general merchandise business in Halifax in 1841, making a great success therein. He was one of the most prominent men in the commercial life of Nova Scotia, and was identified for many years with the Union Bank of Halifax, being for many years a prominent director of that institution.

On this day week died in Montreal George Seymour Brush in his eightieth year. Mr. Brush was known for many years as the chief proprietor of the Eagle Foundry, which dates from 1820, and with which his father became connected in 1838. One of the early orders executed by the firm was from the Admiralty, for providing engines for the steamer "Sydenham." Mr. Brush, who had studied law, was first a partner with his father, and then became chief proprietor of a business that became widely known as the Eagle Engine Works, near the Canal Basin.

The Excelsior Life Insurance Co.

The reports presented at the annual meeting of the above company show that the year 1905 was the most satisfactory the company has ever experienced, every item of the reports showing solid advancement.

The following is a summary of the directors' report:

Insurance.—Applications for new insurance amounting to $2,645,281.00 were received during the year, of which policies were issued for $2,443,281.00. The insurance in force now totals $9,008,774.00, being a gain of 18 per cent., or $1,361,975.65.

Cash Income.—The amount received for premiums, interest, etc., was $324,503.43, an increase of $41,101.82, or 15 per cent. By careful and judicious investment, and the realization of revenue from interest equalled 7.20 per cent. on the mean net ledger assets.

Disbursements.—The expense ratio shows the satisfactory decrease of 7.27 per cent.; the death claims of the year a decrease of $6,097.00. The death rate per $1,000 mean insurance in force was 3.90; the company still occupying the unique position of having the lowest mortality rate on record for the period of fifteen years 2½ months.

Assets.—The assets now exceed one million dollars. Including subscribed, but uncalled capital, the balance for security of policy-holders is $1,410,944.03.

The Reserve Fund is $894,025.30, an increase of 20 per cent. The customary care has been exercised in looking after the company's investments, all of which are in a very satisfactory condition.

The Net Surplus on policy-holders' account (Government standard) is $105,551.64.

The following gentlemen were re-elected directors for the ensuing year: Messrs. D. Fasken, S. J. Parker, R. Grass, Thomas Long, John Ferguson, M.D., Wm. Harvey, R. W. Gordon, W. J. McFarland, J. F. W. Ross, M.D., Geo. E. Weir, W. F. B. Colter, Alexander Fasken, and Joseph Wright, Mr. David Fasken being re-elected president and Messrs. S. J. Parker and Ruliff Grass vice-presidents.

The Mutual Life Assurance Co. OF CANADA.

has had another prosperous year as may be seen from the following table:

Surplus (Government Standard)..................	1,263,905
Gain over 1904............	214,504

The Dominion de Forest Wireless Telegraph Company and the de Forest Wireless Telegraph Syndicate are arranging, it is said, to build two stations, one on the Irish and the other on the Canadian coast. They will be fitted with a large quantity of surplus power so as to ensure the capacity to handle business under all sorts of conditions.

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

MANAGER FOR CANADA:

B. HAL. BROWN.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $151,663,477.29

It exceeds by two millions the entire population of the Dominion of Canada. Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. It has on deposit with the Government of the Dominion of Canada, in Canadian securities, dollar for dollar of its Canadian liabilities. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts.

This Company's Policy-claims paid in 1905 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $105.83 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policy-holders and addition to Reserve
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $3,000 000.00.

THE MILLINERY OPENINGS.

As year after year goes by, the semi-annual function of the millinery openings seems to become of greater importance and interest in the eyes of those artistic caterers to feminine capitate wants, the milliners, in all parts of the Dominion. This week in Toronto and in Montreal has been no exception to the rule, the crowds of visitors being larger and more insistent in their demands for the novel and the pretty than ever before. A rapid survey of some of the show-rooms makes one believe that while radical departures in fashions of head-dress are not frequent, there is an infinite variety of novel touches just sufficient to make everything a little different. And in a woman's eyes, "the slightest difference makes all the difference."

If we were asked to mention the most striking feature of this spring's millinery exhibit, we might say it consists in the predominance of the sailor form. But when it comes to describing these "sailors," one's work is cut out for him, so multitudinous are the shapes and patterns, the colors and the trimmings of these adornments of the dear creatures. Crowns of sailors are low and wide and high and somewhat narrow; and brims are round or straight or curved; and both are all sorts of combinations of any or all of these qualities according to whatsoever a light touch or two of the guiding hand of the deft artist may have conjured up. Feathers and flowers are this year quite often united in the one hat, while chiffons are in full array. Transparent effects are distinctly popular. As to flowers, a very striking feature is the quantity of small Paris flowers in wreath form. Tiny roses, and not very much smaller forget-me-nots, lilacs and lilies of the valley are in great evidence. The shadings are particularly beautiful, and some of them very striking. Lovely effects in bronze greens, pale-blue heliotropes, melting pinks and mauves, combined with equally charming flower designs, meet the eye in every direction.

Trimmings are in many cases notably elaborate; tulle and crinoline show up well, while as to flowers, as we have said, their number and combinations are bewildering. Laces are by no means forgotten, and some of the designs shown present a light gauzy effect which will do much to make the coming Easter a time of charming pictures.

As to the other ornamentations we need not go very fully into their discussion. They are quite as varied as in former years, and are in as great a number of combinations. Ospreys are shown generally in the light vanishing shades before described. Ribbons, buckles, velvets, all have their place on head-gear, as do quills and wings. We will add that business prospects for a good season are unanimously believed by the merchants to be good.

* * *

THE GOOD ROADS MOVEMENT.

At the annual convention of the Western Ontario Good Roads Association, held in Toronto the other day, the keynote was that good roads were just as necessary to a country's well-being as railroads. The necessity for the latter nobody questions; yet roadways are required to reach them and render them properly available for the people. The estimate was made by Mr. A. A. Stewart, of Clyde, where they have some of the best roads in Wentworth County, that the cost of maintaining these roads in repair would average about $50 per mile. One speaker pointed out a defect in the present form of grant to the municipalities from the Government in that townships which are hilly, or have several bridges, receive aid on the same rates as others which have not to overcome these difficulties; while another drew attention to the fact that according to this assessment system the poorer municipalities, which most needed the money, received less than the richer ones.

Mr. K. W. McKay, of Elgin County, attacked the practice of allowing automobiles to run on and ruin the public streets. He contended that the law limiting the speed of these machines to fifteen miles an hour was difficult to enforce, owing to the trouble of ascertaining the speed with exactness, besides which the number of the auto often became covered with dust, making it impossible to find out the owner. He submitted a motion that the Association petition the Legislature to enact such measures as would free the people from the dangers of automobiling on the highways.

* * *

PROPRIETARY CONCOCTIONS.

Manufacturers of and dealers in patent medicines often make complaint of harsh treatment at the hands of medical men, and of legislators who believe that the public should be protected in some measure by a knowledge of the formulæ on which the articles they buy are compounded. It is, of course, necessary to be fair towards the men engaged in an industry in which much capital is invested, even though a very large proportion of this is in the form of wide-spread and expensive advertising. But fairness is a two-sided quality, and when one reads a certain bulletin (No. 113), issued a few days ago from the laboratory of the Inland Revenue Department at Ottawa, he realizes that all the fairness is not on the side of the proprietary medicine men—fairness towards the purchasing public we mean. One much-advertised remedy was found by the Departmental Examiners to contain a proportion of alcohol considerably higher than the strongest port wine, and about two-thirds that of the ordinary grades of whiskey, while the quantity of solid matter in it was less than is usually found in the latter. Another "remedy" with a pleasant sounding name is said to contain a substance whose properties are the opposite of those that its name would indicate. Many extracts of sarsaparilla are found to fall far short in quality and purity of the professed standard under which they are sold. As to headache powders the analyst finds that most of them contain acetanilide, a drug which, while cheap, is attended in its habitual use with physiological effects of a dangerous character. Those interested in the sale of such articles claim, we believe, that it would be unjust to be obliged to publish on the labels the names of the contents, because the public might buy the latter and mix them themselves, which they could not hope to do in the proper and most beneficial manner. A reading of the Government bulletin above referred to, would indicate that there may be other objections to such a law, which have not been frankly stated.

It is worth noting that in the United States a regular crusade is being carried on against specific proprietary medicine preparations. Some of the "consumption cures" placed on the market in these days are described by one speaker before the Senate Committee on Public Health as containing chloroform, cocaine, morphine, and other drugs which, instead of curing the disease, hasten it, and are "of the most diabolic concoction;" while many of the cough and consumption cures contain opium, "principally because this drug advertises itself, one dose calling for another."

Surely some of the legislative ability now engaging itself with local option and framing fantastic laws against the "treating habit," might with propriety find an opening in dealing with this matter of patent medicines, which are swallowed by thousands of men, women, and children, often in recklessness and in worse than utter ignorance of their contents.

* * *

MORTGAGE LENDING COMPANIES.

As has been the case with loan companies in Ontario generally during the year 1905, the Hamilton Provident and Loan Society appears to have experienced an active demand for money. The volume of its business in Ontario has been maintained at a slightly better rate of interest, and in Manitoba and Saskatchewan, it has considerably increased its loans at satisfactory paying rates. The same care is exercised, we are told, in accepting loans, and the result is that losses are rare.

The year's earnings, both gross and net, are greater than in the previous year the net being $99,611; and after paying dividend, there was $35,000 to add to the reserve fund, which now amounts to $450,000 with a contingent fund of $10,507.

The volume of deposits remains practically the same as in the year preceding, namely, $688,000; both sterling and currency debentures are increased, the aggregate of these now exceeding a million dollars; while debenture stock is reduced by some $50,000. The net value of the investments, all on mortgage, presumably, is, apart from office premises, $3,617,364, and there is $181,378 in cash on hand. By reason of the recent passage of a Dominion Act which prevents judges acting as directors of a corporation, Judge Snider has resigned from the board of this society. Mr. Joseph J. Greene has been chosen a director in his place.

Another satisfactory year's business is shown by the Agricultural Savings and Loan Company, of London. Earnings were about the same as before, and the net profits sufficed to pay the usual dividend, to add $15,000 to reserve fund, and to carry something forward at credit of profit and loss. The reserve is now $265,000, which is equal to 42 per cent of the capital. Demand for loans during the year had been active enough to employ all the company's spare funds, and it is stated in the report that payments, both of principal and interest, have been well met. Losses have been slight, and the real estate held under power of sale has since been almost all disposed of. Debentures, both currency and sterling, have been added to during the year, but there was no increase in deposits, rather a slight decrease. The amount and character of the assets appear to be much as in the previous annual report, the total being $2,466,528, all but $79,000 of it in mortgages on real estate. The company is conducted with economy and care.

* * *

IMPORTANCE TO ONTARIO OF HUDSON BAY.

Third Article.

The best market for Hudson Bay sea food is that section of the United States lying midway between the two oceans and southerly from the great lakes, with Chicago as its commercial centre. In this region, with its thirty or more millions of inhabitants, prosperous above the average, the fish of Hudson Bay would find eager buyers at moderate prices. An average individual consumption of one and a half pounds of fish per week would absorb considerably more than one million of tons per annum taken from Hudson Bay.

With the source of supply and the nearest area of adequate demand thus defined, the second query— **"How can commercial access be best obtained?"** can be satisfactorily answered within the axiomatic rules hereinbefore stated. In view of the "muskeg" coast zone, and the shallow tide water adjoining the same, as before mentioned, the only available marine rendezvous within the limits of Ontario's sea coast is at the mouth of the Albany River, which does not afford a harbor for ocean steamers, but will offer shelter to ordinary fishing vessels of the type used in ocean cod and halibut fishing, as it has about ten feet of water over the bar at high tide.

No surveys, or estimates, have yet been made to determine the feasibility, or cost, of making a first-class harbor there, and until that question is settled, and its location determined, no railway line could be expected to extend to it as a terminal station.

As these preliminaries will require several years at least to adjust, commercial access to the sea fishing resources would ordinarily be considered as indefinitely postponed. But a redeeming feature occurs in the fact that the Albany River itself is a noble navigable stream, without an obstruction for 250 miles to Martin Falls (of 40 feet), and which can be utilized by river steamers, like the Ohio River, which it resembles in size and availability.

About 200 miles westward is a very favorable route for a railway, which on a nearly due south route will reach deep water on Lake Superior within 250 miles, thence 125 miles by steamer across that lake to the city of Houghton, in Michigan, where is the terminal of two trunk railway lines to Chicago, 400 miles south.*

By fitting up the river and lake steamers for car transit, fish in refrigerator cars can be taken from the shore of Hudson Bay to Chicago without breaking bulk within forty-eight hours and at less cost per mile than by any other available route.

Another most favorable feature is that a charter including that route has been granted by the Dominion Government, which will enable the railway company to extend to tide water on the north side of the Albany River, and avoid the "muskeg" found on the south side, and **with power to extend to any harbor on the coast between the Albany and the Severn River as may be found desirable upon future examinations.** This, being beyond the limits of Ontario, required Federal authority for charter powers, but the Province could well afford to bonus the railway extension to and into the territory of Keewatin as a most efficient way of pre-empting that section as preparatory to becoming an addition to the Province. The advisability of extending Ontario's boundaries northward is now a mooted question, pending a final decision by the Dominion Government in the near future, as recently stated by Premier Laurier when referring to the claim of Manitoba for an addition to the same territory.

These facts prove that commercial exchange between producer and consumer of the sea food wealth of Hudson Bay can be more promptly transported via the Albany River and Lake Superior combination water and railway route than by any other heretofore proposed or prospectively available.

The third and last query:—

What provincial advantage will result from prompt up-to-date transit facilities extending to the great Canadian sea, via Ontario?—can, in view of the following facts, be answered approximately as follows:—

1. It will enable Ontario to take the lead of all the Dominion Maritime Provinces in fishery industries, in which at present it is in the rear.

NOTE.—The Dominion Department of Marine and Fisheries' latest report, 1905, shows the value of Provincial fisheries thus:—

Nova Scotia	$7,841,602
British Columbia	4,748,365
New Brunswick	4,186,800
Quebec	2,211,792
Ontario	1,535,144
Prince Edward Island	1,199,510
Manitoba and North-West	1,478,665
Total in Canada	$23,101,878

(Newfoundland is not included, as it is outside of the Dominion.)

Deep sea fishery bounties paid by Dominion per report, 1905:—

Nova Scotia	$99,714.15	for	13,958	men.
Quebec	34,704.30	"	7,736	"
New Brunswick	14,872.75	"	1,635	"
Prince Edward Island	9,652.50	"	1,901	"
Ontario	0,000.00	"	0,000	"

2. It will add a considerable percentage to the provincial population:

and that of a hardy, industrial class, which is the backbone of the British Islands to-day. The development of the deep sea food industry there in the last half century has amazed the Old Country economic scientists.

NOTE.—The Toronto "Globe" of August 30th, 1905, stated that at the Port of Grimsby, on the North Sea coast of England, there was shipped in 1904 by railway alone over 126,000 tons of fresh fish to market, where fifty years before only a few fishermen, with a half-dozen or less small boats, gained a scant living—the change being effected by the extension of a railway to that place, which improved transit led to the use of steam "trawlers" or fishing tugs, and the expansion of the sea food product followed.

(The supply had been provided in past ages, but, as in Hudson Bay, enterprise had been lacking to utilize it.)

The same journal, under date of December 18th, 1905, has a notice of the fishing port of Yarmouth, England, where sixty years ago a Scotch fisherman had never been seen, but this year 585 Scotch boats, manned by 4,650 men and 3,000 girls from the Shetland Islands, had been engaged in the herring fishing from that port, with a catch of over 239 millions of fish, which estimating each to equal one pound weight, would total 120,000 tons, while the local home fleet caught over 226 million, the total being over 233,000 tons of fish from that town that season.

Marvelous as these returns are, those of the growth of the fish industry of Lake Superior in the last fifty years would, if the same had been reliably tabulated, also show stupendous increase. But no returns have been presented. A collateral fact can be stated, however, that whereas in 1855, when canal transit was first provided, the entire commerce of that lake region was less than 10,000 tons; in 1905—a half century later—it was over forty-four millions of tons by the same transit system.

* * *

AN ENACTMENT AFFECTING JUDGES.

It will have been noticed that a number of Canadian judges, in both minor and higher courts, have of late resigned positions as directors of boards of financial and other companies, for which services they had been in receipt of payment. They were impelled to this course by an Act passed last year by the Dominion Parliament, which measure provided for the raising of the salaries of the judges. This Act—4-5

---

*NOTE.—These are the Chicago & North Western, and the Chicago, Milwaukee & St. Paul Railway Systems, operating over 9,000 miles and 7,000 miles respectively, and connecting with over 30,000 miles of local railways radiating to all parts of the market region referred to.

Edward VII, entitled "An Act to amend the Act respecting the judges of the Provincial Courts," 1905, Chapter 31, provided in the 7th section thereof as follows:—

> Sec. 7.—"No judges mentioned in this Act shall either directly or indirectly as director or manager of any corporation, company, or firm, or in any other manner whatever, for himself or others, engage in any other occupation or business than his judicial duties; but every such judge shall devote himself exclusively to such judicial duties."

This provision is a most salutary one, and it was, we understand, in part to prevent judges engaging in other businesses that their salaries were increased. "The Monetary Times" took the ground, years ago, that it was not seemly that a justice of any superior court, for example, should be placed in a position of director of any commercial body, the transactions of which might come before him for judicial arbitrament. The very passage of the above act proves that the public sentiment has approved our attitude.

In this connection it may be instructive to observe that a move in the like direction has been made by the British Government. The "Liberal Magazine" says:—"We are glad to be able to announce that all public directorships held by members of the present Government have been given up by Ministers on their acceptance of office. It will be remembered that this very salutary rule, observed in the Liberal Government which went out of power in 1895, was discarded by Lord Salisbury and his successor, Mr. Balfour. The Liberal party has constantly protested against the Minister-Director; and instances have not been wanting in the last ten years of the extreme undesirability (to use no harsher word) of ministers being engaged in the direction of public companies. Sir Henry Campbell-Bannerman has performed a very real public service by his revival of a rule which, once adopted, ought never to have been abandoned."

* * *

THE INTERCOLONIAL RAILWAY.

The words of Hon. H. R, Emmerson before a crowded meeting in Moncton, N.B., leave no room for doubt that the works of the I.C.R. recently half demolished by fire, will be re-built at the same place, if not on exactly the same site. For a city like Moncton, so largely dependent for its prosperity on one particular industry, this was good news. The Minister also took advantage of the occasion to refer to the talk that has been going around, especially since the announcement of a heavy deficit on operating expenses, as to the taking over of the line by some corporation, for whom doubtless it would prove a rich plum, or the running of it by a commission. He assured his hearers that his colleagues in the Government had had no such idea. For himself he would say that it was only last August that he was able to begin looking after the interests of the Intercolonial in earnest, and as yet he was not in a position to account fully for the deficit, part of which, however, had doubtlessly been caused by bad weather, snow-storms, etc., last winter. The Minister also declared that the prospects for the current year were good, and indeed that he had hopes of being able to present a surplus over working expenses.

The Minister has made the further announcement that the newly constructed shops shall be thoroughly modern, and built in such a way as to enable the employees to carry on their work to the best advantage. He has also stated that they will be moved to a better location where room can also be secured for the terminals of the Grand Trunk Pacific. Some public-spirited offers have been made to ensure or assist the rebuilding of the works. For example, Mr. G. B. Jones offers free an extensive site at Sunnybrae, a mile from the centre of the town. The town is prepared to give Bridge Street, which is 2,080 feet long, and the Government owns the entire property along one side of it. This attitude on the part of the townspeople is most gratifying.

* * *

FEBRUARY FIRE LOSS.

A very reassuring account of last month's fire-waste comes from the office of the "New York Journal of Commerce," which makes each month a careful compilation of the losses from fire in Canada and the United States. For the month of February these losses aggregated only $18,249,350, or seven millions and a quarter of dollars less than was the case in February, 1905. This is something to be thankful for. The loss last month was increased materially, it must be remembered, by the conflagration in the Intercolonial Railway property at Moncton, as well as by the destruction of two large elevators across the line, but all told, the waste this year has been barely one-third of that for the same period two years ago, when the Baltimore conflagration occurred. The following is a summary by months:—

	1904.	1905.	1906.
January	$21,790,200	$16,378,100	$17,723,800
February	90,051,000	25,591,000	18,249,350
Total 2 months	$111,841,200	$41,969,100	$35,973,150
March	11,212,150	14,751,400	....
April	23,623,000	11,901,350	....
May	15,221,400	12,736,250	....
June	10,646,700	11,789,800	....
July	11,923,200	13,173,250	....
August	9,715,200	11,435,600	....
September ...	14,387,650	13,715,250	....
October	12,866,200	12,267,000	....
November	11,515,000	16,178,200	....
December	19,422,350	15,276,600	....
Total 12 mos...	$252,364,050	$175,157,800	....

* * *

ONSLAUGHT ON C.P.R. FINANCING.

The "London Economist" is a journal whose opinions particularly on important financial matters, are always worthy of and generally beget respect. Nevertheless, we think its recent sweeping criticism on the methods of the Canadian Pacific Railway directorate in its coming large issue of additional capital stock will not be sympathized with very widely by the Canadian public, who with all deference to our contemporary, be it said, probably have a fuller understanding of the conditions underlying those methods than it can have. We do not gainsay that a degree of truth attaches to the criticisms; but the latter are practically all such as can be replied to with equal truth, we believe. In other words, it is mostly a question of the point of view. And this consideration is all the more pertinent when it is remembered that the "Economist" looks upon such questions from the English standpoint, while the C.P.R. necessarily is influenced by conditions which prevail in the financial world of Canada, and possibly of the United States.

The first bugbear which raises its head in connection with the new issue is the directors' proposal to make it at par, and not at the market price prevailing to-day. They, thus, in the opinion of the "Economist," wilfully sacrifice many millions of dollars which should go legitimately into the coffers of the company, or in another way of putting it, issue considerably more new capital than would be necessary were they to sell it at the market price. This kind of finance it characterizes as unsound.

But the Canadian Pacific management is composed of men who, while probably they recognize to the full the theoretically economical justice of this argument, are above everything practical financiers. They know, none better, what they can do and what they cannot do in the financial market. They recognize, too, that when one or more of the highest-standing American railroads tried to finance a new issue of stock on the above plan, bearing the hallmark of soundness, they failed; and that this being so, it is scarcely likely that they themselves will succeed. Again, when the "Economist" refers to a sacrifice of the high market quotations reached by the C.P.R. stock to-day, it is a moot question how much this enhanced valuation has been due to the recognition in the investor's mind of the very policy on the part of the management which our contemporary deplores, and it is a question also how that same high valuation would stand the shock of any radical departure from that policy. To put it in other words, much of this high valuation which the C.P.R. is advised to preserve intact, and to reap the benefit of, owes its very existence to the knowledge by the public that the possession of shares entails certain rights—to obtain further shares at a moderate par price. To this also attaches a certain sentimental consideration, namely, that original shareholders in the great Canadian transcontinental for years held on to a very dubious path, and that it is only fair, therefore, that they should receive some extra reward for their faith amid trying times. A contented body of shareholders is a valuable asset for such a corporation as the C.P.R. to possess, engaged in developing great areas of new country, and from time to time needing large amounts of cheap money. Practically, and in the end, therefore, it is a matter for doubt whether the C.P.R. is making any serious sacrifice of resources after all. The whole contention of the "Economist" seems to bear out the argument foreshadowed in the earlier part of this article, namely, that it looks at the question too much from the English point of view, as is evidenced again by its approval of the C.P.R.'s conservative policy in the matter of dividends. The English railroads, as a rule, use up all net earnings for the payment of dividends, charging up expenses for improvements and extensions, etc., to capital account. On this continent it is considered more important by railroad financiers to preserve a degree of stability in the rate of dividend, even though it be a small one, and, when they need money, to borrow it as cheaply as they can. Herein consists an important point of difference.

The "Economist" speaks of coming lean years, against which even Canadian prosperity will not be proof. No doubt; and unfortunately this will be the case sooner or later. But the C.P.R. have good ground for the belief, and most Canadians will probably share it, that even granting lean years, the development of the West has now reached such a point, and the country developed possesses such a gigantic area, and such multitudinous resources, that even when the reaction does come, a great transcontinental railroad will find enough to do to keep receipts up to a high degree of profitableness, even though they should not show the wonderful elasticity of the last few years.

As to the strictures of the "Economist" on the policy of the C.P.R. in selling a large block of its land in the North-West to a syndicate at only about $4 per acre, when the market price of such land has averaged $5.30 per acre, the argument may be used that several important items are left out of consideration. What about the *cost* to the company of selling that land for which the settler pays $5.30 per acre? What about the expensive organization necessary in order to bring the land and the actual settler together? Selling land in a block to a syndicate at $4 per acre is a wholesale transaction, the buyer taking the expenses; selling land by the hundred acres or so is retail; and perhaps the actual net receipts to the company would not show much difference in either case, especially when in one case the land is in selected pieces, and in the other it is one tract, comprising good, bad, and indifferent.

* * *

NEW YORK LIFE INSURANCE REFORM.

Some very important recommendations have been made by the Armstrong Committee, which investigated life assurance companies at Albany, and it may not be amiss to refer briefly to them:—

(1). Restriction of Investments.—It is proposed to limit the investments to mortgages on real estate and Government, county and municipal bonds and debentures, and mortgages on real estate. The chief effect of this would be to prohibit the investment of moneys in stocks. It is a fact that some bonds are not as valuable as certain stocks; again, some companies have lost considerable moneys in mortgage real estate loans. The problem of defining the investments which a life insurance company may hold is a difficult one. The British companies leave the matter very largely to the directors, holding them responsible therefor. The investor knows that there are many stocks—for example, bank stocks, trust company stocks, and certain loan company stocks—which may be regarded as more secure than certain bonds. The net effect of the restriction, if put in force, would be that a reduced rate of interest would be earned, and, consequently, the surplus returns to policyholders, from excess interest earned over the reserve rate, would be diminished.

(2). Limitation of the Contingency Reserve Fund.—It has been the practice of some of the large American companies to hold considerable amounts of money in contingent reserve, mainly, we believe, to offset any adverse fluctuation in their several departments. In view of the violent fluctuation of the United States stock market, and the large holding by American companies of stocks, it would appear appropriate that there should be a substantial contingent reserve fund. On the other hand, if the restriction as to investments is put into effect, the amount of this fund could be very properly greatly reduced. Some companies also maintain a contingent reserve fund in connection with deferred dividends under life assurance policies. This represents the unallocated profits which accumulate until the maturity of the deferred dividend period. It would appear to be more appropriate if this contingent reserve fund were allocated amongst the policies entitled to participate in it, instead of being held as an unassigned and unallocated amount. While it is termed a contingent reserve fund it is really surplus unallocated.

(3). No forfeiture of a policy so long as the reserve justifies it being continued in force.—This provision is now almost universally complied with by practically all life offices. At the present date it is the practice, when a policyholder fails to pay his renewal premium, to continue the contract in force so long as the "surrender value" will permit of this being done. The proposal now made is, that instead of the "surrender value" being applicable for the continuance of the contract, the "reserve" shall be thus utilized. The difference between the reserve and the cash surrender value is usually a small percentage of the reserve. The suggestion is not a serious one, nor does it deviate much from the present day practice.

(4). Prohibition of Deferred Dividend Policies.—There is much to be said for and against this proposal. On the whole, we believe that this matter should be left to the policyholders to determine. If the policyholders prefer that their profits shall be deferred for a period of 10, 15, or 20 years by stipulating such in their application for insurance, then there does not appear to be any impropriety in the companies permitting of this, but, *if so allowed, it should be provided that the companies furnish the policyholder with periodical statements of the accumulated surplus, say, one in each five years.* If this latter suggestion were carried out, then the companies' unassigned surplus fund would be comparatively small.

(5). The Standardization of Policies.—In practice there would appear to be slight necessity for such a provision as this. The contracts of all of our life companies are couched in about as simple, straightforward and untechnical terms as can be employed. The fact that in Canada there is practically no litigation in life assurance, testifies abundantly to the attitude of the companies towards their claimants. If anything, the companies err on the side of taking too generous a view, in order to escape litigation and publicity, of certain doubtful claims.

(6). Restriction of Expenses.—The suggestion made by the Armstrong Committee is that the expenses of a company shall be restricted to the loading plus the mortality gains. On the average, the premiums are loaded about 25 per cent., and the mortality gains may be said to average about 15 per cent. of the expected. If companies were compelled to so limit their expenses, the business would be conducted at a much less cost than it is to-day. This would have a very healthy effect upon the evil of rebating, as then it would be practically impossible for the agent to rebate. It would, no doubt, have the effect of limiting the annual volume of business transacted, and would ultimately redound to the benefit of the policyholders.

(7). Limitation of Business to $150,000,000 a Year.—This, of course, has no interest whatever to the companies operating in Canada. It applies to the large American companies whose business operations are most extensive.

* * *

R.S.M., Detroit.—The articles we published entitled "The Trust Company Idea," have been issued in pamphlet form, we understand, by Mr. Ernest Heaton, McKinnon Bldg., Toronto.

DEATH OF JOHN A. McCALL.

The death recently of John A. McCall was under sad circumstances, and it is impossible to repress a feeling of sympathy with a useful, brave, and able man who went to his grave under a cloud which was made darker by malevolence and probably misunderstanding. It is not easy to persuade any one who knew Mr. McCall that he was a boodler, or that in his administration of the New York Life Company's affairs he acted otherwise than under a conviction that he was serving its best interests. True, he paid out the company's money to prevent inimical legislation, but he may have been sincere, and we believe he was, in the belief that he acted to the advantage not only of his own company but of life insurance generally in so doing. John A. McCall was born in Albany in 1849. He entered the insurance business early in life and in 1885 was appointed state insurance commissioner by Grover Cleveland. In that capacity he proved a capable and faithful official—he was no mere figure-head, but was thoroughly well informed on the subject of life underwriting. He relinquished that position to become comptroller of the Equitable Life Assurance Society, which post he held until he became president of the New York Life Insurance Company in 1892. He was a thoroughly capable life insurance man.

* * *

CANADA IN LATIN COUNTRIES.

We have received with pleasure the first copy of a journal which is to be published quarterly in Toronto under the name of "Los Intereses del Canadá en el extranjero," which, being interpreted, means "The Interests of Canada Abroad." As this somewhat lengthy title implies, the new periodical, from cover to cover, will devote itself to giving of information and discussing matters of interest concerning the commercial relations between this country and the Latin-America republics. It believes that trade is the bond of friendship and peace between nations, and desires in particular to strengthen this bond between the Anglo-French nation of Canada in the North and Spanish peoples in the South, and sees no reason why a great commerce should not grow up to the mutual benefit of all concerned. It is certain, we know little of these Southern States at present, and it is probably equally true that the people of Mexico and South America know little of us. "Los Intereses" proposes to show for their benefit that Canada is a land flowing with milk and honey—a land of healthy youth, strong virility and doubtless vigorous old age. Among the signed articles, which we may mention are all in the Spanish language, is one by a gentleman better known in the English writing world, Mr. James Hedley. It treats of Canada as a modern financial force and quotes examples to show how the Dominion, from a poor country without realizable wealth and obliged to borrow money in order to develop its own resources has become a producer of capitalists who have done much for the transportation and industrial development of such countries as Cuba, Trinidad, Mexico, and Brazil. He also makes an interesting comparison between the banking systems of Canada and the United States and shows wherein the former is superior. Another very interesting article is one on Canadian educational institutions, by Mr. Walter James Brown, B.S.A., LL.M., in which incidentally he refers to the advantages of our schools for foreign students. We may add that this new periodical consists of 28 pages, that it has several maps and many other illustrations and that it is published by the Campbell Publishing Co., 34 Victoria Street, Toronto.

* * *

THE ART OF INVESTING.*

It is a popular idea that a greater sum of money is annually lost through speculation than in unwise investment, yet the actual fact is the reverse of this, and not only this but the losses resulting from unwise investing are generally far more important to the world at large, the others in a measure being anticipated. To look into the whole subject of investments is the object of the book in hand. It is a practical hand-book for investors and others, which treats the subject of Wall Street investing in a simple and sensible manner. It is an attractive volume of ten chapters, and is valuable because of the clear and entertaining way in which the various methods and phases of Wall Street investing are explained. The chapters cover such subjects as bonds and what they represent; stocks and what they are; rules for analyzing railroad securities; explanation of syndicate and re-organizations; the difference between investment and speculation; methods for ascertaining security and safety; and a vivid description of the New York Stock Exchange and its works. In addition a chapter is given to Wall Street terms and phrases, explaining briefly and clearly all the important Wall Street words and methods. Many books have been written on the general subject of Wall Street and special descriptions have been given of certain phases, but this is an attempt to cover the subject in more popular form.

---

OUR AUSTRALIAN LETTER.

Australians are enthusiastic statisticians. They revel in figures as the people of the United States used to do and those of Canada now do. They can produce figures in proof of development that are hard to rival even in the golden eras of either of these countries, as the following will prove:—

	1861.	1881.	1901.	1904.
Population	1,166,877	2,323,384	3,835,434	3,994,071
Shipping, tons	2,425,148	8,109,924	26,198,899	29,150,962
Imports . .	£24,182,920	£45,525,682	£68,129,455	£70,118,896
Export . .	24,181,229	42,667,374	75,026,787	90,587,270
Export of wool . ..	5,105,721	13,396,207	15,370,321	17,112,339
Area under crop, acres	1,269,042	4,489,607	8,813,666	9,365,022
Railway mileage, miles	243	4,192	13,821	14,891
Public debt	£11,300,940	£66,306,471	£204,952,075	£230,692,871

These are remarkable figures. It must be admitted that the development of the last fifteen years has not equalled that of previous eras, particularly in the production of wool and gold, but the gold of Australia is not yet exhausted, and wool has scope for an increase.

It is, of course, most unfortunate that the increase of the debt has been most rapid during the last few years when the development of the industries of the country have been the least. This has created an artificial state of prosperity which has produced the reaction from which Australia now suffers. The era of growth is not yet over. The agricultural resources of the country have scarcely been tapped. South Australia, which has been content to consider seven bushels to the acre as a good crop is realizing double that return from the same districts, through improvements in cultivation and the use of fertilizers. It also found that through the same means it secured very heavy crops—over 20 bushels to the acre—from the section of country north of what is known as "Goyder's Line," which was supposed to be the utmost limit of cultivation. With similar improvements in other States, like results will follow. The money lenders of England are buttoning up their pockets against advances to Australia, and though this may be unpleasant for a time, it will conduce to prosperity sound and continued.

The returns for last year are not ready for publication, but so far they bear out the anticipations of my previous letter. Later figures show a better harvest than had been anticipated, and it is presumed that sixty million bushels of wheat will be reaped. Good rains over a large extent of the country have improved the pastures, and for the time increased the bright prospects for the pastoralists of this country for the year.

Sydney, 23rd January.

The cable has informed you that the Canadian Commissioner at Sydney has succeeded in securing the change in the collection of customs duties on Canadian goods shipped from the East via Vancouver, which he had worked for. The new regulation will charge the duty on freight as if the goods had been shipped via New York, so that Canadian exporters in making out their invoices for goods shipped via Vancouver will add to the invoice the freight to the nearest border port on the route to New York. Mr. Larke took the matter up with Sir William Lyne, the Minister of Trade and Customs, on his return to Australia, as soon as he could meet him, with the result as shown. This is a special concession to Canada, for, although the Customs Act of Australia has been complained of with respect to other countries, in none of their cases has any change been made. It may be taken as an act of special good-will which the Government and the people of this country have to their Canadian cousins.

The seasons all over Australia are fairly good, and the drought, which lingered in certain sections of Queensland, where they have had no effective rains for ten years, appears to have been broken up by the downpour of last week. New Zealand is also enjoying a good season with good prospects for the year.

This does not mean that there will be any abnormal importation, for the business men of Australia have learned that one good season is not necessarily followed by a second. In any case, droughts are sure to come. They are, therefore, pursuing a conservative policy, and not increasing their orders as the increase in exports would seem to warrant.

There will be an increase, and Canada should share in it, but it is doubtful unless Canadian exporters are prepared to take a bolder line than they have in the past. They seem to be inclined to welcome trade if it comes, but they do not seem to be inclined to take the steps to make the trade. A Canadian paper shows that in spite of the prosperity only about half of the factories are running full time. If this be the case there ought to be a margin, and a very considerable one, for an export business. Perhaps not many concerns are large enough to seek an export trade, but it should surely be possible for conjoint action to do so. Very few attempts have been made for such joint action, and these have not always succeeded, sometime due to the home firms and sometimes due to the lack of fitness of the men sent here. Some years ago a manufacturer of Canadian school furniture did business here, but the business gradually died out, as the agent, who is a Canadian, complained that he was not supported as he ought to be by the home firm. This may or may not have been, but at all events another Canadian living in Sydney, seeing the prospects there were in the trade, went to the United States, made arrangements with a firm there, and the two together are now doing a very large business in this line. The reason given for not seeking business from Canada was the very much better conditions and assistance which they received from the United States firm. They were supplied with what they wanted promptly, which they could not be sure of from Canada. In another case a Canadian who came here with Canadian lines, abandoned them and made a connection with the manufacturers in the United States The Canadian goods were all right, but he never could be sure that his orders would be filled promptly enough to enable him to hold his trade. He was obliged in his own defence to make the change. These are indications of why Canadian business does not grow as it should.

Sydney, N.S.W., 5th February, 1906.

* * *

The amounts of deposit made by pulp companies whose charters by reason of non-fulfilment of agreements are forfeit to the Ontario Government are $5,000 each in the cases of the Dryden and the Rainy River Companies, and $20,000 in the case of the Montreal River Co. Mr. Aubrey White stated last week that there was no doubt as to the authority of the Government to cancel the charters.

UNSKILLED STEAMBOAT MEN.

Editor "Monetary Times:"

Dear Sir,—Referring to the enclosed paragraph, culled from your issue of 2nd inst. and the lines I have underscored, you should not let this matter drop, but keep at it till some reform is accomplished. The paragraph is as under:

> Much sympathy is expressed by unreflecting people in the Eastern States with the captain of the burned steamer "General Slocum," now sentenced to imprisonment, because he is an old man. It is well to remember, however, that there must be an enforcement of the penalties of the law, and that it was proven that the captain had not properly instructed his crew as to their duties in case fire broke out on board. **It is greatly to be feared that there are many captains of passenger steamers** not only on the Hudson River, but on the **Great Lakes and the St. Lawrence** who are guilty of a like neglect, to the appalling danger of their passengers should fire break out on board."

I might add that the matter of lifeboat drill also should be seriously taken, and persistently written up until matters are put on a very different basis.

Not many summers ago I was on one of the most frequented passenger steamers that ply between Fort William and Owen Sound. The crew lowered a boat to put ashore at Detour an elderly woman, unaccustomed to travel, that had been accidentally carried past "the Sault," and who should have been put off there.

This occurred in the calm water of the river, and was done without accident, but the lubberliness of the crew and their manifest unfamiliarity with the task argued very badly for the safety of the passengers had the same feat to be accomplished under the stress of more adverse circumstances.

One of the chief officers of the steamer remarked at the time that he had been on the lakes for years (I forget how many), and this was the first time he had ever seen a lifeboat lowered from a steamer.

Yours truly,

CONSTANT READER.

Gretna, Man., 24th Feb., 1906.

Vault doors in Bank of Montreal and Royal Trust Company, Montreal
Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

AN APT COMPARISON.

The "Canadian Churchman" of the present week refers to the "Monetary Times'" leadership in opening commercial access to Hudson Bay in the following sentences:

"And now a determined and eventful effort is being made to develop the untold wealth in fish and their products awaiting our energy, capital and enterprise in the waters of the famous Hudson Bay. 'The Monetary Times,' of Toronto, is showing a courageous and commendable lead in this matter. May a like success attend its efforts to that which crowned the enterprise of James Gordon Bennett, when, through his initiative, the eyes of the civilized world were opened to the treasures of the African interior through the explorations of the adventurous Stanley."

This appropriate illustration makes plain how great are the public benefits which may be exercised from a newspaper office. That the leadership of the New York "Herald's" far-sighted proprietor hastened the utilization of the then vast wastes of interior Africa by a score of years or more is now a part of history, and the name of Bennett will always be identified with the awakening of that long-neglected continent. What was done there as to an interior wilderness can now be done respecting a like comparatively unknown sea. The "Monetary Times" is prepared to lead. Who will co-operate in this advance movement to develop Ontario's natural advantages?

NOTICE IS HEREBY GIVEN that it is the intention of The Standard Bank of Canada, after publication of this notice for four weeks in the Canada Gazette, and in the Monetary Times, a newspaper published in the City of Toronto, to apply to the Treasury Board for a certificate approving of the following By-law of The Standard Bank of Canada:

"WHEREAS the Capital Stock of The Standard Bank of Canada is now One Million Dollars, and it is expedient that the same should be increased by One Million Dollars;

BE IT THEREFORE ENACTED as a By-law by the shareholders of The Standard Bank of Canada assembled at a special general meeting called for the purpose of considering and, if thought fit, of passing this By-law, and held in the Board Room of The Standard Bank of Canada, at the corner of Wellington and Jordan streets, Toronto, at 12 o'clock noon, on Tuesday, the thirteenth day of February, A. D. 1906;

1. THAT the Capital Stock of the Standard Bank of Canada be and the same is hereby increased by the sum of One Million Dollars, divided into twenty thousand shares of fifty dollars each.

IN WITNESS WHEREOF the Corporate Seal of the Bank has been hereto affixed, and this By-law has been countersigned by the President and General Manager, this 13th day of February, A. D. 1906.

THE LATE HON. W. J. STAIRS

We have to record the death in Halifax on Tuesday, the 27th, of the Honorable William James Stairs, ex-M.L.C., senior partner of Messrs. Wm. Stairs, Son & Morrow, Limited, the extensive wholesale and retail hardware and ship chandlery firm of that city, and ex-president of the Union Bank of Halifax. Hon. Mr. Stairs had reached the advanced age of eighty-seven years, and the sixtieth-first year of his married life. Born in Halifax in 1819, the son of Wm. Stairs; the first of the family name to be associated with the firm (which was established over a century ago by the famous Kidstone family of Glasgow, Scotland), William J., early entered his father's business, becoming later as a partner, the "son" of the firm name—which continues to this day in its original style.

All his life was he connected with the firm, attaining much success and rapidly acquiring considerable wealth. For over thirty-two years was Mr. Stairs a director of the Union Bank of Halifax, the last fifteen years of which he was president of the bank, relinquishing that office some seven years ago on account of advancing years, being succeeded in the presidency by Wm. Robertson, Esq., a life-long friend, and fellow hardware merchant. Another enterprise he was connected with was the old Dartmouth Ropewalks, founded and controlled by his firm, and at first managed by the late John F. Stairs, ex-M.P., and in later years and at present, since passing into the control of the Consumers' Cordage Company, managed by another of Mr. Stairs' sons, George. Hon. Mr. Stairs was for many years a director of the old Halifax Gas Light Company, and also a director of the Starr Manufacturing Company, makers of the famous Forbes Acme skates. In earlier days taking an active part in politics, he was a disciple of Joseph Howe, opposing with that great one of Nova Scotia's sons the Confederation of the Provinces, and afterwards accepting the better terms as agreed upon between Sir John A. Macdonald and Howe. In 1868 he took a seat in the Legislative Council, and sat there for three sessions. Since 1871 he had been prominently identified with the Liberal-Conservative party of Nova Scotia, several times refusing the highest honors in the gift of the province. Though pressed to accept the gubernatorial direction of Nova Scotia he always declined, preferring the life of a public-spirited citizen without office. In civic life Mr. Stairs served in the city council as alderman, representing ward one, the principal residential portion of the city; in the years of 1855 and 1856, at 36 years of age he was a member of the executive of the Halifax Chamber of Commerce, being prominent in the deliberations of that body. Of more recent years Mr. Stairs had been a member, and for some years chairman, of the Point Pleasant Park Commission, only handing over the active direction of the commission a year or so ago. Ten years ago last July Mr. and Mrs. Stairs celebrated the golden wedding anniversary, and that notable event lives always in the memory of all of the thousands who called to pay their respects at the old homestead, the "Manor House" on South Street. Last July the sixtieth, or diamond wedding anniversary was quietly observed by the members of the family only, saddened by the taking away, but a few months before, of the eldest son of the house, the late John F. Stairs, ex-M.P., and of the rapidly declining days of the head and master of the house. Mr. Stairs had a large family, of whom five sons and one daughter, together with the widow survive. The sons are: Edward, now president and managing director of Wm. Stairs, Son & Morrow; George, director of the Nova Scotia Steel Co., and manager of the Consumers' Cordage Co., at Halifax; James W., formerly of the firm and presently managing his late father's real estate in Halifax; Herbert, one of the extensive fruit raisers and hackney breeders of the famed Annapolis Valley, with farms and orchards at Canning, in King's county; and Gavin Lang, also engaged in farming at Maitland, Nova Scotia. Some of his descendants are in various services of the British Army and Navy. Reported always a wealthy man, Mr. Stairs left an estate of over a half a million dollars —making bequests of $430,000 in cash, to the widow, daughter, sons, and grandchildren, as well as several large bequests of real estate to sons and grandsons. Truly the "Grand old man," of Halifax, and one of the grand old men of Nova Scotia, has gone to his reward.

E. G. S.

* * *

A GREAT FLOUR-MILLING CONCERN.

Some particulars sent to us from Montreal illustrate how extensive is the machinery and appliances of a great flour-milling concern. One such, and it is one of which Canadians may well be proud, is the Ogilvie Flour Mills Company, Limited. In earlier days the proprietors and managers of the Ogilvie mills were the three brothers, Alec, John, and William Ogilvie, of Montreal, and Mattha Hutchinson, at Goderich, but these worthy men are all dead and the proprietorship of the enlarged concern is now a limited liability joint-stock one. It possesses six mills, with daily capacity of producing flour and meal in barrels as under:—

Royal mill, Montreal, water power, 6,000 barrels; Glenora mill, Montreal, water power, 2,000 barrels; Winnipeg mill, Winnipeg, steam and electric power, 3,000 barrels; Fort William mill, Fort William, electric power, from Kakabeka Falls, to be ready for operation June 1st, 1906, 3,000 barrels; Corn Products mill, Montreal, water power, 1,500 barrels; Oatmeal mill, Winnipeg, steam and electric power, 300 barrels. Here is a total of 15,300 barrels per day. Then it has grain elevators, four in Montreal, three being of 250,000 bushels capacity each, and one of 400,000; three in Winnipeg, whose aggregate content is 550,000 bushels; one at Fort William, the largest of all, having 600,000 bushels capacity. In the interior, that is to say in Manitoba and the North-West, the Ogilvie Company has grain elevators of a capacity each of 15,000 to 40,000 bushels. There are 96 of these structures, which in all can hold 3,035,000 bushels of wheat. To store its flour—which needs storing somewhere when it pours out of the hoppers at the rate of fifteen thousand barrels per day—there are three flour warehouses each in Montreal and Winnipeg and one at Fort William, united capacity, 302,000 barrels. The Royal mill at Montreal, capable of grinding six thousand barrels in a single day, is said to be the largest in the British Empire. The whole great concern, with its offices and warehouses in many cities, home and foreign, is the growth of shrewd enterprise based upon faith in the value of Canadian hard wheat and the development of North-West Canada.

AMENITIES OF PUBLIC ACCOUNTING.

It is with gratification we are able to place on record the intimate association of Canadian public accountancy with one of the most interesting functions in London, Eng., held this year. The occasion was the dinner and reception given at the Inns of Conrt Hotel by accountants in practice in London to Mr. T. Hallet Fry, F.S.A.A., the well-known public accountant and income tax authority, with the dual purpose of recognizing his successful arrangements in the absorption of an active body of London public accountants into the ranks of the Incorporated Society of Accountants and Auditors, and his own recent call to the English Bar necessitating his cessation of practice as a public accountant.

The toast list was headed by "The Accountancy Profession," proposed by Mr. T. R. Pattison, A.S.A.A., of London, and Mr. Edmund Woodroffe, C.A., Ont., was called upon to respond. In response Mr. Woodroffe said he had been invited as the accredited representative, resident in the Old Country, of the Institute of Chartered Accountants of Ontario, and on behalf of the council in Toronto and the members he expressed the pleasure of being privileged to dine with the guest of the evening. The Canadian Institutes believed in the movement so strongly agitating public accountants in practice throughout the Empire, namely, statutory registration and the legalization of their status as practitioners of a learned profession. In the Dominion the chartered institutes had the highest recognition in commer-

cial circles and the faith of the investing public and authorities in the members' ability and integrity was undoubted. but the feeling was arising that greater statutory recognition would increase their usefulness. In the great growth of Canada the public accountants would take a full distribution of public work for the national weal. With regard to the higher politics of accountancy legislation the Ontario Institute's aim is to protect and enlarge the interests of public accountants in the smaller and far-outlying communities of the province as well as those of the better-favored practitioners in the populous cities; but towards any legislation in the United Kingdom, on the lines so ably advocated by Mr. Hallet Fry and co-thinkers, most of the Canadian practitioners would, if desired, give sympathetic and moral support.

In responding to the toast in his honor as the guest of the evening, Mr. Fry expressed a sense of regret at relinquishing his daily ties with public accountants and assured his hosts that both the material and political interests of professional accountancy at home and among the daughter-nations should receive his advice or services as a barrister-at-law whenever needed. The professions of law and accounting were yearly becoming better acquainted with one another and to a greater extent interdependent on one another's services, and personally he hoped that his knowledge of the work and aims of public accountants would broaden his usefulness as a member of the Bar. The aim of practising public accountants in any section of the Empire to secure the legal privileges they required in order to better control the profession and protect the public would continue to get his support; and, in this connection he hoped the colonies generally would follow the good example set them by the Transvaal legislators and Transvaal accountants who had adopted registration.

RESIGNATION OF MR. BEASLEY.

It is something more than a year since that we expressed our warm sense of the appropriateness of a testimonial and address presented at that time by the citizens of Hamilton to their city clerk, Mr. Beasley, in token of confidence and good-will on his completing fifty years of service in that capacity. We now hear that Mr. Beasley has resigned the office and that the city council of Hamilton have presented him with the following resolution:—

"That the resignation of Thomas Beasley as city clerk be accepted, and the council place on record its great appreciation of the faithful and efficient service rendered by him during the fifty-one years he has held the office; the council also desires to express its regret at the cause which has rendered his resignation necessary, and expresses sincere sympathy with him in the long period of suffering through which he has been called upon to pass. The council feels that it has lost a valuable and exemplary officer, whose ability, impartiality and kindly disposition have endeared him in the affections of the members of the council and the citizens generally; and as a recognition of his worth and service to the city recommends that he be granted six months' salary."

Mr. Beasley's successor in the clerkship is Mr. Samuel H. Kent.

* * *

WESTERN LUMBERMEN.

The sawmills on the British Columbia coast, who cater largely to the export trade, are said to have so many orders on hand that they are not in a position to accept any large contracts for immediate delivery. In fact it is stated that one large mill in Vancouver has contracted for its total possible capacity for as much as twelve months from this date. Generally the lumber industry is reported to be in a very flourishing condition. The marketing of a greater output than ever is expected in the North-West during the coming season. Saskatchewan and Alberta are commencing to draw upon the mills on this coast in increasing measure, and it is now recognized that in years to come that market will be the principal one which the industry of British Columbia will feed. In Alberta the lumbermen are forming an association to look after their interests. In Calgary there have been meetings held with this object. It is believed there will soon be a rise in the price of lumber owing to the increased demand. It is not intended by the proposed association to boost prices because of the organization, but the increased demand owing to the large immigration is sure to have a firming tendency. The dealers of Alberta and Saskatchewan were formerly under one organization, but the division of the territory has made the formation of another association necessary. Provisional officers have been elected as follows: President, P. A. Prince, Calgary; vice-president, A. B. Cushing, Edmonton; secretary, R. M. Grogan, Calgary.

* * *

—Manufacturers of furniture are holding meetings for the purpose of organizing a special section of the Canadian Manufacturers' Association. There are something like seventy furniture manufacturers in the latter body.

—The people of Red Deer, Alberta, are making a praiseworthy effort to show they are not behind those of older and larger centres. They are moving in the direction of planting trees and grass plots wherever feasible, encouraging the adornment of residences with lawns and flowers and are evidently taken with the idea, fully as important as some considered more practical, of making a "City of Homes."

Meetings

THE HAMILTON PROVIDENT AND LOAN SOCIETY.

The thirty-fourth annual meeting of the shareholders of the society was held at the society's head office, at 11 o'clock, on the 5th March. Among those present were the following:

Captain J. B. Fairgrieve, D. F. Sutherland, George Hope, J. T. Glassco, Geo. Rutherford, Alex. Turner, J. J. Greene, W. J. Reid, David Kidd, F. H. Lamb, H. H. Anderson, J. M. Eastwood, J. H. Coon, W. D. Wilson, P. D. Crerar, R. R. Ferrie, T. C. Haslett, Judge Snider, T. H. Crerar, John McCoy, Geo. LeRiche, Col. A. H. Moore, E. G. Payne, Chas. Judd, Hon. William Gibson, R. Butler, G. Gates, C. Ferrie, D. M. Cameron.

The president, Alexander Turner, in the chair. C. Ferrie, treasurer, acted as secretary.

The secretary read the report and annual statements, as follows:—

Report.

The directors have much pleasure in submitting to the shareholders the thirty-fourth annual report of the society's affairs, and accompanying financial statements, duly audited.

The net profits of the year, after paying and providing for all due and accrued interest on borrowed capital, paying cost of management and other charges, amount to $99,611.48, to which has been added $2,615.28, withdrawn from the contingent fund, making in all $102,226.76, out of which two half-yearly dividends at the rate of 6 per cent. per annum were paid, together with taxes on capital and income, and the balance, $35,000, has been added to the reserve fund.

After writing off all losses, and providing for any possible shrinkage in the value of the securities, there remains at the credit of the contingent fund $10,507.70.

The reserve fund now amounts to $450,000.

The repayment on mortgages during the year were very satisfactory, and the funds of the society have been actively and profitably employed.

Owing to a recent enactment of the Dominion Parliament preventing judges acting as directors of a corporation, the directors have reluctantly been compelled to accept the resignation of His Honor Judge Snider, for some years a valued and active member of the board, and the directors have filled the vacancy thus caused by appointing Mr. Joseph J. Greene, managing director of the W. E. Sanford Mfg. Co., Limited, to the board.

All of which is respectfully submitted.

Alexander Turner, President.

Efforts, it is said, will be made soon to induce the Ontario Government to ask power from the Dominion Government to acquire trunk telephone lines in the Province on lines similar to those proposed by the Manitoba Government.

Not only is application to be made to the Alberta Legislature shortly for permission to build a railroad paralleling the Edmonton branch of the C.P.R. on the west side from Lethbridge to Edmonton, but rumors are heard of another railway, proposed to be constructed from Montana across the Crow's Nest branch of the C.P.R., near Grassy Lake, to parallel the latter on the east side.

A Montreal paper prints a cablegram to the effect that Senator Domville has been successful in the mission he undertook to England, and has been able to form a large and powerful syndicate for the construction of a new electrical railway to run from Montreal to Ottawa and thence to the Great Lakes. The new line, which is to be called the Canada Central, was known during its earliest inceptive stages as the Ottawa Valley road. It is intended that it shall be operated entirely by electricity.

THE CRAIN CONTINUOUS LEDGER

You may be planning to re-organize your book-keeping system; if so we offer you the ripe result of years of experience in designing Loose Leaf Systems of every kind, and will be glad to advise you. Call up any of our branch offices or agencies, or write us direct for further particulars.

Hamilton, 5th February, 1906.

I hereby certify that I have examined the securities and vouchers, and audited the books of the Hamilton Provident and Loan Society for the year ending 30th December, 1905, as kept in their Brandon office, and have found them correct.

H. L. Adolph, Auditor.

Brandon, Man., January 30th, 1906.

On motion of the president, seconded by the vice-president, the report was adopted.

The following gentlemen were re-elected directors:—Alexander Turner, George Rutherford, Hon. William Gibson, John T. Glassco, George Hope, Joseph J. Greene.

At a meeting of the directors, held after the annual meeting, Alexander Turner was re-elected president, and George Rutherford, vice-president.

* * *

AGRICULTURAL SAVINGS AND LOAN COMPANY.

The annual meeting of the shareholders of this company was held in London, Ont., on Thursday, February 15th, 1906, Mr. W. J. Reid, the president, in the chair.

The thirty-fourth annual report of the business of the company was submitted, as follows:—

Report.

The profits for the year (with $1,125.69 brought forward from last year) after providing for losses, expenses of management, and interest on deposits and debentures, amount to		$55,847 67

Which has been applied as follows:—

Half-yearly dividends at the rate of six per cent. per annum, with income tax, have been paid, amounting to	$38,349 28	
Carried to reserve fund	15,000 00	
Balance at credit of profit and loss account	2,498 39	
		$55,847 67

The directors have been enabled this year to again place the sum of fifteen thousand dollars to the reserve fund, which fund now amounts to over 42 per cent. of the paid-up capital.

The demand for loans during the year has been satisfactory, and the loaning funds of the company have been kept fully employed.

Payments of interest and principal have been well met.

The real estate held under power of sale at the end of the year amounted to $10,310.61, but property amounting to $10,000 has since been disposed of, and the loss on same will be very trifling.

The directors desire to express their regret that during the year, Mr. Thomas McCormick, vice-president of the company, and who for the past twenty-six years had been a highly esteemed and valued member of the board of directors, tendered his resignation. Major Beattie was appointed vice-president, and Mr. Thos. P. McCormick was appointed to the board to fill the vacancy.

The directors desire to acknowledge the services of our agents at Edinburgh, Scotland, Messrs. Forbes, Dallas & Co., to whose efforts the substantial increase in the company's sterling debentures is due.

The books, vouchers and securities of the company have received the usual careful audit by the company's auditors, as set forth in their certificate appended hereto.

All of which is respectfully submitted.

W. J. Reid, President.

London, January 30th, 1906.

C. P. Butler, Manager.

We hereby certify that we have audited the accounts of the Agricultural Savings and Loan Company, of London, Ontario, for the year ending December 31st, 1905, and find the same correct and in accordance with the above statements, and the company's books. We have examined the cash and bank accounts and vouchers monthly, and have carefully checked every entry in the company's ledgers, and we have examined the company's securities and find them in order.

Geo. F. Jewell, F.C.A.,
Andrew Dale,
Auditors.

London, Ontario, January 30th, 1906.

The president in moving the adoption of the report stated that the financial condition of the company was in every way in first-class shape. After paying dividends at the rate of six per cent., the sum of $15,000 had been added to the reserve fund, which now amounted to over 42 per cent. of the paid-up capital. He paid a high tribute to the auditors of the company, who were also auditors for the city of London. The directors had every confidence in these gentlemen, whose duties were performed in a very efficient manner. Their audit was a very complete one, and the shareholders might rest satisfied that their interests were in every way safeguarded.

The board of directors, consisting of Messrs. W. J. Reid, Major Thos. Beattie, T. H. Smallman, M. Masuret, T. P. McCormick, was re-elected. At a subsequent meeting Mr. W. J. Reid was elected president, and Major Thomas Beattie, vice-president.

LONDON LIFE INSURANCE COMPANY.

The following synopsis of the company's financial statement was inadvertently omitted from its report appearing on pages 1,166 and 1,167 of our last issue:

LONDON MUTUAL FIRE INSURANCE COMPANY OF CANADA.

The annual meeting of the above named company was held on Monday, February 19th, at the head office, 82-84 King Street East, Toronto, when the following report was submitted.

Report.

Your directors have pleasure in presenting the forty-sixth annual report and balance sheet of the company, for the year ending December 31st, 1905.

It will be seen that the assets stand at $828,528.27, showing an increase of $72,820.94, over the amount shown at the close of 1904.

The re-insurance reserve, amounting to $344.069.56, is calculated on the basis of the pro rata unearned premium of all policies in force December 31st, 1905, on both cash and mutual systems.

There were issued during the year (including renewals) 31,006 policies, covering insurance to the amount of $49,689 060.13. yielding a gross premium income of $794,893.13 and bringing the gross amount at risk on December 31st, 1905, to $82,557.806.

While the amount of unsettled losses appears large it is only fair to state that a large proportion of these occurred too late in the year to admit of adjustment before the 31st of December, but most of them have since been paid.

Owing to the retirement of Mr. Waddington your board appointed as his successor Mr. D. Weismiller, whose long experience in both field and office work with the company specially fitted him for the position.

Your directors are pleased to state that the office and agency staff have performed their duties ably and efficiently during the year.

All of which is respectfully submitted.

JOHN DRYDEN, President.

Income.

Balance forward from 1904		$123,999 72

—The Toronto branch of the Retail Merchants' Association of Canada held a meeting on the 1st inst., at which it was reported that that body now comprises nearly 1,500 members in the city of Toronto and nearly 10,000 throughout the Dominion. During the year, branch associations were organized in the Provinces of Quebec and Manitoba and in the North-West. Among the resolutions was one opposing the granting of a five year franchise to the Bell Telephone Company and heartily recommending that the trunk lines be expropriated by the Government.

The Ontario Accident Insurance Company

TENTH ANNUAL REPORT

The directors have pleasure in presenting to the shareholders the company's tenth annual report for the year ending December 31st, 1905, together with the balance sheet and revenue account, and the attention of all interested in the company's affairs is again directed to its continued satisfactory progress.

Report.

The net income from premiums, after deducting $5,475.80 for reinsurance, was $246,963.86.

The interest upon investments amounted to $2,270.09.

During the year the company paid under its policies 2,165 claims; the total, after deducting $3,249.50 received from reinsuring companies, amounted to $115,290.07.

The revenue account submitted herewith, after debiting all charges and expenses, shows a balance of $30,193.59. This has been applied as follows:—$5,500 to reserve fund, $20,000 to contingency account, $3,568.47 in payment of dividend No. 8, leaving $1,125.12 unappropriated.

The reserve fund has been increased to $61,000, and the contingency fund to $20,000.

The premium income shows an increase over that of 1904 of $28,555.

On September 18th, 1905, there passed away, deeply regretted, Larratt W. Smith, K.C., D.C.L. Dr. Smith was in his eighty-fifth year, and for ten years had been the company's esteemed president. The vacancy on the board thereby created was filled by the appointment of Mr. W. R. Brock.

All of which is respectfully submitted.

A. L. Eastmure, President.

Clarkson & Cross, Auditors.

Toronto, February 12th, 1906.

Proceedings of the Tenth Annual General Meeting.

The tenth annual general meeting of the shareholders was held at the company's offices, Nos. 61-65 Adelaide Street East, Toronto, on Monday, the 19th of February, 1906, at 12 o'clock noon.

The following shareholders were present:—W. H. Pearson, W. H. Cross, A. W. Thomas, A. L. Eastmure, G. H. Muntz, G. W. Monk, E. T. Lightbourn, J. F. Smith, F. J. Lightbourn, G. L. Smith, J. P. Steedman, (Hamilton), Dr. W. H. Oldright, and forty-eight shareholders represented by proxy.

The chair was occupied by the president, Mr. Arthur L. Eastmure, and Mr. F. J. Lightbourn, the secretary, acted as secretary of the meeting.

The notice calling the meeting having been read by the secretary; the president submitted the report, together with the financial statements, and said in part:—

President's Remarks.

Gentlemen,—In submitting for your approval the statements just read, I have pleasure in pointing out that the results for 1905 are well up to the standard of former years, and make a very satisfactory showing. The company has completed its first decade, we are ten years old, and it will be appreciated, I feel sure, from the figures presented today that the time has not been wasted.

As against an income from premiums in 1904 of $223,837.57, the new business and renewals reached the considerable sum of $252,390.57, round figures a quarter of a million dollars. During the year 2,165 persons received benefits under the company's policies, the payments aggregating $118,729.57, and it may be noted that the claims exceeded six daily for every working day of the year. All were satisfactorily adjusted and promptly paid.

The company's assets, which amounted at December 31st, 1904, to $119,829.01—an increase of $16,468.30 over 1903 have advanced to $137,654.68, a further gain of $17,654.67. Attention may also be directed to the continued growth of our reserve fund. Five years ago this had reached the sum of $21,000. It is now $61,000, and is set apart entirely from actual earnings, none of it being derived from premiums on stock or other sources.

Another gratifying feature is the substantial addition to the contingency fund. Created in 1898, and amounting at that time to $4,500, this fund stood at December 31st, 1904, at $10.000. It is now $20,000.

I beg to move, seconded by the vice-president; "That the tenth annual report, now submitted, be adopted, and that the same, together with the financial statements read therewith, be printed, and a copy thereof forwarded to each of the shareholders."

But before the motion is voted upon, I shall be happy to give any information or answer any questions relating to the company's affairs.

On motion, Messrs. Clarkson and Cross were reappointed auditors for the ensuing year.

Mr. A. W. Thomas and Mr. E. T. Lightbourn, having been appointed scrutineers, reported the following gentlemen elected as directors:—A. L. Eastmure, W. H. Pearson, J. Herbert Mason, J. N. Shenstone, W. R. Brock, F. J. Lightbourn, Thomas Fyshe (Montreal), J. F. Smith, K.C., and G. W. Monk.

After the customary votes of thanks to the president, vice-president, secretary, and officials in the office, the meeting adjourned.

At a meeting of the directors, held immediately after the annual meeting, Mr. Arthur L. Eastmure was elected president, and Mr. W. H. Pearson, vice-president of the company.

Executive Committee:—Messrs. A. L. Eastmure, W. H. Pearson, and J. F. Smith, K.C.

* * *

CROWN LIFE INSURANCE COMPANY.

Fifth Annual Statement

In submitting for the consideration of the shareholders their report of the company's operations for the year ending 31st December, 1905, your directors are pleased to be able to report such steady and substantial progress as must commend itself to shareholders and policyholders alike. The quality of the business has maintained the same high standard of excellence and value at which the management has aimed since the inception of the company.

During the year new applications for insurance aggregating $1,602,425 were received by the company. Of this amount policies for $1 301,925 were issued and taken, the balance, $300,500, being the amount declined, deferred and not taken. At the end of the year there were in force a total of 2,190 policies for $3,704,744 of insurance, representing a premium income of $147,633.13. The average amount of each policy is thus shown to be $1,685 and the average premium rate per thousand of insurance is nearly $40.

From premiums received during the year the company derived a cash income of $135,459.37, in addition to which the deferred and outstanding premiums at the end of the year amounted to $35,201.52.

The company's assets during 1905 increased by $93,000.16, and the total assets are now $258,084.80, as compared with $165,084.64 one year ago.

The continuance of great care in the selection of risks enables us to report a very small death loss for the past year, the net death claims amounting to only $15,500 under seven policies.

The company's liability to policyholders is now represented by a net reserve fund of $232,044 on the basis of the present Government standard of valuation (Hm. 3½ per cent.). Against this liability the total security to policyholders from all sources amounts to $620,435.60, as set forth in detail in the financial statement, which has been duly audited and which is submitted herewith.

The directors desire to express their appreciation of the faithful and efficient services rendered by the head office staff and by the company's managers and agents throughout Canada during the past year.

D. TISDALE,
President.

A. H. SELWYN MARKS,
Secretary.

DOMINION PERMANENT LOAN COMPANY.

Fifteenth Annual Report.

The fifteenth regular annual meeting of The Dominion Permanent Loan Company was held at the office of the company on Wednesday, March 7th, 1906. A large number of shareholders were present. The president, the Hon. J. R. Stratton, occupied the chair, Mr. F. M. Holland, manager, acting as secretary. The president presented the following report of the directors for the year ending December 31st, 1905:—

Your directors herewith submit the fifteenth annual report of The Dominion Permanent Loan Company, together with a statement of the accounts for the twelve months ending December 31st, 1905, duly certified to by the auditors, both as to the correctness of the accounts and the satisfactory result of their inspection of the securities of the company.

Your directors are pleased to state that active employment has been found for the funds of the company during the past year, the demand for satisfactory loans being amply sufficient to call into requisition the available funds of the company.

During the past year the company has declared and paid dividends amounting to $69,427.40, and has transferred $40,000.00 to the credit of the reserve fund of the company, beside paying such dividends and transferring the above mentioned amount to reserve fund, and writing off of office furniture and premises, $1,058.85, there remains to the credit of profit and loss for future distribution, $19,099.89.

All of which is respectfully submitted.

J. R. STRATTON, President.

We have examined the cash transactions, receipts and payments, affecting the accounts of the assets and investments for the year ended December 31st, 1905, and we find the same in good order and properly vouched. We have also examined the mortgages and securities, representing the assets and investments set out in the above account, and we certify that they were in possession and safe custody as on December 31st, 1905.

(Signed) HARRY VIGEON, F.C.A.
(Signed) T. N. STEVENS.

Toronto, February 14th, 1906.

Hon. Mr. Stratton, president, in moving the adoption of the report, said:—

In moving the adoption of the fifteenth annual report of The Dominion Permanent Loan Company, I have pleasure in submitting the statement of the directors, from the report of the general manager of the company, with the certificate of the auditors appointed by the shareholders.

This statement shows that the surplus of assets over liabilities, amounting to $1,453,429.42, is a substantial advance over that of the previous year, when the figures stood at $1,441,676.30, an increase of $11,753.12. The net income resulting from the operations of the year under consideration amounted to $205,068.08, and, with the balance of $13,546.25 brought forward from last year, makes a total of $218,614.33. After deducting from this amount the interest on deposits and debentures, writing $1,058.85 off office furniture, and payment of dividends, it will be seen that there remained a balance of $59,099.89, permitting of the transfer of $40,000 to reserve fund, making the total of this fund $200,000, and leaving $19,099.89 for further distribution.

With satisfactory demands for the funds of the company at profitable rates, with a gratifying strengthening of the reserve fund, and with the other encouraging features the statement suggests, there is no reason for doubting that the company will continue to share in the advantage incident to and arising from the great prosperity which promises to be a feature of a future of many years. Even in the short space of time from one annual meeting to another, we can all note the advanced position of prominence Canada assumes in the worlds of finance, industrial activities, commerce and general enterprise. Not only is our population being rapidly added to by a good and thrifty quantity of new subjects and not only is foreign capital coming to an increased, and increasing, recognition of this country as a profitable field of investment, but the energy and enterprise of our own people are putting on foot important enterprises which the resources of the country justify. The expenditure of such large amounts as will be required, and the resulting development of the natural resources of the country, the stimulus that will be given to the farming, and every other form of industry, will create conditions throughout the whole country favorable to the profitable operation of such an organization as The Dominion Permanent Loan Company, which can hardly avoid reaping its full share of the business benefits that will largely abound.

While in London, England, the late vice-president of the company, Mr. T. P. Coffee, died. He was more closely associated with the general manager in the management of the company than any other member of the board, which makes his death the more to be regretted. The vacancy has not yet been filled, and that is a matter that will require attention to-day.

I have pleasure in moving the adoption of the report.

Mr. D. W. Karn, in seconding the motion for the adoption of the report said: It gives me much pleasure to second the motion for the adoption of the report of the manager of the company. There are grounds for gratification in the plentiful employment to be found for the company's funds, in the dividends paid, in the substantial addition and satisfactory magnitude of the reserve fund, and in the very favorable conditions that prevail and promise to improve for future and prosperous operations. I have great pleasure in seconding the motion for the adoption of the report.

The report, after some complimentary remarks by several shareholders, was unanimously adopted.

The following directors were then elected:—Hon. J. R. Stratton, president Trusts and Guarantee Company, Limited; D. W. Karn, president of the D. W. Karn Company, Woodstock; C. Kloepfer, director Traders Bank of Canada; William Findlay, director Winnipeg Fire Insurance Company; George H. Cowan, K.C., Vancouver, B.C.

After the election of the auditors, Messrs. H. Vigeon and T. N. Stevens, the meeting adjourned.

At a subsequent meeting of the directors, Hon. J. R. Stratton was elected president, and Mr. D. W. Karn vice president.

FEDERAL LIFE ASSURANCE CO. OF CANADA.

24th Annual Report and Financial Statement for the Year Ending December 31st, 1905.

The twenty-fourth annual meeting of the shareholders was held at the head office of the company, at Hamilton, March 6th, Mr. David Dexter, president, in the chair, Mr. W. H. Davis, acting secretary, when the following report was submitted:—

Directors' Report.

Your directors have the honor to present the report and fianancial statement of the company for the year which closed on the 31st December, 1905, duly vouched for by the auditors.

The new business of the year consisted of two thousand four hundred and fifteen applications for insurance aggregating $3,532,579, of which two thousand three hundred and twenty-eight applications for $3,329,537.08 were accepted.

As in previous years, the income of the company shows a gratifying increase, and the assets of the company have been increased by $275,140.56, and have now reached $2,423,913.93, exclusive of guarantee capital.

The security for policyholders, including guarantee capital, amounted at the close of the year to $3,293,913.93, and the liabilities for reserves and all outstanding claims, $2,213,698.75, showing a surplus of $1,080,215.18. Exclusive of uncalled guarantee capital, the surplus to policyholders was $210,215.28.

Policies on seventy-eight lives became claims through death, to the amount of $156,886.00, of which $8,911 was reinsured in other companies.

Including cash dividends and dividends applied to the reduction of premiums, with annuities, the total payment to policyholders amounted to $236,425.35.

Careful attention has been given to the investment of the company's funds in first-class bonds, mortgage securities and loans on the company's policies, amply secured by reserves. Our investments have yielded a very satisfactory rate of interest.

Expenses have been confined to a reasonable limit, consistent with due efforts for new business.

The results of the year indicate a most gratifying progress. Compared with the preceding year, the figures submitted by the directors for your approval show an advance of nearly thirteen per cent. in assets.

The assurances carried by the company now amount to $17,294,136.11, upon which the company holds reserves to the full amount required by law, and, in addition thereto, a considerable surplus.

The field officers and agents of the company are intelligent and loyal, and are entitled to much credit for their able representation of the company's interests. The members of the office staff have also proved faithful to the company's service.

Your directors are pleased to be able to state that the business of the company for the past two months of the current year has been better than in the corresponding months of last year, and that the outlook for the future is most encouraging.

DAVID DEXTER, President and Managing Director.

FINANCIAL STATEMENT FOR 1905.

Receipts.

Premium and annuity income ....$	583,279 73	
Interest, rents and profit on sales of securities	121,197 07

Policies were issued assuring...	$3,329,537 08	
Total insurance in force	$17,294,136 11	

Mr. David Dexter, president and managing director, in moving the adoption of the report, said:—I beg leave to submit for your consideration and adoption the report of the company for the year ending 31st December, 1905. In doing so I am pleased to say that it is the most satisfactory your directors have had the privilege of placing before you. As compared with the preceding year it shows a gain of seven per cent. in premium income, thirteen per cent. in interest earned, twelve per cent. in total income, ten per cent. ($319,038) in amount of new assurances placed, 7 per cent. in amount of assurances in force, 12 per cent. in assets, 14 per cent. in reserves held to provide for the payment of policy contracts now in force, and 43 per cent. in the surplus over all liabilities.

The profits paid to policyholders also show an increase of 16 per cent. and the payments made to policyholders 18 per cent. in excess of the previous year.

The reserves now held to meet assurance obligations as they mature are in excess of the present requirements of the Insurance Act, additions being made from year to year to meet the higher standard of reserves on assurances written prior to the year 1900, which the Act requires that we shall hold at the expiration of a term of years. All policies of assurance written since the year 1899 and many previous thereto are secured by reserves on 3½ per cent. and 3 per cent. basis.

The profits to the policyholders have been maintained in so far as it was possible to do so in the face of the inroads thereon from various sources, which may be summarized as follows: The increased cost of new business owing to the methods adopted by competitors, particularly some of the American companies; the fees and taxes charged and levied by Provincial Governments; the greater privileges and advantages granted to the policyholder under the modern policy contract.

I would here remark in explanation of the last item that these additional privileges and benefits are increased privileges of travel, residence, occupation and continuance of policy, the same becoming non-forfeitable after three years, until the reserve thereon is exhausted in payment of premiums. It will be readily understood that some of the causes which I have mentioned have tended to increase the cost of assurance, and others to impair the sources from which profits formerly accrued.

The shareholders who provided the paid-up and additional guarantee capital for security to policyholders when such a provision was necessary have in no way encroached upon the profits to policyholders, but have much less in return for their cash investment than the average rate of interest earned by the company on investments.

Your directors have always endeavored to the best of their ability to select safe as well as profitable investments for the funds entrusted to their care and the securities held will bear the most rigid inspection.

Your directors decided to erect a first-class office building on the very desirable site owned by the company and situated on the north-west corner of James and Main Streets, to meet the company's requirements. Competitive plans were obtained for a steel frame fireproof building of eight storeys. Tenders were received and a contract let for the construction of such a building, to be completed in August next. We are confident that the building will prove to be a satisfactory investment, affording a reasonable return in office rentals as well as desirable offices for the headquarters of the company.

Lieut.-Col. Kerns seconded the motion, which was unanimously carried. The retiring directors were re-elected, and at a subsequent meeting of the directors Mr. David Dexter was re-elected president and managing director. Lieut.-Col. Kerns and Rev. Dr. Potts were re-elected vice-presidents.

* * *

OUR SAINT JOHN LETTER.

There is a great interest throughout New Brunswick in the reported offer of a syndicate to lease the Central Railway, running from Chipman in Queens County to Norton on the Intercolonial. This province controls the road and the offer is for a 999 year lease at $21,000 per year, the company giving a guarantee to push vigorously the development of the coal fields about Chipman. There is much difference of opinion as to accepting this offer. In the first place there is no general knowledge who makes it, other than that it comes through Greenshields & Greenshields, the Montreal lawyers. It can be said without fear of general contradiction that the people of the province did not regard with favor the investment of large sums of the public money in this road. Now, however, they do not want to see it sacrificed without a full understanding of all the conditions. By many it is believed the Grand Trunk Pacific will want the road as a means of reaching St. John from the main line which will cross the province near Chipman. If the Grand Trunk wants it the people would rather see it sold or leased direct than that any company or group of capitalists should make money out of the deal. Of course there are numbers who favor the province getting rid of it on any terms, but the general view is for a full understanding who the buyers are before any deal is closed. The matter is likely to occasion much discussion in the legislature.

The city of St John has something of a civic scandal on hand at the present time. The city is spending $150,000 in building a wharf for deep water steamers. The inspector on the work went before a civic committee a few days ago and declared that at the dictation of the engineer he had been making false returns, and that he had permitted the contractor to do things not allowed by the specifications. He produced a private record book which he declared told the truth about the wharf. The engineer, the contractor, and the director of public works all denied that there had been departures from the specifications, except such as are ordinarily found necessary in the progress of any work and they demanded a full inspection of the wharf. The next day the director dismissed the inspector and put on a new one. The whole matter is to be investigated. What that will disclose remains to be seen. The engineer has been an official of the city for over forty years and the public generally do not credit reports that he has been a party to any wrong-doing. An interesting feature of the case is the fact that the inspector who makes the charges and admits his own wrong-doing is a brother of the man who was the unsuccessful tenderer for the work.

Another sensation in St. John at the moment is a dispute between F. A. Barbour, the Boston engineer who was employed to instal the new water system, and William Murdock, head of the water system for the city. Engineer Barbour says, when the new supply is turned on the pressure will be too great, and he wants to put reducing valves on the low level service. Engineer Murdock declares Engineer Barbour's plan is "unscientific, extravagant and ridiculous" and favors using the new supply for the high levels only and continuing the old service to the low levels. The insurance underwriters are demanding that Engineer Barbour's plans be carried out and the city fathers are in a quandary. The new service is to cost nearly half a million and the public would hardly have favored it except on the understanding that it was to give a gravity service to the whole city.

A delegation representing the St. John city council and Board of Trade is now at Ottawa talking with the Government with the idea of seeing what can be done to forward the idea of the Transportation Commission looking to the nationalization of the port of St. John. This winter's business through St. John will exceed all records. In fact, with two months yet to run the value of the business done already equals the total of the trade of last year. To provide for the future is a bigger task than St. John can undertake, but the people are ready and willing for nationalization and are prepared to consider any proposition the Government may make on the subject.

Some recent snow storms have greatly improved the outlook for the lumbermen in the southern section of New Brunswick, but an outbreak of smallpox in some of the camps may prove an even greater disaster than the lack of snow.

The Fredericton Boom Company sought legislation at Fredericton for permission to increase its rates. The lumbermen organized a vigorous lobby against the bill and succeeded in having it killed. They charged that the company was not well managed and was seeking to collect exorbitant rates to make up its deficits.

* * *

St. John, N.B., 6th March.

* * *

MUTUAL LIFE ASSURANCE COMPANY OF CANADA.

Among the sensible things said by the president of this company at its last annual meeting was this, with respect to the attitude of that company towards doing business at the ends of the earth: "We are more strongly of the opinion now than ever before that good Canadian business is vastly preferable to foreign, and that it can be secured at much less cost. The recent investigation in New York disclosed sufficient evidence of this and one of the reforms now being introduced is the discontinuance of such business in many countries. We are gratified at the amount of business that our agents were able to secure in spite of public criticism of life insurance, etc." The speaker went on to say that the unusual amount of assurance gained was an evidence of confidence of the Canadian insuring public in his company, and in this he was probably quite right. Nor do we doubt that Canadians generally have confidence in their long-established and tried life companies. If there are some who have been frightened by recent pamphlets or newspaper sensations they may perhaps be quieted when the Insurance Commission now appointed makes its report to Government. Mr. Melvin acknowledges that the expense of conducting life assurance is too high—though it is only fair to say that the Mutual Life of Canada shows a good example to others in this respect, seeing that its ratio of expense is the lowest on the list. He is bitter against that greatest abuse—rebating premiums, and no wonder.

The directors' report exhibits an active condition of the company's transactions. There is an increase of new insurance over the preceding year, also of total in force, of premium income and total income, in assets and in surplus. The surplus by the company's own valuation standard is $952,000 as against $772,000 in 1904, and by the Government standard it is $1,263,000. Payments to policy-holders were $552,914, which is a larger sum than last year. The distribution of surplus to them amounts to $87,927. Death claims were again light, being only some forty per cent. of the expectation. Much attention was devoted in the addresses of both the president and the vice-president to the assets of the company, their nature and the method of their handling. That much care is exercised of them is evident. The conservative attitude of the management with regard to investing in speculative securities is to be commended; it is their belief that buying and selling stocks or bonds in the hope of making a profit on them is outside the functions of a life company. Some clever people in other companies may think this a blue-mouldy belief, but they might probably be surprised to find how many sensible folk adhere to it.

LONDON MUTUAL FIRE INSURANCE COMPANY.

In the table attached to its report entitled "Six Years' Record," the London Mutual is able to show total assets almost doubled during that period. Their amount is $828,528, at the close of 1905, a gain of $72,820 over the close of 1904. These assets consist of $114,873 in cash; $216,835 in mortgage loans, debentures and bonds owned; $22,852 in agents' balances; $43,353 in assessments levied; $1,972 of interest accrued. The sum of these is $402,008. Besides there is $404,300 the unassessed portion of premium notes and $22,220 in office premises and furniture.

The new and renewal policies issued during the last twelve months numbered 34,006, covering insurance to the amount of $49,689,000, making the total at risk at the close of the year $82,557,000. This is a very considerable increase in both new business and whole amount at risk, and shows that the company has an excellent standing in the country. It stands third among Canadian companies in respect of amount of policies. Taking its cash assets and premium notes it shows a surplus of $419,090 over re-insurance and all liabilities, including the small amount of capital stock $17,500. The losses of the year absorbed 66.237 of the net premiums and expenses 26.594 per cent., leaving a margin of 7.17 to the good; or including interest income, 9½ per cent. Considering the company's heavy loss in 1904 its members should be well satisfied with the present showing.

* * *

ONTARIO ACCIDENT INSURANCE COMPANY.

A very considerable variety of business is transacted by this company, which, having its head offices in Toronto, has established branch offices or general agencies in Montreal, Halifax, St. John, Charlottetown, Winnipeg, Calgary, and at several points in British Columbia. Its report for 1905 exhibits an increase of nearly $30,000 in net premium income, and payments of $115,000 for claims, an increase of some $10,000. The reserve fund, which was $55,500 a year ago, is $61,000 now, all derived from earnings, while the contingent fund is made $20,000 instead of $10,000. Invested funds are $49,324; cash on hand or on deposit, $40,500; agents' balances, $45,400. The surplus shown this year is $30,193.

The company's tenth year has now been passed, and its total insurance is $16,742,000 under 9,273 policies, showing a steady increase over 1904, as that year was larger than 1903. According to the president's address, benefits have accrued from the forming of the Accident Underwriters' Association of Canada, one being more satisfactory rates of premium. And good results are looked for from the collection of data concerning insurance against sickness disability. A paragraph is devoted to the insurance of personal property against damage—a novelty which must attract attention and may result in profit. Mr. Eastmure declares his antagonism to what are called "liberalized policies" in the casualty field, declaring some of their features wrong in principle and unsound. An admirable paragraph summarizes the relations of the late president, Dr. Larratt Smith to the company, and his prominent standing in the community.

* * *

CROWN LIFE INSURANCE COMPANY.

An increase in new business and an increase of total in force are among the features of the business of this company in 1905. The amount written was $1,301,925, ($300,000 declined or deferred) and the total amount at risk increased from $2,985,200 to $3,704,744. The high average premium indicates a continuance of the large proportion of endowment assurance written, for it is nearly $40 per thousand. Cash income is increased from $109,917 a year ago to $135,459 in 1905, and the assets which were $165,000 in the preceding year are $258,000 now. Death losses were small, being less than $16,000. An increase is made in capital stock paid in of $23,236, besides a premium on stock of $6,-

025. This, the president considers, will enable the management to increase the company's business still further. The company has cash assets of $208,992, besides $49,102 in agents' advances, net outstanding and deferred premiums, etc.

The president referred to the appointment of a royal commission to investigate life insurance companies doing business in Canada, and invited its most careful investigation and scrutiny. He further announced the appointment of Mr. Charles Hughes, A.A.S., to the position of managing-director and actuary of the company, Mr. A. H. Selwyn Marks being made secretary and treasurer, Mr. William Wallace being continued in the position of superintendent of agencies. Mr. Hughes, who is an Englishman, and brother of the former secretary, has been for the past four years actuary and chief examiner of the Insurance Department of the State of Connecticut. This is of itself a recommendation.

* * *

FEDERAL LIFE ASSURANCE COMPANY.

The statement of this company manifests a condition of affairs that ought to be gratifying; in fact, the president says it is the most satisfactory the management has ever issued. Increases are to be perceived everywhere; we do not stay to particularize them, seeing that the percentages are all set out in the report. But we do remark the growth in surplus on policy-holders' account, which is from $185,000 a year ago to $210,000 now. The assets have been valued at rates more stringent than is required by Government. Like his confrere and neighbor, the president of the Mutual Life, at Waterloo, Mr. Dexter in his presidential address makes particular mention of some sources of increased cost of business to the companies.

Says Mr. Dexter: "Profits to policy-holders have been maintained in so far as it was possible to do so in the face of the inroads thereon from various sources, which may be summarized as follows: The increased cost of new business owing to the methods adopted by competitors, particularly some of the American companies; the fees and taxes charged and levied by Provincial Governments; the greater privileges and advantages granted to the policy-holder under the modern policy contract." Among these additional privileges and benefits are increased privileges of travel, residence, occupation and continuance of policy, the same becoming non-forfeitable after three years, until the reserve thereon is exhausted in payment of premiums. And he lays stress on the consideration that some of these causes have tended to increase the cost of assurance, and others to impair the sources from which profits formerly accrued. Can it be that there is an awakening in this "wonderful year?" Wonderful, that is, in the sense of witnessing a greater curiosity among the people on the subject of life assurance cost, and possibly also a greater heart-searching than usual by those whose duty it is to make all they prudently can for their policy-holders. It does seem as if life managers, like some of the more prudent and independent bankers of Canada, are beginning to look a little less carelessly after the "minor profits."

* * *

DOMINION PERMANENT LOAN COMPANY.

The fifteenth annual report states that the funds of this company have been actively employed during the year last past. Out of net earnings has been paid a dividend of six per cent., $40,000 has been put to reserve, a small sum written off premises and furniture, and a larger sum than twelve months ago remains at credit of profit and loss. Of the total assets, amounting to $3,269,000, there is $91,000 in cash, $42,000 in real estate, $3,115,000 in mortgages and other investments not particularized. A paragraph of the president's address is devoted to the growth and development of Canada, her advanced position in the realms of finance and industry, her increasing population; and the confident hope is expressed that the Dominion Permanent Loan Company will benefit through these.

HUDSON BAY COMMERCIAL ACCESS.

One Feature of Proposed Commercial Access with Hudson Bay.

As stated in The Monetary Times' Hudson Bay Commercial Access Series, Circular No. 1, the prospective railway constructors stipulate for a land grant of 12 sections to the mile for 250 miles, in consideration of which, 200 miles of waterway is to be brought into use, to make up a combined commercial transit route of about 450 miles from Ontario's lake frontage north-easterly to its salt sea shore besides rendering some 400 miles more of the Albany River westward from the railway terminus also accessible.

There are those who will look upon a donation of nearly two millions of acres of land as so much taken from Provincial resources, not considering the twenty millions of acres of adjacent area which are going to waste, or rather remaining useless and an incubus upon Provincial progress, which will probably be largely quadrupled in market or industrial values, for revenue or settlement.

The Monetary Times considers that a mixed ownership of such wilderness property is a public benefit of the first magnitude.

Ontario's total area, as reported in the latest official statistics, is 140,516,000 acres, of which up to 1903, only 24,019,235 acres had become "settled," i.e., improved under private ownership—and this after nearly 150 years of possession under an organized government.

With more than 100 million acres of unoccupied lands, the accessibility of 20 per cent. of the same being attained by a commission of two per cent. is a good financial operation, and more desirable in the public interest than to retain the whole.

This position can be fortified by elaborate arguments but one pre-eminent contrast only will be cited.

The United States has, during the last century, from being one of the poorest of nations, so advanced as to now lead the world as the richest, and the secret is mainly in its land policy of changing public holding of its lands into private ownerships, especially in bonuses to new railway lines. Russia, with a far larger country, has pursued the opposite course, and is to-day at the foot of the list of nations in credit and resources per capita.

* * *

MORTGAGE COMPANIES ASSOCIATION OF ONTARIO.

The nineteenth annual meeting of The Land Mortgage Companies' Association of Ontario was held in the board room of the Canada Permanent Mortgage Corporation in Toronto on Thursday, March 8th. The president, Mr. J. Herbert Mason, being out of the city, the chair was occupied by the first vice-president, Mr. W. F. Bullen, of London.

There were present representatives from London, Hamilton, Brantford, Stratford, Guelph, Port Hope, Lindsay, St. Catharines, in addition to the Toronto members. The report of the executive committee, which was unanimously adopted, referred to the legislation affecting the interests of the members of the association which had been under consideration during the past year, and reported the membership to consist of twenty-six companies, having total assets of $93,115,998.

Mr. Mason, who was one of the founders of the association, and has been its president since it was organized in 1887, having declined to stand for re-election; the first vice-president, Mr. W. F. Bullen, of London, was elected to the presidency. The other officers and the executive committee for 1906 are: First vice-president, V. B. Wadsworth, Toronto; second vice-president, Hon. George A. Cox, Toronto; secretary-treasurer, George H. Smith, Toronto; executive committee: Walter Gillespie, R. S. Hudson, Edward Saunders, Toronto; C. W. Cartwright, C. Ferrie, Hamilton; William Buckingham, Stratford; J. H. Helm, Port Hope; J. W. Stewart, St. Thomas, and George A. Somerville, London.

* * *

BANKING AND FINANCIAL.

We are advised by the head office of the Royal Bank of Canada that a branch of that bank will be opened on Granville Street, Vancouver, British Columbia, on the 3rd March.

Although La Banque Provinciale is asking Parliament for power to increase its capital to $5,000,000, it is said to be not the intention to bring its capital beyond $2,000,000 for the present. Permission is also being obtained to make the name of the bank legal, both in English as well as in French. For instance, the bank will be known in Toronto, Winnipeg and other English centres, where branches are to be established, as the Provincial Bank, and the cheques and other documents can be printed in English and still retain their legal status. Mr. G. M. Bosworth, vice-president of the C.P.R., will, it is said, be one of the additional English-speaking directors.

A few weeks ago, an address prepared by R. D. McGibbon, K.C., as the first of a series of lectures, organized with a view of giving to young bankers a knowledge of the theoretical working of the Banking Act, was read, in the absence of the author before a gathering of bank clerks and others in Karn Hall, Montreal. Mr. F. H. Mathewson was in the chair. Mr. McGibbon dwelt upon the dignity and importance of banking. The banker deals with countless problems. He must keep track of the political constitutions and tendencies of his own and of foreign countries as well, for upon the issues of peace and war depend the fluctuations of the money market. The success or failure of crops, both at home and abroad, are matters of deep interest to him, and the opening up of new territories challenges his spirit of enterprise. The ambition of ardent optimists must be restrained and kept within bounds by his influence, and on the other hand the hopes of timid or desponding customers require to be stimulated and their confidence and courage restored. . . . An infinite variety of transactions comes before a city banker in the course of a day's work—deposits, discounts, loans on collateral of shares, stocks, bonds, bills of lading, warehouse receipts and securities under section 74 of the Bank Act, dealing in foreign exchange and numberless other items form a panorama of sufficient interest. Of course, the Canadian banker is restricted in his operations to the objects and purposes set forth in the Bank Act, and it becomes of the greatest importance to know exactly what things he may lawfully do, what things he is forbidden to do, and with respect to the former class, how they are to be done."

* * *

ANSWERS TO ENQUIRERS.

H.D.E., Montreal.—The case is a difficult one. Something radical will have to be done with that young man; city life is evidently too much for him. Could he not be sent to sea, or got into the North West Mounted Police. Such places as you describe him to frequent are ruinous to anybody—young or old. We recall that some two years ago a circular to the following effect was sent out by the Equitable Life Society of New York to its employees: Dear Sir.—For reasons that seem proper to the officials of this society, you are hereby notified that your presence on a race-track, in a pool room, or if you are in future seen in company with persons whose business it is to place bets on horse races, it will be counted as sufficient excuse to request your resignation from the affairs of the society.

Fire Agent, St. John.—I think it was in your paper that I saw, six months ago, a list of Canadian fire departments, their equipment, manning, cost, etc. Can you tell me just when it appeared. What I want to know is the particulars about Montreal."

[It was more like a year ago—10th March, 1905. The cities compared were Montreal, Toronto, Ottawa, Quebec, Winnipeg, Hamilton, Halifax, London and Vancouver. What was said about Montreal was this: "Cost of brigade, $222,537; fire alarm, $20,026; 231 men, 117 horses, 17 stations; cost per head, 87¾ cents; per $1,000 assessment, $1.27. Population 278,695. The information was derived from the "Journal of the Union of Canadian Municipalities."—Ed.]

* * *

HIS EARNESTNESS EVAPORATED.

It is some weeks since a commercial house in Montreal received an application from a well-appearing stranger who wanted employment. He spoke well and, as this item will show, wrote well, professing the most extreme desire for work, and offering anything and everything, so to speak, for a chance to show what he could do. He was given this chance—and the story tells what happened. Here is his letter of application:

Montreal, Canada, January 28th, 1906.

Dear Sir: I herewith respectfully and earnestly make application for any vacancy or opportunity, within the local office of your establishment.

With regard to my abilities, I desire to say that I believe myself to be a capable amanuensis, a good correspondent, and without any needless self-recommendation, add that I could perform any task or duty, which called for a fair amount of tact and diplomacy, good common-sense and hard work.

As regards energy, I have wandered along the purling paths of pleasure long enough to know that by clock-watching one "Arrives at the House of Never."

I would appreciate an outlet for my time, energy, abilities and ambition. If you deem it advisable to give me an opening, I shall endeavor to mark the episode so firmly in your memory, that you will ever look back to it with pleasure. I am an exponent of Elbert Hubbard's five necessary requisites for an all-round man, and shall throw them into my work with all my heart and soul, whether that work be dictating letters or driving a cab. The requisites in question are: Ambition, Application, Aspiration, Respiration and Perspiration.

Trusting that you will give this letter and its motive your consideration, I remain,

Very respectfully,

COURTNEY LOVE.

The firm which sends us this letter adds: "This epistolary curiosity in the way of an application for a job, brought about a curious result. The desire of the writer for work was apparently so intense that he was given a chance as he desired, but alas! the expectations of securing a treasure were doomed to disappointment. The energy, ambition, etc., were all exhausted in one day, after which the disciple of Elbert Hubbard was seen no more—the man simply disappeared without explanation, or even an application for wages.

* * *

—The 20 per cent. ad valorem duty imposed on zinc by the United States Government comes at an unfortunate time for the Province of British Columbia, which was just taking rapid strides in opening up several zinc properties. A few small shipments have, it is true, been made to Europe, but the bulk of the output has so far been sent to the United States, last year the quantity so disposed of being in the neighborhood of 12,000 tons. It will now be in order for our western zinc mining friends to find another and a more permanent market.

ONT WIND ENGINE & PUMP CO. LIMITED.

TORONTO, ONT.

Cayuga, Ont, ratepayers have voted in favor of raising $5,000 to purchase fifty acres of land for the Pittsburgh Window Glass Machine Company who purpose putting up a factory there.

The shipments of ore from Rossland, B.C., last week were as follows: Centre Star, 3,789 tons; Le Roi, 3,000 tons; Le Roi No. 2, 300 tons; Le Roi No. 2 (crushed), 1,200 tons; Jumbo, 300 tons; total for week, 8,580 tons; for the year up to date, 52,155 tons. At Le Roi No. 2 some new and important ore bodies have been discovered lately, so it is quite likely that the output of this mine will be materially increased.

Mercantile Summary.

The Ontario Power Company has at length succeeded in locating its line through the Blackheath section of country by way of Binbrook and Seneca. It is expected that the transmission line will be followed by a trolley.

H. Bercovitch & Co., a retail clothing concern, in Montreal, is trying to compromise liabilities of some $4,000 at 30 cents on the dollar. Bercovitch was unsuccessful on a former occasion, and has latterly been doing business in a daughter's name.

An offer of compromise at the rate of 20 cents on the dollar is made by John Bell & Sons, doing a small grocery and provision trade with the miners at Sydney Mines, N.S. The senior himself worked in the mines, but is reported to have recently left for Scotland, whence he originally came. Liabilities are stated at about $2,000.

James J. Hill interests are said to be at work at Neepawa, Man. Survey lines were recently run leading to Brandon and to St. John, N. Dak., and an American syndicate is said to be negotiating for the flour mills of the Manitoba Milling Company there. It is believed that the Great Northern Railway Company is at the back of both.

We hear from Winnipeg that the Hudson Bay Company have decided on a change in the land policy under which in future only half of any land will be disposed of. Where the company own a section half will be reserved for increment consequent upon settlement. The price has been advanced 50 per cent., making the average quotation $9 per acre, with all tracts within ten miles of the railway running at $10 per acre.

It is stated that estimates are being prepared by the Grand Trunk as to the cost of installing a telephone system on the company's lines, and that the work of placing such a system in service is likely to commence early this summer. Wires will be stretched from Portland to Montreal, Toronto, London, Port Huron, Detroit, Hamilton, Suspension Bridge, North Bay, Chicago, and intermediate points. A copper metallic wire will be used, and it is figured that the scheme will easily reach $150,000, but the expense after the service is once installed will not be large, compared with the cost of the present telegraph service.

WANTED.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Shedden Forwarding Company, Limited, has been empowered to increase its capital stock from $700,000 to $1,500,000, and also to manufacture carriages, motors, waggons, lease elevators, build grain-storage warehouses, etc.

For some sixteen years J. A. Raizenne has been engaged in a moderate store trade at St. Eugene, Ont., near the Quebec line, and for a time apparently did fairly. Latterly he has been reported inattentive and slow pay, and now he has assigned to A. Lamarche, accountant, Montreal. Liabilities are about $4,000.

Consent to assign has been filed by the Empire Shoe Co., of Montreal, a special partnership, composed of J. N. Tessier and M. Larue, the latter as a limited partner contributing $5,000. Their business is of a jobbing character, and they are reported to owe some $60,000, largely to Quebec manufacturers.

Last month a fire destroyed the sawmill of B. R. Clark at Mount Pleasant, N.B. He had no insurance and cannot pay his debts. He has been obliged to assign to W. A. Hayward.—A. L. Stickney, for some fifteen years in the general store business at Stickney, N.B., has assigned to J. R. Tomkins. In 1896 he suspended and arranged a compromise, and again failed in 1902, since which date he has made use of his wife's name. It might be well for him now to take a rest.

A contractor named Olaf Johnston is sinking a shaft for coal in the northern part of Edmonton, within the limits of that city. According to the "Bulletin," the men behind the undertaking are Horne and Osborne, two English coal miners, who believe that there is a fortune to be made in mining coal close to the market. They purchased the land outright at $500 an acre, and tested with a drill for coal. Their tests showed two seams, one at 160 feet and the other at 320 feet. It is their intention to sink to the second seam, at the 320 level. The shaft, which is 9 x 12, is three compartment, is already down twenty feet.

The new passenger rates which will go into effect on the Intercolonial on March 1st are as follows, says the "Gazette": From one mile to 200 miles, 3 cents per mile; previously the 3-cent rate was only up to 100 miles and from 101 miles upwards on a graduated scale. From 201 to 300 miles the new rate will be 2 7-10 cents per mile; from 301 to 400 miles, 2 5-10 cents; from 401 to 600 miles, 2 4-10 cents; from 601 miles to 800 miles, 2 2-10 cents; from 801 to 1,000 miles, 2 cents. For commercial travellers the rate will be 2¼ cents instead of 2 cents, as now, and the 1,000-mile ticket is also advanced from 2 cents to 2¼ cents per mile. Scholars' tickets will remain as at present. Season tickets are abolished, and the following substituted: Ten ride tickets at 2 cents per mile, 50 ride tickets at 1½ cents per mile.

Mercantile Summary.

The British Columbia Electric Railway Company is being petitioned to construct a new line from Sapperton to Port Moody.

A Quebec hotelkeeper, L. V. Dion, of late operating the old "St. Louis Hotel," and who was reported last summer as obtaining an extension, is now offering his creditors 20 cents on the dollar. He is said to owe $24,000.

The business of Fogarty & Brother, who have for years been carrying on a boot, shoe and rubber business in Montreal, will be taken over by a joint stock company, which recently acquired a charter from the Dominion Government under the name of the Fogarty Company, Limited, with a capital stock of $126,500.

In July last J. W. L. Forget started storekeeping in a small way at Carillon, Que., with a stated capital of $700, saved while employed in the office of the S. Carsley Co., department store proprietors. He is apparently lacking in the qualities of a successful trader, and has already assigned, owing about $1,600.

The Canadian North-West Coal Company, Limited, Winnipeg, has been incorporated. It intends to search for, work and deal in coal and other minerals, make gas, manufacture and sell machinery, construct electric roads, etc. The capital stock authorized is $1,000,000. Hon. Robert Watson, of Portage la Prairie, and E. B. Nixon, of Winnipeg, are in the concern.

Since the autumn of 1903 L. Marcoux, of Weedon, Que., has been in a moderate general store way. He was a farmer, and, realizing about $1,000 from the sale of his farm, embarked in trade without any experience thereof. His affairs are now in the hands of J. P. Royer, accountant, at Sherbrooke, and he is proposing to pay 50 cents on his liabilities, which amount to about $2,500.

A Washington despatch of Friday last states that exports of leather and leather manufactures from the United States during 1905 were the largest on record. This appears in a bulletin issued by the Bureau of Statistics of the Department of Commerce and Labor. These exports were valued at $38,946,422, against $35,824,492 in 1904. Total imports of leather and leather manufactures during 1905 aggregated $12,952,519.

According to the London "Mail," the city of London comes out badly in comparison with the great northern and Midland boroughs. The estimated "municipal trading" balance sheet of the county council for the coming year reveals a loss of about £63,000. The Thames steamboats are largely accountable for this. Much of the housing policy of the county council has been, to say the least, unfortunate. The total loss for the past year on the building schemes of the council is given at £14,566.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain additional security of $300,000 and what is of greater importance, are assured of careful and conservative management as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a voice in the management of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet possesses the advantages of both.

Mercantile Summary

The Chambre de Commerce, Montreal, is completing its arrangements for the erection of a new building at an expenditure of $80,000 to $100,000. A hearty welcome will be accorded to English-speaking business men who become identified with the organization.

A syndicate of United States grain men, headed by Isaac Pitblado, is said to have made an offer for the sixty odd seats which still remain unsold on the Winnipeg Grain and Produce Exchange. This is an illustration of the steadily growing prominence of the Exchange in the eyes of the American grain trade.

A man with the remarkable name of Polycarp L. G. Vezina, a manufacturer of and dealer in furniture, St. Jerome, Que., is reported to be in trouble, and a meeting of his creditors has been called. He has been in business since 1884, but has never been a methodical manager, and his affairs called for some straightening out in 1895. They appear to have gone crooked again.
